PLANS and Speculations

California needs more coastal harbors and inland waterway marinas for fiishing and recreation, the state reconstruction and reemployment commission reported this week.

oOo

Antioch city council has ordered formation of an assessment district in a move to get funds for improvements. Provided would be water and sewer mains, street paving, curbs and gutters.

oOo

The San Mateo County fair commission reportedly will buy 25 acres of Bay Meadows Aviation Corp. land on Bell Street, at a price of $1,000 an acre.

oOo

Santa Cruz supervisors have approved a resolution for an expenditure of $2,000 for an investigation of the county underwater supply in the Pajaro Valley.

oOo

Pittsburg unified school district trustees are considering acquisition of surplus barracks for conversion to classroom units.

oOo

Engineering and traffic studies on widening of U. S. 101 through Salinas have been started.

oOo

A $300,000 fund has been allocated for grading and paving of two extra lanes between the toll plaza and the distribution structure at the Oakland end of the Bay Bridge.

#

'Relax Union Rules To Allow Greater Apprentice Training'

WASHINGTON.—A shortage of skilled building trades workers will delay several billion dollars of construction this year unless at least 200,000 young men start training as apprentices within the next few months, James R. Edmunds, Jr., president of the American Institute of Architects, stated yesterday.

"Production of materials soon will soon cutstrip the number of skilled building trades workers available to assemble them into buildings unless apprentice training is expanded sharply," Edmunds said.

Need Apparent

"The building industry and the federal government seem to be doing everything possible to prevent the shortage, but certain labor organizations are not. Until some of the building trades unions decide to admit more apprentices into their ranks and until they shorten the apprenticeship period so as to make employment more attractive to veterans and others, it will be difficult to overcome the impending shortage.

"The average output per building site worker undoubtedly will improve as the supply of materials becomes greater, but the return to pre-war efficiency on the part of workers ow engaged in construction will not be sufficient to permit the $20 billion of building estimated for this year. The brick and tile trade alone needs 55,000 more skilled workers than are available at the present time, and thousands more are needed in other lines to meet 1947 construction goals.

Shortages Costly

"After 18 months of reduced construction, due to inept operation of federal controls, it will be most unfortunate if a further period of restricted building must be endured because of an unnecessary shortage of workers."

Forrest W. Parrott, Midwest Contractor, New AGC President

CHICAGO.—Forrest W. Parrott vice-president of the C. F. Lytle Company of Sioux City, Iowa, was elected president of the Associated General Contractors of America, at the group's closing session of its 28th annual convention at the Stevens Hotel.

The Lytle firm is prominent in mid-west highway, heavy and railroad construction. Parrott has long been active in the Associated General Contractors, serving in many official capacities since 1935.

Vice - president of AGC during 1947 is D. W. Winkelman, of the D. W. Winkelman Company, Syracuse, N. Y.

H. E. Foreman was reappointed managing director and James D. Marshall was renamed assistant managing director.

FORREST W. PARROTT

Ace Home Builder To Receive Trophy

The nation's outstanding Home Builder will be selected next month.

Housing's "man-of-the-year" will be chosen by the National Association of Home Builders. The award will be made at the Association's annual convention and exposition which will be held at the Stevens Hotel, Chicago, from Feb. 23 to Feb. 28.

The "Oscar" in this case will be a trophy donated by the Home Builders Association of Dallas. It will be awarded thereafter each year "to the man who has done the outstanding service to the National Association of Home Builders and to the Home Building industry in the past year."

"The Home Builders of the nation completed 450,000 homes last year under extreme difficulties," Frank W. Cortright, executive vice president of NAHB, said, in announcing the award. "This was a substantial contribution toward ending the housing shortage. Some builders turned in remarkable records of accomplishment. The Dallas award has been instituted to pay deserved tribute to the individual builder who did the most for Home Building in 1946."

Announcement of the trophy winner will be made at the annual association banquet at the Stevens Hotel on February 26. The Dallas trophy measures three feet from its base to the topmost feather of the eagle which stands on a globe and surmounts the trophy. To determine the winner, an Award Committee will submit a list of three to five nominations to the Association's Board of Directors which will then single out the winner by a secret written ballot.

GROOVER AND I Co BUDGET

I previously stated that a national debt was a first mortgage on your grandson's undershirt. I was wrong — your grandson won't own an undershirt!

☆ ☆ ☆

President Truman submitted a budget ANTICIPATING a Federal income of 37.5 billion dollars for the fiscal year.

☆ ☆ ☆

This budget anticipates a surplus of 202 million dollars to apply on the national debt. It also provides 5 billion dollars for interest on the debt.

☆ ☆ ☆

This 5 billion dollar interest is 42% MORE than the TOTAL GOVERNMENT EXPENDITURES in the year 1925—and in that year there was a surplus of 250 million.

☆ ☆ ☆

The pitfall is the optimistic assumption that 37.5 billion income is a fact. Brother, it's a hope and a prayer!

☆ ☆ ☆

(In order to make elbow room for their promised tax reduction the Republicans are now raising the estimated income to something like 39 billion — perfectly permissible as it is guessing.)

☆ ☆ ☆

Idle production lines, supervised by a watchman do not produce Federal revenue — men on picket lines are not paying income tax.

☆ ☆ ☆

It has been rumored that Russia would accept a loan from us of 10 billion dollars. She would probably settle for 5 billion. No reason why we shouldn't make the loan—we haven't the money, anyway.

☆ ☆ ☆

The Budget Boys need a pen that will not only write under water—but will underwrite fantasy, fairytales, and borach.

Steel Export Gets Go Ahead on Rated Orders from CPA

Eliminating ceilings under which steel producers had been permitted to turn down rated export orders in excess of two percent of their total production of any specific steel product, the Civilian Production Administration today announced that these producers would be required to accept any priority orders issued under the agency's current steel export program.

CPA explained that the general ceiling of two per cent had been removed because the export program was found to require more than this percentage of some products, and less of others. However, the over-all steel export program will be held closely to the 1943 ration of rated export orders to total production, CPA added.

Also revoked today were Directions 12, 14, 15, 16 and 17 to M-21. CPA said these orders no longer applied to the current priority program.

OKAY SURPLUS BUILDING GRANT

WASHINGTON. — Two California schools have been approved by Major General Philip B. Fleming, administrator of federal works, to obtain surplus buildings for conversion. Schools, and use of the buildings, follow:

Laton Joint Union High School at Laton, for 2,000 sq. ft. classrooms and shop space; Los Angeles City Junior College district, for 3,500 sq. ft. cafeteria space at school of agriculture.

Resurvey of Power Demands in CVP Area Reveals Potential Power Shortage—Boke

SACRAMENTO.—A resurvey of power demands and supply in the Central Valley Project area has been made by the Bureau of Reclamation in the light of recent events pointing toward a developing power shortage in the area, it was announced today by Regional Director Richard L. Boke in Sacramento.

These events, Mr. Boke said, include:

The turn-down of the Reynolds Metals Company's application for power to reopen the Riverbank aluminum plant near Modesto; the San Francisco "blackout" recently when a large section of the city was temporarily cut off from electric service; the threatened 1947 drought which already has forced a curtailment of power production at Shasta Dam in order to save water.

"It is evident northern and central California face a critical shortage of power facilities which makes necessary the earliest possible completion of the Central Valley Project power features, including both generating and transmission facilities," he said.

The drought probably is the least significant of these developments, according to Boke. Commenting on the population increase and industrial growth in California, and the ack of adequate power reserevs to accommodate them, the Reclamation official said the scarcity not only leaves the entire power system vulnerable to such occurrences as the San Francisco "blackout" but has the far more serious effect of curtailing productive expansion throughout the region. This is pointed up by the loss of the Riverbank aluminum plant which was unable to get power from either the Pacific Gas and Electric Company or the City of San Francisco's Hetch Hetchy project for lack of generating capacity, and unable to get it from the Bureau of Reclamation for lack of transmission lines from Shasta.

Boke added: "My attention has been directed to a recent article in the press which pointed out that on the peak day of 1946, which was August 9, the entire area system (public and private facilities together) provided a mere 62,000 kilowatts of spinning reserve. This figure checks with our own computation, which showed that the normal requirement for a system of this size would have been between 177,000 and 311,000 kilowatts. At that time, the P. G. & E. was supposedly receiving 102,000 k.w. of power imported from southern California and from southern Oregon. That import power is being withdrawn."

The dry year which faces the area only increases the critical situation, Boke said, although the shortage is not solely in terms of hydro - generated power. Equally acute is a shortage of adequate steam power and of transmission lines and equipment.

The real seriousness of the situation, according to the government official, is not that the whole system is being overtaxed and will occasionally break down some place as it did in San Francisco, but that there is absolutely no pos-

President Praises AFL, AGC Officials

WASHINGTON. — The building and construction trades department of the American Federation of Labor and the Associated General Contractors of America were praised by President Truman last week when a "no strike, no lockout" agreement was voluntarily made.

The agreement covers two million workers in the home, highway, heavy and specialized construction field. Contractor and union officials said that the agreement applies to new contract terms as well as grievances under existing contracts, and will run indefinitely.

'BUILDER' PRESENTS INSURANCE ARTICLES

Recent changes in the California unemployment system — including addition of the disability insurance program and the return of the employment service to the state—have resulted in a need to resurvey the entire unemployment compensation program.

As a reader service, the Daily Pacific Builder, in cooperation with the California Department of Employment, presents a series of four articles dealing with the over-all program.

The introductory article discusses the general question, "What Is Unemployment Insurance?" (See Page 9).

Pave Way for Bond Issue for Second State Toll Bridge

SACRAMENTO.—On behalf of the California Toll Bridge Authority, bills were introduced in both rouses of the Legislature over the weekend by Assemblymen Maloney, Wollenberg, Brady, Collins, O'Day, Berry, Blosser and Gaffney, San Francisco; Dunn, Sheridan, Dickey, Carey and Caldwell, Alameda County, and by Senators O'Gara, San Francisco, and Breed, Alameda County, as the initial step in the financing of a second State-owned toll bridge or other highway crossing of San Francisco Bay.

The proposed measures are enabling acts, general in nature, which amend the California Toll Bridge Authority Act to provide specifically for issues of revenue bonds to be retired from the revenue and other income of the existing bridge and any new bridge or other highway crossing that may be built.

The bills, among other things, authorize:

1. A single issue of bonds to provide a trust fund, should this be required, sufficient to redeem outstanding bonds which are a lien on the revenues of the existing bridge, and additional funds for construction of a new crossing.

2. That the revenues of both crossings, after completion of a second crossing, shall be concurrently an dexclusively pledged for the redemption of the new bond issue, and that neither of the crossings shall become free of tolls until all of the joint indebtedness is paid off.

3. That the limitations of the present law regarding new or competing bridges within ten miles of the existing structure shall not apply to any crossing built by the State, when retirement of the indebtedness of the existing bridge and funds for construction of the new crossing are provided for in a single bond issue as authorized by the amendatory acts.

Another bill would empower the California Toll Bridge Authority to provide for payment of operation and insurance charges of the present bridge and any new crossings out of revenues.

Under an existing statute made applicable specifically to the San Francisco - Oakland Bay Bridge, such charges are now paid from the State Highway Fund. This requirement was imposed by the Reconstruction Finance Corporation as a condition of the original Federal loan.

33—BRIDGES

2/4/47 • 33
Owner Taking Bids—Due March 5, 2 P. M.
Bridge (Remove and Erect)
HUMBOLDT COUNTY, Calif. Across Redwood Creek, about 30 miles east of Eureka.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Remove an existing timber span and erect a salvaged structural steel span.
The work involves:
(1) remove existing bridge;
(2) 50 cu. yds. structure excavation;
(3) 75 cu. yds. class A portland cement concrete;
(4) hauling and erecting salvaged structural steel span;
(5) straightening, cleaning and painting salvaged structural steel span;
(6) 2500 lbs. structural steel;
(7) 120 lbs. miscellaneous steel;
(8) 16,000 lbs. bar reinforcing steel;
(9) miscellaneous items of work.
The State will furnish salvaged structural steel for use in the work.
Specifications obtainable from the above office.

2/4/47 • 33
Owner Taking Bids—Due March 5, 2 P. M.
Bridge and Grading
SAN JOAQUIN COUNTY, Calif. At Calaveras River, about eight miles north of Stockton.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Construct steel girder bridge and about 0.4 mile grading and surfacing with plant mix surfacing.
The work involves:
(1) 23 sta. clearing and grubbing;
(2) 2100 cu. yds. roadway excavation;
(3) 150 cu. yds. structural excavation;
(4) 24,000 cu. yds. imported borrow;
(5) 2500 sq. yds. compact original ground;
(6) develop water supply and furnish water equipment;
(7) 1250 M gallons apply water;
(8) 23 sta. finish roadway;
(9) 5000 tons pit run gravel;
(10) 1200 tons untreated rock base;
(11) 1455 tons plant mix surfacing (SC-2) prime coat and penetration treatment;
(12) 700 tons minimum aggregate plant mix surfacing;
(13) 36 tons paving asphalt plant mix surfacing;
(14) 150 cu. yds. class A portland cement concrete structures;
(15) 21,000 lbs. furnish bar reinforcing steel;
(16) 21,000 lbs. place bar reinforcing steel;
(17) 97,000 lbs. furnish structural steel;
(18) 97,000 lbs. erect structural steel;
(19) 1176 lin. ft. furnish treated Douglas fir piling;
(20) 28 each driving piles;
(21) 0.25 mile new property fence;
(22) 0.20 mile remove and reconstruct existing property fence;
(23) miscellaneous items of work;
(24) remove existing bridge.
Specifications obtainable from the above office.

CVP Power Need

(Continued from Page One)

sibility of taking on new load until new generating capacity and new transmission lines are provided.

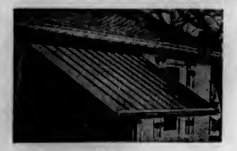
"California is all dressed up and has some place to go," Boke said, "but it hasn't the power to get there. Even the complete expansion program of the private utility company, as announced through 1951, leave to the scheduled development of CVP power will leave us, in 1951, exactly where we are today — without adequate reserves an with productive expansion restricted to the extent of new power installation. Our studies show that the most conservative estimate of possible increase in load growth would call for 255,000 kw more new installation that will be provided.

The Bureau survey shows that the developments bringing on the power shortage are precisely those which are hailed as signs of the State's continuing war time expansion:

(1) Industrial levels and employment, after a slight 1945 slump, are moving again upward, ond the expected major postwar recession, it is now evident, will not take place;

(2) In - migration continues to hold over out-migration and California, which was the fastest-growing state during the war, is retaining that distinction in the postwar period.

"This welcome growth has now come up sharply against the limitations of our physical plant," Boke stated.



"The Pacific Gas and Electric Company, its expansion program halted by war along with that of the Central Valley Project, is making efforts to press into use every piece of generating equipment it can produce — even to utilizing the turbo-generator of a wrecked ship off the coast at Eureka. The Bureau of Reclamation, for its part, is making every conceivable effort to expedite installation of the Shasta and Weswick generators.

"Northern California, the Bay area and the Central Valley are inevitably going to suffer a limitation, and the limitation will be only more acute in proportion as the public power phase of the development should fail of realization.

"This area's productive capacity in every field of agricultural and industrial enterprise is going to experience a restriction. It is the job of all concerned to hold the restriction to a minimum."

Official Proposals

Construction of the Plant Sciences Building on the Davis Campus

"ADVERTISEMENT FOR BIDS"

"Subject to the conditions prescribed by the undersigned, sealed bids are invited for the following work for the construction of the Plant Sciences Building, Unit No. 1 on the Davis Campus, University of California, Davis, California: (1) General Construction, (2) Electric Work, (3) Plumbing Work, (4) Heating and Ventilating Work, (5) Combination Plumbing and Heating and Ventilating Work, (6) Combination Plumbing, Heating and Ventilating, and Electrical Work, (7) Special Temperature Rooms, and (8) Elevator. This project has been granted CPA authorization under VHP-1. Plans and specifications will be issued to intending bidders upon the deposit of fifty ($50) dollars per set. No bids will be received after 2:00 P. M., February 26, 1947. Plans, specifications and information will be available starting January 28, 1947, at the Cashier's Office, 103 Administration Building, University of California, Berkeley, California, and at The Business Office, Administration Building, University of California, Davis, California. The right to reject any and all bids is reserved.

★ EDISON CENTENNIAL ★

1847 1947 *Thomas Alva Edison* —"MADE IN THE U.S.A."

Incandescent electric lights, motion pictures, the talking machine, the dynamo —"Made in the U.S.A."

Edison, genius of his time and eternally the wizard of electricity, is, like Abraham Lincoln, a personification of American opportunity. Born of poor and obscure parents, Edison rose to high honor and achievement by virtue of his vision, his ability, his toil and his enterprise. And in America he found the opportunity to materialize his dreams and produce them for Mankind the world over.

"Made in the U. S. A." labels Edison the man as well as his hundreds of inventive marvels.

Free men, with opportunity to realize their ambitions; enterprising men, with opportunity to produce; skillful men, with opportunity to succeed; hard-working men, with opportunity to profit by their labors; happy men, with opportunity to enjoy life—these are men from which Edisons spring. They are unmistakably "Made in the U. S. A."

Manufacturers' Literature

ALUMINUM ALLOYS
Heating Treating Aluminum Alloys. Process manual including a non - technical discussion of the metallurgy and heat treatment of aluminum alloys, recommended thermal treatments for the various aluminum alloys (in tubular form), and a more technical discussion intended for the metallurgist and operating personnel. Tables of mechanical properties also included. 144 pp., illus. Reynolds Metals Co., Dept. 47, 2500 S. 3rd St., Louisville 1, Ky.* $1.00.

AWNINGS
The Air-Conditioned Awning. Descriptive booklet on Lifetime Kool-vent Ventilated Aluminum Awnings. Color illustrations of actual installations. Details of the Koolvent ventilating design, said to prevent formation of heat pockets and reduce summer temperatures under the awning. 4 pp., illus. Kool-Vent Metal Awning Corp. of America, Keystone Bldg., Pittsburgh, Penn.

CONCRETE SHRINKAGE
The Action of Embeco in Concrete and Mortars (2nd ed.). Discussion of shrinkage of concrete and mortar, its influence on durability and serviceability, the principal factors affecting it, and its control and elimination. Explanation of the principle of specially prepared metallic aggregate in controlling shrinkage. Includes charts, graphs, technical data, tables. 34 pp., illus. The Master Builders Co., 7016 Euclid Ave., Cleveland 3, Ohio.*

FIRE PREVENTION
Croker "A.B.C." of Safety (Catalog No. 46). Fire hose and extinguisher cabinets and racks, portable extinguishers, chemical engines, hose and hose couplings, nozzles, valves, etc. 34 pp., illus. Croker Fire Protection Corp., 32 W. 31st St., New York 1, N. Y.

GAME ROOM PLANS
Ideas for Playroom Planning. Plans for basement recreation rooms— trophy and music rooms, children's playrooms, etc. Includes for the general public a planning kit consisting of a large cross-ruled layout sheet on which to draw basement outlines, and a full set of scale cutouts covering a large variety of basement and playroom appointments. Plans are based on use of automatic heating; booklet includes description of several oil-fired automatic heating units. 24 pp., illus. The Heil Co., 3000 W. Montana St., Milwaukee, Wis., 10 cents.

GREASE TRAP
A New Principle in Grease Interception: HydraFilter by Wade. Complete description of a grease interceptor, its construction and operating principle, design features. 6 pp., illus. Wade Mfg. Co., Elgin, Ill.

HARDWARE
Donovan Awning and Casement Type Window Hardware for Use with Wood Sash. File folder containing complete descriptive literature and 3-in. scale details. Recommended sash sizes and various types of high window operators also provided. Universal Window Co., 950 Parker St., Berkeley 2, Calif.

Round Frame, Protected Type Motors for Close Coupled Service (Bulletin SL-300-3). Describes protected type motors designed for close coupling to centrifugal pumps, agitators, atomizers and many types of machine tools. Drawings and dimensions included. 2 pp., illus. Crocker-Wheeler Electric Mfg. Co., Ampere, N. J.

Type OG Standard Squirrel Cage Induction Motor (Bulletin 720). Covers construction, features, typical applications. Shows standard and special mountings. 12 pp., illus., The Louis Allis Co., Milwaukee 7, Wis.

RUBBER TERMS
A Glossary of Technical Words, Terms and Phrases Used in the Plastic and Rubber Industries. A handy glossary of chemical terms, giving definitions and pronunciation. 12 pp. B. F. Goodrich Chemical Co., Rose Bldg., Cleveland 15, Ohio.*

(Continued on Page 11)

Unemployment Insurance Tends to Slow Up Depressive Tendencies; Supplants Charity

Unemployment insurance is a system of social insurance that provides wage earners with some income during periods of unemployment. It provides for collection of contributions to create a fund for the payment of benefits to eligible unemployed workers. It does not assure benefits for every unemployed person, but only for those who are regularly attached to the labor market, who are able and willing to work and who are genuinely unemployed. It makes no attempt to protect unemployable persons. Most industrial employees are insured under the joint federal-state system.

The risk of unemployment is one of the most serious risks wage earners face and, in a free industrial society, some unemployment is inevitable. Furthermore, unemployment is one of the major risks faced by the community as a whole because of its effect upon the general economy.

Better Than Charity

The causes of unemployment are numerous and varied. Many affect comparatively small groups for relatively short periods. Most spectacular is the unemployment of a general business depression.

Unemployment whether for short periods or long, has an economic effect upon the wage earner and his family. When unemployment is widespread, or for long duration, the results may be disastrous for the family and the community. Public or private charity may be needed to keep families from starving. The insurance method of unemployment compensation is much more satisfactory to both the individual and the community than charity.

California's Unemployment Insurance Act was adopted in 1935 and conforms to standards set by the federal Social Security act. It determines who is covered by the law, the amount of contributions and by whom paid, the amount of benefits, and other aspects of the system, including the creation and operation of the state employment service. The act is administered by the state department of employment, subject to federal requirements. Administrative funds are provided by the federal government from revenue obtained by the pay roll tax on certain employers.

No Job Substitute

At best, a worker's benefits compensate for only part of the wages he loses when he is unemployed, and for only a limited time. But that income helps him meet living expenses. At the same time, unemployment insurance serves to maintain purchasing power when layoffs or shutdowns stop earnings for many families, locally or nationally. It also serves employers by enabling wage earners to remain in communities where they will be needed again instead of scattering aimlessly in search of work, and thus assists to maintain an effective labor force.

Unemployment insurance is no substitute for a job. It is a first line of defense when suitable work is lacking. In conjunction with the employment service, it plays a positive role in helping unemployed workers to get jobs and, if there is no suitable work available for them, in helping to conserve morale and work skill until new jobs are found.

Counteracts Depression

Fundamentally, unemployment insurance helps sustain confidence among wage earners and employers alike. It lessens the reduction in purchasing power which accompanies unemployment and which, frequently, develops a contagion of fear that has a paralyzing effect upon the general economy. The result is a downward spiral that is, at least in part, psychological. Knowledge that some income will be maintained tends to counteract this depressive tendency.

This is the meaning and purpose of unemployment insurance. How the system operates in California will be described soon in the Daily Pacific Builder.

BRANDT SALES MANAGER

HOUSTON, Tex.—Frederick C. Brandt recently was appointed sales manager of the air conditioning controls division for the Minneapolis - Honeywell Regulator Company in the southwestern region.

Scholastic Efficiency Increased Through Air Conditioning; Improves Crowded Rooms

CHICAGO, Ill.—Faced with fat enrollments and thin building prospects, school authorities are turning to air conditioning as one way to ease the burden of crowded classrooms and overtaxed facilities.

In the forefront of studies now being made is the record of the University of Omaha which, before the war, gained the distinction of becoming the world's first completely air conditioned university at an added cost of only 3 cents per cubic foot to the original cost of the buildings.

Now overshadowing that distinction is what air conditioning has accomplished for the university since the war as enrollment has doubled and the year 'round school program has expanded in both size and scope. Combining winter heating and summer cooling throughout 1,750,000 cubic feet in 200 classrooms, here are some of the results as reported to the Refrigeration Equipment Manufacturers Association:

1. Despite twice as many students, classroom facilities are employed to capacity with the air in each of the school's 200 rooms regulated according to the percentage of occupancy.

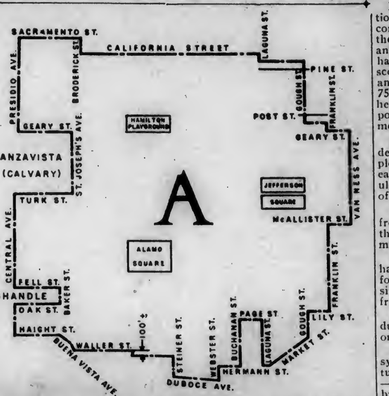
2. Heat and laboratories are freed from objectionable air and therefore may be used longer and more frequently.

3. Summer school enrollments have increased because of the comfort of the classrooms—the university's summer school has students from 40 other institutions.

4. Teachers are easy to engage during the summer— usually only one call is necessary.

The university's air conditioning system provides controlled temperatures twelve months in every year —an advantage that is being viewed by educators in terms of either lengthening the school year or otherwise employing school facilities continuously and without the interruption of vacation periods. In addition to maintaining 72-degree heat throughout the winter and 72 to 79-degree temperatures in the summer, depending on outside weather, the system washes and filters the air and controls humidity. These features are adjustable to the year 'round weather in Omaha, but school officials call attention to the value of the cooling features in southern schools where cooling the air alone would provide unusual benefits.

Reports from the Omaha school and other air conditioned educational institutions also point out that comfortable temperatures are conducive to raising scholastic standards and attendance records, and eliminate the loss of efficiency on the part of instructors and students alike caused by excessive heat and humidity.



Complete air conditioning at the University of Omaha was voted by the school's regents following consideration of an architect's plan for incorporating cooling equipment to operate in conjunction with already-installed heating facilities in structure which consists of a center building four stories high and two wings of three stories each—actually, three buildings in one.

Cooling equipment consists of two wells for supplying water, of which about 135,000 gallons are used on an average Omaha summer day, mechanical refrigerators, and two storage reservoirs. Water pumped from the wells to a 100,000 gallon reservoir travels to the refrigerators, then to the cooling coils and condensers and finally to a second reservoir, from which it is circulated for cooling. Following use, the water is used for lawn sprinkling or diverted to sewers.

Other features of the system include 4-inch insulation on the third and fourth floor ceilings, an air space of one inch between the school's 16-inch brick walls and the inside plaster, double glass and weather stripping on all the buildings' 460 windows and the installation of separate exhaust systems to dispost of "used" air from kitchens, laboratories and other rooms.

#

Fresno College might abandon its present campus for a new site—because it was impossible to find adequate spots for new dormitory development.

BLIGHTED AREA.—Shown above is Area A—which has been tentatively designated as the first general area of San Francisco, of which parts may be torn down and rebuilt under the state Community Redevelopment Act. Since no property can be condemned for this purpose until suitable living quarters may be provided for tenants, redevelopment cannot be started immediately. Supervisors have said that the general area contains many sub-standard buildings and is dangersous to the health, safety and welfare of the citizens of San Francisco. Low assessments on such buildings lower the city's tax income. Redevelopment would be in line with a general plan to be developed by the city planning commission.

Cathodic Protection Aids Electric Steel Water-Heater Tanks

The life of the usual galvanized-steel electric water-heater tank is greatly influenced by the character of the local water. Some 30 years' service can ordinarily be expected from a properly galvanized steel tank, which is by all odds the most economical tank construction now available. In a few areas—curiously enough these are the areas in which the water is soft rather than hard—galvanized tanks corrode in a small fraction of 20 years.

Sometimes a water tank in a house on one side of the street lasts indefinitely whereas across the street, served by a different water system, a tank fails in two or three years. The difference seems to lie in the lack of lime or carbonates in the water, which partially protects the tank wall. Corrosion is largely the result of electrolysis.

Inasmuch as corrosion cannot be eliminated, at least the attack can be diverted to something less objectionable than the zinc surface. Favorable results have been obtained experimentally by one large electrical firm through the fairly simple expedient of suspending inside the tank a magnesium-alloy electrode electrically grounded to the tank. Galvanic currents are such that ions flow away from the magnesium electrode instead of the tank wall, thus destroying the magnesium instead of the zinc. When the magnesium electrode is well disintegrated it could be replaced readily.

This manner of preserving the interior follows the well-known principle of cathodic protection, long applied to pipe lines, water tanks, and other buried structures that are subject to galvanic earth currents.

Round California Plant Is Square

The name of Round California Chain Corp., Ltd., does not pertain to either the shape of the product or the plant which makes it.

DAVID ROUND chain and hoist manufacturing organization began in Cleveland, Ohio, 77 years ago, in 1869, and has grown to become one of the largest of its kind, with four large factories from coast to coast.

The Round California Chain Company, at South San Francisco is the latest plant, built in 1930, and equipped for western trade, for the production of anchor chains for the shipping and shipbuilding yards. Arthur H. Luchs, General Manager, with 20 years experience in the chain industry, advises that one of their specialized services includes annealing and repairing of wildcat and Anchor Chains for the repairs of ships. A special Chain-Testing Machine licensed by U. S. Navy, American Bureau of Shipping, and Lloyds Register, provides testing service up to 500,000 lbs., for all chains manufactured in this plant, and for certifying repaired chains for ships.

Chains for foundries, lumber mills and general purposes are manufactured and warehoused for west coast mill supply houses.

The "ROUND" organization also manufactures a complete line of hoisting equipment, chain hoists, winches, cranes and trolleys.

#

THOMAS NEW CHAIN BELT SALES CHIEF

MILWAUKEE, — Chain Belt Company announces the appointment of Austin K. Thomas as sales manager of its construction machinery division.

Thomas has a background of more than 20 years association with the construction machinery industry. He is a graduate of the college of civil engineering of Cornell University.

Big Production Year Is Foreseen By Electrical Industry; Materials Scant

NEW YORK. Jan. 8.—An optimistic outlook for the electrical manufacturing industry in 1947, qualified only by the possibility of major disturbances and some material shortages, was forecast today by R. Stafford Edwards, of Norwalk, Conn., president of the National Electrical Manufacturers Association, following a survey of the NEMA board of governors.

The demand for heavy equipment is especially strong, and was characterized as "real" with backlogs which would carry the manufacturers of apparatus well through 1947 at capacity production.

In the field of household appliances, however, the feeling was would be tempered by the purchaser's ability to buy and the competition for the consumer dollar offered by other durable goods industries. In this respect a buyers' market was generally predicted by the middle of the year.

Face Selective Buying

The major household appliances were conceded to have the best possibilities for a sustained market, with the smaller appliances already facing selective consumer buying. In any case, it was felt that the backlog of demand was not as sound as in the apparatus field, and that appliance purchases will not actually be as great as the estimate made by some.

Manufacturers of electrical building materials for the home building line expressed the view that a huge backlog of orders was not "real and that pyramiding of such orders had created a demand on the books which was far out of ratio to actual demand. One manufacturer expressed the problem succinctly when he said: "We would hazard a guess that if we could accept and deliver all orders that are offered us for home building equipment, we would be furnishing more devices than have all the houses Wilson Wyatt ever talked about building." He did feel, however, that even if a considerable amount of overordering were eliminated, the present backlog would carry his company pretty well through 1947.

Materials Still a Problem

While shortages of raw materials constituted one of the two principal factors in retarding 1946 production, the availability of copper, steel, lead, castings, nickel, cotton and plastics may hsow some improvement in 1947, according to most opinions, although not in sufficient supply to meet the demand. It was further pointed out that this problem was directly coupled with labor conditions, the second major rippling influence in 1946, and that the same situation might loom as a possibility in 1947.

For example, even though the copper supply might show some improvement, its production for use by the electrical manufacturing industry might easily be bottled up in the rolling mills by labor difficulties, as was the case in 1946.

World-wide Shortages

The opinion was expressed by some wire and cable manufacturers that while copper would not be any more plentiful in the first half of 1947, than in 1946, improvement may be expected in the last half.

The same condition was forecast for steel products and castings, especially sheet steel used in major appliances, and special steel used in motor laminations.

The supply of lead, cotton, and plastics, short in 1946, is expected to show some improvement but still far from sufficient to meet the demand. The shortage of lead and copper was characterized as worldwide. The shortage of plastics will be due principally to delays in completing chemical plants to provide the ingredients for plastic materials, such as phenol and formaldehyde.

Labor the Key to Production

The outlook for a reliable labor supply in 1947 was described as uncertain, and dependent upon a number of factors, the most important of which is the attitude of labor itself and the need for a realization that full production is the only sound method of bringing wages and living costs into real balance.

With labor productivity viewed as the key to the 1947 output, most manufacturers felt that there had been very little increase in labor productivity in the last six months, while one or two had noted a slight improvement. It was pointed out that improved man-hour production was coming more from technological developments and machinery than from any increased effort and interest by labor itself.

One of the problems generally agreed upon, Edwards said, was that job security provisions protect the inept, disinterested worker, but do not offer sufficient incentive to the ambitious worker. Several members of the NEMA board expressed the sentiment that better use of "incentive systems" might help to remedy this condition.

Labor also was described as being very "choosey" about jobs which, coupled with low man-hour efficiency, create labor shortages in vital spots.

New Laws Needed

Improvement in labor-management relations in 1947, it was felt, will depend to a large extent upon the type of legislation enacted by the new congress, especially as it relates to equality before the law for management and labor, and the establishment of true collective bargaining.

While new large-scale wage demands in 1947 would have a serious effect upon the picture. Edwards said that there was some optimism in the industry that the problem could be solved through equitable legislation, by increased productivity, by a better understanding of the problem on the part of labor and by more general cooperation in fighting a wage-price inflation spiral.

Depression Can Be Averted

The concensus among the manufacturers is that a depression or even a temporary recession in business, predicted in some quarters for the latter part of 1947, can be averted if the bright spots now evident become dominant in the 1947 picture.

Edwards summarized these bright spots as the substantial demand for goods and services, held in check during the war and also during 1946 by production difficulties; the very large backlog for heavy apparatus, as well as a demand for consumer goods which had prospects of continuing well into the middle of the year; an improved supply of materials, and signs of a better balance in the labor picture.

Adverse Factors Listed

Factors which could throw the economic machine out of balance, he said, would be excessive wage demands with an attendant wage-price spiral; work stoppages which would affect the supply of materials and component parts all along the line, throttling the production of finished goods; and the failure of labor and management to cooperate to the fullest extent.

High costs and shortages would also restrict the amount of capital to be invested in the expansion of plant facilities in 1947, he said, pointing out that plans for such investments are already showing indications of being postponed by management where feasible until 1948.

#

Intricate Studies Lead to Uniform Plumbing Code

WASHINGTON. — A committee representing the plumbing industry, labor and the government and sponsored by the Office of Housing Expediter and the National Housing Agency is working on a uniform plumbing code which may be used to standardize the numerous plumbing codes now in existence.

As a part of its work, the committee is making arrangements for an extensive demonstration project at the National Bureau of Standards in which clear glass or plastic piping will be used to duplicate working conditions in a plumbing system in order to permit observation of the tests. Moving pictures will be made of the tests and the results will be recorded in a technical report. Both the movie and the report will then be made available to any city or municipality or to anyone in the industry.

#

ENLARGE TURESCO FACTORY CAPACITY

CHICAGO.— The E. L. Rahm Company has opened a new plant containing 45,000 square feet of floor area here. The expansion is expected to increase production of its line of Turesco Waterproof Paints from 2,000 to 40,000 gallons a day.

Smith-Becker Co., is the distributor for the San Francisco area, and the dealers are Cherry-Burrell Corp., International, Ltd., and Cleveland Wrecking Co; the Oakland dealer is Symon Bros.

Beauty, Durability are Outstanding Features Of Hollow Door Rezo

OSHKOSH, Wisc.—With the removal of wartime restrictions and greater availability of materials, production of precision made doors is considerably improved.

Air Circulates

One of the major manufacturers is the Paine Lumber Company, of this city, oldest major door manufacturer in the country, which produces the Rezo patented door. Established in 1853, the company has been producing the Rezo door since 1935.

The door is composed of an aircell grid core, and the woven-wood core is overlaid with plywood, which may be covered with any desired veneer of wood.

Cross and vertical members of this door core are alternately grooved. Both sides of the cross members have notched air vents, permitting air to circulate throughout the door. Continuous movement of air throughout the full length and width of the core prevents swelling, shrinking, or sagging, as well as insulation.

Fire Resistant

The doors are precision made, and are shipped ready to install. They are suitable for use as interior and exterior doors, cupboard doors, fixed and movable partitions, accordion doors, locker doors, fire-resisting doors, sound-resisting doors, panel work, etc.

This hollow core cell type door was initially used by French naval architects for the great ships of the French line—the Normandie, Isle de France, Paris, etc.

Demanded was a door that could stand the high humidity of the sea without warping or swelling, and that could take the abuse of stresses and strains exerted by a rolling, pitching vessel without alignment troubles.

One Million Sold

The door met these requirements, and presented in addition the qualities of lightness in weight and attractive appearance. More than one million of these doors have been installed in various types of buildings in this country.

J. C. Costello, Atlas Powder Manager, Is Succeeded by Mahood

Joseph C. Costello, manager of the San Francisco district, explosives sales department, Atlas Powder Company, retired January 1, after having completed 25 years' service with the company. William T. Mahood, his assistant, has been named new district manager.

Costello is a veteran of 37 years' experience in the explosives industry, having previously specialized in civil and mining engineering.

A native of Cleveland, Ohio, Costello received his formal education at the Wichita, Kan., high school and the University of Kansas where he majored in engineering. He studied further in chemistry at the University of California and Johnston's School of Engineering at Cleveland.

Initial Electric Home Planning Manual Out

Architects and builders will be provided with practical data on space requirements and construction details for accommodating electrical equipment in the home in a new series of manuals planned by A. Carl Bredahl, manager of the Westinghouse better homes department.

The first of these manuals "Planning the Kitchen Electrically," is just off the press. In the kitchen manual, the author divides homes into four series—to cover various sizes of homes and varying degrees of electrification. After discussing the fundamentals of kitchen planning and basic kitchen layouts and design details, he applies the rules to four specific house plans—Thrift, Budget, Ideal and Deluxe—each one taking advantage of an added number of electrical conveniences.

After determining the proper "kitchen series," the designer selects one of sixteen layouts from a key plan sheet. Detailed layouts follow the key plans, listing equipment required for the particular kitchen arrangement. The manual establishes storage and counter surface requirements according to the size of the home. Information on lighting, ventilation and wiring is also included. Price of the new manual is $1.00 per single copy.

Hydron—New Concrete Liner—Prevents Air Pockets, Promotes Structual Strength

LOS ANGELES—An order for 800,000 feet of Hydron for use in the Davis Dam construction, part of which is enroute to the site near Kingman, Arizona, highlights the increasing use of the absorptive lining in concrete technology.

Experience on other projects and exhaustive tests of the material were the influencing factors in Utah Construction Company's decision to utilize the process.

With the trend toward the use of mixes with low water-to-cement ratios and the necessary use of vibrators to expel entrapped air and compact the wet concrete, the need has arisen in recent years, for means to dispose of air collecting at the surface of forms. Surface pockets of such trapped air have been responsible in the past for pits in finished concrete surfaces. Free water at the form surface has been responsible for sand streaks and other disfigurations.

Many previous construction projects have proven the effectiveness of Hydron, a lamination of fabric and paper, to solve these problems. Tests show that concrete poured against forms lined with Hydron has a smooth surface with a case hardened depth of three inches or more, thus increasing structural strength.

The process of applying the lining is a simple one of stapling it to the plywood facing on the concrete forms. The light weight, flexible material makes for ease of handling.

Lowell Manufacturing Makes Low-Cost Paint AC-DC Motor Sprayer

The newest variation from the paint brush is the light-weight "Thoro - Spray" electric paint sprayer which is modern in design and simple to operate. The unit is the product of the Lowell Manufacturing Company, 589 East Illinois, Chicago.

This electric sprayer weighs only eight pounds and efficiently handles paint, varnish, enamel, lacquer and stain. It also produces a smooth finish in a fraction of the time xequired by other methods.

The sprayer has an adjustable nozzle, making it possible to vary the spray, and is powered by an efficient 110-120 volt AC-DC electric universal motor. The motor has a convenient adjustable strap attached to it, making it possible to carry it over your shoulder. A large 24-ounce capacity glass jar is attached to a nickel - plated frame and spray head.

The sprayer is a tremendous time saver in painting screens, porch furniture, radiators, garden trellises, garage and porch steps, picket fences, unfinished furniture, and car fenders. It costs about $30.50.

Farm Water Systems Production Is High

CHICAGO. — "Production of farm water systems reached an all-time high of approximately 620,000 in 1946 despite difficulties in procuring necessary materials," Herbert C. Angster, secretary-director of the National Association of Domestic and Farm Pumping Equipment and Allied Products Manufacturers said today. "This total, well over the estimated production goal of 500,000 set by the industry for the year, gives the water systems dealer a chance to break all records in sales."

"Opportunities for sales activity are greater than ever before with equipment available for delivery and the cash farm income for the past year totaling well over 22 billion dollars. Close cooperation between manufacturers and dealers in training of salesmen and servicemen, advertising and display, and education of the public to the importance of water under pressure as a prime factor in increased farm production can open the door to a sustained high volume of sales in 1947", he aded.

#

BROWN INSTRUMENT ADD TO ENGINEER SALES STAFF HERE

J. R. Culver has been added to the San Francisco branch of the Brown division of Minneapolis-Honeywell Regulator Company.

Culver, a resident of this area, has just completed an intensive course in industrial instrumentation at the Brown Instrument School, Philadelphia. His appointment is described by company officials as part of a move to expand production and sales activities of the company, which made several new production records during the past year.

Glycerine Filter Treating Solution Perfected By GPA

An efficient glycerine filter treating solution has been developed by research laboratories of the Glycerine Producers' Association, for use in new heating and air conditioning systems.

The product has been found to be an exceptionally good moistening fluid for filter bases. It comprises a 50 per cent solution of glycerine and water to which about 0.2 per cent of glue is added.

Procedure in making up the solution is to soak the glue overnight in a small amount of glycerine solution and dissolve the swollen glue in the remainder of the glycerine solution. The fluid is then ready for use and may be applied to the filters by spraying or dipping.

After a period of service the treated filters can be cleaned readily because the fluid is easily removed from the filter base by immersion in or spraying with either warm or cold water. Recoating the filter base with the glue-gycerine solution economically renews the filter's efficiency.

INSULATED PIPE

Durant Insulated Pipe. Catalog giving complete information on Durant Presealed Insulated Pipe, for use in underground and exposed locations. Suggestions for handling and installing. Specifications, instructions for making field joints, applications. Table of weights. 42 pp., illus. Durant Insulated Pipe Co., Dept. AR, 1015 Rumnymede St., P. O. Box 88, Palo Alto, Calif.

Sistemas de Conductos Tubulares Para Lineas Subterraneas y Aereas de Vapor Petroleo y Agua Caliente. Catalog of Ric-Wil insulated pipe conduit systems, prepared in Spanish for Central and South American users. Gives full specifications, description, suggested applications. 12 pp., illus. The Ric-Wil Co., Cleveland 14, Ohio.*

INSULATION

Sprayo - Flake Sound Control, Thermal Insulation, Condensation Control. Characteristics of a process which fabricates and applies insulation in one operation. Advantages claimed. Application details. Tables of thermal and sound insulation values. Typical applications. 4 pp., illus. Sprayo-Flake Co., 2729 Irving Park Rd., Chicago 18, Ill.*

LIGHTING

Fluorescent Showcase Lighting. Bulletin describing a new streamlined fixture for showcase, wall-case and shadow box lighting designed for use in either modern or conventional type installations. Gives table of reflector trough sizes, wiring plans, full description of units. 4 pp., illus. Lustra Corp. of America, 40 W. 25th St., New York 10.

G-E Lamp Bulletin (Bulletin LD -1). A condensed text on the design and operation of incandescent, mercury and fluorescent light sources. The more than 40 topics covered include lamp economics, temperatures, voltages, auxiliary equipment, germicidal, infrared, sunlamps and glow lamps. Numerous tables, diagrams and charts. 76 pp., illus. Lamp Dept., General Electric Co., Nela Park., Cleveland, Ohio.* 40 cents.

The Magazine of Light: Architects Edition (1946, No 5). Articles on store lighting include "Light and Sales," by C. J. Allen; "Lighting Planned for Profit" by W. M. Potter; "Planned Lighting," by M. M. Allon. Lamp Dept., General Electric Company, Nela Park, Cleveland, Ohio.*

Viz-Aid for Commercial Fixtures and Topnotch Commercial Fixtures (Bulletins 10-B-1 and 10-B-2). Revised listings of the Viz-Aid 40- and 100-watt units and the Topnotch 40-watt opentype fixtures. Description of the new "A-J" adjustable stem hanger for continuous installations. Complete specifications, price tables, installation details, tables for figuring footcandle intensities. 12 and 8 pp., illus. Day-Brite Lighting, Inc., 5411 Bulwer Ave., St Louis 7, Mo.*

Westinghouse Mercury Vapor Lamps. Page of technical data and recommended applications for Westinghouse H lamps. In tabular form. Gives complete data on each lamp in the line. Lamp Division, Westinghouse Electric Corp., Bloomfield, N. J.

MEMORIALS

Bronze Memorial Tablets. Brochure illustrating bronze memorial tablets, honor roll plaques, and commercial signs and desk plates in standard patterns. 6 pp., illus. Pan American Bronze Co., 628-642 Sycamore St., Cincinnati 2, Ohio.

METALS

Perforated Metals, Screens, Fabricated Metals. Catalog, giving full specifications, ordering information, general data. Section on perforated metal grilles and ornamental, perforated metal for constructional and industrial uses. Items include open steel flooring, stair treads, lip screens. Large section of useful tables: weights of various metals, equivalents of measure, equivalents of millimeters in inches, circumference and area of circles. 126 pp., illus. Hendrick Mfg., Co., Carbondale. Penn.*

Stanford Electrical Engineering Graduate Perfects Technicolor Television Receiver

An all-electronic color television system using a single electronic picture tube and a very simple optical system has been designed by George E. Sleeper, Jr., Chief Engineer of Color Television, Inc., a San Francisco organization.

Patents (Nos. 2,389,645 and 2,389,646) for this color television system have been granted to Sleeper and assigned to Color Television, Inc.

Reportedly Foolproof

Sleeper, formerly Chief Engineer for Farnsworth Television and Radio Corp., and Video Engineer for the Columbia roadcasting System, believes that sets receiving images from this system could be manufactured for little more than the cost of the present black and white receivers. It is estimated that the increase would be approximately $25 to $35 more per set.

The system does of use any rotating or mechanical diesce and is claimed to be foolproof. Sleeper's development employs a scanning device which converts filtered colors into a single picture at the transmitter. The images are reproduced in a group on the receiving picture tube in black and white and then are projected thru filters and combined optically and projected to a screen as a color picture.

Dual Purpose

An outstanding feature of this single electronic tube system of television transmission is that it has the faculty of being receivable on either a receiver equiped for full color reproduction or on a receiver which can only take monochrome reproduction.

Sleeper is a graduate of Stanford University, having received his AB degree in 1931 and his EE degree in 1933.

Did You Know That . . .

NEW YORK.—New York's newest bigtime restaurant, opened by Boxing Champion Joe Louis in the Harlem section, recently installed a Pacific steel heating boiler providing heat and hot water for the dining and dancing spot, with an innovation to average heating methods. Utilizing an "indirect heating system" incorporating a air conditioing unit and two blowers, the heating of air takes into consideration a quantity of 40 per cent outside air. This system re-circulates only 60 per cent of the air, with 40 per cent of the total amount of air including fresh air brought into the indirect heating system. Ordinary methods utilize 80 or 83 per cent re-circulated air, with only 15 or 20 per cent of outside air.

A constant temperature of at least 70 degrees is maintained throughout the system regardless of outside temperature. Pre-heating of cool air keeps humidity down to a comfortable margin.

oOo

Unemployment in San Francisco continued the gradual upward swing reflected in the October and November figures and increased by about 1,500 from the 27,500 reported in November. This estimate is based upon the total Unemployment Insurance contact load but takes into consideration also the fact that such a load does not include all persons out of work and seeking work.

oOo

Zegers, Inc., 3617 S. Harper Ave., Chicago 31, Ill., announces the formation of a nationwide sales plan for their Dura-Seal combination metal weatherstrip-sash balance. It will be sold through manufacturer's agents.

oOo

Architect Albert W. Kahl has opened his own office at 348 Broadway, Millbrae, Calif., (Millbrae 2094).

H. L. Marchand has opened a private structural engineering office in the Balboa Building, 593 Market, Room 423. GArfield 0286.

RESTRICT COMMERCIAL BUILDING UNTIL JULY

Restriction of non - residential construction in the interest of the housing program will continue at least until July 1, A. J. Grier, regional director of the Civilian Production Administration, said today.

"Housing is a major national problem," said Grier, "and is particularly acute in the western states with their greatly expanded population. Production of building materials is increasing rapidly but distribution is very spotted owing to transportation difficulties.

"We are fully aware of the urgent necessity for industrial, commercial and institutional expansion in this area, but non-essential and deferrable construction must continue to be postponed until materials supply and demand are more evenly in balance. Removal of restrictions at this time would create an utterly chaotic condition, with competition for labor and materials disastrous alike to home building and essential non-residential construction."

SAW MILL SUPPLIERS OPENS BRANCH HERE

American Saw Mill Machinery Company of Hackettstown, New Jersey will open a branch office in San Francisco, on February 1. The branch office will carry a stock of saw mills and woodworking machinery together with parts and will be in a better position to furnish service to customers and dealers in the West Coast area.

The new office will be located at 7 Front Street, and will be headed by William L. Fibben, who has been appointed district manager.

Lift Type Aluminum Garage Door Has Cheap Installation

Use of all welded, airplane type aluminum makes for easy operation of the lift-type garage door. Dual lifhting mechanisms assure effortless, reliable operation.

These features, plus economy in installation are features of the Wilson Garage Door. Since it is built in one piece, there is no assembly on the job. It fits all standard 8 x 7 foot door frames.

While use of heavy gauge aluminum gives durability, its lightness also makes installation easier and less expensive. No painting is required, but it may be finished in any home color scheme desired.

This product is guaranteed by its manufacturer, Wilson Foundry & Machine Co., Pontiac, Michigan.

POTENTIAL PAINT MARKET GREATEST.

WASHINGTON. — The painting industry has never contemplated a potentially greater market than it does today, the U. S. Department of Commerce stated in a summary of industrial trends and trade prospects in 1947.

"Two factors will determine whether it moves ahead," the report commented, "One is the availability of raw materials, and the other is the extent of industrial strife."

Supplies of drying oils and lead are not expected to exceed those of 1946, according to the Department of Commerce.

Builders for Battle: How the Pacific Naval Air Bases Were Constructed. By David O. Woodbury. New York 10 (300 Fourth Ave.), E. P. Dutton & Company, 1946; 8½ by 9½ in.; xvi + 416 pp. illus. $7.50.

Anyone who followed the island warfare of the Pacific must have sensed that there was a tremendous construction story behind the air bases that mushroomed up on coral atoll after coral atoll. Who built these bases? How were the equipment and supplies delivered? How long did it take?

In **Builders for Battle** a good part of that story is told, and tremendous it really is. Starting with the naively optimistic, isolationist days of the pre-Pearl Harbor decade, David Woodbury tells us of the Navy's recognition of the need for Pacific bases, its fight for authorization to build them, its broad-ranged plans and meticulously worked out details. He sketches in the background of the war with Japan; and he records the foresight and care with which Admiral Ben Moreli, Chief of the Bureau of Yards and Docks, guided the Navy in its selection of civilian contractors to build the island bases finally authorized by Congress.

Three firms of contractors were chosen, each a specialist in some one phase of the huge building program: Turner Construction Company and Raymond Concrete Pile Company, both of New York, and Hawaiian Dredging Company of Honolulu. Threse three made up the original Contractors, PNAB (Pacific Naval Air Bases), to whom in July, 1939, was given the task of creating complete installations on coral pin-pricks Midway, Johnston and Palmyra, and of making Pearl Harbor and vicinity a Number-One base. Later, as specific problems were met and the program was expanded to include Wake, Guam and Samoa, other firms were called in: Morrison-Knudson Company, Inc., of Los Angeles; J. H. Pomeroy & Company, both of San Francisco; Utah Construction Company, of Ogden, Utah; and the Byrne Organization, of Dallas, Texas. Albert H. Kahn, Inc., of Detroit, and C. W. Dicker of Honolulu were chosen as architect mainstays.

From the very outset, Contractors, PNAB threw themselves heart and soul into their Navy assignment. Unhesitatingly they gave their best men to the project; they pooled their resources, their equipment, their ideas. The many problems that these men met and solved, the constantly increasing urgency of their work, the hardships which proved to be so much a part of it, make as thrilling a story as any that the war produced. Nothing that these men were called upon to do was strictly routine; imagination, ingenuity and persistence were as much a part of their job as was their building skill.

Take, for example, the project of devising underground storage for four million barrels of Navy fuel oil at Pearl Harbor. No simple burying of tanks, this, but the hollowing-out of a whole mountain and the installing of gigantic bomb-proof, specially designed concrete vaults, up-ended a hundred feet below the surface of the earth.

Or consider the erecting of a radio station powerful enough to reach around the world, a station whose aerials were raised on facing cliffs with sides so steep that it took the men who climbed them, patiently driving spike after spike into the rock for footholds, 23 days to reach the top! And when the station went into operation it so electrified the atmosphere that the rainfall was cut down and the normally wet region almost dried up.

Contractors, PNAB, were civilians. They were used to being their own bosses, to drinking their beer when they wanted it, Navy routine and Navy red tape were new to them. But if the Navy wanted something built, by gosh they'd build it, no matter what it was. They took everything in stride, even the omnipresent gooney birds on Midway. And in the end, of course, the war caught up with them: when the Japs had swarmed over their little coral pin-pricks and gallant Wake had fallen, many of them were whisked away to three long years of Jap internment.

HARMONY AND COMFORT Furniture for Your Home. By Gladys Miller. New York 10 (114 E. 32nd St.), M. Barrows and Co., Inc., 1946. v by 9 in. xiv + 290 pp. illus. $3.50.

Harmony and comfort are the goals held up by Gladys Miller throughout this book. Like most modern decorators, she condones mixtures of style so long as harmony is achieved, and has scant patience with furniture for furniture's sake. She wants the home furnished "for use and pleasure 24 hours a day."

This is a basic book, angled frankly for appeal to the young homemaker. It describes and illustrates the various styles of furniture, tags them "formal" or "informal," assesses their practicality and adaptability. It discusses the functions of different rooms, the placement of furniture, the selection of fabrics and colors. And it winds up with a glossary of terms the novice may find confusing.

MODULAR BUILDING
AS2 Guide for Modular Coordination. By Myron W. Adams and Prentice Bradley. Boston 16, Mass. (110 Arlington St.), Modular Service Assn., 1946. 8 by 12 in. 290 pp. illus. $10.00

With the increasing and important stress on dimensional coordination as a means of speeding up and reducing the cost of all types of construction, here is a volume which will be a very welcome addition to the reference library of every architect and engineer. Its usefulness, in fact, can hardly be overemphasized.

As the foreward to the volume points out, producers of building materials and equipment are adapting their products to the principles of modular coordination "to a gratifying degree." Coordinated sizes already have been adopted for brick, structural clay tile, concrete masonry, glass block, structural facing tile, steel windows and wood double-hung windows.

This Guide, intended to help architects and engineers take full advantages of these modular products, was prepared under the direction of American Standards Association Project A62, sponsored by the American Institute of Architects and The Producers' Council. Consisting of accurate scaling drawings and a minimum of text, it presents the whole subject in a way that is both quickly understood and highly workable. Included are: an explanation of the principles of modular coordination in their application to the various classes of building products and types of construction; the derivation of the standard basis for modular coordination; a reference table for height coordination; and reprints of the three coordination standards thus far approved.

FOR QUICK REFERENCE
Time-Saver Standards. New York 18 (119 W. 40th St.), F. W. Dodge Corp., 1946. 8¼ by 11 in. 656 pp. illus. $12.00.
Reviewed by EUGENE RASKIN

Architects and draftsmen have long been familiar with the Time-Saver Standards as they appeared first in the American Architect and, in the Architectural Record. The creation of such "installment" reference material is an extremely difficult task, calling for a high degree of editorial imagination, technical skill and the coordination of the work of many specialists. It is not enough merely to print useful data (such can be found in many standard reference works)—there must be continuous coverage of new problems arising out of new building types that appear in a constantly changing social and industrial pattern. And each such problem—whether it deals with runways for airports or ducts for air conditioning—must be presented with sufficient background material to make the data meaningful.

This job the editors of Time-Saver Standards have done splendidly for more than a decade. In addition they have devised an excellent format which serves the ful function of facilitating the use of the Standards and of making the Standards pages readily distinguishable from the balance of the editorial pages of the magazine.

Now the Time-Saver Standards since 1935 have been put together in a single, handsomely bound volume which should be eagerly welcomed by architects, designers and students everywhere. True, the format which served so well when limited to several pages per issue of the Architectural Record seems a trifle over-bold when gathered into a 656-page tome, but the usefacility which it offers is not impaired.

In fact, that use-facility is tremendously increased by the addition of a 12-page index which comes closer to being the perfert architectural reference index than any other I have seen. Among man's most unrewarding pasttimes is the familiar one of trying to guess under what heading a desired item might be listed. One usually guesses wrong. But this index is so skillfully cross-referenced that it would take considerable ingenuity to avoid finding what you want. For instance: **Backgammon Tables,.. Concrete** may also be found under **Concrete Game Tables** or under **Games, Backgammon.** With concentration you can find one or two omissions, but on the whole it is a splendid index, one which will do almost as much time-saving as the Time-Saver Standards themselves.

All-State Welding Presents Low Temp. Aluminum Solder

WHITE PLAINS, N. Y.—All-State Welding Alloys Co., Inc., announces the immediate availability in unlimited quantities of a still lower-temperature rub-on solder that opens up a new range of soldering applications for aluminum work. This addition to the All-State line of low-temperature welding and brazing alloys is an amazingly economical alloy that is applied without flux.

Prime applications of this alloy are developing rapidly among companies requiring the assembly of aluminum shapes and wire in production work. As used on aluminum castings, this alloy has good matching color and fair corrosion resistance.

It is recommended for filling and soldering where tightness is essential but strength is unimportant; and also for the repair of blowholes; for building up worn surfaces on aluminum castings; as well as for salvaging and making changes on foundry patterns.

It is also excellent for repairing cracks in aluminum cylinder heads and for filling in surface defects where high temperatures must be avoided. This alloy is known as All-State No. 39 aluminum solder rod.

New Cable Control Adopted for Diesel Engine Caterpillars

PEORIA, Ill.—In order to provide a lower cost rear-mounted double drum cable control unit for use with "Caterpillar" Diesel D6 and D7 Tractors, Caterpillar Tractor Company is now producing a new cable control designated as the No. 23.

Designed to develop line pulls ample to meet service requirements imposed by the operation of scrapers, bulldozers and rippers, the new cable control provides smooth, easy operation with a minimum of adjustments.

The No. 23 offers all the features of the company's No. 25 rear double drum cable control and the No. 24 single drum, front-mounted control, including the smooth performing multiple disk type clutch which has been a performance feature of "Caterpillar" track-type tractors for years.

#

OPEN $300,000 FIBRE GLASS PLANT IN EAST

PATTERSON, N. J.—The new plant of John H. Hand and Sons, manufacturers of tie silks and fibre glass, valued at $300,000, was opened last week. The new building is said to be one of the most modern industrial units in the country.

Temperature, humidity and cleanliness of air are artificially controlled both winter and summer to insure comfortable working conditions which are also right for the manufacturing process. Lighting is also controlled to maintain correct and uniform intensity and cut operators' fatigue.

The entire roof surface of the plant, as well as the side walls and office walls are insulated with fibre glass. Fibre glass walls have been installed as accoustical aids in various locations.

#

Candidates for an assistant forestry engineer position will be examined by the state civil service commission March 18. The salary scale is $295 through $355.

Did You Know - - -

Announcement was made recently that four new portable light and power units are on the market. Each unit is built around a 5,000 watt Westinghouse generator driven by a 15 hp., 4-cylinder air-cooled engine. Mounted on a trailer available in skid or two-wheel mountings, the unit weighs about 1700 pounds. These are primarily lighting devices, but are capable of supplementing existing power facilities and supplying power for electric tools.

oOo

Altico—a tile innovation made from pure aluminum—is finding new applications in residences and business buildings. Originally designed for kitchen and bathroom walls, it now is being used also for laundry, nursery, gun-rooms, rumpus room walls and ceilings. In business buildings it is being used in lobbies, foyers, store fronts, offices, restaurants, bars and public lavatories. It is an individual tile four and half inches square, and comes in sixteen colors.

A lighter-than-cork rubber for insulating refrigerators and freezing units, known as cellular rubber is said to be more effective than cork as an insulator. It will not absorb moisture, is resistant to fire, rot, acids, oil, vermin and termites. It is especially recommended for refrigerator trucks.

oOo

Stock truss system under which details, calculation, cutting lists and layout diagrams are supplied for use in steel fabricators has been developed. With no further engineering, the fabricator using the system can produce 635 different roof trusses, it is said. Although not intended to cover all types of special roof designs, the system does provide a stock truss for the majority of buildings which are designed for uniform roof and ceiling loadings. Use of arc welding in the fabrication is said to eliminate much excess weight. No welding during erection is necessary unless by choice of architect or engineer. Trusses are delivered to the job in one, two or three pieces, according to span length, and bolted or riveted together.

oOo

The new "Micro-Metric" throttle control lever, just announced, provides vernier adjustment of throttle openings. The level can be instantly locked in any position, providing a degree of adjustment as small as .001 inch. This "Micro-Metric" adjustment is accomplished without the use of latches engaged with quadrant teeth. A pinion mounted on the lever handle meshes with the teeth of the quadrant. Expansible brake shoes actuated by a cam bearing inside the pinion locks the pinion in any position. The cam is controlled through linkage from the level handle. As there is no strain on either pinion or quadrant teeth, wear is eliminated, since the lever position does not in any way depend on the number and size of teeth on the quadrant; "micro-metric" adjustments are possible.

#

A plan is afoot for **Alameda** to be added to the state highway system and thereby become eligible for state aid in building and improving city roads.

oOo

A petitions now being circulated asks that postwar highway plans allow a priority on construction of the portion of the Fall River Mills-Dana road, near Fall River Mills, instead of following a plan to begin at a point on Highway 89 five miles north of Dana.

Low and Only Bidders
Sewage Plant
PERRIS, Calif., Riverside Co.
Owner—City of Perris, Mrs. Mildred B. Martin, city clerk, City Hall, Perris, Calif.
Consulting Engineers—J. M. Montgomery, 666 Lafayette Park Place, Los Angeles and Richard Pomeroy, 177 E. Colorado St., Pasadena, Calif.
Includes sewage treatment plant, sewer lines and appurtenant works
Low Bidders—Pernel Barnett, 747 W. Chapman, Orange, Calif., (Sch. 1) $48,400 and O'Shaughnessy Constr. Co., 400 Piru, Compton, Calif., (Sch. 2A) $73,600.26 (Sch. 2B) $70,099.83.
Bids were received Jan. 25 as follows:

Schedule I

(1) lump sum for the construction of a sewage treatment plant consisting of a pump house, Imhoff tank, the pipe lines and structures (exclusive of earth dikes) for five sludge beds, two spreading ponds, and four oxidation ponds, including appurtenances (exclusive of plant fencing) complete;
(2) lump sum, for the construction of roiled earth dikes for five sludge beds, two spreading ponds, and four oxidation ponds complete;
(3) lump sum furnishing and installing plant fencing and appurtenances complete;

Schedule 2A—vitrified clay sewer pipe lines, etc.
Schedule 2B—nonreinf. concrete sewer pipe, linea, etc.
Total bids were:

SCHEDULE I
Pernel Barnett—(1) $41,400, (2) $200, (3) $5003; total Sched. 1, $48,400.
Walter H. Barber and H. R. Breeden—(1) $40,000, (2) $5105, (3) $4546.30; total $49,651.50. Stipulation: will not accept Sched. 1 without 2A or 2B.
Ke Ston Construction Co.—(1) $47,-900, (2) $9560, (3) $4600; total, $61,860.
Thomas McIlvenna—(1) $49,900, (2) $17,500, (3) $4600; total, $72,000.
Haddock Engineers, Ltd.—(1) $59,-460; (2) $8350, (3) $4790; total ,$72,-600.
O'Shaughnessy Construction Co.—(1) $67,825.20, (2) $7500, (3) $5700; total, $81,025.20. Stipulation: Combined award of Scheds. 1, 2A or 2B, $70,-887.05.
Contracting Engineers Co.—(1) $54,900, (2) $33,600, (3) $5500; total, $94,009.

SCHEDULES 2A AND 2B
O'Shaughnessy Construction Co.—Sched. 2A, $73,600.26; Sched. 2B, $70,-099.83.
Fernel Barnett—Sched. 2A, $82,480.
Pipeline Construction Co.—Sched. 2A, $86,344.
Beskin & Brkich—Sched. 2A, $88,-552; Sched. 2B, $84,412.
Walter H. Barber and H. R. Breeden—Sched. 2A, $96,521.81; Sched. 2B, $92,704.46.
Ivan M. Metkovich — Sched. 2A, $103,585; Sched. 2B, $99,236.
Chorak Construction Co. and Bosk Construction Co.—Sched. 2A, $116,-237.79; Sched. 2B, $114,118.36.
Haddock Engineers, Ltd. — Sched. 2A, $12,268.30; Sched. 2B, $119,290.85.

2/4/47 31
FWA Funds Allotted In Amount of $91,500
Water Treatment Plant, Etc
Cost $2,087,300
GRAND JUNCTION, Colo., East of Palisade at elevation of 5,100
Owner—City of Grand Junction, Herbert D. Fritz, City Mgr., Grand Junction, Colo.
Treatment plant, 24 in. cast iron supply main, through which water will flow by gravity from treatment plant to a clear water reservoir near Municipal Airport and 30 in. cast iron supply main from the reservoir to northern City limits.

2/4/47 31
Contract Awarded
Install Penstocks; Spec. 1514
Cost $448,800
CENTRAL VALLEY PROJ., Calif. Shasta Dam, Kennett Division, nr. Coram, Calif.
Owner—U. S. Bureau of Reclamation, Redding, Calif.
Plans by Engrg. Dept. of Owner.
Completion of installation of Penstocks Numbers 1, 2 and 5, including transporting, installing welding and testing remaining portions.
Contractor—Eichleay Engrg. Corp., 33 South 19th St., Pittsburgh, Pa

33— BRIDGES

2/4/47 33
Contemplated
Bridges
YUBA CO., Calif.
Owner—Yuba County Board of Supervisors, A. Conley, county clerk, Hall of Records, Marysville, Calif.
Projects include.
(1) reconstruction of Oregon Creek bridge, $10,285
(2) reconstruction decks of Carlin and Bio Bio bridges, $40,000
(3) 2 concrete bridges to replace wooden structures on Virginia Road, $10,000.

34—DAMS, RESERVOIRS & DREDGING

1/28/47 34
Owner Taking Bids—Due Feb. 25, 1 P. M.—Unit Quantities
Los Angeles River Channel Improvements; Spec. 47-21 Cost $2,000,000
LOS ANGELES COUNTY, Calif. Between Niagara St. and Lankershim Blvd., river mile 23.7 to river mile 35.4 in the cities of Burbank and Los Angeles.
Owner—Los Angeles District Corps of Engineer, War Department, 751 S. Figueroa St., Los Angeles, Calif.
Plans by engineering department of owner.
9000 lin. ft. of river channel improvement and appurtenant consisting of rectangular reinforced concrete section with a rectangular low water channel in the center. Portions of the invert on curves will be superelevated. Subdrainage will consist of a sand and gravel filter under the invert, supplemented by tile drains, embedded in gravel, placed behind the channel walls and beneath the invert. An additional span, concrete bearing piles, steel bearing piles, concrete diaphragm, pier extensions will be required for the Barham Blvd. bridge, which will require construction and removal of a detour on Rose St. Other features include removing the existing downstream sheet pile cutoff and backfill, construction of concrete and metal pipe side drains, fencing, planting lawn and installing suspended water line and timber guard railings. The work involves:
(1) lump sum, diversion and control of water;
(2) lump sum, clearing site and removing existing obstructions;
(3) 3000 cu. yds. rock excavation;
(4) 408,000 cu. yds. channel excavation;
(5) 200 cu. yds. structure excavation;
(6) 900 cu. yds. levee and spillway excavation;
(7) 24,000 cu. yds. excavation for removal of unsuitable soils;
(8) 178,800 cu. yds. compacted fill;
(9) 24,000 cu. yds. structure fill;
(10) lump sum, Rose St. detour;
(11) 36,586 cu. yds. concrete in invert slabs;
(12) 1225 cu. yds. concrete in walls of low water channel;
(13) 12,900 cu. yds. concrete in wall bases and footings;
(14) 12,800 cu. yds. concrete in main channel walls;
(15) 325 cu. yds. concrete in substructures;
(16) 70 cu. yds. concrete in superstructures;
(17) 290 cu. yds. concrete in spillways;
(18) 70 cu. yds. concrete, miscellaneous;
(19) 94,385 bbls. portland cement;
(20) 6,406,000 lbs. steel reinforcing bars;
(21) 6200 lbs. steel reinforcing fabric;
(22) 12,100 each sleeves for type A joint;
(23) 17,800 each sleeves for type E joint;
(24) 495 lin. ft. concrete piles;
(25) 3200 lin. ft. driving steel bearing piles;
(26) 150 each splices of steel bearing piles;
(27) 128 each cape for steel bearing piles;
(28) 2100 sq. ft. steel sheet piles, 22 lbs. per sq. ft.;
(29) 1100 sq. ft. steel sheet piles, 32 lbs. per sq. ft.;
(30) 68,500 lbs. structural steel;
(31) lump sum, handrailing;
(32) 21,700 cu. yds. drain material;
(33) 24,000 cu. yds. filter material;
(34) 7770 cu. yds. filter drain material;
(35) 240 lin. ft. removing and replacing existing 6-in. tile drain;
(36) 120 lin. ft. 6-in. tile drain;
(37) 32,000 lin. ft. 8-in. perforated VCP drain;
(38) 1930 lin. ft. 12-in. perforated VCP drain;
(39) 150 lin. ft. 12-inch corrugated metal pipe;
(40) 276 lin. ft. 18-inch corrugated metal pipe;
(41) 118 lin. ft. 24-inch corrugated metal pipe;
(42) 112 lin. ft. 36-inch corrugated metal pipe;
(43) 35 lin. ft. 48-inch corrugated metal pipe;
(44) 1 each 36-in. automatic drainage gate;
(45) 2 each subdrain riser and hood;
(46) 2500 sq. yds. planting grass;
(47) 425 tons bituminous surfacing;
(48) 200 cu. yds. derrick stone;
(49) lump sum, suspended water line;
(50) 17,750 lin. ft. channel fence;
(51) 340 lin. ft. removing and replacing existing channel fence;
(52) 110 lin .ft. spillway fence;
(53) 40 sq. ft. brickwork in wall openings;
(54) 72 lin. ft. timber guardrail;
(55) 20 lin. ft. removing and relaying 10-in. CIP bioworff line;
(56) 192 lin. ft. relaying 60-in. corrugated metal pipe;
(57) 50,000 squares (100 sq. ft.) additional sheepfoot rolling;
Alternate for Items No. 32 and 33
(58) 65,700 cu .yds. filter drain material.
Specifications obtainable from the above office; no deposit required.

38— ELECTRIC LIGHTING TRANSMISSION LINES

2/4/47 38
Contract Awarded
Traffic Signal Systems Cost $19,500
LOS ANGELES CO., Calif., Seven intersections on Firestone Blvd., between Hooper and Santa Fe Ave.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Includes furnishing and installing fixed time traffic signal systems at intersections of Firestone Blvd. with Hooper Ave., Zamora Ave., Malo Ave., Glendale Av., Cedar St., Bandera St., Fir St., Beaudine Ave. and Santa Fe Ave.
Contractor — Prescott Electric & Mfg. Co., 4389 Radium Dr., Los Angeles, Calif.

39—SEWERS

1/31/47 39
Plans Nearing Completion—Owner Probably Will Ask Bids About Feb. 13
Outfall Sewer
LOS ANGELES CO., Calif., From Rives Ave. and Florence Ave., to Washington Blvd.
Owner—Los Angeles County Sanitation District No. 2, A. M. Rawn, chief engr., and general manager, 3rd floor, 1206 So. Maple Ave., Los Angeles, Calif.
Plans by engrg. dept. of owner.
Unit 1, Section 7, Joint Outfall "B" sewer approx. 17,000 ft. long of 57 inch and 63 inch reinf. concrete pipe.

40— STREETS AND HIGHWAYS

2/4/47 40
Owner Taking Bids—Due Feb. 18, 10 A M.
Grading, Bridges, Surfacing
WASHINGTON
Owner—State of Washington, Clarence B. Shain, Director of Highways, Olympia, Wash.
Plans by owner.
Projects include:
1. Clearing, Grubbing, and Grading on 1.164 miles of P.H.S. No. 1, Longview Wye to Davis Terraces in Cowlitz County, F.A.P. Nos. FI-147 (13) and FI-32 (5) Unit 2, involving about 21 acres of Clearing, 8 arces of Grubbing, 68,540 cubic yards of Common Excavation, 132,090 cubic yards of Solid Rock excavation, 1,220 cubic yards of Crushed Stone Surfacing, 35 cubic yards of Concrete, 4,538 pounds of Steel Reinforcing Bars, 1,131 linear feet of Culvert Pipe and other items.
2. Revising existing portals on the following steel bridges: Nooksack River Bridge at Ferndale on P.S.H. No 1 and Nugents Birdge over Nooksack River on P.S.H. No. 1 (Austin Pass Branch) in Whatcom County; Stillaguamish River Bridge and Koch's Slough Bridge on S.S.H. No. 1-E near Silvana in Snohomish County; a State Project, involving about 10,800 pounds of Structural Steel and Lump Sum Removing Portions of Bridge (4).
3. Constructing a Reinforced Concrete T-Beam Bridge, 359 feet long, across the Wenatchee River on P.S.H. No. 2 in the vicinity of Dryden in Chelan County, F.A.P. No. F-209 (2) Unit 2, involving about 680 cubic yards of Structure Excavation, 1,-280 cubic yards of Concrete, 712 linear feet of reinforced Concrete Bridge Railing, 260,000 pounds of Reinforcing Steel Bars, 11,000 pounds of Structural Steel and other items.
4. Surfacing and Stockpiling on 5.-32 miles of P.S.H. No. 8 Queets to Clearwater Road in Jefferson and Grays Harbor Counties, a State Project, involving about 15,800 cubic yards of Crushed Stone Surfacing on Roadway. 1,700 cubic yards of Crushed Cover Stone in Stockpile, 1,-640 cubic yards of Crushed Stone Surfacing in Stockpile and other items.
5. Clearing, Grubbing, Grading and Surfacing on 0.958 mile of S.S.H. No. 7-B, Ellensburg Vicinity in Kittitas County, a State Project, involving lump sum Clearing and Grubbing, 3,-310 cubic yards of Excavation, 10,100 cubic yards of Common Borrow, 7,-110 cubic yards of Selected Roadway Borrow, 1,660 cubic yards of Crushed Stone Surfacing, 35 cubic yards of Concrete, 1,142 linear feet of Culvert Pipe and other items
6. Clearing, Grubbing, Grading, Surfacing and constructing a Reinforced Concrete Girder Bridge over Rattlesnake Creek on 0.412 miles of S.S.H. No. 6-D, Kusum Vicinity Extension, in Klickitat County, F.A.S. No. S-247 (2), involving about 15,650 cubic yards of Unclassified Excavation, 317 linear feet of Culvert Pipe, 257 cubic yards of Concrete, 47,000 pounds of Steel Reinfocing Bars, 188 linear feet of Reinforced Concrete Bridge Railing and other items.
7. Constructing a 78 in. Corrugated Metal Culvert at Mile Post 10.635 and a 78 in. Corrugated Metal Cattle Pass at Mile Post 13.371 on State Historical Road No. 1, junction P.S.H. No. 1 to Puyallup in Pierce County, a State Project, involving about 56 linear feet of 78 in. Bituminous Coated Corrugated Metal Pipe, 52 linear feet of 78 in. Plain Galvanized Corrugated Metal Pipe and other items.
Specifications obtainable from the above office upon payment of $2 not refundable.

2/4/47 40
Contract Awarded
Clear Reservoir Site; Spec. 1540
Cost $348,700
BOISE PROJECT, Idaho. Cascade Reservoir site, Payette Division, on north fork of Payette River, nine to 17 miles north of Cascade, Idaho.
Plans by engineering department of owner.
Contractor—W. D. Zavalas, Oroville, Calif., $348,700.

2/4/47 40
FWA Funds Allotted in Amount of $3,500
Street Improvements Cost $65,736
PINE BLUFFS, Wyoming.
Owner—Town of Pine Bluffs, O. A. Elwood, chairman of Public Works, Pine Bluffs, Wyo.
Includes paving, draining, grading of streets, avenues and alleys.

NEW *Improved*
SCOOPMOBILE
Five NEW
IMPROVEMENTS!

1 NEW "Shovel Action" BUCKET
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!

2 HAND LEVER CONTROL
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.

3 DISCHARGE ACTION
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.

4 NEW COUNTER BALANCE
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.

5 CONTROLLED DIGGING ACTION
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

MOBILE - EFFICIENT - ECONOMICAL
HOPPER ATTACHMENT HOISTS AND POURS CONCRETE . . . LIFT FORKS LOAD, CARRY AND STACK . . . CRANE BOOM HANDLES UNWIELDY MATERIAL
SOLD AND RENTED BY

TRAXCAVATE for PROFIT

The profitable machine on any job is the machine that keeps busy
The TRAXCAVATOR—front-end loader built by THE TRACKSON CO. and mounted on a "CATERPILLAR" diesel tractor—has been called "the busiest machine on the job" by many builders. It's the perfect machine for jobs that involve digging, loading, leveling, or backfilling, and for the handling and rehandling of materials.
HIGHLY VERSATILE
EASILY MOVED FROM JOB TO JOB

Copyright 1946 by F. W. Dodge Corporation

PLANS and Speculations

State civil service exams will be given candidates for a position as assistant architectural draftsman on March 8. Other exams to be given soon are for senior engineer, design and construction of dams, March 13; junior highway engineer and junior bridge engineer, March 15; and for under, junior and senior engineering aides, on March 22.

oOo

A joint army-navy board has approved construction of a second San Francisco Bay bridge. Reportedly, the most favored site runs from a point near Bay Farm Island to a terminus near Hunters Point. The board recommended a bridge and viaduct.

oOo

Assemblyman Richard J. Dolwig, South San Francisco, has proposed that the state park commission purchase the 5000-acre Buland Oso forest in San Mateo County as a living memorial to men and women who died in World War II.

oOo

Settlement of the year-old strike in the redwood industry may be effected soon. A U. S. labor conciliator announced recently that the union and employers have temporarily concluded negotiations and a proposed contract will be submitted to both.

oOo

Highway construction being considered by the state legislature includes a four-lane divided highway through Porterville, estimated to cost $1,063,000.

oOo

Sacramento is prepared to demand immediate action by Sacramento City Lines to remove all street car tracks not covered in previous franchise agreements.

oOo

Seven additional traffic control signals have been recommended for three locations in Richmond.

oOo

Making the Greenbrae intersection of U. S. 101 and Sir Francis Drake Highways safe by a grade separation is expected to cost $2.3 million.

oOo

Big Sur Lodge, last year destroyed by fire, will be rebuilt, the state park commission recently announced.

oOo

The Biggs (Butte County) City Council is seeking a method to set a nominal sewer extension charge for new homes being erected in the city.

#

ARCHITECTURAL MEET

A meeting of the Architectural Club will be held at 8 p. m., Wednesday, February 5.

Technical Engineers, Architects, Draftsmen Seek Blanket 25c Per Hour Wage Increase

The technical engineers', architects' and draftsmen's union, local No. 89 executive board today announced its policy for 1947. The board unanimously endorsed, and pledged to seek adoption of decisions reached at a conference of union civil engineering personnel of the Bay Area counties, held recently.

Foremost among the decisions was the demand for a blanket 25c per hour wage increase for all classifications of engineers employed by general contractors or by land surveying and civil engineering firms, to be effective May 1. The union scale at that time will be:

	Contractors' Scale	Civil Engrg. Firms Scale
Head chainman, Junior draftsman, Junior inspector	$1.87½ per hour	$1.75 per hour
Instrumentman, Draftsman, Inspector	2.12½ per hour	2.00 per hour
Chief of Party, Senior draftsman, Senior inspector	2.37½ per hour	2.25 per hour
Assistant engineer, Assistant architect	2.75 per hour	2.75 per hour (above rates plus existing sick leave and annual vacation)

The union will seek to write a provision covering paid legal holidays into all new collective bargaining agreements with civil engineering firms.

Overall Association Labor Agreement Is Gelfan's Achievement

William Gelfan, of Los Angeles, is president of the California Council of Painting and Decorating Contractors of America. He was elected unanimously at the 1946 convention, after serving four successive terms as state vice president. A member of the organization for eighteen years, he has been specially active since 1936.

His name is most actively associated with progress toward closer working relations with organized labor and organized painting contractors. It was he who in 1935

WILLIAM GELFAN

proposed that the Los Angeles Association work out collective agreements with the labor union.

He succeeded in interesting a small group of the larger contractors in Los Angeles, who favored the overall agreement rather than individual negotiations—and in 1937 the idea of a closed shop and group agreement with labor was adopted by the Los Angeles Association.

Although the move split the Los Angeles membership, causing some contractors to withdraw, it gained popularity in operation, and today the Los Angeles unit is operating one hundred per cent with the union on a joint committee plan. More recently, the idea has been adopted by the California Council and all its local associations.

Gelfan has been in the business 25 years. One of his present campaigns is for greater recognition of the painting contractors as one of the large volume businesses of the country.

GROOVER AND I

THE SOLID (?) SOUTH

The "Solid South" is almost extinct—something existing in the Land of Memories. Lavender and cornflowers pressed between the Pages of the Past.

☆ ☆ ☆

To realize this look at the record of votes cast in the 1944 Presidential Election:

☆ ☆ ☆

In all that vast empire of cotton and intolerance, hate and sweet potatoes there was only one County which voted "solid".

☆ ☆ ☆

There was not a single Republican vote cast in Allendale County, South Carolina—the only spot in the entire South where Senator Claghorn could feel completely at home and comfortable.

☆ ☆ ☆

In Calhoun and McCormick Counties there was one Republican vote in each—while in Edgefield and Hampton Counties the polls were crowded and crawling with three Republicans each.

☆ ☆ ☆

Georgia, with a Klu-Kluxer under every bed sheet and two governors in every State House, the Republican infiltration reached the alarming proportion of six Republican votes in Taliferro County.

☆ ☆ ☆

Now, you may begin to understand why Bilbo so valiantly fought to protect the honor of his Mississippi — he didn't want another Georgia—

☆ ☆ ☆

There were five Republicans voting in Sharkey County, Mississippi!

Ringrose Decorated By Belgian Consul

Major Harold Ringrose was decorated with one of Belgium's highest honors—the Order of Leopold with rank of officer—at ceremonies at the Palace Hotel Saturday evening.

For his services as town mayor of Brussels, Liege, Antwerp, and other Allied headquarters, he was commended for displaying "great tact and diplomacy in requisitioning both properties and Belgian civilian labor."

Last August 22, the major was decorated in absentia by Prince Charles, Belgian regent. The presentation was made here by the Belgian consul-general.

Ringrose previously had received such decorations as the Army Commendation ribbon just after V-E Day, and a medal for the liberation of Liege.

He was with the corps of engineers. Before the war he was a member of the firm of Anderson & Ringrose, which started in San Francisco at the turn of the century. Since his return he has been associated with Swinerton & Walberg.

MORE DORMITORIES FOR DAVIS CAMPUS

DAVIS, Feb. 5. — Three more dormitories, to house 210 students, will be moved from Benicia and erected on the Davis campus of the University of California.

This action has been taken by the regents of the university to relieve the housing congestion in the College of Agriculture at Davis. The buildings, it is planned, will be ready for the fall semester.

The dormitories have been obtained from the army at the Benicia Arsenal and will be torn down, moved to the campus as soon as possible, and reconstructed for use there.

Painting Contractors Open 43rd California Convention at Palace

Master Painting & Decorating Contractors of California—at least 300 strong—will open that organization's 43rd annual state convention Thursday, Febr. 6, at the historic Palace Hotel in downtown San Francisco.

The state association has 26 chapters, boasting some 1,800 members. Six new chapters were organized in 1946 in the area from Sacramento south. The organization expects to have chapters in many other cities by 1948, but, nevertheless, still is the largest trade association of the building industry in California.

Preceding the convention, members of the executive board and their wives will attend a dinner meeting at the Palace Hotel, Wednesday evening.

Mayor Roger D. Lapham will be on hand to welcome delegates to the city when the convention opens Thursday. His will be one of the few addresses of the session, as the convention will be devoted almost entirely to organization business.

Following are some of the main events of the three-day meeting:

THURSDAY —noon: luncheon for delegates and their wives, Palace Hotel; evening: President Wm. Gelfan, Los Angeles, entertains past-presidents at dinner, Monaco's Restaurant.

FRIDAY —noon: ladies' luncheon and card party; noon: men go to W. P. Fuller plant in South San Francisco for luncheon and tour of the factory; evening: cocktail party, 8 p. m., Palace Hotel.

SATURDAY —annual banquet and entertainment event.

The program was planned by the host chapter's executive board, led by Andrew Jorgensen, board president; Michael Carroll, secretary; and Mrs Joseph Eckhart.

'Construction Fund Under Contract by June 30'-Purcell

SACRAMENTO—Testifying before the Senate Committee on Transportation this afternoon, Director of Public Works C. H. Purcell branded as "ridiculously misleading" advertisements sponsored by the Western Oil and Gas Association and appearing in many California newspapers which make the statement that "the state has enough money to build new roads without increased taxes."

The advertisements seek to show that the state has a surplus of $35 million for highway construction purposes.

#

Californians Take Many AGC Offices

CHICAGO.—Among the 19 directors the Associated General Contractors of America elected at the closing session of their 28th annual convention here were three contractors from the far west. They were:

Roy L. Blair, R. L. Blair & Co., Spokane, Wash., Highway District 1; Fred J. Early, Jr., Fred J. Early Jr., Co., San Francisco, and John MacLeod, Macco Constr. Co., Clearwater, Calif., both of District 2.

B. F. Modglin, of MacDonald & Kahn, Inc., San Francisco, and A. L. Atherton, Atherton Constr. Co., Seattle, Wash., were appointed to the AGC building contractors' division.

Gordon Ball, of N. M. Ball Sons, Berkeley, was named to the highway contractors' division, and A Teichert, Jr., of A. Teichert & Son, Inc., of Sacramento, was appointed to the heavy construction and railroad contractors' division.

Trestle and Tube Selected for Six-Mile Bay Crossing

WASHINGTON. — A $261 million low-level six-lane combination causeway-tube across San Francisco Bay south of the present bridge was recommended by the joint army-navy board, the War Department announced today. The six-mile crossing would connect Fifth St. in Alameda with Army Street in San Francisco. A four-lane tube would be built under the Oakland Estuary emerging at 6th, Clay and Washington Streets in downtown Oakland.

The report recommended that the San Francisco side of the crossing be built on a trestle 15 feet above low water. It would extend approximately 3600 feet out into the Bay, and then would go into an underwater tube some 6400 feet long. Its median 1500 feet would be 81 feet below the surface of the Bay, allowing a 50-foot navigational channel.

The report suggested that such construction would fit in well with the plan of the City of San Francisco, and would relieve congestion in downtown districts of both cities. It was pointed out that the low-level plan would make possible future expansion to include transcontinental railroads, and that it would make Bay crossing facilities less vulnerable to attack in time of war.

Coordination Of Building Materials Dimensions Needed

WASHINGTON. — Savings in construction costs arising from the adoption of modular coordination in the manufacture of building products will become available to the public more quickly as a result of the $65,000 grant made to the Modular Service Association by the office of technical services of the U. S. Department of Commerce.

Tyler S. Rogers, president of the Producers' Council, stated: "The funds will be used to expand and intensify research in methods of coordinating the dimensions of building products in such a way as to eliminate need for cutting and fitting materials on the building site, thus permitting important savings in both time and materials.

"There also will be further savings in the manufacture and distribution of modular materials. These added savings will result from a greater degree of mass production and from lower inventory costs.

"Much research remains to be done with respect to other commonly used building materials, and the grant from the office of technical services will help greatly to speed up the process. The program of the Modular Service Association heretofore has been financed with funds from the estate of the late Albert Farwell Bemis, who was a pioneer in the field of coordinated dimensions.

"The extent of the savings which can be realized in construction costs by the use of modular coordination cannot be estimated with any accuracy until more materials have been made available with coordinated dimensions and until a variety of typical structures actually has been built with such materials. However, enough is known to warrant the statement that the total savings will be substantial.

"The Industry - Engineered Houses being developed by the Producers' Council and the National Retail Lumber Dealers' Association have been designed thruout on the modular basis, which will account for a major part of the savings anticipated in the building of engineered houses."

PLANS and Speculations

On March 13, exams will be given to select a senior engineer for design and construction of dams ($435-$535) for state civil service. Other exams announced recently include water and sewage plant supervisor ($230-$270), on March 27; assistant highway engineer ($310-$370) on April 3; and junior oil and gas engineer ($250-$310), on April 19.

oOo

Governor Earl Warren stated that the second crossing across San Francisco Bay should be constructed within the next six years, commenting: "We have reached the saturation point on the present bridge."

oOo

Instalaltion of traffic signals at two intersections of the Arnold Industrial Highway is being urged by the Martinez chamber of commerce.

oOo

FWA has approved a federal advance of $22,300 to finance preparation of plans and specifications for a senior high school for Chehalis School District No. 302, in Lewis County, Wash. Estimated cost of the project is $624,000.

oOo

Grading and surfacing streets of Browning, Mont., with asphaltic concrete is estimated to cost $113,753. A federal advance of $5,200 has been made for plans and specifications preparation.

oOo

A Vallejo citizen has asked the California Toll Bridge Authority to give consideration to the possibility of construction of a vehicular tube across the Straights of Carquinez. Estimated cost is $12 to $15 million.

oOo

Juvenile Court Magistrate A. F. Bray urged the Contra Costa County board of supervisors to select a building site "large enough so that in ten or fifteen years we won't be stifled for room." Tentative plans already have been drawn for a new building.

oOo

Forty Solano County farmers have signed to form a Solano County irrigation district. A rec bureau representative told the group that a dam on Putah Creek is necessary to irrigate county lands. Before any action is taken, an election must be held to determine whether or not the irrigation district shall be formed.

oOo

The first showing of ready cut houses constructed by the California Homes Inc., at Sanger, drew a large crowd last Sunday. Present production of the Sanger plant is four ready-cut houses per day.

FISHER IS NEW LEADER OF BAY AREA COUNCIL

R. E. Fisher, prominent Bay Area industrial executive and civic leader, was elected Chairman of the San Francisco Bay Area Council at its first quarterly meeting held Friday at the Commercial Club in San Francisco.

Fisher is vice president in charge of public relations and sales for the Pacific Gas & Electric Company. He has been in P. G. & E. service for 35 years, with 21 years as vice president of the corperation.

Born in Ellsworth, Kansas, he came to San Francisco in 1902.

Other Council officers elected were as follows: vice chairman, Frank E. Boyd, president, Pacific Electric Motor Co., Oakland, and treasurer, E. V. Krick, vice president and cashier, American Trust Co., San Francisco. Reelected were Frank E. Marsh, executive vice president and general manager, and C. C. Trowbridge, Jr., secretary.

Builders Forbidden To Tack On 'Extras,' Make Tie-In Sales

Incidental charges and extras cannot be added to the approved maximum sales price of a dwelling unit built under the Veterans' Emergency Housing Program when it is offered to a purchaser, the Civilian Production Administration said today. The ruling was contained in Interpretation 3 to Priorities Regulation 33.

The interpretation points out that under paragraph (g) of PR-33, a seller must not require a purchaser, as a condition of the sale of a dwelling, to buy or agree to buy, any commodity, service or property interest except where the regulation specifically permits these charges to be added to the sale prices. Examples illustrating the ruling were given in the interpretation. They are:

1. **Abstract Fees and Title Insurance:** The purchaser may pay the customary abstract fees and title insurance over and above the maximum sales price, unless the purchaser is required to take esese services when he does not want them.

2. **Financing Charges:** The purchaser may pay customary incidental charges (such as fire insurance, title insurance, mortgagee's appraisal fees, and future taxes) in connection with financing the purchase of a dwelling, if the purchase of these services is not made a condition to the sale. The purchaser must be given an opportunity to purchase the dwelling for cash at or below the approved maximum price and to finance the purchase himself in any way he desires. The seller cannot require the purchaser to finance the purchase throuhg a particular lending institution.

3. **Previously Incurred Charges:** Charges which have been incured by the builder before the sale of the dwelling must not be charged the purchaser in addition to the maximum sale price. A request that a prospective purchaser pay such charges for prior services would be making the charges a condition to the sale. Charges of this kind include accumulated taxes before the date of sale, interest before the sale, prepayment penalties in connction with a buildr's loan, fees for survey of site and liability and fire insurance before the sale.

4. **Charges for Additional Construction or for Equipment or Fixtures Not Specified in the Application:** The builder must publicly offer the building described in the application at or below the approved maximum sale price. He may not, under his authorization, do any additional construction in connection with the authorized construction over and above what is specified in the application, except where he gets written approval from the agency which approved the original application. He must not increase his sales price above the approved maximum sales price by reason of any such additional construction or added equipment, except where the increased price has been approved in writing by the agency which approved the original application.

#

DISCUSS NEW CROSSING

A meeting of members of the joint army-navy board and state officials will be called by the Bay Area Council for Tuesday, Feb. 18, it was announced today. It will be held at the Leamington Hotel in Oakland.

Financing details and proposed legislation on the proposed new bay crossing will be discussed in order that the state, county and municipal divisions and private interests concerned can formulate a broad plan and create an organization to finance, blueprint and build the crossing.

GROOVER AND I

EDISON CENTENNIAL

Thomas Alva Edison was born 100 years ago today. His dogged determination, genius and 1,097 patents influence the lives of more people today than the contribution of any other man, with the exception of Adam who invented the idea of wearing clothes.

☆ ☆ ☆

Edison was a man of determined will—almost to the point of bullheaded stubborness. From this the world benefited. He refused to be lured down the side roads of profitable dalliance, but stuck to his main highway of research. As a merchandiser and opportunist Edison missed the boat? It isn't on record that he tried to catch it: To Edison electricity meant the brute socko of "direct current"—and this was typical of his research approach.

☆ ☆ ☆

At any one of a dozen points he could have stopped and become wealthy beyond dreams. In addition to the incandescent light, and countless industrial contributions he could have owned all that has made Hollywood — or the phonograph industry—or radio—but radio is another story.

☆ ☆ ☆

Edison's first electrical love was the Morse telegraph instrument. To him, this was sacred. He tossed an electrician out of his laboratory because this young Italian insisted that telegraph messages could be sent without wires!

☆ ☆ ☆

Thus, wireless and all that has developed as radio was first conceived in Edison's laboratory, even though its birth certificate is signed elsewhere.

☆ ☆ ☆

Guglielmo Marconi also had determination, and a persistent courage — perhaps inherited from his Irish mother.

#

City Building Permits Highest Value in 20 Years, Sales Spiral

Real estate sales in San Francisco for 1946 established a new all-time high of $265 million, according to Thomas Magee & Sons, and were nearly 50 per cent above 1945. The former all-time annual record of $182,907,216 in 1925 was broken during the eighth month of 1946.

Building permits for 1946 numbered 8,089 with value of $42,251,771—highest in 20 years in dollar value. New residential permits accounted for 39 per cent of the total and provided for 3,112 dwelling units compared to 2,095 a year ago. Additions, alterations and repairs accounted for 25 per cent of the annual total and were valued at two and one-half times that of the preceding year.

Living costs climbed to new highs during 1946 in San Francisco, as in the nation, with the December Index at 160.4, or 18.1 above last December, bringing the 1946 average 8.2 per cent above 1945. Food costs compared to a year ago were up 14.9 per cent; clothing 8 per cent; rent, so far as reported, 0.2 per cent; house furnishings 2.2 per cent; miscellaneous 4.5 per cent; fuel, electricity and ice were down 7.4 per cent due chiefly to reduction in gas and electricity rates during the year.

ORGANIZE TO FIGHT CRITTENDON BILL 215

The board of directors of the Lumber Merchants Association of Northern California will meet at Palace Hotel in San Francisco at 10 a. m. on Friday, February 14.

George K. Adams, president of the Association, announced that one of the main topics on agenda will be a discussion of further action to halt the passage of Senate Bill 215 which calls for an appropriation of 25 million dollars to set the state government up in all phases of the lumber, building materials and home construction industries.

Building Research Board Established As Clearing House

WASHINGTON.—John C. Stevens, chairman of the construction industry advisory council, announced today that the National Research Council has agreed to set up a building construction research board to serve as a clearing house of technical research information in the field of building construction. This decision was reached at a conference with Dr. Frank B. Jewett, president of the National Academy of Sciences, and Dr. D. W. Bronk, chairman of the National Research Council of the Academy.

The new board will be patterned after the existing highway research board. Its principal function will be to collect and disseminate technical research information of importance to the building industry. It will also provide a meeting place at which those actively engaged in research activities will be able to exchange ideas and a mechanism for the correlation of activities carried on simultaneously by several organizations. No direct laboratory activity is contemplated.

The proposal to establish a building construction research board was advanced at a recent meeting of the construction industry advisory council, composed of more than 100 trade and professional associations with a direct interest in construction. It will be supported by contributions from the industry.

A meeting of construction industry leaders will be called in the near future by the division of industrial and engineering research of the National Research Council to determine upon acceptable procedure for setting up the new organization.

How Much Is Wall On A Quonset Hut?

The question of where the roof ends and the sidewall begins on a Quonset hut was given a partial answer by officials of the San Francisco office of the Contractor's State License Board. The point arose in a discussion between roof painters and wall painters as to the exact jurisdiction of each.

Louis Erb, deputy registrar, pointed out that under the State Housing Act, any building designed for occupancy must have a minimum ceiling of eight feet. In the case of a sloping roof, at least 50 per cent of the roof area must be eight feet from the floor while the sidewall in such cases shall be a minmum of three feet.

Further, deponent sayeth not.

#

WINS CHEMICAL AWARD

ST. LOUIS.—Dr. Anderson W. Ralston, whose work at the Armour Research Laboratories in Chicago resulted in extending the nation's failing iron ore supplies for at least 150 years, Sunday was named winner of the 1947 Midwest Award of the St. Louis section of the American Chemical Society.

Six Employer Groups Oppose Boosting $30 A Week Compensation

California ranks high among the states in the liberality of its workmen's compensation statutes and their interpretation, six major California organizations declared today following a long study of this field. Findings of the group have been presented in a memorandum to Senator Clarence Ward, chairman of the legislature's senate interim committee on workmen's compensation.

Proposals for increasing weekly disability benefits, elimination of the seven-day waiting period, and increasing industrial death benefits are opposed in the report.

The study and report were made by the Agricultural Council of California, California Self-Insurers Assn., California State Chamber of Commerce, Casualty Insurance Assn. of California, Employers' Council of San Francisco and the Waterfront Employers' Assn. of the Pacific Coast. Establishment of county medical panels and inclusion of attorney fees in employees' awards are held unnecessary by the group.

"Increase of maximum weekly benefits from $30 to $40 is based by proponents on rising living cost. There has been no relationship between living cost and weekly compensation benefits. The cost of living has risen and fallen since 1917, and since then, the maximum compensation rate has been increased from $20.83 to the present $30 weekly rate.

"Compensation payments are not subject to deductions for income tax, unemployment insurance of social security. Transportation costs and other incidentals are not incurred by the injured worker."

#

Housing Statistics Off Base, NAREB Head

WASHINGTON. — "Washington housing experts have been bidding against each other, like women at an antique auction, to build up the housing shortage," Morgan L. Fitch, Chicago, president of the National Association of Real Estate Boards, charged Friday.

'500,000 Adequate'

"First," said Fitch, "Wilson Wyatt wanted production to stabilize at a million units a year for ten years. General Fleming, boss of OTC, topped this by urging a million a year for 20 years. In a brust of enthusiasm, Senator Kilgore outbid them all by urging the construction of three million units a year. This would require the junking of every urban dwelling unit now standing in America within the next eight years.

"Each of these experts makes his bid in complete assurance against contradiction, because each states his bid in terms of 'need'. Need can be simply personal opinion, often hysterical opinion, but it's possible to arrive at actual need for housing in the light of our experience and way of living.

"The Urban Land Institute has studied the question carefully. It finds that annual house production of between 500,000 and 650,000 urban dwellings would not only take care of the number of new families, but would allow replacement of every dwelling that reached an age of 50 years.' The institute estimates that production of a million new homes in 1947 would take the edge off the housing shortage, which can be eliminated entirely in two years.

"This is consistent with findings of the semi-annual survey of the real estate market conducted by the National Association of Real Estate Boards.

"This shows that the line between 'housing shortage' and 'housing surplus' is fairly thin."

for a SUNNY SPOT *of warmth*
use a good and dependable
ELECTRIC HEATER
Sometimes the weatherman seems to guess wrong about the weather. But then he has a hard time satisfying the public.
There is one thing, however, we can all agree on when wintry winds blow and that is to stay in and hug the heat. And you'll make no mistake when that heat comes from a handy, portable electric heater. There you have an appliance that satisfies all the public. It is like turning on the sun when you plug in an electric heater in your home. See your dealer about your electric heater today.
P·G·and·E·
PACIFIC GAS AND ELECTRIC COMPANY
GOOD—this quality-built electric heater that gives forth fan-driven heat.
GOOD—this dependable and time-tested, double-action electric heater.

Painters Open 62nd Annual Conclave

GROOVER AND I

PAINTERS FIGHT THE EFFECTS OF WATER

Twice within as many weeks San Francisco has been host to organized Master Painters — this week it is the granddaddy organization—Painting and Decorating Contractors of America, meeting at the Fairmont Hotel.

☆ ☆ ☆

This is the first National Convention held in California in 25 years, and the first ever held in San Francisco; what those boys have missed, they will never know!

☆ ☆ ☆

Say, how long has this painting racket been going on, anyway? 544 2724 Alcatraz; owner, ... The National Association was organized in 1884.

☆ ☆ ☆

As a check point, 1884 was the year Mr. Waterman invented the fountain pen. (This was 16 years after Sholes and Glidden invented the typewriter—you see, you can't carry a typewriter in your vest pocket should you want to write under water.)

☆ ☆ ☆

There was much painting and decorating done on Solomon's Palace and Temple. Pitch was used in painting the seams of the good ship "Ark" commanded by Admiral Noah on the famous trip to Mt. Ararat — however, this painting was probably done by members of Noah's family—today it would be called a "Company Union" job.

☆ ☆ ☆

I wanted to mention Leonardo da Vinci, a well known painter of about 500 years ago, but "My Girl Tuesday" tells me da Vinci was not that kind of a painter—that he painted portraits and not houses.

☆ ☆ ☆

(How does she know? Among other things da Vinci was an architect, and if there are no da Vinci houses standing today, it may be on account of unseasoned lumber and no nails.)

☆ ☆ ☆

Getting back to 1884, that was about the time (one authority states 1886) when Boisbaudran discovered Dysprosium, an element of the Yttrium family (the latter discovered by Gadolin in 1794—if you are interested).

☆ ☆ ☆

Yttrium is an element which decomposes water. This may be the reason why some painters avoid drinking water.

☆ ☆ ☆

Who knows but what water is the cause of that ailment known as "Painter's Colic"?

RELAX RENT CLAMPS

WASHINGTON. — Liberalization of provisions under which owners of rental property can apply for increases in rent ceilings was announced today by the Office of Price Administration.

STATE CONVENTION.—Photographed during a tour of the W. P. Fuller & Co. factory at South San Francisco last Friday were these delegates to last week's California state convention of the Painting & Decorating Contractors of America (left to right): M. W. Hancock, Fresno; A. Lund, Sacramento; P. A. Castagnino, San Carlos; K. C. Sanders, Redwood City; Otto Burgmann, Redwood City; Clyde S. Simmonds, Sacramento; Albin Wendt, San Carlos; Jacob Friedman, San Francisco; A. Van Herden, Berkeley; August Gerske, San Francisco; J. C. Hill, Fresno; Sergeant-at-arms George C. Pettis, Fresno; S. G. Foreman, Palo Alto; Eugene Christensen, Berkeley; and Charles Doehring, Oakland.

Lapham, Supervisors Call Meetings To Thresh Rail Crossing to Golden Gate

WASHINGTON.—The War Department may modify plans presented by the joint army-navy board on a second bay crossing to include facilities for bringing the trains into San Francisco, the Daily Pacific Builder learned today.

Following a conference between California Representatives Welch and Franck Havenner and Lt. Gen Raymond Wheeler, chief of the army engineers, Welch said:

"We discussed the matter of making provision for the trains to come across the bay and the War Department opinion is that the plan for the second crossing could be modified to include accommodations for the railroads."

Should the War and Navy Departments make any changes in the report, their findings will be forwarded to the speaker of the House of Representatives.

Governor Warren, who has gone to Washington to ask further appropriations for the Central Valley Project, will be asked to put the backing of the state government into the fight to bring transcontinental trains into San Francisco.

Representative Welch declared: "I intend to go into this matter very thoroughly. I have always been convinced that San Francisco is entitled to a union terminal and direct cross-country train service."

Meanwhile, Mayor Lapham announced Wednesday that he had called a Thursday luncheon meeting of rail executives of Southern Pacific, Western Pacific and Santa Fe railroads, as well as civic leaders.

The group would discuss bringing of transcontinental trains to San Francisco via the new span.

The mayor, who has not taken a stand on the matter, said he may have to pass on some action of the supervisors.

He said he wants further information as to costs of the tracks and terminal facilities.

AT THE CITY HALL

The advisory board composed of members of the building industry is framing revisions to the proposed new building code is scheduled to make its full and complete report to the judiciary committee of the board of supervisors which meets this Thursday, at 2 p. m.

On Friday, the board of supervisors will meet in special session to consider four separate resolutions urging transcontinental train service into San Francisco, and immediate terminal modernization.

January Record of Wiring Devices High

January production of critical electrical wiring devices is expected to exceed all monthly production records for these items, the Civilian Production Administration announced today.

A lack of semi-skilled factory workers, particularly for assembly operations, constitutes a problem in the maintenance of extremely high levels of production, the electrical products branch pointed out. Governmental assistance, including action by the CPA's office of labor requirements to recruit additional assembly workers, has make some progress in solving this problem, but the semi-skilled labor supply is still below the industry's needs. However, it is anticipated that this shortage will be eased as the year progresses.

PERSONNEL COURSES OPEN AT EXTENSION

University of California extension will open a series of classes in personnel administration, industrial relations and economics next week at the San Francisco Extension center, 540 Powell St.

Economics courses scheduled to begin include beginning and advanced "Elements of Economics" and "Labor Economics". Courses in personnel and business administration are "Principles of Public Administration"; "Advanced Personnel Classification"; "Organization and Administration of Training Programs"; "Labor Law and Legislation", and "Industrial Relations."

Other courses opening during the week are "Salesmanship"; "Mechanization of Accounting Procedures"; "Investment Policies" and "Advanced Freight Traffic Management."

The courses are open to the general public without regard to previous educational background. Further information may be obtained from any University of California Extension center. First meetings are open without charge.

Painting & Decorating Contractors Hold First National Convention at Fairmont Hotel

The Painting and Decorating Contractors of America today will open their first national convention in San Francisco. More than 900 delegates are expected to attend the four-day meeting headquartered at the Fairmont Hotel.

The organization is the largest trade association in the building industry, and is one of the older trade associations. Its activities are manifold.

President Jess B. Worthington, San Diego, rapped his gavel at two o'clock Tuesday afternoon to open the 62nd annual national session, and after a brief address of welcome, turned the meeting over to a panel discussion of color merchandising.

Frank P. Connolly, vice-president of Valentine & Co., New York, presented an illustrated lecture on "Color, the Sleeping Giant."

"Selling Color for Light" was the topic of William Kennedy, division engineer of Sylvania Electric Products, Inc.

"Color is an exact science, just as much as chemistry, electricity, and architecture, according to William Clark, chief designer of Congoleum-Nairn, Inc., who will address the 62nd annual convention of Painting and Decorating Contractors of America today.

He discussed well-known color systems, illustrating his discussion with charts and colored material.

Gustave Plochiere, Los Angeles, color consultant who recently was elected a director and a member of the board of consultants of the Color Research Institute of America, described the art of color as "still in its infancy." He discussed the history of color, color theories and color today.

"There are three separate and distinct color theories," said Plochiere, "those of the physicist, the artist, and the psychologist. You, in your daily use of color, are really color psychologists."

He emphasized a growing public interest in color, and the importance of color study in merchandising.

On Wednesday, the morning session will feature a panel discussion on materials. Charles H. Sondhaus, president of the Golden Gate Paint, Varnish and Lacquer Association, will read an address prepared by Ernest Trigg, president of the National Paint, Varnish and Lacquer Association, who was unable to attend.

Probably one of its best known activities is in the field of labor relations. Much has been achieved through its joint maintenance with the Brotherhood of Painters, Decorators & Paperhangers of America, AFL, of a trade board in the industry to adjust differences.

The association's national offices keep in close touch with national legislation affecting the building and painting industries. P & DCA maintains an acting apprenticeship committee, of which Byron Garnette, San Francisco, is a member.

It is a member of the construction division of the U. S. Chamber of Commerce. The association also has an active merchandising committee, industry reclamation and promotion committee, and committees on public service, labor information, painting specifications, paint styling, public relations, and workman's compensation insurance.

CONVENTION HIGHLIGHTS

Morning:
10:00 a. m.—Business session to be opened by Pres. Jess B. Worthington. Panel on Materials features four talks:
1. "Impediments in Paint Production" by Ernest T. Trigg, president, National Paint, Varnish and Lacquer Association, Washington, D. C. Since the national president was unable to attend, his address will be read by Chas. Sondhaus, president of Golden Gate chapter.
2. "Painting Contractors Opportunities in the Years Ahead", by T. J. Campbell, president of the Valspar Corp., New York City.
3. "Industry Relations", by H. S. Margetts, executive vice-president of W. P. Fuller & Co., San Francisco.
4. "The Current and Future Brush and Bristle Situation", by Philip H. Thayer, president of Hanlon and Goodman Co., Belleville, N. J.

Afternoon:
Wednesday afternoon has been set aside for delegates and guests to visit the booths of the exhibitors in the Venetian Room. A drawing of tickets that will be distributed to persons visiting booths will be held Thursday afternoon, following business sessions, and prizes will be awarded by exhibitors.

Evening:
8:30 p.m.—Dancing, floor shows, and versatile entertainment will be featured at an entertainment feature — "Along the Shores of the Pacific" — in the Gold Ballroom at the Fairmount Hotel.

BICB MEETS WEDNESDAY AT COMMERCIAL CLUB

William H. Popert, chairman of the building industry's advisory board on the proposed new building code, will report on the work of his committee when the Building Industry Conference Board meets in the Comercial Club for luncheon Wednesday.

TANFORAN PAINT WOULD COVER 40 VETS' HOMES

U. S. Attorney William E. Licking today asserted that construction at Tanforan race track at San Bruno had retarded the veterans emergency housing program seriously.

"The lumber delivered at the track since January 8 is enough to build 20 or 25 veterans' homes," he declared.

"The paint that's gone on the buildings at the track would paint 40 homes for veterans. Enough plumbing has been done for 17 houses; and the stucco in the paddock is enough for six homes."

He is acting on behalf of the Civilian Production Administration which asked the court to issue an injunction against use of new building materials against the multi-million dollar Tanforan Company when a "stop work" order was ignored repeatedly.

CPA PERMITS GRANTED

SAN FRANCISCO, — The Civilian Production Administration, A. J. Grier, regional director, 1355 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

FEBRUARY 10, 1947

CHURCH, $90,000; Alhambra and Robinson, Martinez; owner, First Baptist Church, Martinez.

TOILET facilities in restaurant, $2,-500; 2263 Chestnut St., San Francisco; owner, Foster Lunch System, 966 Mission St., San Francisco.

PROCESSING dairy for food products, $720,000; 2660 Newhall St., San Francisco; owner Kraft Foods Co., 500 Peshtigo, Chicago, Ill.

COLD Storage plant and ice mfg., $25,342: Dunsmuir; owner, George Harrison, Box 706, Dunsmuir.

FHA PERMITS ISSUED

SAN FRANCISCO.—The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

1 UNIT—Salinas; Clifford Hartsell, 308 Williams Rd, Salinas.
1 UNIT—San Francisco; MacArthur Building Co, San Francisco.
11 UNITS—Harry F Dayton, Route 4, Box 1391; Modesto.
1 UNIT—Oakland; Thiel Realty Co, 9774 Mountain Blvd, Oakland.
2 UNITS—Corning; Lacy Fearman, Box 394, Corning.
62 UNITS—Stockton: Precision Homes Co, 1011 E Channel St, Stockton.
20 UNITS—Marysville; Geo E McDaniel Jr, Box 1087, Marysville.
3 UNITS—Walnut Creek; A Mullins, 1533 Oxford St, Berkeley.
3 UNITS—Modesto; James B Boyd, 1305 Picardy Dr, Modesto.
1 UNIT—San Rafael; Burris Conroy Durand, 171 Tamal Rd, San Rafael.
1 UNIT—Walnut Creek; A Mullins, Berkeley.
3 UNITS—San Francisco; Charles Ingerman, 2340 22nd Ave, San Francisco.
1 UNIT—Calwa; Herman G Sandkuhl, 2585 Main St, Calwa.
1 UNIT—San Francisco; Oscar Spano, 1013 Blackstone Ave, Fresno.
1 UNIT—Fresno; C L Henningsen, 843 Yale Ave, Fresno.
1 UNIT—Hanford; A L Willis, 406 E Myrtle St, Hanford.
2 UNITS—Oakland; Thiel Realty Co, Oakland.
1 UNIT—STOCKTON; J J Dorwart, 153 W Aider St, Stockton.
3 UNITS—Sacramento; Peter Palmer, 3020 Shasta Way, Sacramento.
1 UNIT—Walnut Creek; A D Pollard, 77 Plaza Way, Berkeley.
4 UNITS—Santa Cruz; R B Bernard, Box 945, Santa Cruz.
1 UNIT—San Francisco; V W Williams, 1540 Great Highway, San Francisco.
1 UNIT Palo Alto; Theo M Goddard, 725 Guinda St, Palo Alto.
3 UNITS—Manteca; Harry Stokes, Box 244, Manteca.
2 UNITS—Sacramento; C R DeCuir, 3739 Marshall Way, Sacramento.
7 UNITS—Richmond; Earl W Smith, 4 Stratford Rd, Berkeley.
2 UNITS—Seaside; Edwin E Hawes, Box B, Seaside.
9 UNITS—San Mateo; Stonesen Development Co, San Francisco.
25 UNITS—Stockton; John Dean, Stockton.
26 UNITS—San Francisco; Henry Doelger, San Francisco.
3 UNITS—Oakland; Harry Kroll, San Francisco.
4 UNITS—San Francisco; C L Wold Construction Co, San Francisco.
24 UNITS—Sacramento; Harry J. Buckman, Sacramento.
4 UNITS—San Francisco; Brentwood Co, San Francisco.
1 UNIT—Clarksburg; G O Fraser, Clarksburg.
8 UNITS—San Mateo—Wm C Smith, San Mateo.

PLANS ON FILE

The following list of plans and specifications for construction projects are now available for inspection at the office of DAILY PACIFIC BUILDER, 468 Tenth Street, San Francisco.

Work	Location	Bid Opening Date
Naval Reserve Armory	Stockton	2-19
Francisco Airport.		

Owner—City and County of San Francisco, Public Utilities Commission, James H. Turner, manager, City Hall, San Francisco, Calif.
Architect—W. P. Day & Associates, 111 New Montgomery St., San Francisco, Calif.
Reinforced concrete addition of two wings to north and south end of present terminal building to provide additional passenger facilities, including offices for customs inspectors, additional dining space and restroom area.
As previously reported, Carrico & Gautier, 365 Ocean Ave., San Francisco, Calif., at $316,615, submitted the low bid February 4.

9-10—EDUCATIONAL BUILDINGS

2/12/47 9
Low and Only Bidders
High School
MODESTO, Calif., Stanislaus County. 18th and H Sts.
Owner—Modesto High School District, Aubrey A. Douglas, superintendent of schools, 14th and I Sts., Modesto, Calif.
Architect—Harry J. Devine, Cronan Bldg., Sacramento, Calif.
Unit No. 1 of new main high school, reinforced concrete, to include 19 classrooms, administrative offices and library.
Low Bidder—S. C. Giles, 319 Elks' Bldg., Stockton, Calif., $391,087.
Other bidders February 10 were:
H. E. Rahiman Co., San Francisco, Calif., $407,777.
Moore & Roberts, San Francisco, Calif., $414,699.
Carl N. Swenson Co., San Jose, Calif., $423,423.
Willis F. Lynn, Berkeley, Calif., $429,500.
Erbentraut & Summers, San Francisco, Calif., $463,731.
James I. Barnes Construction Co., San Francisco, Calif., $468,000.

2/12/47 10
Low and Only Bidders
Classroom Building, Technology Building and Technical Annex Building Cost $3,772,785
SEATTLE, Wash., King Co. Washington State College.
Owner—Board of Regents of Washington State College, Dr. Wilson Compton, president and secretary of the board, Olympic Hotel, Seattle, Wash.
Architect (classroom building)—John W. Maloney, 654 Central Bldg., Seattle, Wash.
Architects (technology buildings)—Whitehouse & Price, Hutton Bldg., Spokane, Wash.
Classroom building, reinforced concrete with brick facing and stone trim; T-shaped, 251x281 outside dimensions, four stories and basement; includes 49 classrooms, faculty offices and lecture room.
Technology building, reinforced concrete with masonry exterior, ground and four stories, 60x350 ft., and annex to be known as metals building, reinforced concrete with brick exterior, two stories, 64x165 ft.
Bids submitted February 7 as follows:

Classroom Building
Nettleton & Baldwin, Inc., 1109 N. 36th St., Seattle, Wash., $1,926,999.
Carson Construction Co., Helena, Mont., $1,982,775.
MacLean Construction Co., Seattle, Wash., $2,049,700.
Sound Construction & Engineering Co., Seattle, Wash., $2,085,280.

Technology Building and Annex Combined
Henry George & Sons, Spokane, Wash., $1,845,786.
Nettleton & Baldwin, Inc., Seattle, Wash., $1,993,814.
Carson Construction Co., Helena, Mont., $2,053,243.
Sound Construction & Engineering Co., Seattle, Wash., $2,053,820.

Technology Building Alone
Henry George & Sons, Spokane, Wash., $1,662,935.
Nettleton & Baldwin, Inc., Seattle, Wash., $1,635,815.
Sound Construction & Engineering Co., Seattle, Wash., $1,726,280.
Carson Construction Co., Telena, Mont., $1,748,70.

2/12/47 16
Owner Taking Bids—Due March 20, 2 P. M.
Doors, Wood Flooring and Miscellaneous Repairs
SEATTLE, Wash. U. S. Post Office.
Owner—Federal Works Agency, Public Buildings Administration, office of the district engineer, 838 U. S. Appraiser's Bldg., San Francisco, Calif.
Plans by owner.
Doors, wood flooring and miscellaneous repairs.
Plans and specifications obtainable from the above office of the district engineer.

2/12/47 9
Low and Only Bidders—Contract to Be Awarded Within a Few Days
School Addition (Prefabricatde)
ALMA, Calif., Santa Clara County. Lexington School, three miles south of Los Gatos.
Owner—Board of Trustees, Lexington School District, Mrs. Delia Ewald, clerk, Alma, Calif.
Architect—Henry David Kensit, Rm. 4, Post Office Bldg., Los Gatos, Calif.
Low Bidder—Johnson Rhineland, Los Gatos, Calif., $8422.
Pacific Coast Builders, San Francisco, Calif., at $10,300, submitted the only other bid February 10.

11— HOSPITALS

2/12/47 11
Bids Submitted January 20 Exceeded Available Funds—Endeavor Will Be Made to Secure Additional Funds or Revise Plans to Reduce Cost of Building
Hospital (40 Beds) Cost $300,000
TRACY, Calif., San Joaquin County. W. Eaton Ave. at Bessie Ave.
Owner—Tracy Community Memorial Hospital, George Clever, chairman of board of directors; Mrs. Horstkorta, secretary, Tracy Inn Bldg., Tracy, Calif.
Architects—Fred L. Swartz and Wm. G. Hyberg, Rowell Bldg., Fresno, Calif.
Consulting Engineer—Clyde E. Bentley, 1441 Franklin St., Oakland, Calif.
Structural Engineer—F. W. Kellberg, 320 Market St., San Francisco, Calif.
Concrete slab floor with asphalt tile covering on concrete foundation; one-story, brick veneer exterior walls, asbestos cement shingle roof covering, insulated walls and attic area, heating and cooling systems.
Low Bidder—S. C. Giles & Co., 319 Elks' Bldg., Stockton, Calif., $362,-582.
Other bidders January 20 were:
Tornell Co., Tracy, Calif., $369,897.
Moore & Roberts, San Francisco, Calif., $382,164.
Erbentraut & Summers, San Francisco, Calif., $390,978.
James I. Barnes, San Francisco, Calif., $398,000.
Herbert Mayson, Los Angeles, Calif., $409,284.
H. E. Rahlmann, San Francisco, Calif., $411,777.
Estimate only:
Swinerton & Walberg Co., San Francisco, Calif., $365,200.

12-13—INDUSTRIAL BUILDINGS

2/12/47 12
Contract Awarded
Processing Plant Cost $100,000
SEATTLE, Wash. 700-708 5th Ave. S.
Owner—Yankee-Spredwell Co., 700 5th Ave. S., Seattle, Wash.
Architect—George Wellington Stoddard, Orpheum Bldg., Seattle, Wash.
Reinforced concrete with some brick facing, one story (120x120 ft.).
Contractor—Atherton Construction Co., Terminal Sales Bldg., Seattle, Wash.

2/12/47 12
Plans in Progress—CPA Approval Granted in Amount of $720,000
Plant to Process Dairy Food Products
SAN FRANCISCO, Calif. Newhall and Egbert Sts.
Owner—Kraft Foods Co., 500 Peshtigo St., Chicago, Ill.; local plant at 2660 Newhall St.
Plans by owner's engineering department, 500 Peshtigo St., Chicago, Ill.
Consulting Engineers—Nelier, Rich & Bladen, Chicago, Ill., and Kaj Theill, 580 Market St., San Francisco, Calif.

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

2/12/47 32
Owner Will Ask Bids Some Time In March or April
Sewage Treatment Plant
PALO ALTO, Calif., Santa Clara Co.
Owner—City of Palo Alto, Department of Public Works, J. B. Wells, chairman, City Hall, Palo Alto, Calif.
City Engineer—Fabian S. Miller, City Hall, Palo Alto, Calif.
Consulting Sanitary Engineer—Harry N. Jenks, 845 Madrono Ave., Palo Alto, Calif.

2/12/47 31
Low and Only Bidder
Well Drilling and Pump Installation Cost $8,392
SAN FRANCISCO, Calif. Golden Gate Park.
Owner—Park Commission of the City and County of San Francisco, Gerald J. Linares, secretary, McLaren Lodge, Golden Gate Park, San Francisco, Calif.
Plans by owner.
Includes drilling of a 12-inch well and installation of turbine pump at the water works.
Only Bidder—J. G. Grattan, 730 Laguna Honda Blvd., San Francisco, Calif., $8,392.

2/12/47 31
Low and Only Bidder
Water Storage Tank Cost $15,253
NEAR WATSONVILLE, Calif., Santa Cruz County. Sunset Beach State Park.
Owner—State of California, Division of Architecture, Public Works Bldg., Sacramento, Calif.
State Architect—Anson Boyd, Public Works Bldg., Sacramento, Calif.
Concrete water storage tank for the Division of Parks and Beaches.
Contractor—Granite Construction Co., Box 900, Watsonville, Calif., $15,253; 60 working days completion time.

33— BRIDGES

2/12/47 33
Contract Awarded
Bridge Superstructure Cost $61,455.22
EMERY and GRAND COUNTIES, Utah. U. S. 50 east of Green River, Utah.
Owner—Utah State Road Commission, Ray H. Leavitt, chairman, State Capitol, Salt Lake City, Utah.
Plans by engineering department of owner.
0.114 mile concrete and steel bridge (superstructure), involving (1) 442 cu. yds. concrete class A (cement furnished by state), (2) 116,800 lbs. reinforcing steel and (3) 604,112 lbs. structural steel (erection only).
Contractor—T. G. Rowland, 1568 S. 11th East, Salt Lake City, Utah.

2/12/47 33
Contract Awarded
Bridge and Surfacing Cost $70,301.05
BEAVER COUNTY, Utah, S. R. No. 21, between Milford and Nevada line.
Owner—Utah State Road Commission, Ray H. Leavitt, chairman, State Capitol, Salt Lake City, Utah.
Plans by engineering department of owner, Cedar City, Utah.
Includes concrete bridge and 2.492 miles road-mixed bituminous surfaced road.
Contractor—Palfreyman Construction Co., Box 672, Provo, Utah.

2/12/47 33
Owner Taking Bids—Due Feb. 17, 2 P. M.
Bridge Repair
YUBA COUNTY, Calif. Over Oregon Creek, about four miles south of Camptonville.
Owner—County of Yuba, Adrienne Conley, county clerk, Hall of Records, Marysville, Calif.
Plans by owner.
Includes repair of existing covered timber truss bridge approximately 77 ft. long, consisting of removing the existing timber flooring stringers and floor beams and the steel truss rods and floor beams and new timber stringers and flooring.
Specifications obtainable from the above office of the county clerk upon payment of $2, not refundable.

34—DAMS, RESERVOIRS & DREDGING

2/12/47 34
Contract Awarded
Planting and Sprinkler System Cost $13,072.35
SAN JOSE, Calif., Santa Clara Co. Bayshore Freeway at Santa Clara Street.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Includes about 0.5 mile planting and furnishing and installing sprinkler system.
Contractor — Huettig & Schromm, 278 Santa Margarita Ave., Palo Alto, Calif.

2/12/47 34
Owner Taking Bids—Due March 17, 10 A. M.
Canals; Spec. 1693
CENTRAL VALLEY PROJECT, California, Contra Costa Canal, located from about one mile south of Hookston to about one-half mile west of Pacheco; Clayton and Ygnacio canals from three miles northeast to 4¼ miles south of Concord.
Owner—U. S. Bureau of Reclamation, Antioch, Calif.
Plans by engineering department of owner.
Includes earthwork, canal lining and structures, station 1993 plus 11 to station 2321 plus 25, Contra Costa Canal and Clayton and Ygnacio canals.
Estimated quantities are:
Schedule No. 1
Contra Costa Canal, Station 1993+11 to Station 2321+25
(1) clearing 28 acres of orchards and vineyards;
(2) grubbing 27. acres of orchards and vineyards;
(4) 134,000 sta. cu. yds. overhaul;
(5) compacting 16,000 cu. yds. embankments;
(6) 45,000 cu. yds. excavation for structures;
(7) 220 cu. yds. excavation in tunnel under highway;
(8) erecting 11,300 lbs. permanent steel supports in tunnel;
(9) erecting 3 M b.m. permanent timbering in tunnel;
(10) trimming 59,400 sq. yds. foundations for concrete lining;
(11) 39,400 cu. yds. backfill;
(12) compacting 11,000 cu. yds. backfill;
(13) 3450 cu. yds. concrete in structures;
(14) 90 cu. yds. concrete in tunnel;
(15) 2450 cu. yds. concrete in reinforced canal lining;
(16) 2450 cu. yds. concrete in unreinforced canal lining;
(17) placing 368,000 lbs. reinforcebars in structures and tunnel lining;
(18) placing 150,000 lbs. reinforcement bars in canal lining;
(19) 430 sq. yds. dry-rock paving;
(20) driving 216 lin. ft. timber piles;
(21) erecting 75 B b.m. timber in bridges;
(22) constructing 10 cattle guards;
(23) laying 100 lin. ft. 12-in. diameter concrete pipe;
(24) laying 340 lin. ft. 15-nl. diameter concrete pipe;
(25) laying 590 lin. ft. 18-in. diameter concrete pipe;
(26) laying 400 lin. ft. 24-in. diameter concrete pipe;
(27) laying 180 lin. ft. 30-in. diameter concrete pipe;
(28) installing 12,000 lbs. gates;
(29) installing 7200 lbs. miscellaneous metalwork;
(30) purchase of forms from government by the contractor.
Schedule No. 2
Clayton Canal
(31) clearing 5 acres of orchards and vineyards;
(32) grubbing 5 acres of orchards and vineyards;
(33) 47,000 cu. yds. excavation for canal;
(34) 20,000 sta. cu. yds. overhaul;
(35) compacting 1500 cu. yds. embankments;
(36) 14,000 cu. yds. excavation for structures;
(37) trimming 30,000 sq. yds. foundations for concrete lining;
(38) 10,000 cu. yds. backfill;
(39) compacting 7000 cu. yds. backfill;
(40) 875 cu. yds. concrete in structures;
(41) 1500 cu. yds. concrete in canal lining;
(42) placing 108,000 lbs. reinforcement bars;
(43) 100 sq. yds. dry-rock paving;
(44) erecting 19 M b.m. timber in bridges;
(45) constructing 1 cattle guard;
(46) laying 50 lin. ft. 15-in. diameter concrete pipe;
(47) laying 600 lin. ft. 18-in. diameter concrete pipe;
(48) laying 200 lin. ft. 24-in. diameter concrete pipe;
(49) laying 30 lin. ft. 30-in .diameter concrete pipe;
(50) laying 350 lin. ft. 12-in. diameter corrugated metal pipe;
(51) installing 1500 lbs. gates;
(52) installing 2200 lbs. miscellaneous

metalwork;

Schedule No. 3
Ygnacio Canal

(53) clearing 10 acres orchards and vineyards;
(54) grubbing 10 acres of orchards and vineyards;
(55) 35,000 cu. yds. excavation for canal;
(56) 10,000 sta. cu. yds. overhaul;
(57) compacting 1500 cu. yds. embankments;
(58) 6500 cu. yds. excavation for structures;
(59) trimming 24,600 sq. yds. foundations for asphaltic lining;
(60) applying 15,000 sq. yds. organic soil sterilant;
(61) applying 9000 sq. yds. inorganic soil sterilant;
(62) 6000 cu. yds. backfill;
(63) compacting 3400 cu. yds. backfill;
(64) 440 cu. yds. concrete in structures;
(65) 28,700 sq. yds. asphaltic canal lining, except asphalt;
(66) furnishing 245 tons asphalt for asphaltic lining;
(67) placing 50,000 lbs. reinforcement bars;
(68) 200 sq. yds. dry-rock paving;
(69) erecting 44 M b.m. timber in bridges;
(70) constructing 10 cattle guards;
(71) laying 900 lin. ft. 15-in. diameter concrete pipe;
(72) laying 960 lin. ft. 18-in. diameter concrete pipe;
(73) laying 240 lin. ft. 24-in. diameter concrete pipe;
(74) laying 170 lin. ft. 30-in. diameter concrete pipe;
(75) installing 3800 lbs. gates;
(76) installing 3000 lbs. miscellaneous metalwork.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Customs House, Denver 2, Colo.; R. L. Boke, regional director, P. O. Box 2511, Sacramento 10, Calif.; O. C. Boden, construction engineer, Antioch, Calif., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer.

No charge to prospective bidders for copies of the specification sand drawings; to others, $4.25 per copy, not returnable.

38— ELECTRIC LIGHTING TRANSMISSION LINES

2/12/47 • 38
Owner Taking Bids—Due Feb. 25, 3 P. M.
Street Lighting System; Spec. 48
SAN FRANCISCO, Calif. Third St. from Alameda to Mariposa.
Owner—City and County of San Francisco, Public Utilities Commission, Room 287 City Hall, San Francisco, Calif.
Plans by owner.

Specifications obtainable from the cashier's office, 6th floor, 425 Mason St., San Francisco, Calif., upon deposit of $10, refundable.

39—SEWERS

2/12/47 • 39
Low and Only Bidders
Sewer and Appurtenances Cost, $65,445.20
OAKLAND, Calif., Alameda County, Railroad Ave., 98th Ave. and rights-of-way from 85th Ave. to Stone St.
Owner—City of Oakland, Chas. Don, city clerk, City Hall, Oakland, Calif.
City Engineer—Walter N. Frickstad, City Hall, Oakland, Calif.
Low Bidder—Paris Bros., 2415 Oregon St., Berkeley, Calif., $65,445.20
The work involves:
(1) 30 ft. 36-in. centrifugal standard strength reinforced concrete pipe sewer;
(2) 1770 ft. 33-in. centrifugal standard strength reinforced concrete pipe sewer;
(3) 2370 ft. 27-in. centrifugal standard strength reinforced concrete pipe sewer;
(4) 515 ft. 24-in. vitrified clay pipe sewer;
(5) 1024 ft. 18-in. vitrified clay pipe sewer;
(6) 20 each manholes;
(7) 80 ft. 10-gauge 42-in. corrugated iron pipe with 27-in. centrifugal reinforced concrete pipe laid through and sand filling.

Total bids submitted February 11 were:
(A) Paris Bros., Berkeley, Calif., $65,445.20.
(B) J. Henry Harris, Berkeley, Cal., $69,117.25.
(C) R. G. Clifford, South San Francisco, Calif., $71,443.
(D) McGuire and Hester, Oakland, Calif., $74,401.50.
(E) Stolte, Inc., Oakland, Calif., $99,848.65.

Unit prices were:

40— STREETS AND HIGHWAYS

2/12/47 40
STATE OF CALIFORNIA SPECIAL NOTICES

SACRAMENTO, Calif., Sacramento Co.—State Highway Engineer G. T. McCoy announces cost of blue prints now available for work for which bids will be opened in Sacramento on March 5 and in Los Angeles on March 6:

I-Hum-20-C, across Redwood Creek. No charge.

II - Sis - 3 - C, across Cottonwood Creek and under Southern Pacific Railroad: Plans (including sales tax), $2.15; total cost plans (including sales tax), $2.15.

II-Mod-28-A,B, 4 bridges and 111 culverts, between Adin and Alturas: Plans (including sales tax), $1.08; total cost plans (including sales tax), $1.08.

III-Sac-937, on Howe Ave.: Plans (includes sales tax), $0.77; cross-sections (including sales tax), $2.46; total cost plans and cross-sections (including sales tax), $3.23.

IX-Iny-1070, on Warm Springs Rd. and Poleta Rd.: Plans (including sales tax), $3.23; cross-sections (including sales tax), $4.46; total cost plans and cross-sections (including sales tax), $7.69.

X-SJ-97-A, at Calaveras River: Plans (including sales tax), $0.92; cross-sections (including sales tax), $1.08; total cost plans and cross-sections (including sales tax), $2.

VII-Ven-2,9-C,A, traffic signals at intersection of Ventura Blvd. and Telegraph Rd.: Plans (including sales tax), $0.77; total cost plans (including sales tax), $0.77.

VIII-SBd-58-P, 11 miles east of Needles and Red Rock bridge: Plans (including sales tax), $1.85; cross-sections (including sales tax), $0.30; total cost plans and cross-sections (including sales tax), $12.15.

VIII - SBd - 712, at San Timoteo Creek and Santa Ana River: Plans (including sales tax), $3.69; cross-sections (including sales tax), $2.77; total cost plans and cross-sections (including sales tax), $6.46.

Checks for the above should be made payable to the Department of Public Works, Division of Highways, and should accompany the order to this office.

Requests for the above plans, specifications and proposal form must be addressed to the office of the State Highway Engineer, P. O. Box 1499, Sacramento, Calif.

Blue prints of plans are sold at cost and are not returnable for refund.

• • •

SACRAMENTO COUNTY, Calif.—The county engineer will meet prospective bidders for the proposed project in Sacramento County (III-Sac-937) for which bids will be opened in Sacramento on March 5 at the office of the county engineer, Courthouse, Sacramento, on Wednesday, February 19, 1947, at 10 A. M.

• • •

INYO COUNTY, Calif.—A representative of the district office of the Division of Highways will meet prospective bidders for the proposed project in Inyo County (IX-Iny-1070) for which bids will be opened in Sacramento on March 5 at the district office, Mondays through Fridays, between 8 A. M. and 5 P. M., holidays excepted.

• • •

SAN BERNARDINO COUNTY, Calif.—A representative of the district office of the Division of Highways will meet prospective bidders for the proposed project in San Bernardino County (VIII-SBd-58-P), for which bids are to be received in Los Angeles on March 6, 1947.

Said representative will meet prospective bidders at the California Hotel in Needles on Friday, February 28, 1947, at 9 A. M.

• • •

SAN BERNARDINO COUNTY, Calif.—The county engineer or his representative will meet prospective bidders for the proposed project in San Bernardino County (VIII-SBd-712), for which bids are to be received in Los Angeles on March 6, 1947.

Said representative will meet prospective bidders at his office in the Courthouse, San Bernardino, Tuesday, February 25, 1947, between 10 A. M. and 3 P. M.

2/12/47 40
Contract Awarded
Surfacing Cost $103,033.87
MILLARD COUNTY, Utah. U. S. No. 6, between Hinckley and Nevada line.
Owner—Utah State Road Commission, Ray H. Leavitt, chairman, State Capitol, Salt Lake City, Utah.
Plans by engineering department of owner, Cedar City, Utah.
Included 4.387 miles 2-in. road mixed bituminous surfaced road.
Contractor — Bethers Bros., Heber City, Utah.

2/12/47 • 40
Low and Only Bidders
Streets, Sewer and Water Lines7; Spec. 1628 Cost $111,538
BOULDER CANYON PROJECT, Arizona-Nevada. Boulder City, Nev.
Owner—U. S. Bureau of Reclamation, Boulder City, Nev.
Plans by engineering department of owner.
Includes streets, sidewalks, curbs and gutters, extension of sewerage and water distribution systems.
Low Bidder—H. W. Folk, Las Vegas, Nev., $111,538.
Hensler Construction Corp., Glendale, Calif., at $191,41.65, submitted only other bid February 11.

2/12/47 • 40
Owner Taking Bids—Due Feb. 25, 3 P. M.
Grading; Spec. 447
SAN FRANCISCO, Calif. East side of 28th Ave., between Pacheco and Quintara.
Owner—City and County of San Francisco, Public Utilities Commission, Room 287 City Hall, San Francisco, Calif.
Plans by owner.

The work involves:
(1) 10,000 cu. yds. grading;
(2) estimated field inspection cost at $10.75 per calendar day.

Specifications obtainable from the cashier's office, 6th floor, 425 Mason St., San Francisco, Calif., upon deposit of $5, refundable.

2/12/47 40
Owner Taking Bids—Due March 12, 2 P. M.—Grading and Seal Coat
HUMBOLDT COUNTY, Calif. Elk River Road between junction with State Highway Route 1 south of Eureka and Elk River School.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engr.—G. T. McCoy, Public Works Bldg., Sacramento.
About 2.2 miles grading and applying Class B-Single seal coat.

Unit quantities will be given tomorrow.

Work involves:
(1) 75 cu. yds. remove conc;

TRAXCAVATE for PROFIT

The profitable machine on any job is the machine that keeps busy
The TRAXCAVATOR—front-end loader built by THE TRACKSON CO. and mounted on a "CATERPILLAR" diesel tractor—has been called "the busiest machine on the job" by many builders. It's the perfect machine for jobs that involve digging, loading, leveling, or backfilling, and for the handling and rehandling of materials.

Demand for Automatic Heating Equipment Sensational—Plumbing, Heat Industries

CHICAGO.—The sensational demand for automatic heating equipment is easily the most significant fact in the heating industry today, according to the Plumbing and Heating Industries Bureau. The demand for automatic heating far exceeds the forecasts based on surveys made during the war years, and has caused hurried revisions of production schedules of manufacturers of heating equipment.

The urgent demand for automatic heating covers all types of heating systems and all fuels and is as strong among owners of existing homes who are seeking to modernize their heating equipment as it is among builders of new homes.

This unprecedented public interest in automatic heating indicates, that millions of Americans today are conscious of the convenience and comfort of central heating, automatically-fired, the Bureau believes.

Systems Variable

There are three types of central heating systems, each of which may be automatically-fired. These are hot water, steam, and warm air. There is no relation between the type of heating system and the fuel. In other words, any one of the three kinds of central heating systems may be fired with any one of the three kinds of fuels. This means that the owner has an option in the choice of the heating system and in the fuel.

Similarly there is a choice of heat distributing surfaces, particularly in the case of hot water and steam heating systems. With a hot water heating system, for instance, the heat may be distributed by means of radiators, convectors, radiant baseboards, or radiant panels. Each of these methods of heat distribution provides radiant heat. The difference consists in the variation in the size of the heat distributing surfaces. In the case of radiant panels, the entire floor, wall, or ceiling serves as a heat distributing surface.

Controls are the "brains" of every automatically-fired heating system whether the fuel be oil, gas or coal. The principle control instrument for automatic heating is the thermostat.

Outdoor Control

The modern thermostat is an extremely sensitive instrument. It is instantly responsive to the slightest change in room temperature. A refinement of the standard thermostat is the electric clock thermostat. Maintaining the same accurate control, it also automatically provides lower temperature during the night period. Another method of day-night control is the twin thermostat operating in conjunction with an electric time switch in the basement.

One of the refinements in automatic heating is zoning, that is, dividing the house into two or more zones each controlled by a separate thermostat. Still another refinement is modulation, that is, the continuous circulation of the heating medium whether it be air or hot water. This prevents cold floors and drafts.

Another innovation in controls for automatic heating is the use of an outdoor control to anticipate temperature changes before they are reflected by the indoor thermostat.

Heat Domestic Water

Automatic heating has made it possible to heat the domestic hot water supply by the same boiler which heats the house. This is accomplished by the circulation of the hot boiler water around coils containing the domestic water Thus the domestic water is heated indirectly by the boiler water the year around.

Caterpillar Tells Staff Promotions

PEORIA, Ill.—Because of the addition of new products to its line, and because of expanded productive facilities, Caterpillar Tractor Company has created the job of parts consultant in its parts department here with W. B. Gordon, former inventory control manager, appointed to the new position.

J. G. Hamner has been promoted from Parts Technical Manager to inventory control manager and H. F. Haven promoted from assistant parts manager, western division to parts technical manager.

E. L. Mason, who has been central division assistant parts manager, takes the western division post vacated by Haven and C. F. Cummings becomes assistant parts manager of the central division.

#

Acquisition of the $2 million army airport at Hayward by the City of Hayward is in final stages. Reportedly, the deed has been drawn up by the San Francisco WAA office and forwarded to Washington for final action.

Thomas Hofmann Died January 17

Thos. G. Hofmann of San Francisco, veteran P. & F. Corbin sales representative, suddenly passed away on January 17 at the California Hospital in Los Angeles.

Accompanied by his wife, he was spending a few days in Los Angeles after a return trip from the Corbin plant in New Britain, Conn., when he was stricken and removed to a hospital in that city.

In 1900 Tom Hofmann started his hardware career with the Baker & Hamilton Company of San Francisco, where he rose to the position of manager and buyer of the builders' hardware department, and then to manager of the contract builders' hardware division. Later on he joined the Sargent Company and represented that firm on the west coast until September of 1912 when he became associated with P. & F. Corbin as sales representative covering the California-Nevada territory.

His fine personality and expert knowledge of builders combined to win Tom Hofmann a host of personal friends both in and out of the hardware fraternity.

A native of San Francisco, he was born Sept. 23, 1884. Survisors are Mrs. Hofmann, and a son, Dr. T. Richard Hofmann of Berkeley.

MARKET CONTRACT IS AWARDED TO LUSTRON

WASHINGTON, Feb. 5.—Negotiations have been completed for a guaranteed market contract with the Lustron Corp., Chicago, for the production this year of close to 15,000 porcelan enamel steel houses Housing Expediter Frank R. Creedon announced today.

Previously, the RFC had announced the approval of a $12,500,000 loan to Lustron conditioned on the company's raising $3,500,000 cash equity.

#

ESTABLISH STIFF RENTS

The Apartment House Association of Alameda County is sponsoring a plan to distribute available housing by a sliding rental scale based on the number of occupants in each unit.

Citing statistics which disclosed that between April, 1940, and November, 1945, 20 per cent of new dwelling units in Alameda County housed only one person each, a spokesman proposed that such persons be charged "stiff" rents that would force sharing of apartments.

This would be accomplished by adoption by OPA of a sliding rent scale based on the number of occupants.

The Painting Industry Puts Apprenticeship To Work And Furthers Industrial Relations

William F. Patterson, Director
Apprentice-Training Service, Washington, D. C.

The value of joint apprenticeship committees from the technical viewpoint is obvious, as they bring into the apprenticeship program the experience and viewpoint of both employers and employees.

There is another factor sometimes overlooked. That is the improvement of public and industrial relations by such committees. The public appreciates the social responsibility undertaken by these committees—a responsibility shared voluntarily by management and labor—to provide the skilled work force needed in a community and to give young men in that community an opportunity to train for a career in a skilled trade.

All of the branches of the construction industry have benefited from the improvement of industrial relations through joint participation in apprenticeship. With several common problems — to develop thoroughly skilled workers, to protect apprentices, and to "give and take" in order to make the apprenticeship program work—labor and management have achieved better understanding to their mutual advantage. And it is not claiming too much to assert that the good industrial relations created by joint participation in apprenticeship also helped cement the good relations that exist between employers and unions in the building trades in collective bargaining over matters affecting wages, hours and working conditions of journeyman.

It has been said by educators that some students seem to have insulated themselves against the scepage of knowledge into their brains. It can hardly be said that apprentices—of an age when they are just beginning to think seriously of their responsibilities to society—can fail to realize what their employers and unions are doing for them by cooperating to enable them to learn a skilled trade. The apprentices in joint programs know that participation in the program is voluntary that both parties have made a contribution in time and money, and that they, the apprentices, have as a duty the preservation of the good, employer-union relations evidenced by their joint apprenticeship program.

The industry has not capitalized in full the chance to dramatize the opportunities offered by apprenticeship. The painting industry, its contractor organizations and unions, have something worthwhile to sell in apprenticeship and can easily dramatize the opportunities for apprentices in your craft in the event there is a shortage of applicants. Newspapers and radio stations will give you space and time to tell what apprenticeship offers to veterans, and non-veterans, and to explain what is being accomplished through apprenticeship to develop craftsmen in the painting industry. Veterans' publications are only too glad to print such news which will be read avidly by their younger members interested in learning a skilled trade.

You may be interested to know that veterans are proving to be generally good apprentices. Employers and unions throughout the country have reported that their work on the job is satisfactory and that they are diligent in learning the skills of their trade.

We now have favorable reports on their classroom record. Carl W. Brown, principal of the evening school of the Hadley Technical High School, St. Louis, has this to say about their classroom performance:

"It is the unanimous opinion of those teachers who taught apprentices, both before and after the war that the veterans as apprentices are: more matured and serious minded, more studious and more dependable, and accomplish more, both as to quality and quantity of school work." At the time Mr. Brown made this report last December, Hadley High School had 1,053 apprentices, of which more than 80 percent were veterans.

More veterans are seeking apprentice training than can be accommodated. With the projected record construction program ahead, and the shortage of building trades craftsmen in some trades and in some areas, I believe more joint apprenticeship programs should be set up and more apprentices should be hired—in the painting trade and the other building trades. These jobs must be done on the local level. The number of apprentices to be hired is a matter for local joint committees to determine. If there is no joint committee, AT's field representatives will be glad to help you organize a committee and set up apprenticeship standards.

It is hardly necessary to emphasize that the major task of local joint committees is establishing apprenticeship programs which provide thorough training in all of the skills of a trade.

Many of you probably have had experience with brush hands who tried to get by as journeymen painters. They have cost you money and time. Neither contractors nor unions can afford to have these incompetents working as craftsmen. Trade standards are lowered by them and both groups suffer. By the same token, you cannot afford to spend money and time in training apprentices who, after completing their term of apprenticeship, are not qualified to give the service furnished by a real journeyman painter.

The Painting and Decorating Contractors of America are of course cognizant of these facts. Not only has your association cooperated in the establishment of National Joint Standards for the Painting Industry, but it is continuing its endeavors to promote sound apprenticeship. One example of this active interest is the booklet which you issued last year, "Putting Apprenticeship to Work." This booklet explains joint committees and their functions, procedure on obtaining desirable apprentices, training of apprentices, and matters affecting veterans in apprenticeship. You may be interested to know that yours is the only national employer group which has issued this logical and timely follow-up on the adoption of National Joint Apprenticeship Standards.

"Putting Apprenticeship to Work" —With those words you have called attention, briefly but forcefully, to a most important phase of apprenticeship. The best national standards are worthless if they are not put into opcration; if not enough local apprenticeship programs are set up, if not enough apprentices are hired, and if the training is inadequate.

Plumbing, Heating Materials To Be Plentiful During '47

CHICAGO—"The year 1947 will go down in history as a year of transition—a year in which we will emerge completely from the era of reconversion and enter the period of full peacetime production," W. W. Weaver predicted recently. He is president of the Plumbing and Heating Industries Bureau.

"I believe 1947 will stand up even in the face of strikes which may somewhat retard, but will not change the upward trend of the production curve," Weaver declared. "I am convinced that in many lines the production of plumbing and heating materials in 1947 will exceed the all-time, prewar highs."

He pointed out three significant factors: a huge backlog of demand for the products and services of the plumbing and heating industries, and the increase in the productivite capacity. "New plants are being built; productions methods are being streamlined; foundry processes are being introduced. The result is a huge productive potential beyond anything our industries had a few years ago," he said.

#

FARM VETS' HOUSING ASSISTANCE NEEDED

WASHINGTON—Creation of an independent federal coordinating board to help veterans on farms and in rural areas to obtain better housing was proposed today by Douglas Whitlock, chairman of the Building Products Institute.

"It has been amply demonstrated that improvement of farm housing does not receive adequate attention when responsibility for making or insuring loans is scattered among several governmental agencies," Whitlock said.

Extension of credit, he said, has been difficult because of the problem of separating loans for home improvement from those made on the farm property as a whole.

National President Worthington Member Of Industry 25 Years

Jess B. Worthington, San Diego, is president of the Painting and Decorating Contractors of America, as well as a member of the contractors' state license board. He was elected national president at the 1946 convention in Cleveland.

Associated with the painting and decorating industry for more than 25 years, he is president of Jess B.

JESS B. WORTHINGTON

Worthington, Inc., which specializes in commercial, residential and government work.

He has been active in the painters' organization for more than twenty years, and achieved a splendid record as president of the California State Council in 1937. He also served for five years as western regional vice-president of the national convention.

Commercial Building Applications Valued At $2,619,293 Okayed

Eighty-two applications for non-residential construction for an estimated cost of $2,619,293 were approved for the Northern California area during the week ended February 6, it was reported today by Gilbert H. Kneiss, district manager of Civilian Production Administration. Forty-one applications, invovling $704,345, were denied.

Largest of the authorizations was a $700,000 plant sciences building for the University of California at Davis. Other major projects approved included a lithographing plant for H. S. Crocker Company at San Bruno to cost $400,000; a $212,000 municipal wharf at Redwood City; a $100,000 food market for Stoneson Bros. to service a newly developed tract at Colma; a $107,220 elementary school at Redwood City; and a $275,000 telephone exchange building for Pacific Telephone and Telegraph Company at Napa.

The facilities review board in Washington, which considers appealed cases, has authorized Roos Bros. to erect a store at San Jose to cost $350,000, and an elementary parochial school at Piedmont to cost $175,000. Roos Bros.' application was for a 5-story building to cost $500,000 but the approval limited construction to two stories of approximately the same size as the firm's present quarters from which it will be evicted at the expiration of its lease.

COMMERCIAL LABS FORM NEW DIVISION

President of the newly - formed Western Division of the American Council of Commercial Laboratories is Dr. Roger W. Truesdail, president of Truesdail Laboratories, Inc., Los Angeles.

The Western Division was formed at a recent meeting in San Francisco. It will take in the 11 western states, Alaska and the Hawaiian Islands.

Vice - president is Herbert D. Imrie, president of Abbott A. Hanks, Inc., of San Francisco. E. Ord Slater, president of Smith-Emery Company of Los Angeles, was elected secretary-treasurer.

BUSINESS PROGRAM

62nd National Convention, Painting and Decorating Contractors of America

Tuesday, February 11, 1947

AFTERNOON SESSION - - 2:00 P. M.

Presiding Officer:
JESS B. WORTHINGTON, President

MERCHANDISING

1. "COLOR, THE SLEEPING GIANT"—
   Under the direction of Frank P. Connolly, vice-president, Valentine & Company, Inc., New York City
2. "SELLING COLOR FOR LIGHT"—
   William Kennedy, division engineer, Sylvania Electric Products, Inc.
3. "REMOVING THE MYSTERY FROM COLOR"—
   William Clark, director, Color and Design, Congoleum-Nairn, Inc., Kearny, N. J.
4. "INJECTING COLOR INTO THE SALE AND JOB"—
   Gustave Plochler, color expert and system producer

Wednesday, 10 A. M.

MATERIALS

1. "IMPEDIMENTS IN PAINT PRODUCTION"—
   Ernest T. Trigg, president, National Paint, Varnish and Lacquer Association, Washington, D. C.
2. "THE PAINTING CONTRACTORS OPPORTUNITIES IN THE YEARS AHEAD"—
   Thurlow J. Campbell, president, The Valspar Corporation and chairman executive committee, National Paint, Varnish & Lacquer Association, New York City
3. "INDUSTRY RELATIONS"—
   H. S. Margetts, executive vice-president, W. P. Fuller Company, San Francisco
4. "THE CURRENT AND FUTURE BRUSH AND BRISTLE SITUATION"—
   Philip H. Thayer, president, Hanlon and Goodman Company, Belleville, N. J.

Thursday, 10 A. M.

INDUSTRY MANPOWER

1. "LABOR PROBLEMS"—
   (1) L. M. Rafferty, general secretary-treasurer, Brotherhood of Painters, Decorators, and Paperhangers of America, Lafayette, Ind.;
   (2) Joseph F. Clarke, fourth general vice-president, Brotherhood of Painters, Decorators and Paperhangers of America
2. "NEED FOR EXPANSION OF APPRENTICESHIP IN THE PAINTING INDUSTRY"—
   William F. Patterson, director, Apprentice Training Service, Washington, D. C.
3. GENERAL DISCUSSION OF LABOR AND MANPOWER PROBLEMS

Afternoon Session

INDUSTRY SECURITY

1. "THE SHOP CARD SYSTEM"—
   Cleo J. Klaas, Los Angeles, Calif.
2. "HOW THE CALIFORNIA LICENSE LAW WORKS"—
   Nicholas J. Morrisey, deputy registrar, Department of Professional and Vocational Standards, Sacramento.

PROMOTIONAL ADVERTISING

SPEAKERS:
Cleo J. Klaas, Los Angeles, Calif.
Robert W. Linley, editor, Western Paint Review, Los Angeles, Calif.

Did You Know That . . .

Bethlehem Pacific Coast Steel Corporation announces that it has a film library containing many interesting pictorial accounts of various phases of steel making and shipbuilding.

Bethlehem films are extensively used by manufacturers of steel products, technical societies and trade associations, jobbers and dealers, colleges and universities and other groups such as business and service clubs.

These motion pictures are available, free of charge, through the district offices of Bethlehem Pacific Coast Steel Corporation located in San Francisco, Los Angeles, Seattle, Portland and Salt Lake City. A booklet completely describing these films can be obtained by writing to one of bte district offices.

oOo

Frederick B. Barss, architect, announced this week that he has moved his office from 268 Market Street to 110 Market Street, Room 209. Telephone YUkon 6-9062.

oOo

Offices of the New **Amsterdam Casualty Company** have been moved to 320 California Street, first floor. The telephone number is SUtter 4626.

oOo

Sixteen Beale Street is the new address of the **Standard Electric Time Company.** Its telephone numbers are SUtter 5980 and 5981.

FEWER WOMEN WORK IN FACTORIES NOW

The year 1946 was characterized by a sharp reduction in the female factory force in California war industries accompanied by a rise in peacetime industries, largely trade and service.

Manufacturing industries in the state employed an average of 101,800 female production workers in 1946 compared with the wartime peak average of 240,900 in 1944. Nonetheless, the current level is more than 50 per cent above 1941 when 66,400 women wage earners were at work in these industries.

Although the ratio of women to the total manufacturing force dropped in 1946 from wartime highs, the current percentage is substantially above that in former peacetime years. This is especially significant in durable goods industries where the 1946 ratio of 11.5 percent compares with 3.3 percent in 1941.

URGENCY CERTIFICATES AID IN BUYING SURPLUS

WASHINGTON. — Outstanding Civilian Production Administration urgency certificates, formerly not valid against Government - owned surplus which the War Assets Administration had advertised for sale, may now be used to buy such surplus when the public offering so states, CPA said today.

This would supply, for example, in the field of construction machinery, such as tractors, cranes and bulldozers. Although CPA no longer issues urgency certificates, at the time of the revocation of Direction 16 to Priorities Regulation 13, under which they had been issued, it was stated that those outstanding would remain valid.

Action was taken by issuance of Direction 25 to Priorities Regulation 13, and conforms with changes of procedure by WAA and the Office of the Housing Expediter, designed to speed up surplus disposal.

PERSONAL MESSAGE TO PAINTING INDUSTRY

By JESS B. WORTHINGTON, PRESIDENT
Painting & Decorating Contractors Of America

It may sound redundant to be ever harping upon more and more members, but it must be appreciated that maintaining an influential membership will always be one of the essential goals of a strong organization.

Our Association set-up—local, state and national—is conducive to strength and effectiveness if carried to its intended proportions. In the local area we foster the chapter to meet the problems that are peculiarly characteristic to our industry in that community. If the chapters multiply, to at least three in number, we have the Council to coordinate the efforts of the chapters, however, large the number, and to maintain policy, provide protection and develop the welfare of the industry on a state-wide basis. As Council organizations are developed through the states, we consolidate our efforts into National implementation through the Painting and Decorating Contractors of America. In the National Association all trade problems come up for consideration and study and solution, to the end that our members may be protected and our industry welfare promoted.

Our National Association has made rapid progress on membership growth during the past year. In fact, it has been the most spectacular in the history of the Association. Thirteen hundred new members may be regarded as an army of recruits; fifty new chapters may be regarded as a series of Council organizations. It may be said to the credit of our chapters and councils officers throughout the country that the membership growth in the past year has been creditable. We know that the California Council has taken her place in this advanced procession.

When we consider that Association effort on the part of small business enterprise is largely a volunteer contribution of service to the welfare of one's industry and to the protection and development of one another, we must commend business for its unselfishness and members for their character.

Problems in our industry are never ceasing. The paint material situation is more distressing at this writing from the standpoint of the painting contractor, than at any time since the war started. Our National Association has and is devoting its best efforts to relieve this situation through Washington contacts and I'm sure as a result, materials have become available that we would otherwise not have had. However, the situation is not as we would like it, and it's anyone's guess when materials will be available in quantity, quality, and in variety to enable careful painting contractors to hit their old-time stride.

There is a great shortage of journeymen painters in our industry. In certain isolated communities the scarcity of mechanics may have eased recently, but there has been no perceptible improvement in the metropolitan areas.

The only thing that will meet scarcity is production. The only salvation for manpower shortage is more men. The most expedient way to develop more journeymen painters is to train them. This is our only assurance of efficiency and skill in our industry.

Apprentice-training, therefore, has come to the front not as a voluntary program to be promoted, but as a compulsory undertaking brought upon us by the stringency of the times. Our National Association is and has urged all our Chapters to set up the joint committees to matriculate training classes under proper instruction in our vocational schools throughout the country.

Our manpower shortage will not be adequately supplied with competent journeymen until we make our training classes more effective, much after the manner of the European system.

#

REDWOOD WORKERS STRIKE PROLONGED

EUREKA.—Striking AFL redwood lumber workers in Mendocino and Humboldt Counties last weekend rejected a plan worked out by negotiators and government conciliators to end its year-old strike.

According to Frank Chapman, representative of the Brotherhood of Carpenters, with which the lumber workers are affiliated, the dispute now centers about jurisdictional features.

The vote turning down the proposed new contract was 1242 to 42.

6,000 Home Builders Expected to Attend Chicago Convention

CHICAGO.—More than 6,000 home builders are expected to attend the National Association of Home Builders' annual convention-exposition at the Stevens Hotel from Sunday Feb. 23 to Thursday, February 27.

The exposition of postwar equipment, materials and appliances will be opened at 2 p. m., on Sunday.

The first general session will begin Monday afternoon, with Paul Griffith, American Legion national commander, heading the program. Association officials will report on activities of the year.

Housing Expediter Frank Creedon will speak at a Tuesday morning panel on the subject of "Status and Outlook of Veterans' Housing". An afternoon panel on "Financing Outlook and Availability" will be addressed by Administrator Raymond Foley, of the National Housing Agency.

Wednesday's event will be the evening annual banquet in the Stevens ballroom. Daytime panels will treat methods, materials, and labor problems.

Commander Louis Starr, of the Veterans of Foreign Wars, will address the final convention session Thursday morning. The Association's new board of directors will remain after the close of the convention to hold sessions Thursday and Friday.

Pre-convention board of directors meetings will be held in Chicago beginning February 20.

A large delegation of Bay Area home builders will attend the national convention of the NAHB.

George H. Sharp, executive vice-president of the Associated Home Builders of Alameda County, Inc., announced that the metropolitan Oakland delegation at the convention will include the following members:

Philip F. Heraty, president, Maurice G. Read, director, David D. Bohannon, regional vice president of the national association, and Clarence C. Jordan, A. J. Clancy, Charles A. Russell, R. P. Kirkpatrick, L. H. Lincoln;

Otto Blauert, vice-president of Oakland Title & Guarantee Company, S. M. Shapero, H. S. Pulliam, Ray D. Nichols, E. J. Unruh, assistant vice-president of American Trust Company.

Other members of the local association are expected to add their names to the list before Convention time.

Milton W. Morris, executive secretary of the San Francisco chapter, announced that the following prominent home builders from his chapter will attend the Chicago meeting:

Ellis and Henry Stoneson, J. C. Johnson, Carl and Fred Gellert, Earl Popovitch, George Belcher, Floyd Frank, Joseph Filippo;

Chris McKeon, William Young, Henry Doelger, James Jansen, John McMahon, Paul Ford, Ray Lindsay, Perry Liebman, Jesse Horn, and E. W. Perkins.

Also in Mr. Morris' party will be Phil Davies, of the San Francisco Bank, R. J. Moretti, Bank of America, F. A. McCue, local manager of the U. S. Gypsum Company, and Sacramento sub-contractors Carroll Cook and Willard Davis.

#

The last national convention of Painting and Decorating Contractors of America that was held in California was twenty-five years ago. The 1947 convention is the first ever held in San Francisco.

STEELFORM CONTRACTING CO.
666 Harrison Street DOuglas 5583 San Francisco

Three Large Dams Under Construction On Columbia Basin

COULEE DAM, Wash.—For the first time in the history of the West, three large earth-and-rock dams are under construction simultaneously on a single reclamation development — the Columbia Basin Project of Eastern Washington, the bureau of reclamation reported today.

They are the 3½-mile-long Potholes Dam, the 1,900-foot Long Lake Dam, and the 10,000-foot South Dam. In all, they will contain 12,190,000 cubic yards of earth and rock, greater in volume than the 10,500,000 cubic yards of concrete used in the Grand Coulee Dam and its two massive powerhouses.

The three new dams, said Bureau officials, represent contracts totaling $13,800,000 and are part of the comprehensive system of irrigation structures designed to serve more than a million acres of dry land in the Big Bend region of the Columbia River. This area will be divided into from 12,000 to 15,000 family-size farms for veterans and other settlers.

Work on the South Dam, near Coulee City, Grant County, began last fall under a $2,771,000 contract granted the Bair-Crick Company of Spokane. Heavy earth-moving equipment started operating at the two other dams in the past few days, thus bringing the total under construction to three. A fourth large earth-and-rock dam on which bids are yet to be called, is the North Dam in the Upper Grand Coulee.

The Boise firm of J. A. Terteling & Sons holds the $1,770,000 Long Lake Dam contract, and the firm of Lytle, Amis, and Green will build the $9,300,000 Potholes Dam, 4th longest in the United States.

Long Lake Dam, just north of Sentford, also in Grant County, will save nearly six miles of costly Main Canal construction, said Reclamation Commissioner Michael W. Straus. The Potholes Dam, blocking the Drummheller Channels, near the center of the Columbia Basin, will capture seepage and waste flow for nearby irrigated land, thus reducing pumping costs at the project's main pumping station at the Grand Coulee Dam.

At the South Dam, which will block the Upper Grand Coulee to form a 27-mile storage reservoir for the irrigation project, Bair-Crick Company is working on the foundation cut-off wall and completing excavation on the foundation for the two-mile structure. At Long Lake Dam, Terteling & Sons are completing their camp and performing preliminary excavation for the foundation of the 1,900-foot barrier. At Potholes Dam, work has started on the foundation and outlet works. The outlet will be needed to carry away the flow of Crab Creek and other natural waterways during construction.

If contractors' schedules are maintained, the Long Lake Dam is to be completed by February 23, 1949; the South Dam by February 13, 1949; and the Potholes Dam by November 6, 1950. The Potholes Dam, by far the largest, will contain approximately 9,200,000 cubic yards of material. The Long Lake and South Dams will contain about 1,500,000 cubic yards each.

#

INGHAM NEW PRESIDENT OF LUMBERMEN'S GROUP

PORTLAND.—Charles W. Ingham, of Fischer Lumber Co., Eugene, Ore., aws elected president of the West Coast Lumbermen's Association at its recent 36th annual meeting.

Judd Greeman, Oregon-American Lumber Corp., Vernonia, Ore., vice president for Oregon; Corydon Wagner, St. Paul and Tacoma Lumber Co., Tacoma, Wash., vice president for Washington; Frank A. Graham, Hills Creek Lumber Co., Jasper, Ore., treasurer; Col. W. B. Greeley, Seattle, vice president; H. V. Simpson, Portland, Ore., executive vice president, and Harris E. Smith, Portland, Ore., secretary.

New England Conference Organized In 1947; Plans Zone-Wide Industry Activities

By WILLIAM C. SUTHERLAND
President, New England Conference; Regional Vice- president Zone No. 1

The New England Conference is now a full-fledged organization! The States of Maine, New Hampshire, Massachusetts, Rhode Island and Connecticut have united in an aggressive program of action based on industry problems as they affect the interests of our special area and as these problems are related to the national functioning of the Painting and Decorating Contractors of America. Under the new set-up as provided in the by-laws, the New England Conference will strive for—and it confidently forsees—a steadily increasing membership in all its Councils and unattached Chapters, a marked development in vitally needed services for such membership, and a coordination of effort which will prove a definite factor in strengthening the industry's national program.

Full realization of the great potentials for a unified New England Association came last September with the outstanding success of our convention at Poland Spring, Maine, which crystallized the thinking and planning of several years. We had been meeting at national conventions as individual representatives of our several states, and had noted the community of interest and desires as expressed in our resolutions and participation in debates. We had exchanged courtesy visits at our several State Council conventions, and here again we noted similarity in problems and in our approach to those problems, in our solution of them.

The New England Conference was formally organized with the adoption of by-laws at a meeting in Hartford, Conn., January 23, 1947, and the election of Mr. Sutherland as chairman, with George Winch as secretary-treasurer. Sutherland has long been a prominent contractor in Providence. Winch is a contractor in Allston, Mass. William R. Muirhead, of Muirhead's Shops, Inc., is vice-president.

New England, of course, has long been regarded as one of the most closely-knit geographical, industrial and economic areas in our country. Why not establish a coordinated group for the painting industry in this area? That's what we set out to do. That's what we have now done. The idea developed slowly, because of the peculiar conditions of the war years: a surplus of jobs, shortage of manpower, labor problems, government rules and regulations. We felt no time, no facilities to undertake what we knew to be our first step—a campaign to increase membership. Our aspirations were realized with the end of the war which brought a marked increase in enrollment in Rhode Island, Connecticut and New Hampshire and in some chapters in Massachusetts. The time had come to act. To act, we needed funds. We determined to hold a two- or three-day meeting, to invite all members of the PDCA, their ladies and unaffiliated members of the industry. Space does not permit detailing of our long hours of planning, of our set backs, of the untiring work of our committees. But that meeting was held at Poland Spring, and it was a success—financially, socially and industry-wise. It showed that we could develop an organization on a zone basis. It has rewarded those men of far-seeing vision who believed a strong New England trade organization was possible.

So successful was the convention that President Jess B. Worthington—who was our guest with Executive Director George S. Stuart—recommended that other zones would do well to try the same thing. Such a remarkable job was done on our Year Book that two Rhode Island organizations in other fields are using it as an example of what their own associations may do. And, of course, the immediate and insistent call was heard for establishment of the convention as an annual event. This will be held, at a time and place to be announced, and by that date we fully expect that the progress reports then to be made will indeed represent progress.

Following are the factors which will enable us to reach our goal:

1. Development of a sound plan of financing to permit us to carry on with an organization capable of truly representing our industry. Indicative of their faith, certain contractors have contributed sizable sums as an underwriting fund at the start.

2. Appointment of a full-time field man to work under the direction of a special committee, this field man to establish new Chapters, increase membership in existing Chapters, and act as contact man with such Chapters and with the National Executive Director.

3. Establish the broadest possible program of service to Councils and Chapters, through a direct bulletin service that will deal with all phases of industry problems: manpower, materials, government regulations, labor relations, meeting programs, etc.

4. Open Conference meetings to all members of the PDCA and encourage participation and suggestions of a constructive nature.

Realization of this program is entirely possible through the hard work which we all propose devoting to the task, and thus we will achieve a strong organization without which, in this age of complicated business operations, no industry can move forward.

#

'ACTUAL PRICE DECLINE POSSIBLE THIS YEAR, DESPITE MATERIAL COST'

WASHINGTON.—Major General Philip B. Fleming, administrator of the Federal Works Agency, and the Office of Temporary Controls, predicted no immediate change in building materials prices. He addressed a Monday luncheon meeting of the Washington Building Congress.

He added: "There may be some further increases in wages and building material prices this year but on the other hand, look for a smoother flow of materials and better labor productivity. Thus we could get no increase, or even anactual decline."

He depicted highway construction work as "especially sensitive" to present high costs.

Reports from nearly all the states indicate that about 22 per cent of the bids for needed work are being rejected because they are so much above the cost estimates, he declared.

Color History Began 50,000 Years Ago

By Gustave Plochere
Color Consultant

Color Power is everywhere. Color and light are important factors in our emotional life and general well being. Everywhere, on the farm, in the metropolis, in the plant, in the office, at home, in all places of rest and at centers of recreation, we are affected by colors, consciously or unconsciously.

Wrong colors not only cause eye fatigue, but are depressing and aggravating. Right colors are easy on the eyes and are stimulating, inspiring or calming.

The appropriate colors and right lighting conditions mean more stable emotions and give men, women and children better general health and higher morale.

Color itself goes back to the beginning of heaven and earth when this planet was a mass of muck and goo—when mountains and oceans began to appear and the first colors came to life on the face of the earth.

The first time a man used color in decoration was 50,000 years ago on the stone ceiling of a cave near Altmire, in Spain. These drawings were of prehistoric animals, which scientists tell us roamed Europe during the Stone Age.

Many centuries later the Babylonians, Assyrians and Egyptians used color lavishly for interiors of their dwellings and tombs.

Their paint makers made green, blue, terra cotta, gold and black. Lamp black was as common then as it is today. They made ultramarine blue by breaking up Lapis Lazuli into small fragments, then separating the chips and grains of blue color that appeared in the semi-precious stones, then grinding them into a powder and sifting this again to obtain the pure mineral color.

This material was mixed with water and gum arabic, or water and white of egg, thus producing a paint unsurpassed in its delicacy of color. This color was used not only in decorations but also for clothing.

Certain colors were restricted for the use of the Pharaohs, the Princes and Princesses—members of the High Priests and the Nobles. The city dwellers had one set of colors while the peasants and slaves had another.

In the Greek period we think of pictures of the Parthenon in Athens —or Greek Temples with their beautiful symetrical columns of glistening white marble. Up until about twenty years ago we are told that they had always been natural color of stone or marble.

However, scientists now tell us that all of the old Greek buildings, both interior and exterior, and their statues were painted in deep, rich, colors, similar to the colors used in Egypt. The palette in those days did not have the range and variety of hues we have today. One of their main combinations for the facades on buildings was black and a rich golden yellow—the black serving as a background.

The Romans began to use ornamentation and design, and in addition began shading their ornaments, which had not been done by previous races. Here, for the first time, we see two shades of green on a leaf design. While still using the same six or seven colors used by the Egyptian, they added white for tinting and black for shading.

The blaze of color in the French and Italian Renaissance brings readily to our minds the richness of the colors used in that era. For centuries certain religions used special colors for ceremonials which are still apparent today in the services of the Catholic Church and the Masonic Orders. Buddha's color was yellow—and all the Priests in India wear yellow robes and carry yellow umbrellas and no one else is so attired.

Mohammed, the Prophet, used black and green. The Holy Kaba in Mecca is covered with black and all the Mohammedans who have made the Pilgrimage to Mecca wear a Green Turban in honor of the visit.

Purple was always a royal color. The reason was that purple in ancient days, during the time of King Tyre, could only be made from a tiny fish found on the shores of the Mediterranean Sea. Within the head of this fish was found a secretion which could be converted into this wonderful dye and the color was known as Royal Purple or Murex which is mentioned in the Bible. The secret of making this color died with the vanishing Phoenicians.

Isaac Newton, in 1666, while working on a lens for glasses, discovered that light passing through a prism, disclosed the seven spectrum colors, starting with deep violet on the short wave length and going to deep red on the long end. Beyond violet the spectrum continues into the invisible ultraviolet waves. Beyond the red light the rays lengthen into invisible infrared rays of heat. Newton was the first to complete the color circle by adding purple to fill the gap between infra-red and ultra-violet.

About 1720, a copper engraver, by the name of Le Blond, in Frankfort, on Main, discovered that by using three pigments, blue, red and yellow, he achieved the same results as he had formerly with seven. Ever since this our primary grades in schools have been taught that red, blue and yellow are the primary colors.

After Isaac Newton discovered the spectrum colors there came a period of color consciousness with any number of theories and books on the subject by such outstanding men as Goethe, the German poet, Helmholtz, Young, Maxwell, Schopenhauer, Brewster, Hering and Chevreul. Chevreul's work on color theory is in most of our libraries. However, when his theory was tried out on the weaving looms in the Gobelin Tapestry factory in France where he was the director of the dyeing department, they proved unsatisfactory in practice and were abandoned.

About the same time, here in the United States, Mr. Ogden Rood published a book on color called "Modern Chromatics" which caused considerable comment in France, about this time Vincent van Gogh, Monet and Cezanne changed from the Old Dutch and French schools of painting to the, by now, world famous Impressionistic Art.

Probably the most famous of all colorists was Dr. Wilhelm Ostwald who was one of the world's greatest scientists. He was winner of the Nobel Prize in 1909, Honorary Professor of the University of Berlin, Edinburgh, London, and a Guest Lecturer to our own Harvard University. Dr. Ostwald spent twelve years of his life in the study of color and he left the world his monumental work on this subject. Probably his color solid is one of the most masterful pieces of work ever accomplished in color.

We are told that there are two million colors visible to the human eye. Most of these do not interest you to any great extent in your business, but about 1,000 or 1,500 of them are those we are necessarily interested in, because they are the ones you are called upon to use more or less all the time.

Good coloring is nothing but good relation of colors, one to another. We all know that we have some fine architecture in the United States, but just as surely we also know we have some horrible examples of architecture. It has been my experience that nothing can cover up a defect in design as the proper use of color. You can submerge a bad line and accent a good line until you are conscious only of beauty.

With color a building can be made to recede into a background or it can be made to stand out from its surroundings, which ever effect is desired. A building that is too low architecturally can be made to seem higher with the proper use of color just the same as a too high structure can be reduced in apparent height. Lines that are too wide can be cut with color to throw them into related proportion to their surroundings.

'47 HARDWOOD FLOOR OUTPUT TO EXCEED '46

Production of standard grade hardwood flooring in 1947 is expected to be 80 to 95 per cent above 1946, the Civilian Production Administration said today.

Officials of the CPA forest products division anticipated 1947 production of 800 million feet of all grades and species of hardwood flooring. The five principal flooring species (oak, maple, birch, beech, pecan), are expected to make up 650 to 700 million feet of total output, with the remainder in non-standard grades and flooring of other species. Total production will more than meet anticipated 1947 housing requirements for 638 million feet, but will fail to meet combined expected requirements of all users by approximately 163 million feet, CPA said.

#

PROVIDE FRIANT-KERN WORKERS WITH HOUSING

Housing for personnel engaged in the construction of the bureau of reclamation's Friant-Kern Canal in California, will be provided under a contract recently awarded. Barracks from Army Air Force Training Center at Fresno will be converted into five duplex residences at the government camp site at Orange Cove.

The contract for the housing and camp site improvements, amounting to $75,695, was awarded to the Paul Spencer Constr. Co. of Los Angeles. Work must be completed within four months.

Painter Apprentices Double Past Year, Patterson Asserts

"California is leading the nation in the number of apprentices employed in the skilled trades with 18,519 registered with the California Apprenticeship Council at the end of last December," William F. Patterson, Washington, director, Apprentice-Training Service, U. S. Department of Labor, said today.

Gains Remarkable

Patterson's statement was made in an address before the 62nd national convention of the Painters and Decorators Contractors of America here.

He credited the achievement to the excellent and continuous work of Archie J. Mooney, chief, division of apprenticeship standards, California Department of Industrial Relations, and his staff.

At the end of last December, 1,032 painter apprentices were employed in California, or about 100 percent more than were employed at the end of December, 1945. During the 12-months period the number of California joint area-wide contract-or-union apprenticeship programs in the painting trade increased from 20 to 32, and the number of contractors participating in these programs from 909 to 1,805, according to Mr. Patterson.

"Nationally, record gains were made also. The following increases were recorded for apprenticeship in the painting trades: apprentices listed at the end of last December, 7,305, about 100 percent; joint area-wide contractor-union apprenticeship programs, from 181 to 300, and participating contractors, from 4,307 to 8,339.

"These remarkable gains are due to the fact that there are not enough skilled workers, especially in the building trades, and because of the record volume of building projected for at least five years.

War Made Security

"Our skilled work force was depleted because during the depression years, when many journeymen were out of jobs, very few apprentices were hired and trained. Then came the war and the armed forces took practically all of our apprentices and potential apprentices, in addition to many craftsmen. Now industry, especially construction, is beginning to develop the skilled workers it needs," he said.

He stated that there are more applicants for employment training in apprenticeship than can be accommodated. To remedy this situation many more local apprenticeship programs should be set up and many more employers should train apprentices under these programs.

He emphasized that apprenticeship programs should be registered with a State Apprenticeship Council, or where there is no Council, with the Federal Committee on Apprenticeship. Registered programs, he said, provide thorough training in all of the skills of a trade.

Registration Aids G. I.

It is more important than ever to have apprenticeship programs registered, he added, as about 85 percent of all currently employed apprentices are veterans. If veteran-apprentices are working under a registered program, those qualified for a subsistence allowance under the G.I. Bill have no difficulty obtaining this financial aid from the Government, Patterson said.

SEEK CHANGES IN LAVATORY, SINK TRAP STANDARDS

WASHINGTON—The National Bureau of Standards announces that Simplified Practice Recommendations R21-46. Lavatory and Sink Traps has been promulgated and that printed copies are now available. Copies may be purchased from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. The list price is five cents per copy and a discount of 25 per cent from list price will be applied to orders of 100 or more copies.

R21-46 is the first revision of the original recommendation which became effective in January 1925. It contains six tables of various types of traps showing sizes and styles recommended for stock production. One table, containing two items of cast traps with swivel tee inlet for sink and tray combination, is new to the recommendation with this revision.

#

The Painting and Decorating Contractors of America was organized in 1884. The association's first national convention was held in 1885.

Present Stocks of Linseed Oil May Be Used Up in 90 Days; Material Outlook Disappointing

"The removal of practically all government controls has given us all a tremendous uplift in morale," declared Ernest T. Trigg, president of the National Paint, Varnish and Lacquer Association, in an address to the national convention of Painting and Decorating Contractors of America Wednesday.

The address was read by Charles H. Sondhaus, president of the Golden Gate Paint, Varnish and Lacquer Association, in Mr. Trigg's absence. It continued:

"Nearly all restrictions on the use of materials were removed more than a year ago, but the price controls which remained in many cases tended to hamper efforts to increase the supply of raw materials and otherwise made things very difficult for the paint manufacturer.

Linseed Oil Short

"It was the OPA philosophy that increased volume compensated for decreased profit margin and all pleas of this industry for price relief fell upon deaf ears. By virtue of reduced selling costs, by 'stretching' oil, by reduction in the number of sizes and colors—and by elimination of some items normally in heavy demand—and with increased volume, too, paint manufacturers generally were able to keep their over-all dollar profits comparable to the 1936-39 average which was OPA's yardstick.

"No relief at all was afforded until last October when insignificant increases were granted for a few house paint items in recognition of an increase in the linseed oil ceiling and a more substantial increase for a few of these items early in November, after linseed was removed from price control."

The national leader praised action removing price controls which, he said, enabled the paint manufacturer to restore his production schedule to a more normal balance.

He pictured the raw material outlook as "disappointing in relation to current needs," with linseed oil as the most critical item. He said:

Buyer's Market Looms

At the present rate of consumption all of the linseed oil from our 1946 domestic crop and all the foreign oil for which any definite commitment has yet been made will disappear within the next sixty to ninety days.

He predicted a record volume of business in the painting industry and predicted that "the buyer's market is coming on hence slack and it has already arrived in some lines of business."

#

CONTINUE PREMIUM PAYMENTS ON IRON

Continuation to June 30, 1947, of premium payments on foundry and malleable grades of pig iron, in order to assure maximum production of this critical material, was generally approved by Joint Pig Iron Industry Advisory Committee this week. At the same time, the committee recommended discontinuance of all government controls as rapidly as possible.

Combined production of plants participating in the plan increased an average of 48,800 tons a month in the September-November period over the three months prior to the institution of the plan. The overall increase in the industry, including both participating and non-participating plants, was 4.4 per cent in September and 8.9 per cent in October, the latter a peak for 1945-1946. In November, despite the coal strike, the daily average production was higher than during any of the eight months of 1946 prior to the premium plan.

New Steel Boiler Unit Has Greater Reception—USRC

The Pacific Steel boiler division of the United States Radiator Corporation, Detroit, Mich., disclosed today increased reception for its unique, adaptable boiler that minimizes the problem of installing the unit after the building has been constructed.

The Pacific Steel Boiler is a compact unit that is readily disassembled into base, firebox and shell, all of which can enter a building in sections and can be reassembled on the job without welding. Pacific Steel Boiler division officials point out that the reassembled boiler maintains shop and boiler insurance inspection standards. Elimination of further welding makes a second inspection unnecessary.

The unusual construction of the Pacific Steel boiler, a distinguishing characteristic first advanced by United States Radiator's Pacific division, makes installation a simple procedure, and eliminates the necessity, in many replacement jobs, of making alterations in passageways and doors in order to bring the unit into the building. The firebox can be split so that it will pass through a minimum space allowance.

As an example, a Pacific Steel Boiler of 6,000 square feet capacity will pass through a space 46-¾-in. x 34-½-in. or through an ordinary 3 ft. x 7 ft. door.

Side and rear connections give positive circulation between the shell and the firebox of the Pacific Steel boiler. As water heats, it rises through side connections with a nozzle action, tending to wash air bubbles from tubes of the boiler, and the circulation is completed through the rear circulation connection.

PLANS and Speculations

Elections February 25th will determine whether Mission San Jose will be annexed to the Irvington sanitation district.

oOo

Construction of a bridge over the Tuolumne River between Empire and Hughson is scheduled to start this summer.

oOo

Monterey Peninsula Association has asked the state utilities commission to investigate the Monte Regis Water System, privately owned, on grounds that it is operating as a public utility without proper authority.

oOo

The War Department has authorized a joint army-city study of possible use of the Presidio as home sites.

oOo

The U. S. Forest Service will hold a hearing on proposed plans for development of the San Gorgonio Primitive Area in San Bernardino National Forest, on February 19, in San Bernardino.

oOo

Petitions for organization of a hospital district within the Kern County fourth supervisorial district are being circulated, and will be presented to the board of supervisors when signatures of 15 per cent of the voters have been obtained.

oOo

Tentative plans for a $4.5 million earthquake proof, subterranean garage in downtown Los Angeles, under Pershing Square, soon will be laid before the Los Angeles city park department.

oOo

Financing of a new estuary tube in Alameda is one of the prime objectives of the Chamber of Commerce.

Develop New, Small Tournapull Featuring Two Individual Electric Motors for Control

A new small Tournapull for high-speed dirtmoving, the Model D, has been developed by R. G. LeTourneau, Inc., Peoria, Illinois, to add to its line of rubber-tired earthmoving and construction equipment. Built to answer the need for a small, high-speed scraper unit on small yardage projects, the D Tournapull features many new developments in design.

Powered by an 85 HP gasoline engine, this prime mover is equipped with the new E-4 Carryall Scraper, having a load limit of 4 tons and a struck capacity of 3.3 yards. The unit is self-loading, has 4 speeds forward, 4 reverse, and travels up to 23 miles per hour.

One of the outstanding features of this Tournapull is the new electric control by individual electric motors—a revolutionary operating principle which replaces conventional tractor steering and gear shift levels. It also eliminates the need of a power control unit for scraper operation. Operator steers, shifts and handles all scraper controls by buttons on the electric control panel.

The D Tournapull has a new type differential which keeps both wheels pulling at all times. The design of this differential is such that on slippery going the most power is supplied to the wheel on firmest footing. Neither wheel will spin independently of the other. This factor, along with positive steering, another development, contributes greatly to mobility and ease of operation. Positive steering enables the operator to lock the Tournapull and Carryall into a single unit and keep this unit traveling in a given direction.

Air brakes add to safe operation. The air brakes, differential, transmission, electric motors and generators were all engineered especially to answer the problems of heavy construction work, and are designed and manufactured by LeTourneau.

Ability to turn on a 25-foot fill and to turn in its own length (22 ft 5 in.) from a full stop makes this small, fast rig extremely maneuverable. Overall dimensions are: length 22 ft. 5 in; height 7 ft. 4 in.; wheelbase 13 ft. 2 in.; width of cutting edge 6 ft, and weight empty 7½ tons.

A new type and size of pneumatic rubber tire is used on the 2-wheel D Tournapull prime mover. This is a 14.·x 32 tire with tapered beads which seats itself firmly against the wheel rim at low air pressures. This special tire gives ample flotation in soft material and enables the unit to travel over paved surfaces without damage. 9.00 x 16 tires are used on the E-Carryall Scraper.

Based on good working conditions, average material, 60-minute operating efficiency, a single D Tournapull, self-loading and one-man operated, is capable of moving 48 yards an hour on 200 ft one-way haul; 40 yards on 800 ft. haul; 33 yards on 1500 ft. haul; 27 yards on 2500 ft. haul; and 18 yards an hour on 5000 ft. one-way haul.

Previous crawler and rubber-tired scraper units were usually worked in fleets but one of these new small Tournapulls can operate successfully all by itself. Its high production capacity, speed and mobility make it especially versatile on general construction work for grading, maintenance and drainage on roads and airports, stripping and working roadside gravel pits, spreading surfacing material, leveling building sites, yards and parking areas, etc. In addition, this one-man utility dirtmover is equally useful around counties, mines, pits, quarries, railroads, logging operations, and industrial plants.

It is expected that LeTourneau Distributors throughout the United States will have the D Tournapull and E-4 Carryall Scraper on their floors in approximately 30 days.

International Lighting Exposition Offers $1200 Merit Awards for Best Lighting Plan

Electrical Contractors, Wholesalers, Architects, Engineers Utility Men Asked to Submit Outstanding '46-'47 Installations; Deadline for Entry August 31

Chicago, Ill., (Special)—A competition for $1200 in merit awards, designed to bring to the Second International Lighting Exposition, Nov. 3-7, 1947, outstanding examples of "What Planned Lighting Can Do" in industrial, store, and office applications and in floodlighting and street lighting, was announced today by the exposition operating committee.

"Through these merit awards," the committee states, "we hope to give opportunity for electrical contractors, utility lighting men, architects, consulting engineers, and wholesaler's representatives not only to gain recognition for work well done, but through the medium of display at the coming exposition to provide inspiration and ideas for better lighting to the thousands who will be in attendance."

Deadline August 31

Entries are to cover reports and data on the results of planned lighting installations made during the calendar years of 1946 and 1947. All submittals accepted by the board of judges will be placed on exhibit at the second International Lighting Exposition and Conference, and will be given an Award of Merit. In addition, the board of judges will also award three cash prizes of $100 each to the best entries from each of the four classifications, a total of 12 cash prizes for a total of $1200.

Classification 1. Electrical Contractors; Classification 2. Utility Lighting Representatives; Classification 3. Architects and Consulting Engineers; Classification 4. Wholesaler's Lighting Specialists and salesmen.

The entire Merit Award Program is under the direction of the second International Lighting Exposition and Conference, which is sponsored by the industrial and commercial lighting equipment section of the National Electrical Manufacturers' Association.

Entry Blank Required

An official entry blank, containing the complete rules and conditions of the merit award competition, together with helpful suggestions for the preparation of entries may be had by writing to the International Lighting Exposition Award, Suite 818, 326 W. Madison Street, Chicago, Illinois.

LAUDS ADMINISTRATIVE AID ON REGIONAL BASIS

WASHINGTON.—Paul J. Raver Bonneville power administrator, submitted his annual report to congress this week.

He cited reconstitution of the statutory Bonneville advisory board at the regional rather than national level as bringing about "more effective and efficient working relationships among federal agencies concerned" and particularly praised the work of the Pacific Coast Board of Intergovernmental Relations, which seeks to correlate the activities of the federal, state, county and municipal governments.

#

NEW BRIDGES LINK URGED IN SENATE

SACRAMENTO.—Senator Randolph Collier introduced into the committee on transportation a proposal that a new route via Broadway between approaches of the Golden Gate and Bay bridges be established.

It is part of Senate Bill 5, which sets up a formula for assigning funds to cities and counties to finance their participation in the 10-year modernization program.

The bill also includes the much-protested freeway over Twin Peaks, Alemany Boulevard, sections of the Bayshore Highway, El Camino Real, and Junipero Serra Boulevard within the city limits.

Plans Nearing Completion
Warehouse and Garage Cost $40,000
SAN RAFAEL, Calif., Marin County. West line of D St., south of 2nd St.
Owners—Z. and S. Smith, c/o architects.
Architect — Heiman & Pollock, 605 Market St., San Francisco, Calif.
Reinforced concrete, one-story warehouse (50x150 ft.), wood trusses and three-truck garage.

2/12/47 3
CPA Approval Granted—Grading Under Way
Cherry Processing Plant
Cost $34,500
SAN JOSE, Calif., Santa Clara Co. 10th and Taylor Sts.
Owner—Tri-Valley Packing Assn., 64 Fine St., San Francisco, Calif.
Architect—private plans.
Frame and stucco, saw tooth roof.
Contractor—Carl N. Swenson Company, P. O. Box 558, San Jose, Calif.

9-10—EDUCATIONAL BUILDINGS

2/12/47 9
Plans In Progress—Construction Contingent Upon Financing With Available Funds Provided by $50,000 Bond Issue Approved in January 1946
School (addition)
Approx. Cost $100,000
SAN LEANDRO, Calif., Alameda Co. Roosevelt School.
Owner—City of San Leandro Board of Education and San Leandro School District, Person W. Brown, president of board of trustees, Chas. W. Stone, secretary of board of education, c/o office of the board, in the Lincoln School Building, 451 Hepburn St., San Leandro, Calif.
Architects — Dragon, Schmidts & Hardman, 2068 Allston Way, Berkeley, Calif.
Six additional classrooms and auditorium to seat 750.

2/12/47 10
Owner Taking Bids on (1) General Construction; (2) Heating, Ventilating and Plumbing and (3) Electric Wiring—Due March 4, 2 P. M.
Physics Bldg. and Johnson Hall Additions Cost $1,200,000
SEATTLE, Wash., King Co. University of Washington Campus.
Owner — Board of Regents of University of Washington, Dr. Raymond B. Allen, President; Herbert T. Condon, Secretary, Room 1030 Henry Bldg., Seattle 1, Wash.
Architects-Engineers—John Graham, George Rasque, Associate Architect, 1501 Dexter Horton Bldg., Seattle 4, Wash.
Reinf. concrete with brick surfacing, 4-story, 150x50-ft each; L-shaped; built-up roofs; sound-auditorium for Johnson Hall.
Specifications obtainable from office of the Architects upon deposit of $20 refundable.

2/12/47 9
Contemplated—Bond Election In Amount of $250,000 Proposed by City Superintendent of Schools
Schools (3)
ROSEVILLE, California, Placer Co. Suggested sites in the Sierra Vista area and the Cirby-Riverside area.
Owner — Roseville City Board of Education, A. W. Ray, superintendent of schools, Atlantic street school, Roseville, Calif.
Includes 2 elementary school buildings.

2/12/47 9
Owner Taking Bids—Due Feb. 14, 8 P. M. (Bidder Figuring)
School (remodel)
MILL VALLEY, Calif., Marin Co. Homestead School.
Owner—Mill Valley School District, Horace Cagwin, clerk, Tamalpais Park Elementary School, 360 E. Blithedale Ave., Mill Valley, Calif.
Work includes remodel of boys' and girls' toilets; install new heating system; install new classroom windows; waterproof east and west basement walls.
Plans and specifications may be obtained from the Superintendent's office at Tamalpais Park Elementary School, 360 E. Blithedale Ave., Mill Valley, upon deposit of $10.00. Each bid must be accompanied by cash, certified or cashier's check, payable to the school district for at least 10% of bid.
The following contractor has taken out plans:
Peter Sartorio, 262 Clementina St., San Francisco, Calif.

2/12/47 9
Low and Only Bidders
School Building (Addition)
NORTH HOLLYWOOD, Calif., Los Angeles County. Toluca Lake Elementary School, 4340 Cahuenga Blvd.
Owner—Los Angeles Board of Education, 1425 S. San Pedro St., Los Angeles, Calif.
Architect—George Adams, 2439 Hyperion Ave., Los Angeles, Calif.
Engineers—Hillman & Nowell, 816 W 5th St., Los Angeles, Calif.
Frame and stucco, one-story, eight-classroom building (191x58 ft.).
Bids submitted Feb. 7 were:
General Construction
Louis F. Geisler Co., 9637 California Ave., South Gate, Calif., $101,164

pipe, 132 cu. yds. concrete, 120 lin. ft. reinforced concrete bridge railing, 27,000 lbs. steel reinforcing bars, 1400 lin. ft. precast concrete piling and other items.

Contract Awarded—Northwest Construction Co., Seattle, Wash., $147,-146.

(5) Surfacing with selected roadway borrow, crushed stone surfacing and constructing light bituminous surface treatment on 13.0 miles of S. S. H. No. 4-B, Wilbur South in Lincoln County, F.A.S. 274 (3), involving about 33,670 cu. yds. selected roadway borrow, 12,100 cu. yds. of crushed stone surfacing, 5300 cu. yds. crushed cover stone, 345 tons bituminous cement MC-2 and other items.

Contract Awarded—D. A. Whitley, Spokane, Wash., $79,925.40.

(6) Clearing, grubbing, grading, surfacing and constructing light bituminous surface treatment on 0.47 mile of S. S. H. No. 10-D, Chelan River North in Chelan County, F.A.P. No. F-45 (2), involving lump sum clearing and grubbing, about 64,860 cu. yds. common excavation, 26,420 cu. yds. solid rock excavation, 3260 cu. yds. ballast, 1225 cu. yds. crushed stone surfacing, 27 tons bituminous cement MC-2, 105 cu. yds. dry rubble masonry, 1070 cu. yds. structure excavation, 290 cu. yds. concrete, 24,000 lbs. steel reinforcing bars and other items.

Contract Awarded—Goodfellow Bros., Inc., Wenatchee, Wash., $151,839.30.

(7) Constructing steel girder bridge with reinforced concrete deck, 128 ft. long, over Rocky Creek and grading, draining, surfacing, 3510 cu. yds. unclassified excavation, 940 cu. yds. selected roadway borrow, 60 cu. yds. special riprap, 248 cu. yds. concrete, 22,000 lbs. steel reinforcing bars, 15,500 lbs. structural steel, 5200 lbs. cast steel, lump sum erecting structural steel and other items.

Contract Awarded—A. W. Stevens Construction Co., Mt. Vernon, Wash., $41,610.

(8) Constructing a reinforced concrete overcrossing over the Union Pacific Railroad and approaches thereto on Palouse Hills State Park Rd. in Franklin County, a state project, involving about 350 cu. yds. common excavation, 390 cu. yds. solid rock excavation, 250 cu. yds. screened gravel surfacing, 592 lin. ft. beam guard rail, 420 cu. yds. structure excavation, 178 cu. yds. concrete, 187 lin. ft. reinforced concrete bridge railing and 35,000 lbs. steel reinforcing bars and other items.

Contract Awarded—Don L. Cooney, Inc., Seattle, Wash., $26,685.70.

(9) Grading and surfacing on 3.433 miles of the Bayview-Edison Road, Skagit County Road Project No. A. S. No. S-113 (1), involving about 2980 cu. yds. common excavation, 26,040 cu. yds. selected roadway borrow, 19,400 cu. yds. crushed stone surfacing, 11 cu. yds. concrete, 607 lin. ft. culvert pipe and other items.

Contract Awarded—Lige Dickson Co., Tacoma, Wash., $67,870.77.

2/11/47 40
Preliminary Plans in Progress—
$195,000 Bond Issue Tentatively Scheduled for This Spring
Street Improvement
ALBANY, Calif., Alameda County.
Owner—City of Albany, City Clerk, City Hall, Albany, Calif.
City Engineer—Ernest A. Tarr, City Hall, Albany, Calif.
Projects include:
(1) Resurfacing of all city streets except Solano Avenue, San Pablo Avenue, Buchanan Street and possibly Thousand Oaks Boulevard and Marin Avenue.
(2) Extension of Cleveland Avenue from Arthur Street parallel to the Southern Pacific tracks to service all developments between the East Shore Highway and the tracks as far as the last Albany property owner short of the county line.
(3) Improvement of Key Route Boulevard by widening its west side to 30 feet and cutting through of Thousand Oaks Boulevard from east to west across Key Route Boulevard.
(4) Improvement of Tevlin Street from Francis Street to the Berkeley city limits and smoothing of all corners which give access to the East Shore Highway.
(5) Establishing of a new major street by cutting through Buchanan Street at an angle over the University of California Gill Tract and running into Marin Avenue across San Pablo Avenue with traffic signals at intersections. This plan is dependent on approval of the Board of Regents of the University.
(6) Widening of the north side of Solano Avenue between San Pablo Avenue and Jackson St.
(7) Separation of the sanitary sewer from the storm sewer on Marin Avenue from the Berkeley city limits to San Pablo Avenue.

2/11/47 40
Low Bidders
Grading, Bridges
STATE OF OREGON
Owner — Oregon State Highway Commission, Public Service Bldgs., Portland, Ore.
Plans by engineering department of owner.
Projects include:
Clackamas County.—4.81 miles grading, 5.95 miles surfacing and oiling, and construction of 161-ft. reinforced concrete viaduct with stockpiling on Eagle Creek-Sandy section of Woodburn-Sandy Secondary Highway.
Low Bidder—R. A. Heintz Constr. Co., 8101 NE Union St., Seattle, Wash., $221,610.73.
Clatsop County—14 miles grading, 45 mile paving and constructing traffic control structures on Astoria section of Columbia River and Oregon Coast Highways.
Low Bidder—Heavy Hauling Co., Astoria, Ore., $62,888.

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

2/13/47 31
Low and Only Bidders Water Filtration Plant Cost, $610,379
MARTINEZ, Calif. Contra Costa Co.
Owner — City of Martinez, Leonard McClintock, city administrator; Frank Sarles, city engineer; Raymond B. Johnson, City Clerk, City Hall, Martinez, Calif.
Consulting Engineers—A. Kempkey, Balboa Bldg., San Francisco, Calif., and Charles Gilman Hyde, 2599 Buena Vista Way, Berkeley, Calif.
Includes low-pressure supply pipe line from the Terminal Reservoir of the Contra Costa Canal to the proposed water treatment works; a clear water high-pressure pipe line delivering to the existing distribution pipe system of the City of Martinez at 3 locations; a complete treatment plant, having capacity of 6,000,000 gals. per 24 hrs. Completion of work: 360 days.
The approximate quantities include 8200 cu. yds. net excavation for treatment plant and pumping station structures; 8200 cu. yds. compacted and partially compacted backfill including 1700 cu. yds. of top soil around the treatment plant and pumping station; 6300 cu. yds. excavation in the wash water settling pond; 6300 cu. yds. compacted fill in the restraining levees of the wash water settling pond; 3,150 cu. yds. concrete, mostly reinforced; 404,000 lbs. of steel reinforcement; 2690 lin. ft. 30 in. or 24 in. raw water supply pipe and 10,100 lin. ft. 14 in. and 12 in. clear water pressure pipe lines, etc.
Low Bidder—Stolte, Inc., 8451 San Leandro St., Oakland, Calif., $610,379.
Bids were taken as follows:
(1a) lump sum, 30 in. welded steel raw water supply pipe line wall thickness 3/16 in. complete with all appurtenances
(1b) lump sum, 30 in. welded steel raw water supply pipe line, wall thickness ¼ in. complete with all appurtenances
(1c) lump sum, 24 in. Class 50 transite raw water supply pipe line complete with all appurtenances
(2a) lump sum, 14 in. Class 150 Cast-iron clear water pressure pipe line complete with all appurtenances
(2b) lump sum, 14 in. Class 150 transite clear water pressure pipe line complete with all appurtenances
(3a) lump sum, 12 in. Class 150 cast iron clear water pressure pipe line complete with all appurtenances
(3b) lump sum, 12 in. Class 150 transite clear water pressure pipe line complete with all appurtenances
(3½a) lump sum, 8 in. Class 150 cast iron clear water pressure pipe line complete with all appurtenances
(3½b) lump sum, 8 in. Class 150 transite clear water pressure pipe line complete with all appurtenances
(4) lump sum, earthwork at treatment works - pumping station site complete
(5) lump sum, paved roadways and truck maneuvering area complete
(6) lump sum, concrete curbs, walks and steps complete with all appurtenances
(7) lump sum, preparing, seeding and temporarily maintaining lawns, complete
(8) lump sum, concrete structure of the sedimentation basins
(9) lump sum, basin level regulator or controller complete with all appurtenances
(10) lump sum, primary aerator pipe system and spray nozzles complete with all appurtenances
(11) lump sum, 7 sluice gates in the sedimentation basins, complete with operating stands and all appurtenances
(12) lump sum, high pressure wash water supply pipe system for the sedimentation basins complete with all appurtenances
(13) lump sum, 10 in. cast-iron and vitrified clay pipe drainage system of the sedimentation basins complete with all appurtenances
(14) lump sum, 20 in. class 50 cast iron pipe connection between the sedimentation basins and flocculation tanks No. 1 complete with all appurtenances
(15) lump sum, 24 in. Class 50 cast iron effluent pipe system from the sedimentation basins to a terminus in the filter pipe gallery complete with all appurtenances
(16) lump sum, concrete structures of the 3 flocculation tanks
(17) lump sum, 24 flocculation tank vertical wood deflector baffles complete with all appurtenances
(18) lump sum, for the effluent, bypass and drain piping system of the flocculation tanks complete with all appurtenances
(19) lump sum, 3 paddle stirring mechanisms and assemblies in the flocculation tanks complete with all appurtenances
(20) lump sum, concrete structure of the wash water tank complete
(21) lump sum, high pressure Class 150 6 in. cast iron supply pipe line to the wash water tank complete with all appurtenances
(22) lump sum, 20 in. Class 50 cast iron wash water pipe line from the water tank to a terminus in the filter pipe gallery complete with all appurtenances
(23) lump sum, 6 in. Class 50 cast iron force main from the wash water pump to the wash water tank complete with all appurtenances
(24) lump sum, overflow pipe assembly from the wash water tank to the main plant drain complete with all appurtenances
(25) lump sum, water settling pond complete with all excavation, levees, seeding to grass and all other appurtenances
(26) lump sum, 20 in. cast iron and the 21 in. vitr. clay main plant drain from its beginning in the filter pipe gallery to its terminus in the wash water settling pond complete with all appurtenances
(27) lump sum, concrete structure of the filtered water basin complete with all appurtenances
(28) lump sum, 24 in. Class 50 cast iron discharge pipe line excepting the Venturi meter complete
(29) lump sum, 3 in. air pipe line from the blower to and including the diffusors in the filtered water basin complete with all appurtenances
(30) lump sum, 24 in. Class 100 cast iron supply pipe line from the filtered water basin to the pumps in the pumping station complete with all appurtenances
(31) lump sum, 12 in. Class 50 cast iron by-pass pipe line between the 24 in. cast iron influent pipe and the 24 in. cast iron supply pipe line to the pumps complete with all appurtenances
(32) lump sum, filter house building and pumping station structures complete with all appurtenances
(33) lump sum, architectural plumbing system and work in the filter house and pumping station complete with all appurtenances
(34a) lump sum, 440 volt low voltage interior and exterior electrical system of the treatment plant and pumping station structures and site complete with all equipment and appurtenances
(34b) lump sum, 2400 volt do
(35) lump sum, 4000-lb. capacity overhead-type traction elevator complete with all equipment and appurtenances
(36) lump sum, underdrainage pipe systems in the 4 filter units complete with all appurtenances
(37) lump sum, for 16 filter troughs in place in the 4 filter units complete with all appurtenances
(38) lump sum, for 4 raw water supply laterals to the 4 filter units complete with all appurtenances
(39) lump sum, for 4 wash water supply pipe lines to the 4 filter units complete with all appurtenances
(40) lump sum, for 4 effluent pipe and controller systems of the 4 filter units complete with all equipment and appurtenances
(41) lump sum, for 4 wash water drainage pipe lines from the 4 filter units complete with all equipment and appurtenances
(42) lump sum, for 2 filter effluent laterals complete
(43) lump sum, for gravel underbed, egg crates in the 4 filter units complete
(44) lump sum, for filter sand in the 4 filter units complete
(45) lump sum, for 2 double filter operating tables for the 4 filter units complete with all equipment, connections and appurtenances
(46) lump sum, for wash water rate of flow meter and pedestal type indicator - totalizer - recorder, complete with all equipment, connections and appurtenances
(47) lump sum, for the filter plant effluent rate of flow meter and the pedestal-type indicator-totalizer-recorder, complete with all equipment, connections and appurtenances
(48) lump sum, for the wall-type wash water tank depth gage complete with all connections and appurtenances
(49) lump sum, for 4 chemical dry feed machines complete with all equipment, connections and delivery piping to points of application
(50) lump sum, for the chemical dust remover for the 4 chemical dry feed machines complete with all equipment, piping and connections
(51) lump sum, for the Toledo scale and supporting table complete with all appurtenances
(52) lump sum, for the Raymond Laboratory Mill and Supporting Table complete with all connections and appurtenances
(53) lump sum, for the 2 Wallace and Tiernan Chlorinators and 1 ammoniator and all supply and discharge piping and appurtenances complete
(54) lump sum, for 2 chlorine cylinder and 1 ammonia cylinder scales complete with all appurtenances
(55a) lump sum, for 3 1400-gals. per minute high lift electric motor driven horizontal centrifugal pumping units and connections complete
(55b) lump sum, for one 600, one 1000, and 1 1400-gals. per minute high lift electric motor driven horizontal centrifugal pumping units and connections complete
(56) lump sum, for 200-gals. per minute electric motor driven horizontal centrifugal wash water pumping unit, automatic control and connections complete
(57) lump sum, for surge chamber, air compressor, connections and equipment complete with all appurtenances
(58) lump sum, for 18 in. Class 150 cast iron pipe connection between the Venturi meter and the filtered water basin complete with all appurtenances
(59) lump sum, for the Venturi meter and Recorder-Totalizer-Indicator panel and connections complete
(60) lump sum, for the Venturi meter chamber complete with all appurtenances
(61) lump sum, for the electric motor driven water seal air compressor (blower) complete with connections and appurtenances
(62) lump sum, for the sump electric motor driven centrifugal pumping unit complete with all connections and appurtenances
(63) lump sum, for the plant irrigation pipe system complete
(64) lump sum, for laboratory supplies, accessories and special equipment complete.

Total bids submitted Feb. 11 were:
(A) Stolte Inc., Oakland, Calif., $610,379.
(B) Central California Constr. Co., Inc., San Francisco, Calif., $645,085
(C) De Luca & Son, San Francisco, Calif., $648,696.
(D) Fred J. Early, Jr., Co., San Francisco, Calif., $699,444.
(E) Hoagland-Findlay Engng. Company, Long Beach, Calif., $705,729.
(F) Fredrickson & Watson Construction Co., Oakland, Calif., $773,490.
Unit prices will be given shortly.

2/13/47 32
Contract Awarded on Schedule 1, Item 1—Action on Award of Schedule 2 Will Probably Be Taken February 21 Sewage Plant Cost $40,420
PERRIS, Calif., Riverside County.
Owner—City of Perris, Mrs. Mildred B. Martin, city clerk, City Hall, Perris, Calif.
Consulting Engineers—J. M. Montgomery, 686 Lafayette Park Place, Los Angeles, and Richard Pomeroy, 177 E. Colorado St., Pasadena, Calif.
Includes sewage treatment plant, sewer lines and appurtenant works.
Low Bidder—Pernel Barnett, 747 W. Chapman, Orange, Calif.

2/13/47 32
Plans in Progress Sewage Disposal Plant Cost, $65,000
SEBASTOPOL, Calif., Sonoma Co.
Owner — City of Sebastopol, Mayor John R. Spooner, City Hall, Sebastopol, Calif.
City Engr.—Walter Adams, City Hall Calif.
Includes pumps, drying ponds and other necessary facilities.

34—DAMS, RESERVOIRS & DREDGING

2/13/47 34
Owner Taking Bids—Due April 11, Alvaro Obregon Dam
SONORA, Mexico Dam Site of Oviachic, Yaqui River.
Owner — Secretary of Hydraulic Resources, Ing. Adolfo Orive Alba, at office of Ministry at Balderas No. 94, Mexico City, D. F.
Plans by owner.
Combination earthfill and concrete dam, 4300 feet long and 290 feet high with concrete lined side channel spillway, 330 ft. wide, 3 concrete tunnels, each 1330 feet long and 20 ft. in diam., high and low outlet works, stream diversion and camp
Plans and specifications written in Spanish, obtainable from above office upon deposit of 200 pesos; guarantee of 1,000,000 pesos to accompany bids.

2/13/47 34
Owner Taking Bids—Due March 20, 2 P. M. (Bidders Figuring) Dorena Dam and Appurtenant Work; Spec. 47-265 Cost $8,894,000
DORENA, Ore., Lane Co. Row River, a tributary of the coast fork of Willamette River and approx. 2 miles below the village of Dorena.
Owner—Portland District Corps. of Engineers, War Department, Col. O. E. Walsh, District Engineer; 628 Pittock Block, Portland, Ore.
Plans by engineering department of owner.
Earthfill type structure with crest length of 4650 ft. having a storage capacity of 75,000 acre feet of water completed in time 120 calendar days;
Work consists of in excavation for spillway, abutments and outlet structure foundations including discharge tunnel; Unwatering spillway structure foundations and earth embankment dam structure foundation. Local drainage in the construction area and borrow pits is also included; construction of a concrete spillway consisting of a free overflow gravity section, concrete abutment structure extending into the earth embankment dam, a reinforced concrete training wall on the south of the upstream side of the spillway structure, five outlet openings at the base of the spillway structure, a concrete abutment structure at the north end of of the spillway structure, ten hydraulic operated outlet gates. There is also included a reinforced concrete stilling basin and reinforced concrete sill; construction of earth embankment dam, structure complete, including stripping the foundation, placing and compacting embankment and placing protective stone revetment; construction of an outlet and inlet channel; construction of a diversion levee downstream from the toe of the earth embankment dam near the south abutment, and a tailwater levee and access road paralleling the south bank of the outlet channel; and other incidental work at the dam site.
The work involves:
(1) 70,000 cu. yds. river diversion channel common excavation;
(2) 2,000 cu. yds. river diversion channel, solid rock excavation;
(3) lump sum clearing reservoir and dam sites areas;
(4) 214,000 cu. yds. stripping;
(5) 7,500 cu. yds. common excavation for ditches;
(6) 300 cu. yds. solid rock excavation for ditches;
(7) 2,700 cu. yds. common structural excavation for subdrainage system;
(8) 500 cu. yds. solid rock structural excavation for subdrainage system;
(9) 2,730 lin. ft. 8-inch diameter perforated cast iron pipe in place;
(10) 520 lin ft. 8-inch diameter cast iron pipe, in place;
(11) Deleted;
(12) Deleted;
(13) 128 lin. ft. 48 in. diam. extra-strength reinf. coincrete culvert pipe in place;
(14) Deleted.
(15) 2700 cu. yds sand filter for drains in place;
(16) 700 cu. yds. gravel filter for drains in place;
(17) 155,000 cu. yds. pervious zone material in place;
(18) 68,000 cu. yds. common excavation for spillway structure;
(19) 55,000 cu. yds. solid rock excavation for spillway structure;
(20) 62,000 cu. yds. common excavation for core trench;
(21) 5,000 cu. yds. solid rock excavation for core trench;
(22) 4,000,000 cu. yds borrow excavation;
(22a) 620,000 cu. yds. embankment, zone 1 and random gravel cover;
(22b) 1,131,000 cu. yds. embankment, zone 2;
(22c) 1,114,000 cu. yds. embankment, zone 3 and gravel toe;
(22d) 62,500 cu. yds. embankment, tailwater channel levee and access road;
(22e) 120,000 M sq. ft. additional rolling, two passes;
(23) 127,000 cu. yds. common excavation for tailwater channel;
(24) 1,800 cu. yds. solid rock excavation for tailwater channel;
(25) 2,500 cu. yds. excavation for diversion levee embankment;
(26) 50,000 cu. yds. excavation from stockpiles;
(27) Deleted;
(28) Deleted;
(29) Deleted;
(30) Deleted;
(31) 7,000 lin. ft. Type "A" foundation grout holes;
(32) 5,000 lin. ft. type "B" foundation grout holes;
(32a) 2,000 lin ft. drilling through overburden for type "B" grout holes;
(32b) 52 each grout outlet holes;
(33) 3,000 lin. ft. foundation drainage holes;
(34) 43,000 lb. miscellaneous pipe, fittings and valves for grouting;
(34a) 200 lin. ft. copper grout stops;
(35) 10,000 cu. ft. pressure grouting;
(36) 30,600 cu. yds. select gravel backing, in place;
(37) 61,000 cu. yds. dumped revetment, in place;
(38) Deleted;
(39) 14,300 cu. yds. derrick placed revetment in place;
(40) 15,000 M. gal. sprinkling;
(41) 3,000 cu. yds. gravel surfacing for dam road, in place;
(42) 10 acre seeding;
(43) 146,000 cu. yds. concrete in spillway section and in north and south abutment;
(44) 8,800 cu. yds. concrete in stilling basin slab and baffles and outlet channel slab;
(45) 320 cu. yds. concrete in trash rack structure;
(46) 1,250 cu. yds. concrete in upstream retaining wall;
(47) 4,750 cu. yds. concrete in spillway training walls in stilling basin and outlet channel retaining wall;
(48) 30 cu. yds. concrete in recorder house and adit structure;
(49) 25 cu. yds. concrete in headwalls;
(50) 150,000 bbl. Portland cement;
(51) 1,375,000 lb. steel reinforcement;
(52) 2,600 lb metal water stops;
(53) 23 ton asphalt for seals;
(54) 34,000 lb. structural steel;
(55) lump sum 10 outlet gates, complete with conduit linings, oil piping and control (Standard Design);
(55a) lump sum 15 outlet gates, complete with conduit linings, oil piping and control (Alternate Design);
(56) lump sum sump pump and motor;
(57) 30,000 lb. miscellaneous metal;
(58) 51,000 lb. miscellaneous pipe, fittings and valves;
(59) lump sum electrical work, complete;
(60) lump sum adit entrance structure and recorder house;
(61) 660 lin. ft. 6-inch porous concrete drain tile and porous concrete;
(62) 2,700 lin. ft. 12-inch spilt drain tile and gravel backfill;
(63) 6,500 lin. ft. drilling and grouting anchor bars;
(64) lump sum installation of standby power unit.

Total including item 55 but not item 55a.
Total including item 55a, but not item 55.
Plans and specifications available from the above office upon deposit of U. S. money order or certified check, payable to the Treasurer of the United States in the amount of $25.

35— DOCKS, PIERS & HARBORS

2/13/47 • 35
Low and Only Bidders
Drydocking and Overhauling Dredge; Serial No. 04-260-47-57 Cost $106,056
SAN FRANCISCO, Calif.
Owner—U. S. Engineering Office, 74 New Montgomery St., San Francisco, Calif.
Plans by engineering department of owner.
Drydocking and overhauling government-leased Standard Dredging Co. hydraulic dredge Point Loma.
Low Bidder—Pacific Coast Engineering Co., Inc., Drawer E, Alameda, Calif., $106,056.
Bids taken February 11 as follows:
(A) repairs to hull;
(B) repairs to machinery;
(C) electrical repairs;
(D) allowance for scrap steel (approximately five tons).
Complete bids were:
Pacific Coast Engineering Co., Inc., Alameda, (A) $35,221, (B) $47,170, (C) $23,690, total $106,081, (D) $25, grand total $106,056.
Moore Drydock Co., Oakland, (A) $33,825, (B) $61,558, (C) $18,765, total $117,148, (D) $15, grand total $117,133.
Bethlehem Steel Co., San Francisco, (A) $53,683.50, (B) $61,526.02, (C) $31,877.98, total $147,087.50, (D) $50, grand total $147,087.50.
General Engineering & Drydock Co., San Francisco, (A) $61,904, (B) $70,364, (C) $25,470.50, total $157,738.50, (D) $50, grand total $157,688.50.

38— ELECTRIC LIGHTING TRANSMISSION LINES

2/13/47 38
Plans in Progress
Distribution Lines Cost $600,000
MIRANA, Ariz.
Owner—Trico Electric Co-operative.
T. J. Smith, pres., Mirana, Ariz.
Engr. — Beavers & Lodal, Transit Tower, San Antonio, Texas.
Includes distribution lines.

2/13/47 38
Plans in Progress on Transmission Lines—Work Under Way by Force Account on Distribution Lines
REA Distribution & Transmission Lines Cost $490,000
CURRY CO., N. M.
Owner—Farmers Electric Co-operative, Inc., Oliver Kimbrough, mgr., Clovis, N. M.
Engr. — Beavers & Lodal Transit Tower, San Antonio, Tex.
Includes 50 mi. transmission lines, $160,000 and 312 mi. dist. lines.

39— SEWERS

2/13/47 • 39
Owner Taking Bids—Due March 6, 2 P. M.
Culvert: Pro. Calif. FH-68-D
SAN BERNARDINO COUNTY, Calif.
Mill Creek, San Bernardino National Forest.
Owner—Public Roads Administration, C. C. Morris, division engineer, 720 Phelan Bldg., San Francisco, Calif.
Plans by engineering department of owner.
About 1.730 miles.
The work involves:
(1) $7500 extra and miscellaneous force account work;
(2) 26 acres clearing and grubbing;
(3) 339,000 cu. yds. unclassified excavation;
(4) 2650 cu. yds. unclassified excavation for structures;
(5) 1,100,000 sta. yds. overhaul;
(6) 1.730 miles finishing of earth-graded road;
(7) $3270 force account debris deflectors;
(8) 21 cu. yds. concrete;
(9) 600 lbs. reinforcing steel;
(10) 3096 lin. ft. corrugated galvanized sheet metal pipe culvert;
(11) 2 eac hculvert pipe elbows;
(12) 60 lin. ft. spiral welded steel pipe;
(13) 480 cu. yds. derrick-placed rock retaining wall;
(14) 12 each drop inlets and steel covers;
(15) 5 embankment spillway inlet assemblies;
(16) 22 right-of-way monuments;
(17) 4 concrete maintenance marker posts;
(18) 28 timber culvert markers;
(19) 122 timber guide posts;
Snow Creek Culvert (Alternate A)
(20) 550 cu. yds. unclassified excavation for structures;
(21) 236 cu. yds. foundation fill;
(22) $3000 force account debris deflectors;
(23) 120 cu. yds. concrete;
(24) 12,050 lbs. reinforcing steel;
(25) 496 lin. ft. 72-in. reinforced concrete culvert pipe;
Snow Creek Culvert (Alternate B)
(20a) 700 cu. yds. unclassified excavation for structures;
(21a) $3000 force account debris deflectors;
(22a) 600 cu. yds. concrete;
(23a) 124,000 lbs. reinforcing steel.
Specifications obtainable from the above office upon deposit of $10, refundable.

2/13/47 39
Owner Taking Bids—Due March 3, 2 P. M.
Sewers & Lift Station; ORE-35258
HERMISTON, Ore.
Owner—Federal Public Housing Authority, Francis A. Staten, Asst. Director for Management, Rm. 510, Skinner Bldg., 1326 5th Ave., Seattle, Wash.
Engineers—J. D. Hall & Assoc., Larson Bldg., Yakima, Wash.
Specifications obtainable from the above office or the Engineer upon deposit of $50 payable to the Treasurer of the United States.

40— STREETS AND HIGHWAYS

2/13/47 40
Contract Awarded
Street Improvement Cost $2,001.50
SACRAMENTO, Calif., Sacramento Co. Alley between C and D Sts., from easterly line of 23rd St. to westerly line of 24th St.
Owner—City of Sacramento, H. G. Denton, City Clerk, City Hall, Sacramento, Calif.
City Engineer — Fred Klaus, City Hall, Sacramento, Calif.
Installing cast iron gutter drains and connecting same to sewer system with vitrified ironstone sewer pipe; reconstructing existing manhole by placing curb and cover to proper grade; constructing concrete manhole complete with cast iron curb and cover; grading and constructing a hydraulic concrete pavement six inches in thickness.
Contractor—A. Teichert & Son, Inc., Box 1113, Sacramento, Calif.

2/13/47 40
Contract Awarded
Street Improvement Cost $6304.40
SACRAMENTO, Calif., Sacramento Co., 53rd St. from V St. to 2nd Ave.
Owner — City of Sacramento, H. G. Denton, City Clerk, City Hall, Sacramento, Calif.
City Engineer — Fred Klaus, City Hall, Sacramento, Calif.
Includes concrete curbs and gutters, cast iron gutter drains, and connecting same to sewer system with vitrified ironstone pipe sewer; constructing concrete manhole complete with cast iron curb and cover; grading and constructing an asphaltic concrete pavement 5½ inches in thickness, removing and replacing present asphaltic concrete pavement for sewer; constructing vitrified ironstone pipe sewer.
Contractor—McGillvray Constr. Co., Box 873, Sacramento, Calif.

2/13/47 40
Owner Taking Bids—Due Feb. 19, 10 A. M.
Grading & Surfacing
CLALLAM CO., Wash. Project2-F, Olympic Highway, Olympic National Forest
Owner—Public Roads Admin., W. H. Lynch, Div. Engineer, 208 Broadway-Oak Bldg., Portland, Ore.
Plans by engineering department of owner.
Specifications obtainable from the above office upon deposit of $10 refundable.

2/13/47 40
Plans in Progress
Street Improvement Cost, $35,000
SEBASTOPOL, Calif. Sonoma County, Murphy Ave., Sheridan Lane, etc.
Owner — City of Sebastopol, Mayor John R. Spooner, City Hall, Sebastopol, Calif.
City Engr.—Walter Adams, City Hall, Calif.
Includes grading, curbs, repair and new construction on streets, sidewalks and gutters.

41— GAS, WATER AND OIL PIPE LINES

2/13/47 41
Plans in Progress
Water Sys. Imp. Cost, $90,000
SEBASTOPOL, Calif., Sonoma Co.
Owner — City of Sebastopol, Mayor John R. Spooner, City Hall, Sebastopol, Calif.
City Engr.—Walter Adams, City Hall Calif.
Includes new mains, water lines, booster pumps and other necessary equipment.

2/13/47 • 42
Sewer Pipe
Low and Only Bidders
CENTRAL VALLEY PROJECT, California.—The following submitted bids February 6 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Inv. No. E-33,078-A for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Cody, Wyo., the roof structural steel for the Heart Mountain power plant, Shoshone Project, Wyoming. The materials will be installed by the government.

2/13/47 42
Pipe and Coupling Bands
Bids Wanted
CENTRAL VALLEY PROJECT, California.—As previously reported, until February 20, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Customs House, Denver 2, Colo., under Inv. No. E-33,118-A for galvanized corrugated metal pipe and coupling bands, f.o.b. shipping point and/or Coram, Calif.
The bids will be taken as follows:
(1) 388 lin. ft. 48-in. diameter, 8-gauge pipe in 14-ft., 18-ft. and 20-ft. lengths;
(2) 122 lin. ft. 48-in. diameter, 10-gauge pipe in 16-ft. and 18-ft. lengths;
(3) 24 only 12-in. wide, 10-gauge coupling bands with bolts for 48-in. diameter pipe;
(4) 316 lin. ft. 42-in. diameter, 8-gauge pipe in 16-ft. and 20-ft. lengths;
(5) 14 only 12-in. wide, 10-gauge coupling bands with bolts for 42-in. diameter pipe;
(6) 292 lin. ft. 42-in. diameter, 10-gauge pipe in 14-ft., 16-ft. and 20-ft. lengths;
(7) 250 lin. ft. 42-in. diameter, 12-gauge pipe in 18-ft. and 20-ft. lengths;
(8) 25 only 12-in. wide, 12-gauge coupling bands with bolts for 42-in. diameter pipe;
(9) 224 lin. ft. 36-in. diameter, 10-gauge pipe in 28-ft. lengths;
(10) 522 lin. ft. 36-in. diameter, 12-gauge pipe in 24-ft., 26-ft. and 30-ft. lengths;
(11) 23 only 12-in. wide, 12-gauge coupling bands with bolts for 36-in. diameter pipe;
(12) 348 lin. ft. 30-in. diameter, 14-gauge pipe, lengths varying from 24-ft. to 30-ft.;
(13) 260 lin. ft. 30-in. diameter, 14-gauge pipe in 24-ft., 20-ft. and 30-ft. lengths;
(14) 18 only 7-in. wide, 16-gauge coupling bands with bolts for 30-in. diameter pipe;
(15) 1082 lin. ft. 24-in. diameter, 14-gauge pipe, lengths varying from 22-ft. to 30-ft.;
(16) 832 lin. ft. 24-in. diameter, 14-gauge pipe, lengths varying from 22-ft. to 28-ft.;
(17) 57 only 7-in. wide, 16-gauge coupling bands with bolts for 24-in. diameter pipe;
(18) 144 lin. ft. 18-in. diameter, 16-gauge pipe in 22-ft. and 26-ft. lengths;
(19) 368 lin. ft. 18-in. diameter, 16-gauge pipe in 20-ft., 24-ft. and 30-ft. lengths;
(20) 13 only 7-in. wide, 18-gauge coupling bands with bolts for 18-in. diameter pipe;
(21) 24 lin. ft. 12-in. diameter, 16-gauge pipe, 24-ft. lengths;
(22) 3 only 7-in. wide, 18-gauge coupling band with bolts for 12-in. diameter pipe;
(23) 36 lin. ft. 12-in. diameter, 16-gauge pipe in 10-ft. and 24-ft. lengths.

Synchronous Motors
Bids Wanted
CENTRAL VALLEY PROJECT, Calif. Until April 1, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Customhouse, Denver, Colo., under Spec. 1699 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Herdlyn, California, six (6) 22,500-horsepower, 13,600-volt, 3-phase, 60-cycle, 0.95 -leading - power - factor, vertical-shaft, 180-revolutions-per-minute synchronous motors, for Delta-Mendota Pumping Plant, Central Valley Project, California. The apparatus will be installed by the Government.

Cost-Plus Bills
(Continued from Page 1)

program allowing urgent work to proceed while withholding less critical construction, would save up to $50 million of the $77 million deficit envisioned by the Public Works Board.

In Committee

The bills have been referred to governmental efficiency and economy committee of which C. Don Field, Glendale trucking contractor, is chairman and Rep. Edward J. Carey (r., Emeryville), is vice chairman.

NEW Improved SCOOPMOBILE Five NEW IMPROVEMENTS!

1 NEW "Shovel Action" BUCKET
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!

2 HAND LEVER CONTROL
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.

3 DISCHARGE ACTION
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.

4 NEW COUNTER BALANCE
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.

5 CONTROLLED DIGGING ACTION
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

PLANS and Speculations

Among Lodi's major improvements are a $20,000 baseball park, two tennis courts equipped for night playing, and improvements of swimming facilities at Lodi Lake Park.

oOo

Butte County supervisors have allocated $507,000 for improvement of the Chico-Paradise cutoff recently.

oOo

Walnut Creek city council has requested financial aid from the county for improvement and maintenance of the muny park.

oOo

Earl R. Asdell, superintendent of the recreation bureau Orland project, will become land development engineer at the Riverton, Wyo., project.

oOo

Bids will be received until noon, February 28, at the office of the secretary of the maritime commission in Washington, for lease of Richmond Shipyard No. 3.

oOo

Possible use of merchant marine properties at Coyote Point in San Mateo County includes a college site; part of the navy's electronics training setup; San Mateo County has asked first rights in purchasing the site.

oOo

Eleven sites have been selected for dams on the Sacramento River tributaries alternatives for the proposed Iron Canyon Dam. Location of the sites has not been revealed.

oOo

Oroville's chamber and its city council have gone on record favoring a proposed truck route around Oroville.

oOo

Mountain View city council has approved widening and straightening of Stierlin Road to Central Ave., and for straightening of Moffett Boulevard.

Fog Dispersion Is Topic At Military Engineers' Dinner

The local chapter of American Military Engineers held a dinner meeting Thursday, February 13, at the Engineers Club, at 6:30 p.m.

Robert L. Champion, director of the landing aids experiment station at Arcata, Calif., will discuss "Development of an Integrated Landing System".

His likely will be the first discussion of experiments in fog dispersion conducted at Arcata, before a technical group, since the experiments have been a well-guarded secret. The studies took in facilitation of aircraft landings under extremely low visibility conditions.

The annual election of officers will be held at the meeting February 13, the nominating committee announced.

#

$43,000 IN LOGS

COULEE DAM, Wash. — Purchase of 2 million board feet of saw logs at a cost of $43,000 was announced today by the Bureau of Reclamation's Columbia Basin Project headquarters here.

The logs will be provided by Ellsworth Gregerson and Clarence W. Pratt, both of Rice, Wash., who agreed to furnish 1 million board feet each at $21,500. Gregerson's contract calls for delivery of the logs to Lake Roosevelt on or before July 1. Pratt's agreement calls for delivery on or before June 15. The logs will be rafted and towed to the Bureau's sawmill above the Grand Coulee Dam by government tugs.

Farm Equipment Bids Due February 21 for Experimental Farm

EPHRATA, Wash. — Farming equipment, including a modern tractor, will be purchased by the bureau of reclamation for use at an 80-acre "development farm" on the Columbia Basin Project, near Moses Lake, bureau officials announced today in calling for bids on the machinery.

In addition to a rubber - tired tractor, the following equipment will be acquired for use with the power unit:

Two-row potato cultivator, tractor mounted witt 7-ft. cutter bar, two-row drill-type corn planter, two-row potato planter, two-way trailer plow, disc harrow, corrugated roller, fertilizer broadcasters, side-delivery hay rake, dump hay rakes, grain drill, press wheel grain drill, spike-tooth harrows, and automatic pickup hay press.

Bids on the equipment will be accepted at Coule Dam until 11 o'clock the morning of Feb. 21.

The development farm, a cooperative undertaking by the bureau of reclamation, the bureau of plant industry, and Washington State College, will test cultivation and irrigation methods in advance of the coming of the 12,000 to 15,000 farm families who ultimately will establish homes in the Basin. Portions of the farm will be used to study crops well known to Western irrigation farmers. Some acreage will be devoted to experimental work on crops relatively new to this region. Similar development farms, on different soils, will be created in other parts of the basin.

W. W. Johnston, project development supervisor, explained that the Moses Lake development farm program will include proper farm and ditch layout, maintenance of fertility, determination of chief irrigation requirements, and testing of irrigation practices.

The irrigation system for the farm will be supplied from a well being drilled by Hosack and Son, Nampa, Idaho.

#

Snowed In, Workers Devise Bulldozer to Clear Drifted Road

When construction workers on the Bowman Dam job in California during the winter of 1927-28 were isolated from their source of supplies by snowdrifts ranging from five to twenty feet deep, an effort to reopen the line of communication was made by use of an on-the-job wooden bulldozer.

Working from memory of description concerning bulldozer blades for track-type tractors, workmen made their dozer out of available timbers. The blade was elevated and its load of snow tipped by means of a hand operated winch at the rear of the "Caterpillar" Sixty track-type Tractor which provided the motivating power.

After a portion of the road had been cleared, however, the timbers proved too weak to support the weight of the snow and the homemade bulldozer had to be discarded. Before the road was finally opened and supplies moved by tractor-drawn sleds and wagons, an attempt was made to send a sled load of meat to the workmen by using a team of movie dogs on location at Nevada City, California. This method of transportation proved so slow that the dogs consumed all the food they were carrying before reaching their goal.

LUMBERMEN MEET

A luncheon meeting will be held by San Francisco Lumbermen's Club at the Concert Room of the Palace Hotel next Tuesday, at 11:45 a. m.

GROOVER AND I

LINCOLN

When Abraham Lincoln was assassinated the South lost its best friend. That is a strong statement coming from an unreconstructed Rebel—yet it is a statement made by many of my shoe-wearing, book-reading forefathers and brethren.

☆ ☆ ☆

It would be interesting to make a safari into Mississippi and find out just how many people would give you one 100 factual words about Abraham Lincoln.

☆ ☆ ☆

(On July 4, 1863, Vicksburg, Mississippi, fell to General Grant after a siege of 14 months. Not until July 4, 1945—three wars and 82 years later— did Vicksburg recognize July 4th as a National Holiday.)

☆ ☆ ☆

You may find the answer in the Mississippi schools—if you can find the schools.

☆ ☆ ☆

Compulsory school attendance applies to children from 7 to 14, and is for 80 days per year.

☆ ☆ ☆

The average salary of teachers in public schools is $517.00 per year—

☆ ☆ ☆

—less than one-half of the rate received on $20.00 per week unemployment benefits!

#

Commerce Figures Show Phenomenal Industry Expansion

WASHINGTON—There are now 59 per cent more contract construction firms operating than at the beginning of 1946, the Department of Commerce disclosed today.

The Commerce Department said that generally new proprietors were starting in busines in 1946 at a rate about double that of the 1940-41 period, with the rate of business discontinuance in 1946 about half what it was in 1940-41.

New Lumber Firms

The contract construction industry received the greatest expansion of all the eight major industry groups. Commerce figures showed that new enterprises entered the field at a rate of 553 new firms for every thousand in existence at the start of the year.

The final compilation showed that there now exist 233,400 contract construction firms in the United States. In December, 1943, there were 147,190.

Expansion of other industry groups ranked next, in this order:

Wholesale trade, manufacturing, service industries, retail trade, mining and quarrying, transportation, communications and other public utilities, and last, finance, insurance and real estate.

Among manufacturing industries the most popular field was that of stone, clay and glass products. Other high rates of entry were in nonferrous metals, lumber and timber basic products, electrical machinery.

Some Fall Out

Highest rates of discontinuance among manufacturing industries were in lumber and basic products, with 156 firms quitting business for every thousand in existance. Discontinuance rates for other manufacturing industries in 1946 were: Machinery (except electrical), 129; electrical machinery, 93; iron and steel and their products, 80.

Sewers, Water and Sanitation Facilities Now Lead in Federal Planning Loan Program

WASHINGTON.—The results of state and local advance planning of public works, with and without federal assistance, are shown in the third semi-annual report of George H. Field, commissioner of the bureau of community facilities, FWA, which was made public today by Maj. Gen. Philip B. Fleming, Federal Works administrator.

Through December 31, 1946 the report shows, under the advance planning program of the Bureau of Community Facilities, a total of $46,606,763 had been advanced to 3,231 different public bodies, ranging from state governments and major cities to counties, townships, independent school districts, and other public agencies. These public bodies, located in every state, the District of Columbia, Alaska, and Hawaii, are using the advances to finance the preparation of drawings and specifications for local public works with an estimated construction cost totaling $1,529,211,000 and an estimated total cost of $1,832,913,000.

Commenting on the report, General Fleming said:

"It should be emphasized again that advances made under this planning program must be repaid, without interest, when the projects so planned go into construction and more than a quarter of a million dollars so far advanced has been returned to the Federal Treasury. Since all the advances are recoverable, there is no ultimate cost to the Federal government beyond the small sums required for administration."

States Aid Plans

The public bodies to which advances have been approved include 29 State governments, 206 counties, 2,256 cities, townships and towns, 596 school districts, and 52 special districts of various kinds. Of the cities, townships and towns, 1,188 have populations of less than 2,500, 639 are between 2,500 and 10,000; 226 are between 10,000 and 25,000; 90 are between 25,000 and 50,000; 45 are between 50,000 and 100,000; and 68 are cities of more than 100,000 population. In the bureau's advance planning system, intra-State quotas have been used to extend planning more and more into the smaller governmental units.

Plan preparations completed without federal financial assistance through December 31, 1946, cover proposed state and local public works with estimated construction costs of $1,323,498,000, and estimated total costs of $1,581,260,000. The reported increase in completed plan preparations during 1946 was $538,827,000 and during the six months ending December 31, $197,709,000, both in terms of construction costs. A third of all planning completed without federal financial assistance is in New York State, compared with about half in that state a year ago.

In addition, without federal financial assistance, state and local governments have plans in the design stage for public works with an estimated construction cost of $4,124,009,000, but, the report says the rate of progress in bringing these plan preparations from the design stage to completion has been slow. Programs of state planning aid to local governments have been set up in New York, California, Michigan, Illinois, Pennsylvania, New Jersey, Maryland and Indiana. Except for Indiana—which makes loans—these state planning-aid programs provide grants up to one-half the planning costs of approved projects.

Of 12,631 governmental units reporting on plan preparations without federal assistance, 7,438 had no plans in either the completed or the design stage. These included one state government, 1,601 counties, 3,470 cities, townships and towns, 2,235 separate school districts and 131 special districts. Most of the cities, townships and towns reporting no planning were of 10,000 population or less, but they included 273 with populations of more than 10,000, and of these,

Lumbermen Foresee Big 1947 Production

PORTLAND.—Booming lumber production during January in the Douglas fir region of Oregon and Washington indicates that 1947's total production will reach or exceed previous estimates, H. E. Smith, secretary of the West Coast Lumbermen's Assn., announced today.

Smith said January's production of 116,786,000 board feet was 12.4 per cent greater than the total for January, 1946, and more than 2½ million board feet in excess of the figure named in earlier predictions.

"This very favorable production figure suggests that the year's output of lumebr may go beyond 6½ billion board feet, which is 500 million feet above the level reached in 1946," Smith said.

"Such continuing high production is heartening insofar as home building and commercial construction are concerned. When the spring building program goes into high gear, the West Coast lumber industry will be ready to supply whatever construction items it requires."

#

Manufacturer Cites Factors Leading to Material Price Rise

NEW YORK (Exclusive)—Prices of building materials of a large firm here, whose products are distributed nationally, have risen slightly less than 15 per cent since 1941, it was disclosed today.

A company spokesman said that in contrast, average straight time hourly wage rates paid by the company at its mine and factory locations rose 74 per cent over the beginning of 1941. He said that average weekly wages paid by the company have risen 93 per cent in the same period.

The manufacturer cited such price increases as on asphalt roofing, 5 per cent; asbestos wallboard, 10 per cent; and asbestos shingles 15 per cent. Then he pointed out the rise in cost of certain raw materials used in the manufacture of building materials, since December 15, 1946.

He said: "Since Dec. 15, prices for asphalt and flux oils jumped 18 5 per cent to make a total increase of 33.5 per cent over January, 1941, costs. Rag prices climbed 13.1 per cent—making a total increase of 107 per cent since January, 1941. These materials are essential to the manufacture of asphalt shingles and other types of asphal roofings.

"A rise of 17.6 per cent in freight rates on Jan. 1, 1947, is also reflected in the cost of raw materials and in the distribution of finished products."

#

FOLSOM RESERVOIR MAY BE MILLION FT.

In Sacramento it is rumored that Governor Earl Warren and State Engineer Edward Hyatt may drop their insistence on a 600,000 acre reservoir on the American River near Folsom. U. S. army engineers and the ree bureau favor a 1,000,000 feet storage unit.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, A. J. Grier, regional director, 1355 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

RE-ERECT BUILDING (for headquarters division engineer), $3500; Lindsay; owner, Bureau of Reclamation, 701 K St, Sacramento.

BUILDING (detail store), $9000; 270 El Camino, Salinas; owner, Rene L Rochex, 123 Central, Salinas.

BUILDING (brake lining manufacturing and distribution), $7525; 131 Mission St, San Francisco; owner, Mrs Nettie Post, 300 Montgomery St, San Francisco.

OFFICE (excavating and grading firm), $4840; Watsonville; owner, Granite Construction Co, Box 900, Watsonville.

MILLWORK PRODUCTION, $11,500; 1309 E El Camino, North Sacramento; owner, R W Draper Co, 1516 Capitol Ave, Sacramento.

NICHE SPACE (crematorium), $35,000; Oakland; owner, California Crematorium, 4499 Piedmont, Oakland.

SOUNDPROOF ROOMS, $35,000; 28 Geary, San Francisco; owner, RCA Communications, 2048 Market St, San Francisco.

BUILDING (field operations center), $15,200; 21-23 Mariposa, San Anselmo; owner, Pacific Tel & Tel Co, 140 New Montgomery St, San Francisco.

ADDITION (to central office), $6160; 7th and Dolores, Carmel; owner, Pacific Tel & Tel Co, 140 New Montgomery St, San Francisco.

REPAIRS (store building), $2500; 300 Santa Rosa, San Francisco; owner, R J Peltrome, 600 South Van Ness, San Francisco.

BUILDING (steel products fabrication), $8000; 16th and American River, Sacramento; owner, J R Reeves, Box 1072, Sacramento.

ALTERATONS (complete alterations to store building), $550; 1414 Van Ness Ave, San Francisco; owner, Frank Edwards, 382 6th St, San Francisco.

BUILDING (manufacturing of flake aluminum powder), $40,500; 1069 2nd St, Albany; owner, Metals, Inc, 582 Market St, San Francisco.

OFFICE (telephone company), $4500; 131 Throckmorton, Mill Valley; owner, Estate sof Jacob Albert, 4th and Court Sts, San Rafael.

SERVICE STATION, $6230; south of Sunnyvale; owner, Paul O Valente, Route 1, Box 1691, Santa Clara.

RESTAURANT, $10,000; 2138 Allston, Berkeley; owner, Joseph B Enos Jr, 627 Wesley, Oakland.

BUILDING (dairy and poultry feed), $4500; Turlock; owner, Vetro & Silva, 840 Park, Turlock.

BUILDING (tent and awning manufacturing), $10,650; 221 X St, Sacramento; owner, Carnie-Goodwin-Pendleton Co, 515 L St, Sacramento

BUILDING (to house city equipment), $9800; between College and California, Dinuba; owner, City of Dinuba, City Hall, Dinuba.

WAREHOUSE (for millwork manufacturing), $4000; Autumn and Santa Clara, San Jose; owner, Chase Lumber Co, 547 W Santa Clara, San Jose.

PLANT (paint manufacture), $16,000; North Sacramento; owner, Capitol Paint Co, 120 E El Camino, North Sacramento.

PLANT (manufacturing of sugar refining equipment), $62,120; Chestnut, Redwood City; owner, Chemical Process Co, 58 Sutter St, San Francisco.

WAREHOUSE (contractor's), $3600; Eastern Ave, Sacramento; owner, Louis Jansen, 775 El Dorado, Sacramento.

PLANT (manufacture of building hardware), $9700; Belmont; owner, Henry Hughes, 1440 Old County Rd, Belmont.

REMODEL (complete remodeling of food store and living quarters), $1750; San Francisco; owner, Robert H Nelson, 2401 38th Ave, San Francisco.

PLANT (manufacture cement laundry trays), $2000; 1225 Herman, San Bruno; owner, Eagle Tray Co, 1225 Herman, San Bruno.

REMODEL FRONT (retail clothing store), $5500; 169 Pacific, Santa Cruz; owner, Leibbrandt Clothing Co, 7 Manor Ave, Santa Cruz.

REPAIR SHOP (for servicing concrete mixer trucks), $4500; 312 S Linden, South San Francisco; owner, Ken Royce Co, 185 Bayshore, San Francisco.

SERVICE STATION, $4325; Plumas St, Yuba City; owner, Emory W Tucker, 573 Church, Yuba City.

FHA PERMITS ISSUED

SAN FRANCISCO.—The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

1 UNIT—Fresno; Clyde C Hawthorne, Fresno.
85 UNITS—Oakland; McGah & O'Shea, 631 Bergedo Dr, Oakland.
1 UNIT—Visalia; Stewart Bros, 1220 Leslie Rd, Visalia.
7 UNITS—San Francisco; Gilbert L. Plov, San Francisco.
3 UNITS—Visalia; Lindquist & Lindquist, 719 Sowell St, Visalia.
1 UNIT—Carmel; Linley J Daniels, Box 2204, Carmel.
5 UNITS—Sacramento; Lean Boaz Roland, Route 8, Box 1625, Sacramento.
10 UNITS—Santa Cruz; Ralph L Robinson, 68 Centennial St, Santa Cruz.
2 UNITS—Redwood City; Forrest F Brackett, 550 El Camino Real, Redwood City.
2 UNITS—Oakland; M P Brasch, 1600 Mountain Blvd, Oakland.
17 UNITS—Santa Cruz; R B Bernard, Box 945, Santa Cruz.
3 UNITS—San Francisco; J C Duerner & Son, San Francisco.
1 UNIT—Visalia; E A. Boettler, 614 Oak Park Ave, Visalia.
1 UNIT—San Carlos; Ward Tucker, 515 4th Ave, San Mateo.
1 UNIT—North Sacramento; C J Farver, 3809 Palmetto St, Del Paso Heights.
1 UNIT—Fresno; Lloyd D Hibner, 4866 Madison Ave, Fresno.
4 UNITS—San Francisco; J C Duerner & Son, San Francisco.
1 UNIT—Visalia; E A. Boettler, 614 Oak Park Ave, Visalia.
1 UNIT—San Carlos; Ward Tucker, 515 4th Ave, San Mateo.
1 UNIT—North Sacramento; C J Farver, 3809 Palmetto St, Del Paso Heights.
1 UNIT—El Cerrito; H G Patrick, 969 Ordway St, Albany.
1 UNIT—Palo Alto; West Bay Construction Co, 537 Bryant St, Palo Alto.
2 UNITS—San Francisco; Rude & Lipman, San Francisco.
1 UNIT—Hanford; A F Losli, 102 W 4th St, Hanford.
1 UNIT—Fresno; Claude I Clothier, 1103 Wilson Ave, Fresno.
48 UNITS—Palo Alto; owners, Wm J Mooser and G Workman, San Francisco.
20 UNITS—Colfax; John Roland, Box 690, Route 1, Colfax.
5 UNITS—San Francisco; Lacey & White, San Francisco.
1 UNIT—Berkeley; Petersen & Fisher, 3510 Rheem Ave, Richmond.
1 UNIT—Modesto; Gordon C Wilson, 417 Maple St, Modesto.

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

2/14/47 • 32
Engineer Appointed to Prepare Plans Sewage Treatment Plant
MARTINEZ, Calif., Contra Costa Co.
Owner—City of Martinez, Leonard McClintock, city administrator; Frank Sarles, city engineer; Raymond B. Johnson, city clerk, City Hall, Martinez, Calif.
Consulting Engineer—L. Cedric Macabee, 156 University Ave., Palo Alto, Calif.

2/14/47 • 32
Owner Taking Bid—Due Feb. 26, 8 P. M. (Bidders Figuring)
Sewage Pumping Plant Cost $166,000
MILL VALLEY, Calif., Marin County.
Owner—City of Mill Valley, R. E. Baumberger, city clerk, City Hall, Mill Valley, Calif.
Consulting Engineer—John S. Bates, 3134 Etna St., Berkeley, Calif.
Reinforced concrete pumping station, including pumps, mechanical and electrical equipment, piping, grading, etc.
Unit quantities were published on February 5.
Specifications obtainable from the office of the engineer upon deposit of $25, refundable.
The following contractors have taken out plans:
DeLuca & Son, 1745 Filbert St., San Francisco, Calif.
Stolte, Inc., 8451 San Leandro St., Oakland, Calif.
Fred J. Early Jr. Co., 369 Pine St., San Francisco, Calif.
Hoagland-Findlay Engineering Co., 3254 Cherry Ave., Long Beach, Calif.
Haas & Rothschild, 326 Merchants' Exchange Bldg., San Francisco, Calif.

33— BRIDGES

2/14/47 • 33
Low and Only Bidders
Bridge (Substructure) Cost $317,106
REDDING, Calif., Shasta County. Across the Sacramento River.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Substructure for a bridge.
Low Bidder—James I. Barnes Construction Co., Box 799, Santa Monica, Calif., and 941 Russ Bldg., San Francisco, Calif., $317,106.
The work involves:
(1) 3400 cu. yds. structure excavation ,type A;
(2) 1300 cu. yds. structure excavation, type B;
(3) 1450 cu. yds. class A portland cement concrete structure;
(4) 1350 cu. yds. class A portland cement concrete footing block;
(5) 4700 lbs. miscellaneous steel;
(6) 20,810 lin. ft. furnish steel piling;
(7) 510 each drive steel piles;
(8) 52 each steel pile splices;
(9) 219,000 lbs. furnish bar reinforcing steel;
(10) 219,000 lbs. place bar reinforcing steel;
(11) engineer's office.
Total bids submitted February 13 were:
(A) James I. Barnes Construction Co., Santa Monica, $317,106.
(B) John C. Gist, Sacramento, $318,340.
(C) Lord & Bishop, Sacramento, $335,731.
(D) United Concrete Pipe Corp. and Ralph A. Bell, Baldwin Park, $348,925.
(E) Macco Corp., Clearwater, $367,740.
(F) Guy F. Atkinson Co., South San Francisco, $368,697.
(G) Johnson Western Co., Alameda, $374,419.
(H) E. B. Bishop, Orland, $387,783.
(I) Pacific Bridge Co., San Francisco, $465,835.
(J) George Pollock Co., Sacramento, $446,669.
Unit prices will be published tomorrow.

2/14/47 • 33
Low and Only Bidders
Overhead Crossing (Substructure) Cost $231,305.50
SANTA BARBARA, Calif., Santa Barbara County. Over tracks of Southern Pacific Co. at Salsipuedes Street.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Substructure for an overhead crossing.
Low Bidder—Macco Corp., 815 Fairmount Blvd., Clearwater, Calif., $231,305.50.
The work involves:
(1) 450 cu. yds. roadway excavation;
(2) 2400 cu. yds. structure excavation;
(3) 3800 cu. yds. imported borrow;
(4) 2700 cu. yds. class A portland cement concrete;
(5) 32,110 lin. ft. furnish Douglas fir piling;
(6) 3150 lin. ft. furnish 10-in. steel piling;
(7) 772 each drive timber piles and steel piles;
(8) 6 each steel pile splices;
(9) 442,000 lbs. furnish bar reinforcing steel;
(10) 442,000 lbs. place bar reinforcing steel;
(11) 9500 lbs. anchor bolt assemblies;
(12) 590 lin. ft. new track;
(13) 915 lin. ft. remove existing tracks;
(14) 174 lin. ft. relocating existing track;
(15) engineer's office.
All track materials in connection with items 13, 14 and 15 will be furnished free of cost to the contractor.
Total bids submitted February 13 were:
(A) Macco Corp., Clearwater, $231,305.50.
(B) C. B. Tuttle Co., Long Beach, $238,816.
(C) R. E. Price Co., Huntington Beach, $241,178.50.

(E) John C. Gist, Sacramento, $264,453.50.
(F) Johnson Western Co., San Pedro, $279,728.45.
(G) Winston Bros. Co., Los Angeles, $289,838.50.
(H) United Concrete Pipe Corp. and Ralph A. Bell, Baldwin Park, $307,702.
Unit prices will be published tomorrow.

2/14/47 • 33
Low and Only Bidders
Overcrossing (Substructure) Cost, $378,653.30
Overcrossings (Substructure)
SAN DIEGO COUNTY, Calif. Bayshore Freeway between South San Francisco and Burlingame.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Substructure for four overcrossings.
Low Bidder—Carrico & Gautier, 365 Ocean Ave., San Francisco, Calif., $378,653.30.
The work involves:
(1) 9250 cu. yds. structure excavation;
(2) 5085 cu. yds. class A portland cement;
(3) 18,100 lbs. anchor bolt assemblies;
(4) 75,996 lin. ft. furnish untreated timber piling;
(5) 5040 lin. ft. furnish 10-in. steel piling;
(6) 4975 lin. ft. furnish 12-in. steel piling;
(7) 19 each steel pile splices;
(8) 2148 each driving piles;
(9) 755,000 lbs. furnish bar reinforcing steel;
(10) 755,000 lbs. place bar reinforcing steel;
(11) engineer's office.
Total bids submitted Feb. 13 were:
(A) Carrico & Gautier, San Francisco, Calif., $378,653.30.
(B) Healy-Tibbitts Constr. Co., San Francisco, $388,595.45.
(C) Dan Caputo and Edward Keeble, San Jose, Calif., $404,408.36.
(D) Parish Bros. and Lou Jones Constr. Co., Benicia, Calif., $405,312.00.
(E) Butte Constr. Co. and Haas & Rothschild, San Francisco, Calif., $425,209.54.
(F) Barrett & Hilp, San Francisco, Calif., $426,513.80.
(G) Macco Corp. and Morrison-Knudsen, San Francisco, Calif., $427,144.20.
(H) M. & K. Corp., San Francisco, Calif., $433,790.54.
(I) Carl N. Swenson, San Jose, Cal., $458,232.20.
(J) Harry J. Oser and Peter Sorensen, Redwood City, Calif., $463,329.50.
(K) Guy F. Atkinson Co., South San Francisco, Calif., $465,545.10.
(L) Charles L. Harney, San Francisco, Calif., $466,867.72.
(M) Underground Constr. Co., Oakland, Calif., $497,943.66.
(N) Clinton Constr. Co., San Francisco, Calif., $524,021.01.
(O) Stolte, Inc. and Duncanson-Harrelson Co., San Francisco, $595,837.60.
Unit prices will be given tomorrow.

2/14/47 • 33
Contract Awarded
Undercrossing Cost $234,826.90
SAN RAFAEL, Calif., Marin County. Linden Lane, under the tracks of the Northwestern Pacific Railroad and the freeway.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Includes undercrossing and approximately 0.15 mile grading and surfacing with portland cement concrete, crusher run base and plant mix surfacing.
Contractor — Parish Bros., Box 6, Benicia, Calif.

34—DAMS, RESERVOIRS & DREDGING

2/14/47 • 34
Owner Taking Bids—Due Feb. 26, 5:30 P. M.
Bryant Reservoir; Spec. LS-379
CONTRA COSTA COUNTY, Calif.
Owner—East Bay Municipal Utility District, Room 406, 512—16th St., Oakland, Calif.
District Engineer—John S. Longwell 512—16th St., Oakland, Calif.
Prestressed concrete structure, 3,000,000-gal. canacity.
Work involves:
(1) 2200 c.y. excav. for reservoir;
(2) 2000 c.y. compacted backfill;
(3) 942 c.y. reinf. concrete;
(4) lump sum, installation of pipe, valves and fittings;
(5) lump sum, installation of ⅞-in square steel bands;
(6) lump sum, furnish and install drains;
(7) lump sum, install gunite cover on outside of reservoir wall;
(8) lump sum, furnish and install misc. steel work;
(9) lump sum, furnish and install reservoir bottom seal;
(10) 5200 sq. ft. bending and placing rein.; steel;
(11) 923 barrels furnish high early strength portland cement;
(12) 635 bbls. furnish portland cement;
(13) lump sum, furnish and install 1½-in. pipe railing.
Specifications obtainable from the above office.

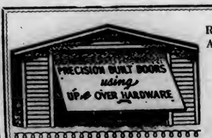
How to make clients your friends

If you consider your clients' comfort and convenience for years to come, your clients will be friends for years to come. And one sure way is to plan for built-in telephone outlets before construction starts. Here's why!

Built-in telephone outlets add little to building costs...much to building value.



The location of the telephone can be changed or additional telephones may be added in the future without tearing up the flooring or running wires along baseboards.

The convenience of well placed telephone outlets will be appreciated now and for years to come.

Call or dial local Telephone Business Office. Ask for Architects' and Builders' Service.

American Road Builders' 44th Convention To Open Monday; Airports High on Agenda

WASHINGTON.—Delegates to the annual convention of the American Road Builders' Association in Chicago next week will meet on the morning of Monday, February 17, in the Grand Ballroom of the Palmer House to take apart all phases of the federal-aid airport program.

The road builders have an important interest in air field construction and are looking forward to a heavy volume of 1947 business from this source. Be it bituminous surfacing or concrete, the highway builders have the equipment and experience to cope with problems involved in surfacing airport locations.

So, to give these contractors of heavy work an x-ray view of national airport act provisions, W. R. Macatee, manager of ARBA's airport division, has scheduled a Town Hall Meeting on airports in connection with the organization's 44th annual get-together in Chicago.

This Town Hall session will consist of two and one-half hours of discussion of 60-odd formal questions by a panel of 18 or 20 experts in their respective fields. These men will give studied answers to the questions placed before them by a moderator.

Having the questions in hand before the session, these panel members are expected to interpret them and solve the problems posed by them with correct and straight-forward answers, Macatee said.

Following the formal panel discussion, audience participation will enable delegates to question the experts for approximately half an hour to bring out any points that remain unanswered at that time.

The panel experts will not be limited to professional opinion in their answers but may cover their replies with individual though with respect to the subjects they will cover. This will enable a more searching inquiry into various aspects of the government's federal-aid program for communities planning air fields with financial assistance from Washington.

The following phases involved in airport development will be considered:

1.—Scope and purpose of the federal-aid airport program.

2.—programing and scheduling federal-aid for airports.

3.—Design and construction of concrete aprons, runways and taxiways for light, medium and heavy loads.

4.—Design and construction of flexible pavements (asphalt, tar and turf) for aprons, runways and taxiways for light, medium and heavy loads.

5.—Significance of subgrade support for airport pavements.

6.—Value of super-compaction of subgrades and base courses.

7.—Methods for making airports self-sustaining.

8.—The need for advantage of freeway-type of access roads between airports and heart of cities.

9.—Geometric pattern of layout for airports, and need for master plans.

10.—Financing sponsors' share of airport costs.

11.—Relationship of subgrade-support to thickness of flexible pavements for airports.

12.—Current and prospective airport legislation — national and state.

13.—Advantage of funneling through state aviation agencies requests for federal-aid for airport development.

14.—Airport drainage problems.

15.—Are property owner objecat airports.

17.—Airport terminal buildings and hangars.

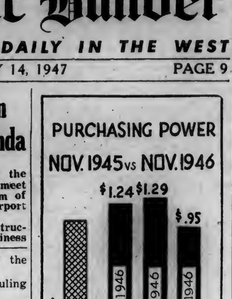
18.—State-aid for local airport developments.

19.—Airport snow removal.

20.—Advantage of a monthly schedule of airport maintenance.

21.—Use of vertical sand drains to speed settlement of muck-filled airport sites.

22.—Community airparks.



23.—Advantages of expert public relations-advice in stimulating airport development.

24.—Radiant heat for airport snow removal.

25.—Separate airports for air freight.

26.—Disposal of surplus airports and operating equipment.

27.—Airport markings.

WATER FILTRATION PLANT, MARTINEZ, CALIF.

Low and Only Bidders
Water Filtration Plant Cost, $610,379

MARTINEZ, Calif. Contra Costa Co. Owner — City of Martinez, Leonard McClintock, city administrator; Frank Sarles, city engineer; Raymond B. Johnson, City Clerk, City Hall, Martinez, Calif.

Consulting Engineers—A. Kempkey, Balboa Bldg., San Francisco, Calif., and Charles Gilman Hyde, 2599 Buena Vista Way, Berkeley, Calif. Includes low-pressure supply pipe line from the Terminal Reservoir of the Contra Costa Canal to the proposed water treatment works; a clear water high-pressure pipe line delivering to the existing distribution pipe system of the City of Martinez at 3 locations; a complete treatment plant, having capacity of 6,000,000 gals. per 24 hrs Completion of work: 360 days.

The approximate quantities include 8200 cu. yds. net excavation for treatment plant and pumping station structures; 8200 cu. yds. compacted and partially compacted backfill including 1700 cu. yds. of top soil around the treatment plant and pumping station; 6300 cu. yds. excavation in the wash water settling pond; 6300 cu. yds. compacted fill in the restraining levees of the wash water settling pond; 3,150 cu. yds. concrete, mostly reinforced; 404,000 lbs. of steel reinforcement; 2090 lin. ft. 30 in. or 24 in. raw water supply pipe and 10,100 lin. ft. 14 in. and 12 in. clear water pressure pipe lines, etc.

Low Bidder—Stolte, Inc., 8451 San Leandro St., Oakland, Calif., $610,379.

Bids were taken as follows:

(1a) lump sum, 30 in. welded steel raw water supply pipe line wall thickness 3/16 in. complete with all appurtenances

(1b) lump sum, 30 in. welded steel raw water supply pipe line, wall thickness ¼ in. complete with all appurtenances

(1c) lump sum, 24 in. Class 50 transite raw water supply pipe line complete with all appurtenances

(2a) lump sum, 14 in. Class 150 Castiron clear water pressure pipe line complete with all appurtenances

(2b) lump sum, 14 in. Class 150 transite clear water pressure pipe line complete with all appurtenances

(3a) lump sum, 12 in. Class 150 cast iron clear water pressure pipe line complete with all appurtenances

(3b) lump sum, 12 in. Class 150 transite clear water pressure pipe line complete with all appurtenances

(3⅛a) lump sum, 8 in. Class 150 cast iron clear water pressure pipe line complete with all appurtenances

(3⅛b) lump sum, 8 in. Class 150 transite clear water pressure pipe line complete with all appurtenances

(4) lump sum, earthwork at treatment works - puniping station site complete

(5) lump sum, paved roadways and truck maneuvering area complete

(6) lump sum, concrete curbs, walks and steps complete with all appurtenances

(7) lump sum, preparing, seeding and temporarily maintaining lawns, complete

(8) lump sum, concrete structure of the sedimentation basins

(9) lump sum, basin level regulator or controller complete with all appurtenances

(10) lump sum, primary aerator pipe system and spray nozzles complete with all appurtenances

(11) lump sum, 7 sluice gates in the sedimentation basins, complete with operating stands and all appurtenances

(12) lump sum, high pressure wash water supply pipe system for the sedimentation basins complete with all appurtenances

(13) lump sum, 10 in. cast-iron and vitrified clay pipe drainage system of the sedimentation basins complete with all appurtenances

(14) lump sum, 20 in. class 50 cast iron pipe connection between the sedimentation basins and flocculation Tank No. 1 complete with all appurtenances

(15) lump sum, 24 in. Class 50 cast iron effluent pipe system from the sedimentation basins to a terminus in the filter pipe gallery complete with all appurtenances

(16) lump sum, concrete structures of the 3 flocculation tanks

(17) lump sum, 24 flocculation tank vertical wood deflector baffles complete with all appurtenances

(18) lump sum, for the effluent, bypass and drain piping system of the flocculation tanks complete with all appurtenances

(19) lump sum, 3 paddle stirring mechanisms and assemblies in the flocculation tanks complete with all appurtenances

(20) lump sum, concrete structure of the wash water tank complete

(21) lump sum, high pressure Class 150 6 in. cast iron supply pipe line to the wash water tank complete with all appurtenances

(22) lump sum, 20 in. Class 50 cast iron wash water pipe line from the water tank to a terminus in the filter pipe gallery complete with all appurtenances

(23) lump sum, 6 in. Class 50 cast iron force main from the wash water pump to the wash water tank complete with all appurtenances

(24) lump sum, overflow pipe assembly from the wash water tank to the main plant drain complete with all appurtenances

(25) lump sum, water water settling pond complete with all excavation, levees, seeding to grass and all other appurtenances

(26) lump sum, 20 in. cast iron and the 21 in. vitr. clay main plant drain from its beginning in the filter pipe gallery to its terminus in the wash water settling pond complete with all appurtenances

(27) lump sum, concrete structure of the filtered water basin complete with all appurtenances

(28) lump sum, 24 in. Class 50 cast iron filtered water effluent pipe from its beginning in the filter pipe gallery to the filtered water basin complete with all appurtenances

(29) lump sum, 3 in. air pipe line from the blower to and including the diffusors in the filtered water basin complete with all appurtenances

(30) lump sum, 24 in. Class 100 cast iron supply pipe line from the filtered water basin to the pumps in the pumping station complete with all appurtenances

(31) lump sum, 12 in. Class 50 cast iron by-pass pipe line between the 24 in. cast iron influent pipe and the 24 in. cast iron supply pipe line to the pumps complete with all appurtenances

(32) lump sum, filter house building and pumping station structures complete with all appurtenances

(32) lump sum, architectural plumbing system and work in the filter house and pumping station complete with all appurtenances

(34a) lump sum, 440 volt low voltage interior and exterior electrical system of the treatment plant and pumping station structures and site complete with all equipment and appurtenances

(34b) lump sum, 2400 volt de.

(35) lump sum, 4000-lb. capacity overhead-type traction elevator complete with all equipment and appurtenances

(36) lump sum, underdrainage piping systems in the 4 filters complete with all appurtenances

(37) lump sum, for 16 filter units in place in the 4 filters complete with all appurtenances

(38) lump sum, for 4 raw water supply laterals to the 4 filter units complete with all appurtenances

(39) lump sum, for 4 wash water supply pipe lines to the 4 filter units complete with all appurtenances

(40) lump sum, for 4 effluent pipe and controller systems of the 4 filter units complete with all equipment and appurtenances

(41) lump sum, for 4 wash water drainage pipe lines from the 4 filter units complete with all equipment and appurtenances

(42) lump sum, for filter effluent laterals complete

(43) lump sum, for gravel underdrains and egg crates in the 4 filter units complete

(44) lump sum, for filter sand in the 4 filter units complete

(45) lump sum, for 2 double filter operating tables for the 4 filter units complete with all equipment, connections and appurtenances

(46) lump sum, for wash water rate of flow meter and pedestal type indicator - totalizer - recorder, complete with all equipment, connections and appurtenances

(47) lump sum, for the filter plant effluent rate of flow meter and the pedestal-type indicator-totalizer-recorder, complete with all equipment, connections and appurtenances

(48) lump sum, for the wall-type wash water tank depth gage complete with all connections and appurtenances

(49) lump sum, for 4 chemical dry feed machines complete with all equipment, connections and delivery piping to points of application

(50) lump sum, for the chemical dust remover for the 4 chemical dry feed machines complete with all equipment, piping and connections

(51) lump sum, for the Toledo scale and supporting table complete with all appurtenances

(52) lump sum, for the Raymond Laboratory Mill and Supporting Table complete with all connections and appurtenances

(53) lump sum, for the 2 Wallace and Tiernan Chlorinators and 1 ammoniator and all supply and discharge piping and appurtenances complete

(54) lump sum, for 2 chlorine cylinder and 1 ammonia cylinder scales complete with all appurtenances

(55a) lump sum, for 3 1400-gals. per minute high lift electric motor driven horizontal centrifugal pumping units and connections complete

(55b) lump sum, for one 600, one 1000, and 1 1400-gals. per minute high lift electric motor driven horizontal centrifugal pumping units and connections complete

(56) lump sum, for 200-gals. per minute electric motor driven horizontal centrifugal wash water pumping unit, automatic control and connections complete

(57) lump sum, for surge chamber, air compressor, connections and equipment complete with all appurtenances

(58) lump sum, for 18 in. Class 150 cast iron discharge pipe line excepting the Venturi meter complete

(59) lump sum, for the Venturi meter and Recorder-Totalizer-Indicator panel and connections complete

(60) lump sum, for the Venturi meter chamber complete with all appurtenances

(61) lump sum, for the electric motor driven water and air compressor (blower) complete with connections and appurtenances

(62) lump sum, for the sump electric motor driven centrifugal pumping unit complete with all connections and appurtenances

(63) lump sum, for the plant irrigation pipe system complete

(64) lump sum, for laboratory supplies, accessories and special equipment complete.

Total bids submitted Feb. 11 were:

(A) Stolte, Inc., Oakland, Calif., $610,379.

(B) Central California Constr. Co., Inc., San Francisco, Calif., $645,085

(C) De Luca & Son, San Francisco, Calif., $648,696.

(D) Fred J. Early, Jr., Co., San Francisco, Calif., $[illegible]

(E) Hoagland-Findlay Engrg. Company, Long Beach, Calif.,% $703,725.

(F) Fredrickson & Watson Construction Co., Oakland, Calif., $773,490.

Unit prices will be given shortly.

Highway Improvements
Solano County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway rate of wages applicable to the work to be done to be as follows:

Classification — Rate per hour

Skilled Labor

Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	1.90
Operator of power shovel or other excavating equipment, shovel type controls (up to and including 1 cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Pile driver hoistman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.60
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2825
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, at the office of the Associated General Contractors in San Francisco and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the office of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on **March 5, 1947**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Sacramento County on Howe Avenue, between Fair Oaks Boulevard and Arden Way (III-Sac-937), about one and six-tenths (1.6) miles in length; to be graded and surfaced with crusher run base on imported borrow; and the existing pavement to be widened with crusher run base and surfaced with plant-mixed surfacing.

Bids are required for the entire work described herein.

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Unskilled Labor	
Flagman	1.25
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.25 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Unskilled Labor	
Flagman	1.25
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.25 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

licly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications thereto, to which special reference is made, as follows:

Placer County, between Wise Canal and Rock Creek (111-Pla-17-C), about one and nine-tenths (1.9) miles in length to be graded and surfaced with crusher run base and plant-mixed surfacing, an underpass to be constructed and an existing bridge to be widened.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	1.90
Derrick operator	2.10
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.75
Roller operator	1.95
Structural steel worker	2.00
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

PLANS and Speculations

Plan loans have been made to School District No. 414 of King County, Washington, for preparation of plans to a 2-story addition to the elementary school at Redmond, and certain remodeling. Total cost of the project is $175,000; federal advance is $7,500.

oOo

A plans loan of $2,950 went to Union high school district No. 202 of Spokane County, Wash., for a $73,963 two-story addition to the high school at Millwood.

oOo

A $126,000 project for replacement of the water supply main and raising the height of a storage dam was okayed for a planning loan of $6,000.

#

Pasco Unit Pumps, Gates, Pipe Bids Asked for Project

COULEE DAM, Wash.—Bringing the 5,400-acre Pasco Unit of the Columbia Basin Irrigation Project closer to completion, the bureau of reclamation called for bids on seven "relift" pumps for the distribution system and additional equipment for the main pumping plant on the east bank of the Columbia River, February 10.

At the same time, the bureau also announced issued calls for materials to be used in building the main irrigation system which is under construction farther north to serve the entire million-acre project. The Pasco unit is scheduled to be ready by fall, but it will be several years before the main network of reservoirs, canals, and siphons will carry water from Lake Roosevelt, behind the Grand Coulee Dam, to the Basin.

Bureau officials said the Pasco relift pumps, ranging from a capacity of 3 cubic feet per second to 59 cubic feet per second, will be used to raise water to laterals serving higher-lying lands in the Pasco unit. Bids on the pumps will be opened at Denver March 12.

Another bid invitation, on which offers will be opened at Denver March 10, covers service pumps for the Pasco Pumping Plant, an air compressor, and two gate valves.

A third bid request for the Pasco unit covers emergency gates. Bids on this equipment will be opened at Denver February 18.

Other bid calls announced by the Bureau's Columbia Basin Project are:

February 13, at Denver, 15,530 feet of lead-sheathed electrical cable, armored and unarmored; 9,000 feet of bare copper cable.

February 19, at Coulee Dam; soil pipe and fittings.

Prospective bidders can obtain additional information from Chief Clerk C. B. Funk or Purchasing Agent J. H. Jabbusch at Coulee Dam.

#

MILLWORK SUPPLY, DEMAND NEAR EQUAL

An estimated 2,300 million board feet of lumber will be available for millwork this year, as against a minimum demand for approximately 2,200 million feet for residential building and other construction, including that authorized under veterans' housing program order 1, the Civilian Production Administration said today.

Both CPA and the industry estimate that existing millwork facilities are more than sufficient to process the lumber to become available, and that satisfactory quantities of finished millwork will be turned out.

O'Gara Investigation Highlights Aversion To Public Housing

Senator O'Gara's investigation into housing Thursday, Friday and Saturday at Larkin Hall drew many home builders, investors, state officials and interested citizens. The committee is making a study of highly congested communities over the state, in an effort to determine what state legislation is needed to stimulate building.

Dominant theme of the meeting was aversion of government housing and control with Milton W. Morris, executive secretary of the Associated Home Builders of San Francisco, that rent controls is one of the things discouraging rental building.

The American Legion coincided in most respects with eight recommendations prepared by A. Earl Washburn, state director of reconstruction and employment. He said that through the period January 15-December 23, 1946, housing priorities granted in California alone were one-sixth of the national total. He said 50 per cent less priorities for rental units were granted from June 28 to Dec. 23, 1946, than for the previous six months.

He praised passage of the Maloney Act of 1946 establishing a state million dollar revolving fund for purchase of surplus housing from War Assets Administration, and made these recommendations:

1)—The Legislature appropriate funds for the completion of all inquota FPHA buildings in California now under federal stop orders;

2)—That use of permanent type construction be encouraged;

3)—That the Legislature be asked to memoralize congress requesting the removal of rental ceilings on all new multiple-unit dwelling construction started or completed after such congressional action is taken;

4)-a—Authorize for income tax purposes an additional amortization over a 5-year period of one-third of the cost of construction, provided the owner certifies that the rental received does not exceed one per cent per month of two-thirds of the total investment, and that the property has been rented to a veteran;

4)-b—Disregard for a five-year period the value of improvements provided the property is rented to a veteran;

5)—That the Legislature enact proper measures authorizing and permitting cities and counties to establish local rent control, with authority to increase or diminish rentals where justified; such legislation to be effective upon termination of the federal rent control act;

6)—Create a State Board of Building Standards to establish basic building design and construction standards;

7)—Create a State Commission to study the subject of uniform building codes and make recommendations leading to adoption of a uniform building code for statewide use.

Frank C. MacDonald, president of the State Building & Construction Trades Council, made a four-point recommendation as a possible solution to the housing crisis Thursday, and at he same time denounced efforts in some quarters to obtain sweeping revisions of building codes.

"This emergency must not cause us to jeopardize community safety," he said.

His recommendations to reduce costs of building were to:

1)—Make publicly owned lands available, especially in small city and rural areas;

2)—Prepare standard plans;

3)—Use sandard size materials and parts;

4)—Make an effort to coordinate and pool the labor supply.

MacDonald said there is an ov-

Highways Crucial National Welfare Factor—ARBA

WASHINGTON. —Two aspects of American highways make highway transportation a crucial factor in the welfare of the entire nation, Charles M. Upham, engineer-director of the American Road Builders' Association, said in a statement to engineers here today in which he urged a high volume of highway construction.

National welfare is affected in two major respects, Mr. Upham said. First by the existence of the transportation system itself without which the nation cannot prosper, and secondly by the effect of the construction program on the national economy.

Of the latter category, Mr. Upham said, "Highway construction is the stabilizer of the nation's economic structure. It fulfills every requirement needed for prosperous conditions. It is the backbone of the important durable goods industry which controls the nation's labor force. Highway production is the means of filling in the gap between war production and full peacetime production."

The highway dollar is an all-important economic weapon because it builds needed facilities, is felt in rural as well as urban areas, and its influence multiplies as it reaches out from the job-site to the iron and steel mills, transportation, mines and farms. "It is the dollar which must play a major role in the nation's economy during the period ahead," Mr. Upham said.

$20 Billion Need

"The size of the job ahead must of necessity exceed any road building previously attempted. The lapse in highway and street construction during the depression years and those following has resulted in a highway deficit which has been aggravated by yet another lapse in highway construction caused by the war."

Mr. Upham said that the cost of construction needed to modernize the present highway system to accommodate present traffic is estimated to be between 16 to 20 billion dollars.

#

SPECIAL MEET TO REVIEW FLOOD WORK

A special meeting of the state water resources board will be held February 22 in San Diego. It will study a request that it make a complete study of California's flood control problems and urge congress to allocate $31,972,000 for 1948 control in the state.

Board Recommendations Presented, Many Adopted; Lateral Force Discussion Heated

Judiciary Hopes to Put Building Code on Legislative Calendar Soon—Chairman MacPhee

Early passage of the proposed new building code was virtually assured when the construction industry advisory committee presented their report to the judiciary committee meeting Thursday, and won approval for many recommendations.

These are some of the more important issues that were settled in committee.

To guarantee that contractors will clear streets of dirt, debris, materials and equipment after a job is completed, $30 must be deposited for each 50 feet of frontage. For continuous building operations, a surety bond in amount of $1,000 may be accepted in lieu of a cash guarantee.

Fire-resistive requirements in section 904-I were restated, as follows:

"Structural members supporting exterior walls and inner court walls shall be of incombustible material and shall have a fire-resistive rating of not less than four hours."

A department of works section requiring that garages be lathed and plastered was voted out.

Restaurant Ventilation

The judiciary committee refused to revise the department of works' provision that mudsills shall be bolted to the foundation of foundation wall with not less than one-half inch bolts embedded at least seven inches into the masonry and spaced not more than six feet apart, except in one- and two-family dwellings where one-half inch bolts may be embedded six inches into the masonry and spaced not more than six feet apart. The committee promised to revise this in cases where the material required is not available, and suggested that it might be taken care of by specific department of works action.

A series of suggestions by the heating and ventilating engineers sought to put teeth into a series of code rules on ventilation thru clarification of verbiage. All were approved. A recommendation that all restaurant kitchens shall be ventilated at the minimum rate of two cubic feet of pure air per square foot of floor area per minute was written into the code.

A recommendation that all portions of hazardous occupancies customarily by human beings shall be provided with light and ventilation by means of windows or skylights with an area equal to one-fifth of the total floor area, or shall have artificial means of supplying an equal amount of light and fresh air.

Exceeds State Rules

A lengthily discussion of Article 23, covering lateral forces, failed to bring any agreement, as Dr. Lydik Jacobsen, Stanford earthquake specialist, urged that the only logical assumption as to quake intensity is that it will be as great as that of 1906.

He was seconded in a statement that damage due to the earthquake only in 1906 was much greater than is popularly supposed by H. M. Engle, consulting structural engineer, who urged that the lateral force requirements be stringent and conservative.

"The proposed code as drafted by Mr. Vensano goes way beyond existing state requirements," said consulting Engineer L. H. Nishkian. "In some cases it increases requirements by as much as 500 per cent. How can you justify such an increase?"

May Vote Feb. 24

The judiciary committee devoted four and a half hours to the code hearing, and set aside its next Wednesday's meeting to round up remaining items. Chairman Chester MacPhee said the committee hoped to have the code on the board of supervisors' legislative calendar of Monday, Feb. 24.

ASK BIDS SOON

Plans for a new women's dormitory on the Los Angeles campus of the University have been approved by the Regents and bids will be called for soon.

Contractors' Key Men on $27 Million Projects Announced

COULEE DAM, Wash. —Office headquarters and key personnel of contracting firms handling more than $27,000,000 in Bureau of Reclamation construction jobs on the Columbia Basin Irrigation Project of Eastern Washington were listed today by Bureau officials.

The information, they said, will prove useful to equipment dealers, fuel distributors, service agencies, and other business firms in all parts of the Pacific Northwest which provide supplies and machinery for construction jobs and contractors' camps.

Following is the list:

South Dam—**Bair-Crick Company.** Contract $6,771,000. James Crick, Jr., general superintendent. Postoffice address: Box 637, Coulee City, Wash.

Owner—Joey Dodge Cleaners, 2430 27th St., Sacramento, Calif.
Plans by owner.
Concrete block and siding.
Contractor—Stolte, Inc., 8451 San Leandro Blvd., Oakland, Calif.

14-17—PUBLIC BLDGS.

2/17/47 15
Owner Taking Bids—Due March 18, 2 P. M.
Border Station (alter & adds.)
CALEXICO, Calif., Imperial Co. U S Border Station.
Owner—General Works Agency, office of the division engineer, Public Buildings Administration, 838 U. S. Appraiser's Building, San Francisco, Calif.
Furnish materials and perform work for janitor's closets, evaporative type coolers, etc.
Plans and specifications obtainable from the above office of the district engineer.

2/17/47 15
FWA Funds Allotted in Amount of $4000
City Bldg. Cost $100,000
ELKO, Nevada.
Owner—City of Elko, Allen B. Carter, city manager, J. N. Littlefield, City Engineer, City Hall, Elko, Nevada.
Reinforced concrete Class 1 2-story and partial basement structure to provide office space for city officials, a fire station, jail, justice court and related offices.
FWA funds have been allotted to assist in the preparation of plans according to an announcement by Wright L. Felt, Div. Engr. in charge of the Bureau of Community Facilities of the Federal Works Agency, 630 Sansome St., San Francisco, Cal.

22-26—RESIDENTIAL BUILDINGS

Owner Taking Bids—Due Feb. 26, 2 P. M.—Officers' Apts. (Conversion from Barracks); Spec. 1265
STOCKTON, Calif., San Joaquin Co. Stockton General Depot Annex.
Owner—U. S. Engr. Office, Wright Bldg., Sacramento, Calif.
Plans by owner.
Bids will be taken as follows:
(1) 6 each convert 38-man cadet barracks to 4 officers' apts.;
(2) 5 each convert 30-man cadet barracks to 4 officers' apts.;
(3) 2 each convert 63-man barracks to 4 officers' qtrs.;
(4) 1 job, elec services, lump sum;
(5) 1 job, sewer services, lump sum

ALTERNATES
If Refuse Containers are Omitted from:
(1) 6 bldg. A deduct from item 1 for each bldg.;
(2) 3 bldg. B deduct from item 2 for each bldg.;
(3) 2 bldg. C deduct from item 3 for each bldg.;
If Doors on Kitchen Cabinets are Omitted from:
(4) 6 bldg. A deduct from item 1 for each bldg.;
(5) 3 bldg. B deduct from item 2 for each bldg.;
(9) 2 bldg. C deduct from item 3 for each bldg.;
If Switches are Omitted and Pull Chains Substituted:
(7) 6 bldg. A deduct from item 1 for each bldg.;
(8) 3 bldg. B deduct from item 2 for each bldg.;
(9) 2 bldg. C deduct from item 3 for each bldg.;
If all Interior Doors, Except Entrances to Rooms from a Common Entry, Doors in Fireproof Partitions and Bathroom Doors are Omitted:
(10) 6 bldg. A deduct from item 1 for each bldg.;
(11) 3 bldg. B deduct from item 2 for each bldg.;
(12) 2 bldg. C deduct from item 3 for each bldg.;
If Wallboard is Omitted from One Side of all Interior Partitions Except Fireproof Partitions Bathrooms and Kitchens:
(13) 6 bldg. A deduct from item 1 for each bldg.;
(14) 3 bldg. B deduct from item 2 for each bldg.;
(15) 2 bldg. C deduct from item 3 for each bldg.;
If Tubs are Omitted and Showers Substituted:
(16) 6 bldg. A deduct from item 1 for each bldg.;
(17) 3 bldg. B deduct from item 2 for each bldg.;

SACRAMENTO, Calif., Sacramento County.
Owner—City of Sacramento, Bartley W. Cavanaugh, City Mgr.; H. G. Denton, City Clerk, City Hall, Sacramento, Calif.
City Engr.—Fred Klaus, City Hall, Sacramento, Calif.
Treatment plant with capacity of about 40,000,000 gals. a day, and new enlarged mains.

33— BRIDGES

2/17/47 33
FWA Funds Allotted in Amount of $600
Viaduct Cost, $23,900
AUBURN, Calif., Placer Co. Over Southern Pacific tracks on Cherry Street.
Owner—City of Auburn, Mayor W. H Boswell City Hall, Auburn, Cal.
Reinforced concrete viaduct to replace timber viaduct.
FWA funds have been granted to assist in the preparation of plans, according to an announcement made by Wright L. Felt, Division Engineer, in charge of the Bureau of Community Facilities of the Federal Works Agency, 630 Sansome Street, San Francisco, Calif.

34—DAMS, RESERVOIRS & DREDGING

2/17/47 34
Contemplated—Bond Election
Planned Cost $600,000
Dam
SANTA CLARA CO., Calif. Approx. 2 miles west of Highway 101 in Paradise Valley about 300 yds. north of Lone Cut-Off Road.
Owner—South Santa Clara Valley Water Conservation District; Dr. Elmer J. Chesbro, President, 64 5th St., Gilroy, Calif.
Dirt fill construction with up-stream side faced with 4 inches of concrete; approx. 65 ft. high, 550 ft. long and 300 ft. thick with reservoir behind it covering 238 acres, with capacity to store approx. 3800 acre-feet of water.

2/17/47 34
Contract Awarded
Install Radial Gates, Extend Spillway Walls, Etc.
NAPA and SOLANO COUNTIES, Calif.
Owner—City of Vallejo, Melvin F. Brooks, city clerk, City Hall, Vallejo, Calif.
City Engineer—T. D. Kilkenny, City Hall, Vallejo, Calif.
Consulting Engineers—Kaiser Engineers, Inc., 1964 Broadway, Oakland, Calif.
Includes (1) furnishing labor, materials and equipment for installation of radial gates in the spillway of Lake Curry Dam, located in Gordon Valley, Napa County, consisting of five steel radial gates, worm gear hoist, extension of existing spiliway buttress walls, alterations to existing pipe railing and (2) installation of float wells and switches on three elevated tanks of the city water department located in Vallejo, Solano County, consisting of fabrication and erection of three float switch wells and three float switches, electrical conduit and crossarms.
Contractor—Fred J. Early Jr. Co., 369 Pine St., San Francisco, Calif., (1) $7645; (2) $1668; alternate $8983.

37— RAILROADS, SUBWAYS & TUNNELS

2/17/47 37
Contract Awarded on Schedule 2 Exploration Tunnels; Spec. 1593 Cost $16,928
HUNGRY HORSE PROJECT, Montana. Hungry Horse damsite on the south fork of Flathead River, about 15 miles south of Coram, Mont.
Owner—U. S. Bureau of Reclamation, Box 710, Kalispell, Mont.
Plans by engineering department of owner.
Contractors—Arthur Benson, Columbia Pre, Mont.; James F. Douglas, Coram, Mont., and Frank Bissell, Coram, Mont.

38— ELECTRIC LIGHTING TRANSMISSION LINES

2/17/47 * 38
Low and Only Bidders
Flood Lighting Cost $13,950
PETALUMA, Calif., Sonoma County. Petaluma City High School.
Owner—Petaluma City High School District, Dr. Hall Weston, clerk, Petaluma, Calif.
Plans by owner.
Installing flood lights on football field.
Low Bidder—Frank B. Maus, 22 Post St., Petaluma, Calif., $13,950.
Other bids Februrary 11 were:
L. H. Leonardi Electric Construction Co., San Rafael, Calif., $15,425.
Empire Electric Shop, Santa Rosa, Calif., $18,800.
Bids taken under advisement until February 19.

39—SEWERS

2/17/47 * 39
Owner Taking Bids—Due March 4, 7:30 P. M.
Industrial Waste Trunk Line
TURLOCK, Calif., Stanislaus County.
Owner—City of Turlock, Walter M. Brown, city clerk, 108 N. Broadway, Turlock, Calif.
City Engineer—Don C. Davies, 108 N. Broadway, Turlock, Calif.
The work involves:
(1) 7030 lin. ft. 30-in. reinforced concrete pipe;
(2) 547 lin. ft. 16-in. reinforced concrete pipe;
(3) 20 lin. ft. 20-in. concrete pipe;
(4) 65 lin. ft. 12-in. concrete pipe;
(5) 156 lin. ft. 8-in. concrete pipe;
(6) 16 lin. ft. 15-in. vitrified clay pipe;
(7) 22 manholes, brick or precast;
(8) 1 manhole, brick;
(9) 1 manhole, remodel, brick;
(10) 1 outlet structure, including weir and installing measuring device;
(11) 1 bypass structure;
(12) 5 inlet structures;
(13) 1 30-in. irrigation syphon to reconstruct.

Specifications obtainable from the office of the city engineer upon deposit of $5, refundable.

2/17/47 39
Resolution Applying for State Funds in Amount of $24,696 Approvad by City Council
Sanitary Outfall Sewer Cost $49,392
SALINAS, Calif., Monterey County. Ronnie Lane District.
Owner—City of Salinas, F. E. Heple, city clerk, City Hall, Salinas, Calif.
City Engineer—Donald Davies, City Hall, Salinas, Calif.

2/17/47 39
Plans in Progress
Sewer Trunk Lines
ROSEVILLE, Calif., Placer County.
Owner — City of Roseville, R. W. Terry, city clerk, City Hall, Roseville, Calif.
Engineer—Frank E. Packard, Box 1341, Sacramento, Calif.

2/17/47 * 39
Owner Taking Bids—Due Feb. 26, 2:30 P. M.—Slope Repair and Drainage; Spec. 20,136
SAN FRANCISCO, Cal. Bernal Ave. west side bet. Miguel Street and St. Mary's Ave.
Owner — City and County of San Francisco, Dept. of Public Works, Room 282, City Hall. San Francisco, Calif.
City Engr.—Ralph Wadsworth, City Hall, San Francisco, Calif.
Work involves:
(1) 1800 c.y. excavation;
(2) 1470 c.y. quarry run rock fill;
(3) 500 l.f. 8-inch perforated VCP drain;
(4) 3 each manholes;
(5) 10 c.y. basalt block retaining wall
(6) 6 each weep holes;
(7) 25 c.y. gunite slope finish.

Specifications obtainable from the office of the city engineer upon deposit of $10, refundable.

2/17/47 39

Housing Probe
(Continued from Page 1)

er-emphasis on low-cost housing, and recommended that the state board of public works be authorized to study the cheapest means of constructing a safe, modern home. He asserted that prefab housing meeting all the requirements of the conventionally-built home, cannot compete in cost. He said it would cost as much, or more, than the regularly built home.
James W. McCrary, regional economist of the office of the housing expediter, gave statistics outlining the housing need. He said 27% of all California married veterans are sharing homes. Of 8,500 units authorized in Northern California in a given period, only 726 were built for rent. Only 81 permits were issued for constuction to rent under $50.
One recommendation was that veterans building now should be tax exempt on improvements (or construction) on the land, and should pay taxes on the land only for a period of five years.

Official Proposals

LS 379—Construction of Bryant Reservoir

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the East Bay Municipal Utility District, 512 Sixteenth Street, Oakland, California, until 5:30 P.M., Wednesday, February 26, 1947, and will at that hour be opened, for the construction of the Bryant Reservoir, a prestressed concrete structure of three million gallons capacity, located in Contra Costa County.

The general prevailing rate of per diem wages in the locality in which the work is to be performed, for laborers and each craft or type of workman and mechanic needed to execute the contract, and the general prevailing rate for legal holiday and overtime work specifically set forth in the plans and specifications on file with the Secretary of the District, are referred to and incorporated herein.

Specifications No. LS 379 covering this work may be obtained upon application at Room 406 of the office of the District.

State Housing Board Needed, Witnesses at O'Gara Hearings Say

John W. Beard, executive director of the Housing Authority of the City and County of San Francisco, Monday estimated that 37,426 families here are living in substandard housing. His estimate does not include families living in temporary public war housing nor families living doubled up.

His figures were presented to the state Legislature's Joint Committee on Housing, at Larkin Hall. He said that more than 80 per cent of the substandard dwellings were rented for less than $25, including utilities, but that new construction to replace these units could not be had for less than a $50 rent. Underlining the need for certain amount of low rent housing, he said that SFPHA had made application for some 5,000 units the federal government must dispose of when the war emergency no longer exists.

Liberalization of mortgage insurance terms has not been sufficient to encourage local rental building, an examination of city building permit statistics revealed today.

The records showed that in January only three permits had been issued for rental building. All of these were 12 - family dwellings, to be built at a total cost of $71,000. No permits to build multi-family rental housing were issued in February.

Here's how San Francisco stood at the end of 1946:

	No.	Cost Fam.
3 or 4 families	24	$905,200 93
5 or more families	6	311,000 51

R. W. Mattison, executive vice president of the Bank of America, declared that further financial aid is not desirable. Liberality of FHA Sections 603 and 608, he said, is evidence that no further financing plans are needed at this time.

He recommended a two-point action: establishment of a state uniform building code, and reinstatement of the Class III loan. The latter action, he said, would enable home buyers to get a loan on "the shell of a house" and do such finishing work as plastering, painting, cabinet work and landscaping themselves to reduce costs.

Mattison stated opposition to any building program by the state or federal government, saying that private enterprise was better organized to do the job.

Frank Rose, executive assistant to the regional director of the Federal Public Housing Authority, recommended that a single, overall state housing board be established in California" to provide the Legislature with reliable information on housing from year to year."

He described other states' action on urban redevelopment, and suggested that some active program would be beneficial to California. Creation of the state housing board might expedite urban redevelopment, he added.

Although nearly every speaker who has appeared before the joint committee during its three - day session has spoken in favor of creation of a state housing board, no one has detailed what its powers should be.

PROFESSOR DEGARMO TO TALK AT WELDERS' MEET

Professor E. Paul DeGarmo, associate professor of mechanicel engineering at the University of California, at Berkeley, will describe some tests of large welded structures when the American Welding Society's San Francisco chapter meets Monday, February 24, at the Engineers' Club.

E. L. Mathy, national director of the society, will discuss the coming Western Metal Exposition and Congress.

State License Board Passive as Industry Plans Big Revisions

The Contractor's State License Board will take no formal stand in the current campaign to locate the Board, together with the architects' and engineers' agencies, outside the Department of Professional and Vocational Standards, although representatives of the Board will attend the next meeting of the Industry Legislative conference scheduled later this month at Sacramento, it was revealed with release of the official minutes of the last Board meeting at Los Angeles.

Agitation for publication of a geographically classified list of licensed contractors also received the attention of the Board with membera voting to have Registrar Eugene Zeiss prepare a full report for the next meeting after Zeiss told the Board it would cost $10,000 to have such a list printed.

Examiner Harry W. Abranams was requested to complete specific examinations for plumbing and electrical classifications and a new blanket examination by a definite date.

The contention of Michael J. Costello, San Francisco general contractor and former Board member, that Joseph A. McNeil of Los Angeles was improperly appointed to Costello's former membership was given a thorough airing. Costello charged that McNeil was improperly classified at the time of his appointment. An exchange of letters between Costello and J. Philip Murphy, Board chairman, in which Murphy refuted the charges, was read. The Board voted to secure an opinion from the Attorney General.

'Rent Control Draws 2 Million Rental Units from Market'

WASHINGTON — Rent control has slashed about 2 million rental units from the nation's tight supply and discouraged the construction of new facilities, results of the 46th semiannual survey of the real estate market by the National Association of Real Estate Boards disclosed today. The survey brought returns from local real estate boards in 475 cities in 45 states.

Urban dwelling units have been withdrawn from the rental market since the beginning of rent control in three categories: 1. converted to nonresidential use; 2. held vacant off the market; 3. sold for home ownership.

Conversion of residential properties to commercial purposes has taken at least 120,750 units not only off the rental market, but entirely out of residential use, the survey indicated. Two reasons were given:

1. Under rent control, returns from residential property have been limited, and the threat exists that they may continue to be limited, but labor and maintenance costs have increased and are increasing.

2. The long ban on commercial construction and the present limitation upon it produces a great pressure for conversions because there is a growing demand for commercial space.

KEEP STANDARD BUREAU

The Divisions of Simplified Practice and Trade Standards will be retained at the National Bureau of Standards in the interests of effective service to business and industry, Secretary of Commerce W. Averel Harriman announced today.

GROOVER AND I
DANCING IN THE DARK

While we were feeding the monkeys and watching the clowns some heist guy hijacked our government.

☆ ☆ ☆

We may awaken to the fact that we have a Super Government, called the State Department, and Secretary of State with more power than the President.

☆ ☆ ☆

During the past 15 years the super-agencies have been created, given a bank account, a check book and a pen that will write in the dark—in the dark so far as you are concerned.

☆ ☆ ☆

Now and then one of us little guys gets an unauthorized peek into the Back Room. For instance, when it was admitted that we were pulling out of China on account of political, economic and military failure, someone unthinkingly blabbed about the 500 million dollar loan the Export-Import Bank had already earmarked for China.

☆ ☆ ☆

We are making another hurry up "loan" to our very unfriendly little pal, Hungary. This one may be made through your World Monetary Bank.

☆ ☆ ☆

Probably the Sweetest Story of the Week is the State Department requesting free shipping space for $35 million dollars worth of Lend-Lease to Russia.

☆ ☆ ☆

Lend-Lease has been dead for over a year. The State Department explains that these goods were "on order" at the time Lend-Lease expired.

☆ ☆ ☆

It isn't stated just how much merchandise remains "on order" or for whom. We do know that Russia refuses to discuss, even by mail, the 11 billion dollars of LL goods already sent.

☆ ☆ ☆

Some day a Spending Official in Washington may turn back to the Taxpayers any unused balance of his Appropriation — but if he does, they will cage him in the Smithsonian Institute.

'Rejuvenate Transit Facilities to San Mateo'–Paulsen

Vic Paulsen, whose novel campaign for short term senator jarred orthodox political circles last year, was back in the news today, this time with a plan to rejuvenate inter - urban transit facilities on the Peninsula.

The Paulsen Plan proposes a new two-mile section of track alongside Junipero Serra boulevard, connecting the "M" line at Worcester Avenue with the old No. 40 car right-of-way at Colma.

This new track, together with existing facilities and the proposed Market St. subway, would enable fast gas or electric trains to be routed directly from downtown San Francisco to San Mateo over a right-of-way almost entirely uncluttered with street traffic, he said. The proposed route would also give badly needed service to the fast-growing residential districts west of Junipero Serra Blvd.

Readily admitting that his plan would become a political tangle because the proposed new trackage would cross the county line, Paulsen nevertheless was optimistic. "The function of government," he said, "is to serve the needs of the people. If the people who need that service want it badly enough, political obstacles can be resolved."

Sellers' Market in Homes Vanishing, Says Bay Area Builder; Market Now in Rentals

By PHILIP G. BRADY

The seller's market in private homes is over right now, and within one year homebuilders will add salesmen to their staffs to continue in business. Those are the views of a prominent Bay area homebuilder who declined to be quoted by name, but was willing to back up his predictions by wagering a suit of clothes with any disputants.

"Within one year, we will have to add a sales force to our organization," he said. "It's apparent today that the buyer's market is already here. We used to draw droves of people to inspect the opening of our homesites. Today, we're lucky to get three or four a day in spite of heavy advertising."

He said this condition was attributable to two factors: overemphasis of private housing needs and "propaganda". He admitted that adverse publicity promoted by various groups urging prospects not to buy until prices drop was having its effect. However, he contended that no foreseeable price-cutting was in sight so long as labor and material costs remained at an all-time high.

"The only possible remaining method of cutting prices," he pointed out, "is to adopt new methods of building."

Concurrent with the buyer's market in private residences, this large-scale developer predicted resumption of multiple dwelling construction "within three or four months". He ascribed present reluctance to rental construction to material shortages which he expects to be cleared up within that time.

"The only two serious shortages at this time are tile and hardwood floors," he said, adding that the flooring shortage was lessening daily.

A recent survey in a neighboring city, he disclosed, showed that of 1200 applicants for housing relief, only 84 were interested in buying their own homes. This condition, he stated, will probably lead to a suspension of the 60-day waiting period for sale to veterans and allow all citizens an equal opportunity to buy.

"The veteran market is primarily rentals," he said. Increasing the amortization period from 25 to 35 years would bring monthly payments low enough to permit veteran purchases.

Wagner, Pefley to Head Sacramento Exchange in 1947

SACRAMENTO. — Irwin M. Wagner was elected president of the Sacramento Builders Exchange for 1947, recently. Vice-president is H. A. Pefley. H. H. Holland will serve as secretary. J. A. Foster is the new treasurer.

The following were elected to serve on the board of directors during 1947: P. N. Benton, Chas. E. DeCuir, J. A. Foster, N. T. Hill, Harvey H. Holland, Carl K. Lawrence, Leo G. Lentz, Charles L. Mapel, C. C. Neff, H. A. Pefley, E. E. Phillips, R. W. Priest, H. W. Robertson, I. M. Wagner, W. S. Wassum.

H. W. Robertson is the outgoing president.

RIO VISTA BRIDGE HEARING UP TODAY

SACRAMENTO.—Col. Lester F. Rhodes, army corps of engineers, announced that a hearing will be held today on the application of the state division of highways for the War Department approval of plans for a new bridge across Three Mile Slough, at a point some three and a half miles south of Rio Vista.

It will be held in Rm. 300, Wright Building, 1209 Eighth Street, Sacramento, at 10 a. m., February 18.

The proposed bridge would be located approximately 500 feet west of the existing swing bridge which will be removed after the new bridge is opened to traffic.

Purcell Proposes Twin to Existing Bridge, No Rails

SACRAMENTO. — In a report released over the weekend, State Public Works Director Charles H. Purcell presented a twin to the existing Bay Bridge as the solution to the transbay traffic problem. It would start near the existing bridgehead on Rincon Hill and run parallel to it, not more than 300 feet from it at any point. It would not have rails.

Total estimated cost is $84 million for the bridge and approaches, plus $21 million for a four-lane tube under the Oakland estuary to tap the east shore freeway and Alameda.

The state proposal disregards the entire recommendation of the joint army-navy board as well as the official position of the San Francisco planning commission.

Meeting in special session Friday, the board of supervisors passed two resolutions leading possibly to mainline rail connections into San Francisco. A resolution memorializing the state and federal governments to investigate this was passed unanimously. The investigations would be conducted by the state public utilities commission and the interstate commerce commission.

The board passed a second resolution urging the Secretaries of War and Navy to hold in abeyance" final action on a second Bay crossing until the city can present the advantages of bringing the trains across the Bay. Supervisors Colman and J. Joseph Sullivan cast the "no" votes.

A "get the facts" meeting called by Mayor Roger Lapham for Thursday afternoon brought from California railroad interests united opposition to proposed inclusion of a train bridge in projected Bay crossing plans.

Representatives of the Southern Pacific, Santa Fe, and Western Pacific appeared to show that not only would the train bridge be economically unfeasible, but that there is no need for it. They pointed out that freight rates into San Francisco differ little, if any, from those where goods is delivered at Oakland.

"Any way you figure it out," said one railroad executive, "you cannot possibly give a better freight service than you are getting today."

He added that it would be impossible to dovetail the rail service into either of the army-navy proposals, and that it would probably cost $208 million or so, which is the estimate given for the rapid transit causeway.

Ben C. Dey, representing the Southern Pacific, declared that if tracks were placed a water level grade, the Southern Pacific still couldn't afford to use them even if the crossing were handed to the company complete without a dollar of cost.

Mayor Lapham asked Dey if the Interstate Commerce Commission or the state public utilities could order the Southern Pacific to put up the cash, or part of it, to erect a train bridge.

Dey replied: "Our engineers feel that there isn't the slightest justification for any causeway or tube expenditure.

"The Southern Pacific Company would, and could, not comply with any order short of the U. S. Supreme Court.

COASTWIDE SERVICE

YOUR GAS AND ELECTRIC BILL IS THE TOTAL OF MANY SMALL SERVICE ITEMS

Your "small change" does not buy very much today, especially your nickels and dimes. There is one outstanding exception, however. You get BIG VALUE for 5c and 10c spent for Gas and Electric service. You are now buying gas and electric service at way below pre-war prices. Best of all—you buy them, use them, "charge them!" It is just like having a handy charge account at the 5 and 10 cent store. For example . . . 5c runs your electric clock for 6 months . . . 10c cooks three meals a day on a Gas Range for 2½ days.

The Cost of Gas and Electricity has gone DOWN and DOWN

Natural Gas Rate Cuts in 1939, 1940, 1943 and 1946 slashed the average cost of Gas in the home...33 per cent. Electric Rates have been cut SEVEN TIMES since 1939 . . . a series of reductions that place P. G. and E. electric rates 20 per cent below the national average.

'Rent Control Used To Bolster Public Housing'—Fitch

WASHINGTON—First witness to urge continuation of the present rent freeze before the Senate Banking and Currency Committee recently was an advocate of more government built, owned, and operated dwellings, Morgan L. Fitch, Chicago, president of the National Association of Real Estate Boards, told the Real Estate Board of Newark yesterday.

"The testimony plugged expansion of public housing along with continued discrimination against owners of rental property," Fitch said, "and it is a significant joining of hands by two forces that can destroy property ownership.

"The increasing tendency of rent control is to transfer essential owner rights from the lawful owner to another. This, in turn, is the greatest possible discouragement to the production of new rental housing. It is stabilizing the housing shortage.

Ignore Objective

"Those who want the government to become the landlord of more and more American people know this. If rent control can kill off private ownership of rented dwellings, as it is steadily doing by forcing rental property off the market and stifling the entry of new rent property onto the market, then the public housers will shout that private ownership has "failed;" that the only answer is their own topsy-turvy scheme of building new houses to rent at a loss for the price of second-hand houses, with the taxpayers getting the bill for the loss.

"From the start, this nonsensical experiment has failed. It has

(Continued on Page 8)

Truck Tax Should Be Doubled, Gas Tax Upped—Call

An additional 1½ cent gas tax, a new truck tax based on weight and miles traveled, and other increased levies on highway users are imperative if California is to have within the next eleven years the highways, expressways, county roads and freeways so critically needed, Asa V. Call, president of the California State Chamber of Commerce, declared today.

"Findings of the Legislature's Collier Committee and its engineering staff reveal critical deficiencies in the state's highway system. The State Chamber favors modernization of the state's road system over an eleven-year period. This will involve an expenditure of $2,500, billion," Call stated.

"Revenues from existing sources will raise an estimated $1,343 billion in the eleven-year period. This leaves a deficit of $957 million which must be met through new taxes."

The State Chamber advocates for the eleven-year period:

1. Increasing present state gasoline tax 1½ cents per gallon.

2. A new truck tax, based upon vehicle weight and miles traveled.

3. Increasing annual vehicle registration fee from the present $3 to $6.

4. Increasing state diesel tax 3¾ cents per gallon.

EARMARK $350,000

Alameda County supervisors have appropriated $350,000 for construction of a new juvenile detention home on a site at 155th Avenue and Foothill Boulevard in Oakland.

Road Building Cost Peak May Be Past, AED Members Hear in Last Convention Session

"It is probable that the cost of highway construction has reached a peak and that a decline will become evident this year as the state and federal highway programs, estimated at $1 billion, shift into high gear."

This was the prospectus unfolded by Charles M. Upham, engineer-director, American Road Builders' Association, at the closing session of the 28th annual Associated Equipment Distributors' convention at the Edgewater Beach Hotel Saturday morning.

"The billion dollar state-federal program does not include the programs planned by the counties and cities," Upham asserted, "and just how much of this will be completed depends on how fast the various retarding influences can be eliminated."

Prediction on Costs

Dealing with the cost structure Upham said: "The cost of highway construction is high compared with pewar level, but with production increasing it is probable, barring labor upheavals, that the peak has been reached and this year should show a decline."

As to the rise in highway maintenance costs over recent years, Upham pointed out such costs rose 50 per cent from 1940 to 1946 with an estimated 75 per cent increase the prospect for this year.

Speed Essential

Since most states are rejecting many highway bids at the moment because of bids beyond estimates, there is a strong possibility that much of the money apportioned under the 1844 Federal Aid Highway Act may be lost to the states, Upham declared.

The Act provides $500 million in aid which must be claimed by June 30, 1947, and like sums that must be used by that same time in 1948 and 1949. If the states shy away from high road bids and fail to claim this money, the act provides the funds revert to the federal treasury, he said.

Foreman's Analysis

Five basic problems currently are confronting the construction industry from attaining its record-breaking volume of activity during 1947, H. E. Foreman, managing director of the Associated General Contractors of America, declared in another address before the group.

Foreman asserted these problems, namely, construction costs, government regulations, construction labor, day labor, and portal-to-portal pay must be dealt with successfully to acquire the projected 1947 goal.

Commenting on construction costs, Foreman said that the immediate goal is stabilization of these costs, concurrent with the ability of the contractor to make a firm bid on a competitive basis as uncertainties are removed.

Suggests Service Provision

Viewing the prospects on heavy construction equipment, the AGC managing director said he hoped the AED would include in its program plans for servicing equipment which will contribute to the lowering of over-all construction costs.

With the increased drive made by the AED to increase service performed on the machines in the field, Foreman sai dthis procedure is of great importance at this time as there is a large amount of warweary equipment in the hands of contactors in the field which needs to be kept in repairs until more normal conditions are attained.

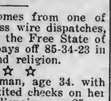
"The most results that can be attained by close cooperation of the various elements of the construction industry are improved methods, materials and equipment to serve the public." Foreman concluded.

GROOVER AND I

BROKERAGE ON SIN

This yarn comes from one of the current press wire dispatches, date lined from the Free State of Maryland and pays off 85-34-23 in sin, romance and religion.

☆ ☆ ☆



A church woman, age 34, with her facile pen kited checks on her employer, a millionaire age 85.

☆ ☆ ☆

The proceeds of her "art work", totaling $40,000, went for the support of a 23-year-old boy friend who liked music and light — both soft.

☆ ☆ ☆

But wait—before the gigolo got his loot, the gal deducted a tithe, conscientiously sending 10% of the "take" to her church.

Home Builders Meet Features 1947 Home Exhibition Febr. 23

CHICAGO.—America's postwar home will be unveiled in Chicago soon.

Seven thousand of the nation's most important home builders, from all parts of the nation, will do the unveiling. They are members of the National Association of Home Builders who will assemble for a week-long convention and exposition at the Stevens Hotel commencing Sunday, Feb. 23.

The home builders will see materials and appliances for the postwar home demonstration in the Exposition Hall. They will hear experts on the use of lumber and cement and on novel heating methods who will conduct demonstrations for them. They will listen to the government's chief housing officials and the representatives of veterans' groups. Perhaps most important of all, they will engage in discussions and exchange practical tips to speed and improve the construction of the postwar homes.

The exposition will be opened at 2 p. m. on Sunday. More than 150 exhibits by manufacturers and trade associations will fill the Stevens Exhibition Hall and flow over into adjoining rooms. The exposition will be "for builders only".

The convention proper begins on Monday, Febr. 24, and will continue through Thursday, Febr. 27. The list of speakers at convention sessions includes Housing Expediter Frank Creedon, National Housing Agency Administrator Raymond M. Foley, Commander Paul Griffith of the American Legion, Commander Louis E. Starr of the Veterans of Foreign Wars and Commander Raymond Sawyer of AMVETS.

Congressman Jesse P. Wolcott of Michigan, Republican, an authority on housing legislation, will be the principal speaker at the Annual NAHB Banquet which will be held in the Grand Ballroom of the Stevens on Wednesday, Febr 26th.

INCREASE IN DECEMBER

WASHINGTON.—Dollar value of both manufacturers' shipments and manufacturers' inventories continued to increase during December but the increases were smaller than those of recent months, the office of business economics, Department of Commerce, said today.

Manufacturers' shipments during December reached a volume of $12.7 billion and the book value of inventories reached $20.2 billion.

Forty-two Bay Area Home Builders Leaving For National Association Chicago Convention

Forty-two Bay Area home builders will board the streamliner City of San Francisco Thursday to attend the annual convention and exposition of the National Association of Home Builders to be held in Chicago. The national gathering will be held in the Stevens Hotel from February 23 through 27.

Milton W. Morris, executive secretary of the San Francisco Associated Home Builders, today announced that the San Francisco delegation to the convention will include: J. C. Johnson, Ray Lindsay, Carl Gellert, Fred Gellert, Wm. Young, Earl Popovich, Geo. Belcher, E. W. Perkins, Jos. Filippo, Ellis Stoneson, Donald Stoneson, Chris McKeon, Henry Doelger, Oliver Rousseau, Paul Ford, James Jansen, J. McMahon, Carroll Cook and Willard Davis.

George H. Sharp, executive vice-president, Associated Home Builders of Alameda County, Inc., has announced that among those attending the convention will be Philip F. Heraty, president of the local chapter, who will stay at the Stevens Hotel while in Chicago, Russell Kirkpatrick of the Bay Constr. Co., L. H. Lincoln and associate, Otto Blauert, vice-president of Oakland Title & Guarantee Co., and party, S. M. Shapero of Triangle Builders, Inc., Charles A. Russell of the Charles A. Russell Development Co., Howard S. Pulliam, Ray Smith of the Ray Smith Co., Realtors, E. C. Peterson, vice-president of the Central Bank, Ray D. Nichols, Alvin F. Groom and Mr. and Mrs. Glen Groom of Groom & Groom, E. J. Unruh, assistant vice-president of American Trust Co., and Maurice G. Read and C. C. Jordan of Jordan & Read.

Three well-known local builders will be admitted to the Board of Directors of the National Association of Home Builders. They are: Carl Gellert and J. C. Johnson, with Ellis Stoneson serving as alternate. Mr. Gellert and Mr. Johnson succeed Chris McKeon and Ellis Stoneson as active members of the Board.

The Chicago exposition will feature demonstrations of latest housing equipment, materials and appliances. The convention program will be concerned mainly with the newest trends in the home building field. It will offer the 6,000 delegates in attendance technical sessions on building methods, the construction of veterans homes and the use of new materials.

The Northern California delegates will hold daily meetings to sift information applicable to area building problems. These regional sessions help to make quick use of latest building methods and equipment in local housing construction.

Key speakers for the convention are the government's two chief housing officials, National Housing Administrator Raymond M. Foley and Housing Expediter Frank R. Creedon. In addition, prominent figures in the fields of building, labor, government and veterans affairs will also address the convention sessions. They include Paul Griffith, national commander of the American Legion; Louis E. Star, national commander - in-chief of the Veterans of Foreign Wars; Representative Jesse P. Wolcott of Michigan; Morgan L. Fitch, president of the National Association of Real Estate Boards, and James C. Downs, Jr., president of the Real Estate Research Corporation.

FHA-BUILDERS MEET

WASHINGTON. — Nation-wide meetings of the building industry are demonstrating a high degree of interest in the immediate construction of a large volume of rental housing for veterans, Raymond M. Foley, administrator of the National Housing Agency and commissioner of Federal Housing Administration, announced today.

More than 300 meetings attended by over 35,000 industry representatives have already been held, and another 250 meetings are planned for the remainder of February.

Dept. of Commerce Sees Lumber Market Loss Due to Prices

Lumber prices since decontrol have gone up much more sharply than have prices of other building materials and there is now danger that lumber dealers may lose some of their markets unless prices can be stabilized at more moderate levels, the Forest Products Section Department of Commerce, said today.

This loss of markets could easily happen, the Department of Commerce said, particularly since there has been great technological improvements in competing materials and the production of these lumber substitutes is now expanding.

There appears to have been plenty of lumber available during the last few months tho' those who cared to meet the price. Delay by distributors in building up their depleted stocks must, in general, be based on fear of excessive tieup of working capital in high priced lumber, and of possible losses when prices finally stabilize at lower levels.

Indications from consumers and distributors point to a strengthening resistance to inflated softwood prices, and many orders are being placed only to meet firm commitments to maintain minimum stocks, the Department of Commerce said.

Lumber production is 1947 is now estimated by the Department of Commerce at about 36 billion board feet and it appears that on an over-all basis at least, supply and minimum requirements should be in approximate balance during the year.

Kraft Foods Plant CPA Approvals

Largest of non-residential construction authorizations for the week ended February 13 was that of Kraft Foods Company to build a $720,000 plant in San Francisco for the processing of dairy products, it was reported today by Gilbert H. Kneiss, District Manager of Civilian Production Administration.

The new Kraft plant, which will utilize dairy products from a range of 200 miles from San Francisco and will be the company's production hub of the West Coast Division serving seven western states, will be located at 2660 Newhall St. Construction will be of reinforced concrete, and with machinery installation, will require approximately a year to complete.

Other major approvals include a $124,000 one-story addition for the Bank of California, $101,536 for elementary public school classrooms in six San Francisco projects, a $70,000 elementary school at San Jose, a $65,000 food market at Sacramento, a $62,120 Chemical Process Company plant for manufacture of sugar refining machinery at Redwood City, a $48,500 building material warehouse for Dolan Building Material Company at Sacramento, a $61,125 building rehabilitation project to house Alchar California Corporation lithographing plant in San Francisco, and a $40,500 aluminuh powder plant for Metals, Inc., at Albany.

Approvals for the week were 61 in number for a total estimated cost of $1,936,977. Denied as deferrable were 46 applications involving $1,242,412 estimated cost.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, A. J. Grier, regional director, 1355 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

FEBRUARY 17, 1947

FURNACE mfg. plant, $3750; 1000 Brittan, San Carlos; owner, Sequoia Mfg Co., premises.
CENTRAL, office, $311,000; F St. at 4th, Marysville; owner, Pacific T & T Co., 140 New Montgomery St., San Francisco.
MEDICAL offices, $20,500; Hannn and Dorsten, Corcoran; owner, Alden E Stamler, MD, 1108 Whitley, Corcoran.
FURNITURE and appliance store, $20,000; 423 S. Broadway, Eureka; owner, Herbert L. Eggiman, Box 426, Yreka.
REPAIR storm damage to filling station, $2107; Broadway and Pullman, Richmond; owner, Standard Oil Co. of Calif., 225 Bush St., San Francisco.
MFG. terra cotta water coolers, $45,000; 560 N 6th St., San Jose; owner Garden City Pottery Co., premises.
OPTOMETRIST'S office, $14,200; 429 N Irwin, Hanford; owner, Carl H. Duffy, 223 W 7th St., Hanford.
COTTON grading bldg., $13,220; N Encina St., Visalia; owner, Ralph Sherman, 203 Todd Dr., Visalia.
WHOLESALE drug distributor, $6,000; 1604 E. Harding, Stockton; owner, Wm. Platek, premises.
CLASSROOM addition, $67,000; Lincoln School, Reedley; owner, Reedley Joint School District, Box 507, Reedley.
ESCALATORS, $18,168; 1501 Broadway, Oakland; owner, Western Department Stores, premises.
REPAIR termite damage to store bldg., $7800; 5th and Mission Sts., San Francisco; owner, Herbst Bros 1625 Mission St., San Francisco.
COMPLETE alterations to furniture bldg shop, $1850; 5133 Geary Blvd., San Francisco; owner, P. F. Singer premises.
REPAIRS and alterations, $1500; 25 West Portal Ave., San Francisco; owner, Eezy Freezy Food Store, 1500 Peralta, Oakland.
MACHINE shop, $5704; 1430 Potrero, Richmond; owner, John J. Kershner, 318 31st St., Richmond.
CABINET making shop, $5000; Yuba City; owner, Orland K. Morn, 824 Ct St., Marysville.
EXPANSION of dry kiln facilities $7752; 99 Bayshore, San Francisco; owner, J. E. Higgins Lbr. Co., prem.

FHA PERMITS ISSUED

SAN FRANCISCO. — The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

1 UNIT, Sacramento; Robert L. Cameron, 1217 Del Paso Blvd., Sacramento.
1 UNIT, Oakland; H. P. Fisher, 376 17th St., Oakland.
1 UNIT, Strathmore; Jewel Pharis, RFD No. 2, Box 1116, Strathmore
2 UNITS, Roseville; G. F. Van Vliet, 312 Poppyland, Roseville.
1 UNIT, San Francisco; S. E. Carlson, San Francisco.
1 UNIT, Mtn. View; Jexcell & Son, 200 Mariposa Ave., Mtn. View.
1 UNIT, Santa Cruz; A. E. Staggs, Route 3, Box 104, Santa Cruz.
4 UNITS, Napa; Percy Devita, 144 Spruce St., Napa.
4 UNITS, San Francisco, Eugene Vignati and F. C. Frank, San Francisco.
4 UNITS, San Francisco; J. L. Kelly, San Francisco.
18 UNITS, San Francisco; Oliver Rousseau, San Francisco.
1 UNIT, San Anselmo; O. P. Mahoney, 72 Skyline Blvd., San Anselmo.
3 UNITS, Boulder Creek; Harold Mitchell, Boulder Creek.
6 UNITS, Del Monte Heights; Thos. E. Moon, Route 1, Box 216-D½, Del Monte.
5 UNITS, San Francisco; J. Bjorkman, 454 Athens St., San Francisco.
2 UNITS, San Francisco; Ernest Lombard, 1218 Hollister Ave., San Francisco.
1 UNIT, Berkeley; Alba & Son, 920 Carlton St., Berkeley.
1 UNIT, Redwood City; Robt. Mullin, 1614 Hudson St., Redwood City.
1 UNIT, Santa Rosa; Harry B. Fetch 403 Brown St., Santa Rosa.
37 UNITS, Sacramento; Klein Realty Service, Inc., 827 J St., Sacramento.
1 UNITS, Petaluma; K. J. Colin, 616 Mtn. View Ave., Petaluma.
5 UNITS, Sacramento; Leslie R. Mason, 2616 V St., Sacramento.
1 UNIT, Santa Cruz; Fred S. Lippincott, 224 Ocean St., Santa Cruz.
3 UNITS, San Francisco; Fred C. Rudisill, San Francisco.
1 UNIT, San Jose; John R. Alvarez, 2260 Pioneer Ave., San Jose.
1 UNIT, Sacramento; Walter Jennings, 1063 56th St., Sacramento.
2 UNITS, Menlo Park; D. D. Robertson, 42 Stockbridge Ave., Atherton.
2 UNITS, San Francisco; S. J. Olafsson, San Francisco.
2 UNITS, Santa Cruz; L. L. Trent, 260 San Juan Ave., Santa Cruz.
6 UNITS, Campbell; A. L. Garrison, Route 2, Box 306, Campbell.
1 UNIT, Fairfax; L. E. Yeakey, 808 A St., San Rafael.
1 UNIT, El Cerrito; Wm. J. Kraus, 6042 Broadway Terrace, Oakland.
10 UNITS, Marysville; Frank Maun, 1302 Eye St., Marysville.
1 UNIT, Santa Rosa; Louis Halvorsen, 982 Dutton Ave., Santa Rosa.
532 UNITS, Richmond; California Homes, Inc., San Francisco.
1 UNIT, San Pablo; M. C. and M. E. Faris, 429 21st St., Richmond.
20 UNITS, Hayward; Louis J. Becker, 7350 Strowbridge Avenue, Hayward.

SUB - BIDS WANTED

General contractors desiring sub-bids on any jobs are invited to make known their requirements in this column. There is no charge for this service.

Cellular Structuras For Slide Area, Vet. Adm. Ft. Miley: Bids Due Feb. 28 2:30 P. M.
Stolte, Inc., 8451 San Leandro St., Oakland (TRinidad 1064).
Erbentraut & Summers, 696 Pennsylvania St., San Francisco, Calif., (ATwater 2420)
Jas. I. Barnes, Construction Company, 941 Russ Bldg., San Francisco, Calif., (EXbrook 6905)
Haas & Rothchild, 828 Merchants Exchange Bldg., S. F. (EXbrook 1206)
Fred J. Early, Jr., 369 Pine St., San Francisco, Calif. (SUtter 1731)
Wm. Horstmeyer, 23 Mara St., San Francisco (Market 7239).
Daley Brothers, P. O. Box 127, Belmont (BElmont 2300).
Charles MacClosky Co., 112 Market St., San Francisco (DOuglas 0504).
Henry Arian Construction, 4142 Geary Blvd., S. F. (BAyview 3170)
Wellnitz & DeNarde, 314 6th St., San Francisco (Market 4493)
Moore & Roberts, 693 Mission St., San Francisco, (GArfield 8579)
M. & K. Corp., 200 Financial Center Bldg., San Francisco (EXbrook 7624)
H. E. Rahlmann Co., 251 Kearny St., San Francisco (DOuglas 5023)
Guy F. Atkinson Co., 10 W. Orange Ave., South S. F. (JUniper 4-5200)
Albert E. Manga, Box 2309, Route 2, Redwood City (Redwood City 1270J)

Plant Sciences Bldg., Unit No. 1, Davis; Bids Due Feb. 20, 2:00 P. M.
Erbentraut & Summers, 696 Pennsylvania St., S. F. (ATwater 2420)
James I. Barnes Constr. Co., 941 Russ Bldg., San Francisco (EXbrook 6905 or EXbrook 7054)
Carl N. Swenson Co., 1095 Stockton Ave., San Jose 4 (Ballard 2602
Moore & Roberts, 693 Mission St., San Francisco, (GArfield 8579)
M. & K. Corp., 200 Financial Center Bldg., San Francisco (EXbrook 7624)

Forestry Bldg., Berkeley Campus, U. C.; Bids due Feb. 21, 2 P. M.
James I. Barnes Constr. Co., 941 Russ Bldg., San Francisco (EXbrook 6905 or EXbrook 7054)
Erbentraut & Summers, 696 Pennsylvania St., S. F. (ATwater 2420)
Elmer J. Freethy, 1432 Kearney St., El Cerrito (LAndscape 5-3811)
Parker, Steffens & Pearce, 155 Scuth Park S. F. (EXbrook 6659)
Harrett & Hilp, 918 Harrison St., San Francisco (DOuglas 0700)
Willis F. Lynn, 1040 Folger St., Berkeley (BErkeley 6044)
Clinton Constr. Co., of Calif., 923 Folsom St., San Francisco (SUtter 3444)
Williams & Burrows, Inc., 10 California Dr., Burlingame (Burl. 4-1795)
Peter Kiewit Sons Co., 442 Post St., San Francisco Calif. (EXbrook 5730)
Carrico & Gautier, 365 Ocean Ave., San Francisco, Calif., (Juniper 4-8081)
John E. Branagh, 105 Sheridan Ave., Piedmont (HUmboldt 5262)

Conversion of Bldg. into Apts., Ft. Ord; Bids due Feb. 27, 2 P. M.
Stolte, Inc., 8451 San Leandro St., Oakland (TRinidad 1064).
Charles MacClosky, 112 Market St., San Francisco (DOuglas 0504)
Erbentraut & Summers, 696 Pennsylvania St., San Francisco, (ATwater 2420)
J. A. Bryant, 1815 Capitol St., Vallejo (Vallejo 20400)
James I. Barnes Constr. Co., 941 Russ Bldg., San Francisco, Calif., (EXbrook 6905 or EXbrook 7054)
Biltwell Constr. Co., 4745 Geary Blvd., San Francisco (BAyview 5947)
M & K Corp., 200 Financial Center Bldg., S F. (EXbrook 7624)
Wallace D. Harkins, Inc., 406 Sutter St., San Francisco (GRaystone 2956)

M. & K. Corp., 200 Financial Center Bldg., San Francisco (EXbrook 7624)

Water Softener Equipment (Install), Spec 19165, Oakland; Naval Hospital; Bids Due February 26, 2:00 P. M.
Henry Arian Construction, 4142 Geary Blvd., S. F. (BAyview 3170)
Albert E. Manga, Box 2309, Route 2, Redwood City (Redwood City 1270J)

Telephone Bldg., Shell Oil Co., Martinez: Bids due March 6.
Swinerton & Walberg Co., 225 Bush St., S. F. (GArfield 2980)

Alter Geary Street Carhouse, San Francisco; Bids due Feb. 25, 3 P. M.
N. O. Wisely, 711 McAllister Street, San Francisco (UNderhill 6321)
Adam Arras & Son, 116 New Montgomery St., S. F. (GArfield 8381)
Henry Arian Construction, 4142 Geary Blvd., San Francisco (BA 3170)
Peter Sartorio, 262 Clementina St, San Francisco (GArfield 8317)
Carrico & Gautier, 365 Ocean Ave., San Francisco (JUniper 4-808[illegible])

Sewage Pumping Plant, Mill Valley; Bids due Feb. 26, 8 P. M.
J. D. O'Connor Constr. Co., 391 Sutter St., San Francisco (DOuglas 3985)
Marin Corporation, P. O. Box 417, Sausalito (Sausalito 1260)

Woodrow Wilson School, San Leandro; Bids due March 4, 8:30 P. M.
Jas. I. Barnes Constr. Co., Russ Bldg., S. F. (EXbrook 6905 or 7054)
Willis F. Lynn, 1040 Folger Street, Berkeley (BErkeley 6044)
H. E. Rahlmann Co., 251 Kearny St., San Francisco (DOuglas 5023)

Conversion of Barracks into Apts., Stockton General Depot Annex; Bids Due February 26, 2:00 P. M.
Thomas C. Buck, P. O. Box 407, Stockton.
Bingham Constr. Co., Route 2, Box 1975, Sacramento.
M. & K. Corp., 200 Financial Center Bldg., S. F. (EXbrook 7624)
Erbentraut & Summers. 696 Pennsylvania St., San Francisco (AT 2420)

Misc. Bldgs., Oakland Yard, Western Pacific R.R.; Bids due Feb. 19, 10 AM
A. M. Hardy, 736 Clementina St., San Francisco (HEmlock 4404)
M. & K. Corp., 200 Financial Center Bldg., S. F. (EXbrook 7624)
H. E. Rahlmann Co., 251 Kearny St., San Francisco (DOuglas 5023)

Prefabricated Steel Bldgs., San Francisco; Bids due Feb. 19, 2:30 P. M.
Adam Arras & Son, 116 New Montgomery St., S. F. (GArfield 8381)
Wellnitz & DeNarde, 314 6th St., San Francisco (Market 4493)
Peter Sartorio, 262 Clementina St., San Francisco (GArfield 8317)

Church Bldg., West Portal Lutheran, S. F.; Bids due Feb. 21, Noon
Adam Arras & Son, 116 New Montgomery St., S. F. (GArfield 8381)

School (Addn.) Canyon Elementary School, Contra Costa County; Bids Due March 3, 8:00 P. M.
Frank A. Payne & Son, 8 Overhill Road, Orinda (Orinda 2076)

School Addn., Walnut Creek Grammar School, Walnut Creek; Bids Due March 1, 2:00 P. M.
Frank A. Payne & Son, 8 Overhill Road Orinda (Orinda 2076)

Bulk Sugar Storage Bldg., Honolulu, T. H., for Castle & Cooke, San Francisco; Bids due Feb. 28, 10:00 A. M.
Swinerton & Walberg Co., 225 Bush St., San Francisco (GArfield 2980)

PLANS ON FILE

The following list of plans and specifications for construction projects are now available for inspection at the office of DAILY PACIFIC BUILDER, 486 Tenth Street, San Francisco.

Work	Location	Bid Opening Date
Naval Reserve Armory	Stockton	2-19
Soil Tests Now Under Way		
Contract Awarded		
Store and Office Building and Garage	Cost $5,000,000	
Building		

SAN MATEO, Calif., San Mateo Co. Entire block on 4th and 5th Aves. from San Mateo Dr. to El Camino Real.
Owner—Parrott Investment Co., Joseph Donohue, Woodside; William Parrott and Count Marc de Tristan, San Mateo, members of board of directors; Thomas J. Branson, San Mateo, secretary of board; A. R. Johnson, assistant secretary, 155 Montgomery St., San Francisco, Calif.
Architect—W. P. Day, 311 New Montgomery St., San Francisco, Calif.
Structural steel and reinforced concrete structure with 615-ft. frontage on 4th Ave.; includes six-story office building (with provisions for possible eventual additional six stories), having 100 rooms, two elevators and arcade on ground floor housing 10 stores; 3-story structures on each side of the main building will house 20 stores and 2-story sections will extend to each corner providing two 100-ft. stores for department store usage. The entire 615-ft. building will be completely excavated to provide basement area for parking, storage space for merchant tenants or eventually as an additional parking area. The building will include two roof terraces, one expected to be utilized as a restaurant-cafe and the other to service office building personnel. Provisions will be made for glassing in the terraces. A 2-story public parking garage to accommodate 125 cars will be built at the corner of 5th Ave. and San Mateo Dr. with full basement parking, main floor parking and a second-story ramp. The entire rest of the block will provide a 300x100-ft. parking lot to handle 125 cars. The existing Tower Market will be remodeled to fit the architecture of the rest of the block. Work will get under way first on public garage.
Contractor — Dinwiddie Construction Co., Inc., 210 Crocker Bldg., San Francisco, Calif.

2/19/47 • 4
CPA Approval Granted—Contract Awarded
Telephone Exchange Building (Addition) Cost $560,000
FRESNO, Calif., Fresno County. 1455 Van Ness Ave.
Owner—Pacific Telephone & Telegraph Co., 140 New Montgomery St., San Francisco, Calif.
Architect—Harry A. Thomsen Jr., 315 Montgomery St., San Francisco, Calif.
Steel frame, brick walls, reinforced concrete floors; includes addition to present four-story and basement building by extending it back 32 feet. The extension will be five stories and basement and 100 feet wide, as is the present building, to which will be added a fifth floor 100x32 feet.
Contractor—Fisher & McNulty, Fulton Bldg., Fresno, Calif.

2/19/47 • 4
Building Permit Granted
Telephone Exchange Building (Addition) Cost $420,000
OAKLAND, Calif., Alameda County. 479 45th St.
Owner—Pacific Telephone & Telegraph Co., 140 New Montgomery St., San Francisco, Calif.
Architect—Harry A. Thomsen Jr., 315 Montgomery St., San Francisco, Calif.
Contractor—N. H. Sjoberg & Son, 5604 E. 16th St., Oakland, Calif.

2/19/47 3
Owner Taking Bids—Due March 6, 2 P. M. (Bidders Figuring)
Automatic Sprinkler Systems; Serial No. 04-203-47-58
BENICIA ARSENAL, Calif., Solano County.
Owner—San Francisco District, Corps of Engineers, War Department, 74 New Montgomery St., San Francisco, Calif.
Plans by owner.
Unit quantities were published on February 14.
The following contractors are being furnished with plans:
M. & K. Corp., 200 Financial Center Bldg., San Francisco, Calif.
Allan Automatic Sprinkler Service, 536 Chetwin St., Berkeley, Calif.
Automatic Sprinkler Engineering Co., 420 Market St., San Francisco, Calif.
Automatic Sprinklers of the Pacific, 116 New Montgomery St., San Francisco, Calif.

Mall CONCRETE VIBRATORS

Placing concrete with a Mall Gasoline Engine Vibrator is fast—easy—and economical. It lays a stiff mix 5 times faster than hand puddling, eliminates honey-combs and voids ...and increases bonding strength. Stiff mix dries rapidly permitting earlier stripping of forms. Variable speed Gasoline Engine also operates 8 other interchangeable construction tools for Wet-Wall Rubbing, Wire Brushing, Grinding, and Drilling.
1½ H.P. Gasoline Powered model available; also 3 H.P. round base or wheel barrow mounting; 1½ H.P. Universal Electric and 7500 r.p.m. Pneumatic Units.

Rent Control

(Continued from Page 1)

never come even close to the problem; it pretends to attack. And that problem is a very real one.

"There are always families who do not have the means to buy or rent a dwelling of minimum decency. Public housing, obligated by congress to concern itself with families in the 'lowest income group,' ignores them with its carefully drawn standards of regular employment, good credit, and social status acceptable to the public housers.

"These families in greatest need of housing assistance are now being aided, as they always have been, by direct help through various forms of private and public charity. It's the only system that has ever worked.

Rent Raised

"Ironically enough, many of these charity houses all over the United States, are occupied by families with incomes well above the national average. It is still more ironic that public housing agencies are somehow exempt from the stringent rent freeze imposed on private property. Public housing rent raises of 35 per cent and even 60 per cent have been reported recently."

State Congressional Delegation Backs Up Plea for Higher GI Apprenticeship Lid

By LORNA S. STOCK

Veterans of Foreign Wars announced recently that the powerful organization will press for enactment of a congressional amendment to raise the present $200 a month limit on total income under the on-the-job-training program to $325.

Their action is certain to have support of all California congressmen, who recently assured both labor and management interests of their support. Following repeated meetings considering the question of apprenticeship councils have recommended almost unanimously that congress raise the ceiling from $200 to about $300. Such a measure is sponsored by Senator William Knowland, of Oakland.

Present wage ceilings established for veterans students and on-the-job trainees are now the object of study in Washington, D. C.

Several veterans' organizations are urging a higher minimum for subsistence allowance and the VA itself has launched an intensive study to se what hardships, if any, have been placed upon veterans by the present law.

In a recent interview, William P. Kelly, coordinator of apprenticeship of the Bay Counties District Council of Carpenters, gave figures substantiating the scarcity of journeymen in one of the construction industry's important trades.

He said the number of apprentices indentured in the Bay Area, as computed at the end of 1946, was 3,465, of which 63 per cent are veterans. The carpenters' council figures show the number of journeymen in San Francisco, San Mateo, Marin and Alameda Counties to be 25,000.

In contrast, the union rules allow one apprentice to every four journeymen.

"They almost never use more than a ratio of one to ten," said Kelly, who believes that apprenticeship would fare better if it were again a financial temptation.

Labor has been cited as one of its biggest sore spots as the construction industry enters a year that may see a huge increase in building over 1946. While employers bemoan the fact that their labor supply is far from adequate, and they "need young blood" in their organizations, veterans generally are rejecting the opportunities of apprenticeship for greener fields.

The apprentice's minimum starting wage in the Bay Area is 40 per cent of the journeyman's wage. In prewar days when the large share of apprentices were young men without family responsibilities, this was sufficient. Now—as any San Francisco maid can tell you—most of the vets are married and have families. For them, the wage alone could not suffice.

However, the government aid can bolster the income to $200. A small family can live on that, but with little more than the bare necessities.

Starting with 40 per cent of the journeyman's wage, the apprentice gets a five per cent increase proportionately every three months during the first year, and a five per cent boost every six months during the remaining three years. During the last half of the fourth year the apprentice may receive 90 per cent of the journeyman's wage.

When the training program started and wages and subsistence were allowed to totnl an amount equal to the journeyman's wage, enrolment in all apprenticeship training programs was brisk. Then the program was attracting vets who could jack up their incomes through the (unamended) GI Bill of Rights.

Amending of the GI Bill last summer to limit the total income of vets in the training program to $200 a month had a particularly poignant effect on Bay Area trainees. Because the Bay Area can boast one of the highest wage scales in the United States, it has somewhat higher prices than com-

PLANS and Speculations

The site for the proposed new Florence Crittenton Home has been purchased. It is a lot at the southeast corner of Broderick Street and Golden Gate Avenue. A drive to raise $250,000 for constructing and equipping a new home is underway.

oOo

The joint legislative water problems committee meeting at Sacramento Wednesday heard pros and cons over proposed lifting of the 160-acre water limitation for farmers in the Central Valley Project.

oOo

Industrialist Henry J. Kaiser recently told the joint legislative committee on housing at Oakland that a critical shortage of homes will last "at least ten years the way we are going now," and added: "It could even be fifteen."

oOo

Construction of the $36 million Pine Flat Dam on Kings River will be started by April 1, with release by President Truman of a million dollars for start of the project. He had impounded the money until settlement of a dispute between the army engineers and the bureau of reclamation over how much of the dam's cost should be paid by local users could be effected.

oOo

An overall transit plan will be presented to Mayor Lapham next week, James H. Turner, manager of utilities and chairman of the technical committee drafting the plan, reported Wednesday. Reportedly, it will include recommendations for a subway as a "long range" plan.

oOo

A train bridge across San Francisco Bay is feasible, F. W. Panhorst, chief bridge engineer for the department of public works, admitted recently. He said the state had given the matter consideration before drawing up its report.

oOo

Swimming, boating, camping, fishing, and picknicking facilities will be developed by the National Park Service as rapidly as funds are made available, C. E. Greider, supervisors of the Coulee Dam Recreationg Area, announced today.

oOo

Upon passage of a resltion authorizing formation of an improvement district, Walnut Creek city councilmen recently asserted, sidewalks in certain areas will be installed, despite possible opposition.

oOo

Installation of parking meters for the center business district in Martinez has been proposed by the chief of police.

oOo

Plans for the proposed downtown subway to Roseville have been scrutinized by the Roseville city council. They were drafted by the state department of public works at the request of a council member.

oOo

A single joint pipeline to bring water from both the Conn and Rector Dams down the Napa Valley may be installed instead of two separate lines, one built by Napa and the other by the state.

Three-Lane Highway A Death Trap Says Federal Works Head

CHICAGO. — The three - lane highway has been shown to be a veritable death trap with an accident rate three times higher than on the four-lane road, Major General Philip B. Fleming, administrator of the Federal Works Agency and of the Office of Temporary Controls, today told delegates to the American Road Builders' Association meeting in the Palmer House here today. General Fleming also is general chairman of the President's Highway Safety Conference.

Needs Changing

Speaking on "Engineering For Highway Safety," he declared the conference committee on engineering acknowledged that it wasn't possible to build a wholly foolproof road.

"No matter how well your road meets every technical requirement," General Fleming, said "it will always be possible for some criminal or drunken driver to get on it and kill himself or somebody else. It is possible, however, to build a road over which people of average intelligence, and possessing a reasonable sense of responsibility, can travel with always be[illegible] unwittingly com[illegible] mayhem.

[illegible]

[illegible] highw[illegible] tle [illegible] safet[illegible] you[illegible]

"[illegible] be wa[illegible] States, speeds, wide[illegible] and the gro[illegible] are bringing [illegible] ward wider lanes.

[illegible] tion the three-lane [illegible] been found to be a veritable [illegible] trap, largely because the third lane constantly tempts motorists to pass other vehicles, even when the road ahead is blind because of a hill or a curve. The driver too frequently presumes upon safety ahead when there is no safety.

"At all points there should be a sufficient range of clear vision ahead to enable the driver to recognize danger in time to stop. The

(Continued on Page 6)

HOUSING COMMISSION ENDORSES A. B. 735 AT SACRAMENTO MEET

SACRAMENTO. — The State Commission of Housing met here today in a all-day session, reviewing housing legislation introduced in the Legislature.

The commissioners passed a resolution urging the Legislature to enact Assembly Bill No. 753 which provides for greater fire-safety in hotels and apartment houses.

The state fire advisory council to the State Fire Marshal in session here today, also, urged the passage of Assembly Bill No. 712.

The commissioners are J. Earl Cook, Oakland, president; Rt. Rev. Thomas J. C'Dwyer, Los Angeles, vice - president; Mattie Richards Butler, Sacramento; J. V. Hart, Visalia, and Frank L. Hope, Jr., San Diego.

Construction of 800 Airports Depends On Communities' Ability to Finance Their Share

By ERNEST MICKEL

WASHINGTON. — Progress of the nation's $70,542,065 airport construction program during the "open season" building months of 1947 depends almost entirely on the ability of local communities to finance their proportionate expenses.

For 47 states (Alahama and the District of Columbia are excluded), the government is prepared to advance $33,367,315 of the larger sum. This can be used by local governments as project sponsors in construction work at some 800 airports. Only conditions for the applicants under this program is that they put up their respective shares of $37,174,750—representing all non-federal funds—and that they conform to requirements set out in the simplified Civil Aeronautics Administration airport construction plan.

Minimum Aid 20%

The last figure cited ($37,174,750) represents the total amount all states, counties and municipalities will have to furnish from their own fiscal resources if full advantage of the federal airport program is taken.

Since revision of its regulations to suit the new Congressional airport construction and development plan, the CAA has been processing reams of paper work which must be completed before any contracts are let and actual work begins at the site. The desk work is expect-

ENGINEERING COURSES

A class in "Analysis of Indeterminate Structures" (X-112C) opened Wednesday night at the University of California extension at 540 Powell, San Francisco, with registration to be completed Feb. 26. Two courses began Feb. 14, with final registration Feb. 21. They are: "Analytical Mechanics" (XB-102A), and "Applications of Engineering Economics" (820CD). On March 4, the introductory meeting will be held for "Applications of Diesel Engines" (820C).

GROOVER AND I

Dear Reader:

I know you are weary of me talking about debt, taxes and spending. I am weary of writing about them—but there is nothing in the news today quite so important to all of us.

☆ ☆ ☆

Today we have a note on the same subject—but on the lighter side.

☆ ☆ ☆

China has asked permission to sell 200 million dollars worth of UNRRA relief supplies in the Black Market to help control Chinese inflation!

☆ ☆ ☆

This is such a welcome change from what has happened in Continental Europe. UNRRA supplies going there were either delivered directly to the Black Markets or were re-branded with new labels and brands—and new languages.

☆ ☆ ☆

The unfailing politeness of the Chinese is surprising only in its constancy.

Supersonic Lab Equipment At UC Is World's First

The world's first supersonic laboratory equipment, duplicating actual conditions prevailing from 50,000 feet to 100 miles above the earth, is now under construction at the University of California at Berkeley, with funds provided by the Office of Naval Research. Announcement of the equipment construction was made jointly today by Rear Admiral Donald B. Beary, USN, commandant of the Twelfth Naval District, and the University.

The equipment includes two supersonic wind tunnels: a pilot model good up to 70,000 feet in which speeds three times the velocity of sound can be simulated, and a larger tunnel, three inches square, which will duplicate conditions up to 50 miles and simulate speeds over five times the velocity of sound. The wind tunnel is scheduled for completion in about a month, the large one, some time this year.

To cover the range from 50 to 100 miles, a modernular beam apparatus, the design of which has yet to be determined, will be constructed.

The wind tunnel, based on war-developed vacuum and jet propulsion principles, will make possible the first practical exploration of a wide belt of atmosphere which has been a scientific no-man's land.

State Congressional Delegation Backs Up Plea for Higher GI Apprenticeship Lid

By LORNA S. STOCK

Veterans of Foreign Wars announced recently that the powerful organization will press for enactment of a congressional amendment to raise the present $200 a month limit on total income under the on-the-job-training program to $325.

Their action is certain to have support of all California congressmen, who recently assured both labor and management interests of their support. Following repeated meetings considering the question, apprenticeship councils have recommended almost unanimously that congress raise the ceiling from $200 to about $300. Such a measure is sponsored by Senator William Knowland, of Oakland.

Present wage ceilings established for veterans students and on-the-job trainees are now the object of study in Washington, D. C.

Several veterans' organizations are urging a higher minimum for subsistence allowance and the VA itself has launched an intensive study to se what hardships, if any, have been placed upon veterans by the present law.

In a recent interview, William P. Kelly, coordinator of apprenticeship of the Bay Counties District Council of Carpenters, gave figures substantiating the scarcity of apprentices in one of the construction industry's important trades.

He said the number of apprentices indentured in the Bay Area, as computed at the end of 1946, was 3,465, of which 63 per cent are veterans. The carpenters' council figures show the number of journeymen in San Francisco, San Mateo, Marin and Alameda Counties to be 25,000.

In contrast, the union rules allow one apprentice to every four journeymen.

"They almost never use more than a ratio of one to ten," said Kelly, who believes that apprenticeship would fare better if it were again a financial temptation.

Labor has been cited as one of its biggest sore spots as the construction industry enters a year that may see a huge increase in building over 1946. While employers bemoan the fact that their labor supply is far from adequate, and they "need young blood" in their organizations, veterans generally are rejecting the opportunities of apprenticeship for greener fields.

The apprentice's minimum starting wage in the Bay Area is 40 per cent of the journeyman's wage. In prewar days when the large share of apprentices were young men without family responsibilities, this was sufficient. Now—as any San Francisco maid can tell you—most of the vets are married and have families. For them, the wage alone could not suffice.

However, the government aid can bolster the income to $200. A small family can live on that, but with little more than the bare necessities.

Starting with 40 per cent of the journeyman's wage, the apprentice gets a five per cent increase proportionately every three months during the first year, and a five per cent boost every six months during the remaining three years. During the last half of the fourth year the apprentice may receive 90 per cent of the journeyman's wage.

When the training program started and wages and subsistence were allowed to total an amount equal to the journeyman's wage, enrolment in all apprenticeship training programs was brisk. Then the program was attracting vets who could jack up their incomes through the (unamended) GI Bill of Rights.

Amending of the GI Bill last summer to limit the total income of vets in the training program to $200 a month had a particularly poignant effect on Bay Area trainees. Because the Bay Area can boast one of the highest wage scales in the United States, it has somewhat higher prices than com-

PLANS and Speculations

The site for the proposed new Florence Crittenton Home has been purchased. It is a lot at the southeast corner of Broderick Street and Golden Gate Avenue. A drive to raise $250,000 for constructing and equipping a new home is underway.

oOo

The joint legislative water problems committee meeting at Sacramento Wednesday heard pros and cons over proposed lifting of the 160-acre water limitation for farmers in the Central Valley Project.

oOo

Industrialist Henry J. Kaiser recently told the joint legislative committee on housing at **Oakland** that a critical shortage of homes will last "at least ten years the way we are going now," and added: "It could even be fifteen."

oOo

Construction of the $36 million **Pine Flat Dam** on Kings River will be started by April 1, with release by President Truman of a million dollars for start of the project. He had impounded the money until settlement of a dispute between the army engineers and the bureau of reclamation over how much of th dam's cost should be paid by local users could be effected.

oOo

An overall transit plan will be presented to Mayor Lapham next week, James H. Turner, manager of utilities and chairman of the technical committee drafting the plan, reported Wednesday. Reportedly, it will include recommendations for a subway as a "long range" plan.

oOo

A train bridge acros San Francisco Bay is feasible, F. W. Panhorst, chief bridge engineer for state department of public works, admitted recently. He said the state had given the matter consideration before drawing up its report.

oOo

Swimming, boating, camping, fishing, and picknicking facilities will be developed by the National Park Service as rapidly as funds are made available, C. E. Greider, supervisors of the **Coulee Dam** Recreationg Area, announced today.

oOo

Upon passage of a reslution authorizing formation of an improvement district, **Walnut Creek** city councilmen recently asserted, sidewalks in certain areas will be installed, despite possible opposition.

oOo

Installation of parking meters for the center business district in Martinez has been proposed by the chief of police.

oOo

Plans for the proposed downtown subway to **Roseville** have been scrutinized by the Roseville city council. They were drafted by the state department of public works at the request of a council member.

oOo

A single joint pipeline to bring water from both the Conn and Rector Dams down the **Napa Valley** may be installed instead of two separate lines, one built by Napa and the other by the state.

Three-Lane Highway A Death Trap Says Federal Works Head

CHICAGO. — The three - lane highway has been shown to be a veritable death trap with an accident rate three times higher than on the four-lane road, Major General Philip B. Fleming, administrator of the Federal Works Agency and of the Office of Temporary Controls, today told delegates to the American Road Builders' Association meeting in the Palmer House here today. General Fleming also is general chairman of the President's Highway Safety Conference.

Needs Changing

Speaking on "Engineering For Highway Safety," he declared the conference committee on engineering acknowledged that it wasn't possible to build a wholly foolproof road.

"No matter how well your road meets every technical requirement," General Fleming, said "it will always be possible for some criminal or drunken driver to get on it and kill himself or somebody else. It is possible, however, to build a road over which people of average intelligence, and possessing a reasonable sense of personal responsibility, can drive without unwittingly committing murder or mayhem.

"The fact is that many of our highways were designed with little reference to the element of safety. The engineers of 25 and 30 years ago built streets and roads designed to serve then-existing needs. Primarily the problem and the slogan was to "Get the farmer out of the mud". The auto was still considered pretty much of a luxury and a speed of 30 miles an hour was generally considered excessive.

"Most of these earlier highways are now obsolete and they would have to be rebuilt regardless of the safety factor, merely to enable them to carry the heavy traffic of today at today's speeds. In the rebuilding we have a priceless opportunity to bring them up to modern safety requirements.

May Divert Traffic

"Traffic lanes generally need to be wider. Ten feet seems to be about the standard in many of the States, but higher operating speeds, wider commercial vehicles, and the growth of traffic volume are bringing about a trend toward wider lanes. In this connection the three-lane highway has been found to be a veritable death trap, largely because the third lane constantly tempts motorists to pass other vehicles, even when the road ahead is blind because of a hill or a curve. The driver too frequently presumes upon safety ahead when there is no safety.

"At all points there should be a sufficient range of clear vision ahead to enable the driver to recognize danger in time to stop. The

(Continued on Page 6)

HOUSING COMMISSION ENDORSES A. B. 735 AT SACRAMENTO MEET

SACRAMENTO. — The State Commission of Housing met here today in an all-day session, reviewing housing legislation introduced in the Legislature.

The commissioners passed a resolution urging the Legislature to enact Assembly Bill No. 753 which provides for greater fire-safety in hotels and apartment houses.

The state fire advisory council to the State Fire Marshal in session here today, also, urged the passage of Assembly Bill No. 713.

The commissioners are J. Earl Cook, Oakland, president; Rt. Rev. Thomas J. O'Dwyer, Los Angeles, vice - president; Mattie Richards Butler, Sacramento; J. V. Hart, Visalia, and Frank L. Hope, Jr., San Diego.

Construction of 800 Airports Depends On Communities' Ability to Finance Their Share

By ERNEST MICKEL

WASHINGTON. — Progress of the nation's $70,542,065 airport construction program during the "open season" building months of 1947 depends almost entirely on the ability of local communities to finance their proportionate expenses.

For 47 states (Alabama and the District of Columbia are excluded), the government is prepared to advance $33,367,315 of the larger sum. This can be used by local governments as project sponsors in construction work at some 800 airports. Only conditions for the applicants under this program is that they put up their respective shares of $37,174,750—representing all non-federal funds—and that they conform to requirements set out in the simplified Civil Aeronautics Administration airport construction plan.

Minimum Aid 20%

The last figure cited ($37,174,750) represents the total amount all states, counties and municipalities will have to furnish from their own fiscal resources if full advantage of the federal airport program is taken.

Since revision of its regulations to suit the new Congressional airport construction and development plan, the CAA has been processing reams of paper work which must be completed before any contracts are let and actual work begins at the site. The desk work is expected to be completed in time, however, to permit construction to go ahead whenever sponsors show their capacity to finance local costs through cash on hand, bond issues or other notes.

Ernest J. Mickel, the Daily Pacific Builder's capital correspondent, has been ill since mid-December.

Now he is back in circulation on Capitol Hill, gathering first-hand news of legislation and federal programs affecting the construction industry. His first Washington story treats progress in the nation's multi-million dollar airport construction program.

The basic formula for administration of the program has been carried out in revision of the CAA regulations, anncunced recently. They now call for federal payment of 50 per cent up to $5 million. The ratio then would decrease five per cent for each additional million dollars up to a maximum of $11 million. In no project will the government pay less than 20 per cent of the project cost.

New Seaplane Bases

This final plan differs from the original, which limited to $2 million the 50 per cent federal share that would be paid on large fields, with the federal ratio decreasing five per cent for each additional million dollars. The change is considered to be a concession to larger centers which entered strong objections to discrimination between large and small airfield construction.

As it has been readied for application, the formula enables CAA to construct 232 new Class I fields, and improve 82 at a cost to the government of $6,539,795. New Class II fields under the program will number 109, and improvements will be undertaken at 177, at a total federal cost of $9,968,958. Forty-four new fields of Class III size will be built, and 153 are scheduled for improvements at a combined cost of $17,363,362. In addition, theree new seaplane bases will be built.

(Class I fields have runways 1,800 to 2,700 feet long; Class II, 2,700-3,700 feet, and Class III, 3,700-4,700 feet).

Of the $45 million appropriated by Congress for the fiscal year ending this coming June, the program recently announced will utilize all but $8,850,733 which will be held for later allocation and as a contingency fund.

Cities Restore Fields

Including $531,950 to be spent in Alaska and Hawaii, total fed-

FHA PERMITS ISSUED

SAN FRANCISCO.—The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

3 UNITS—Oakland; Y C Soda, 5231 Genoa St, Oakland.

3 UNITS—Modesto; James B Boyd, 1305 Picardy Dr, Modesto.

2 UNITS—Richmond; A D Ashby, 1971 20th St, San Pablo.

1 UNIT—Morgan Hill; Harold E Beckenhaver, Morgan Hill.

3 UNITS—San Lorenzo; L J Emery, 1544 35th Ave, Oakland.

3 UNITS—Newark; L L M Potts, Rte 1, Box 309, Newark.

2 UNITS—San Juan Bautista; J W Cullumber & Sons, Box 272, San Juan Bautista.

2 UNITS—Santa Cruz; Richard P Freytag, Box 1040, Santa Cruz.

1 UNIT—Kenwood Acres; Thomas L Mitchell, 97 E Santa Clara St, San Jose.

1 UNIT—Santa Cruz; R P Freytag, Box 1040, Santa Cruz.

1 UNIT—Burlingame; O C Moroney, 1437 Drake Ave, Burlingame.

1 UNIT—Sacramento; Dudley P Brown, 900 7th St, Sacramento.

2 UNITS—Sacramento; Vern B Dewey, Route 7, Box 1228, Sacramento.

2 UNITS—Sacramento; Jas Mayzie, Route 7, Box 1228, Sacramento.

3 UNITS—Santa Rosa; Thos Hotchkin, 2404 Slater St, Santa Rosa.

3 UNITS—San Francisco; J Arvid Johnson & Son, San Francisco.

33 UNITS—Mt View; Residental Victory Homes, Inc, Mt View.

1 UNIT—Sacramento; owner, Otis M Linton, Route 5, Box 7208, Sacramento.

1 UNIT—Sacramento; Bruce A Asbury, 3500 13th St, Sacramento.

2 UNIT—Bayshore City; Gilbert L Plov, 391 Monterey Blvd, San Francisco.

1 UNIT—Concord; Philip Fear, Rte 2, Box 347, Concord.

1 UNIT—Sunnyvale; W R Walker, 1117 Elabra Way, San Jose.

16 UNITS—San Carlos; Modern Home Builders, San Francisco.

1 UNIT—Santa Cruz; T B Eisenbrandt, Route 4, Box 436A, Santa Cruz.

1 UNIT—El Cerrito; Patrick E Connor, 4201 Gladys Ave, El Cerrito.

Three-Lane Highway
(Continued from Page 1)

length of this clearsight distance depends upon the braking ability of the vehicle, the travel speed, the friction characteristics of tires and road surface and the reaction time of the driver. But since every driver considers his own reactions to be perfectly coordinated, no harm is done by making extra allowance for unobstructed vision.
"The Interstate Highway Network, if built to the high standards intended, will bring substantial relief by diverting a good deal of traffic from present alternate routes built to lower and more dangerous standards. The Interstate for the most part will be a four-lane highway—even six lanes in certain places—with controlled access, without intersections at grade and with unobstructed vision made possible by the control of a wide strip of abutting property on either side and the prohibition of the roadside development of gas stations, tourist camps, hot dog stands and the like."
General Fleming spoke of the Action Program adopted by the President's Highway Safety Conference, which, he said, carries the essence of the report of the participating automotive and highway engineers on the relation of engineering to safety. Some of its salient recommendations are:
Elimination of railway-highway grade crossings with adequate protection for crossings where grade separation structure are not feasible.
Provision of sidewalks and other pedestrian protection facilities.
Maintenance of roadways for safe year-round travel so they will have skid-resistant surfaces, smooth, usable shoulders and adequate drainage.
Adoption of all jurisdictions of the provisions governing traffic signs, signals, markings and islands contained in the Manual on Uniform Traffic Control Devices. "A highway sign ought to say and mean the same thing in Indiana or Missouri as it does in Illinois."
An effective and continuing liaison among motor vehicle manufacturers, road builders and traffic engineers to promote closer coordination of vehicle design, the geometric and structural plans for roadways, and plans for operation and traffic control.

attachable to the top back edge of 60-inch flat top desks at 100 McAllister St., San Francisco, Calif.

Subsistance Ceiling

(Continued from Page One)

munities where overall labor costs are lower.

Sections of the country where wages generally are low, also have a lower range of prices. The present $200 a month would stretch farther in such a region. It follows that establishment of a specific, nation-wide wage-subsistance lid for veterans could fall into the category of discriminatory legislation.

Airport Program

(Continued from Page One)

eral expenditures will amount to $33,899,265.

Contract lettings on early projects should be announced soon.

Meanwhile, another government agency, the War Assets Administration, announced its intention to speed the disposal of surplus airport properties.

This can readily be accomplished under terms of a new bill introduced by Senators Brien McMahon and Raymond Baldwin of Connecticut.

Of interest to contractors is one feature of this legislation which proposes that acceptance of a surplus field releases the government, of "any and all liability it may be under for restoration or other damages, under any lease or other agreement," to the fields.

This applies only to damages while the field was controlled by the government, and not to damages occurring in the future from use of the field by government aircraft.

Bill In Committee

This aspect is not likely to be acceptable to those municipalities which have turned fields over to the government for war-time operations for it means that new civilian operators will assume responsibility and expense involved in employing contractors to restore damaged portions of their ports.

The McMahon - Baldwin bill, which would facilitate return of 1,100 fields to state, county and municipal governments, has been referred to the Senate armed services committee.

PLANS and Speculations

Residents of **Pollock Pines** and nearby Fresh Pon (in El Dorado County) have voted to seek organization of a public utility district for the solution of water problems in the two communities.

oOo

A chamber of commerce private housing survey will seek to determine the actual need in **Vallejo.**

oOo

Attorney Harlan Hewart, backed by what he described as the longest petition in Reno's history, carrying the signatures of 5194 residents, pleaded with the Reno city council to take immediate action to make the city's ditches safe. He suggested fencing them.

oOo

Basalt Rock Company of Napa, was high bidder for the liberty ship Benjamin Ide Wheeler, at $25,800.

oOo

Recently, **Palo Alto**ans have petitioned for postponement of a vote on parking meters until the regular municipal election is held May 13.

oOo

The **Palo Alto** city planning commission soon will rule on proposed creation of a recreation area in the south part of the city, next to Mayfield School, on Stanford University property.

oOo

Programmed construction and improvements at **Mt. Diablo** state park will total $59,250 during 1947-48 fiscal year.

oOo

Harry B. McClure was named chairman of a committee to investigate the possibility of obtaining recreational parks for Yuba City.

oOo

Clarence C. Stephenson, Yuba building contractor, died Tuesday in Yuba City. Surviving are his wife, Mabel, a daughter, Lois Stephenson, member of the Linda School faculty, and a son, Charles.

oOo

Bids for conversion of 55 existing buildings at Camp Carson (Colorado Springs) into family-type units (250) will be opened February 27.

oOo

The application of the Board of Supervisors of **Stanislaus County**, P. O. Box 1098, Modesto, for approval of plans of a new bridge across the San Joaquin River, 4.5 miles east of Crows Landing, will be considered at a public hearing on the subject, to be held by the U. S. Army Engineer Corps, in the Board of Supervisors' Rm., Courthouse, Modesto, at 10 a. m., Tuesday, March 4, 1947.

#

Rate Reduction Is Not Subsidy, Says U. S. Steel Head

NEW YORK—Benjamin F. Fairless, president of United States Steel Corporation, today issued the following statement:

"Any reduction in the present freight rates on the shipment of steel by rail from Geneva, Utah, to the west coast will benefit a customer of Geneva Steel Company on the Pacific coast to the extent of such reduction. Such a customer's delivered cost of steel at the Pacific coast will be reduced by the amount of such freight reduction.

"New freight rates, if made effective, will reduce the present delivered cost of structural shapes and plates from Geneva to a customer at Los Angeles, San Francisco, or Portland to the extent of approximately $4.50 a ton. At Seattle, such reduction in the delivered cost will be in excess of $3 a ton. That cannot accurately be described as a discrimination or subsidy in favor of Geneva Steel Company."

BPI Urges Larger Appropriation For Apprentice Training

WASHINGTON. — Douglas Whitlock, chairman of the Building Products Institute, today urged congress to approve adequate funds for the training of apprentices in the building trades in order to avert a shortage of skilled workers which might prolong the housing shortage and delay other essential construction.

Budget Inadequate

In a letter to Representative Taber, chairman of the house appropriations committee, which is considering funds for the Apprentice Training Service of the U. S. Department of Labor, Whitlock stated that the ATS has been doing outstanding work in aiding the recruiting and training of construction workers and said that a larger force of field workers is required to carry on the work.

"At least 150,000 to 200,000 additional skilled workers will be required by the middle of the year if the $20 billion construction program is to be achieved in 1947," Whitlock said. "The present budget of the ATS is not adequate for the job it faces.

"Because the limitation on nonresidential building is holding down the total volume of construction at this time, the need for training more building trader workers is not fully appreciated in some parts of the country and insufficient effort is being made to expand apprentice training programs.

Delay A Mistake

"It would be a serious mistake to wait until the shortage materializes before providing the necessary funds. The field workers of the ATS can perform an invaluable service by stimulating action ahead of the need. Were it not for the seasonal let-down in building, the shortage would have developed before now."

#

'Subcontractor Is Needed to Provide For Winter Building'

WASHINGTON.—Winter building techniques in the small-house field have not kept pace with those used in large construction to the consequent disadvantage of construction labor, the small contractor and the home-builder, the Department of Commerce said today.

Study Russian Methods

The housing field is wide open for a new class of subcontractor—the winterizing or winter-proofing subcontractor—who would provide some sort of enclosing arrangement including heat and light for small house construction, according to an article in the forthcoming February issue of Domestic Commerce, monthly publication of the Office of Domestic Commerce.

A number of winter construction methods were developed in large projects during the war, according to the article. Among them is the use of a circus-type tent which wholly or in part encloses the job site and provides lighted and heated interiors in which to work.

Assures Efficiency

Another cold-weather technique, improved considerably in recent years, is the piping of heated concrete from mixing plants on the building site to a pouring point some distance away. Heated concrete has been piped as much as 600 feet by this means. German and Russian cold weather building methods are also discussed in the article.

Development of similar techniques in the small-house field

(Continued on Page 7)

GROOVER AND I

ANDREA MINUTOLI — REPLY

Now and then a reader is extremely annoyed with me—generally from an entirely unexpected angle. A recent column delicately mentioned that Mr. Edison once fired a young genius from his laboratory. I though it would be interesting to my non-Italian readers to know that Marconi was half Irish.

☆ ☆ ☆

I fully expected some Edison devotee to take my hide off in long, thin strips. I got a working over of an entirely unexpected nature.

☆ ☆ ☆

Mr. Andrea Minutoli of the "Travertite" Company, proceeded to take me to pieces for mentioning a half-Italian when there are so many full blood Italians in the field of physics.

☆ ☆ ☆

Minutoli had me squirming until I suddenly realized he was needling me—and doing a good job of it!

☆ ☆ ☆

You can take very few steps in the Arts or the Sciences without running into enough Italians to form a Neapolitan Trio complete with Street Scene.

☆ ☆ ☆

To mention a few, **Napoleon** was a soldier of note. Then there was **Benvenuto Cellini**, a lovable scoundrel, accomplished in many arts.

☆ ☆ ☆

Look at the mess this Nation is in today — 49 Governors and 49 States, including **Georgia**, the State of **Confusion**. **Christopher** Columbus might be partly responsible for this.

☆ ☆ ☆

Do you think the British dug the Suez Canal in order to further their Dream Empire? No, it was to give **Giuseppi Verdi** a reason for writing "Aida".

☆ ☆ ☆

Now about all of this love-stuff which mixers of perfume and makers of poems tell about under the general name of "Amor". Amor is the name of—

☆ ☆ ☆

The ancient and Eternal City of "Roma"—which is "Amor" spelled backwards.

#

PROBLEM OF 'SMOG' RECOGNIZED IN 1661

LOS ANGELES,—Battling the "smog" nuisance is a problem nearly 300 years old as two recent acquisitions by the University of California's William Andrews Clark Memorial Library will testify. These are the first and latest editions of **Fumifugium**, John Evelyn's classic treatise on London's smoky atmosphere.

Published in 1661 the first edition's title-page reads as follows: **Fumigugium**, or, the Inconvenience of the Air **and Smoake of London dissipated; together with some Remedies humbly proposed by John Evelyn, esq., to his Sacred Majesty's Command.**

In 1933 the National Smoke Abatement Society of Manchester reprinted Evelyn's work, and the Clark Library has received this edition as a gift of the Society.

Evelyn's proposed remedies included moving London's "heavy industries" to uninhabited lands on the city's leeward side, and then planting London thickly with blossoming trees and shrubs. The author, it will be recalled, was famous as a horticulturalist and was the author of **Silva**, a classic work on British forestry, the first and later editions of which are also in the Clark Library.

The Clark Memorial Library, located at 2205 West Adams Boulevard, is open to all qualified scholars and students.

Proposed Code Hearings Concluded; Bill Probably Not on February 24th Calendar

San Francisco's proposed building code probably will not go upon the February 24th legislative calendar of the board of supervisors, it was learned today. Many items of the voluminous piece of legislation were taken under advisement by the judiciary committee.

Even these highly controversial features may be again contested when the proposed code is brought into the supervisors' chambers.

Following are the important matters taken under advisement but the list does not attempt to mention all the many issues which remain.

(1) Section 1209, which provides that no gas service or gas service piping will be permitted in any assembly building. The advisory board recommended that it be permitted and that "every gas service shall be provided with an approved outside shut-off valve conspicuously marked."

(2) Section 2005, precluding the use of pneumatically placed concrete. The advisory board recommended that pneumatically placed concrete be reinstated in the code, with qualifications.

(3) Section 2401-to-2410, dealing with proposed permissable working stresses for structural steel. The advisory board recommended that the 1946 specifications of American Institute of Steel Construction be adopted, noting that code requirements "are in some instances lower than those permitted by the A. S. C. I."

(4) Section 2905, Gypsum Lath. The advisory board endorsed use of 3/8-inch gypsum lath meeting certain tests "whenever in this code metal lath is required" except in Type 1, 2 3 and 4 buildings in all elevator shafts, vertical openings, in the soffits of stairs and staircases.

(5) Article 23, Sections 2301 through 2307, dealing with lateral forces. The advisory board contends that requirements stipulated by the department of works are too stringent, and would relax requirements for tall buildings.

At Wednesday's hearing, Works Director Harry Vensano again assailed the advisory board report.

"We are against every feature of this report," he announced. "If you are going to allow further emasculation of the code, I am going to ask that the code be tabled permanently, because it will be no good."

#

Authorize Prefab House Experiment With Peeler Logs

Industrial research to develop prefabricated houses using a new type of wood veneer made from low grade and presently unused peeler logs is being sponsored by the industrial research and development division of the Commerce Department's office of technical services, John C. Green, OTS director, announced today.

Under the terms of a six-month "actual cost" contract with the Elmendorf Corp., Chicago, Ill., a private research organization, a complete model prefabricated structure incorporating the new panel will be designed, built, and tested under the specifications of the National Housing Agency.

The panel, called "K-Veneer" uses a veneer 3/16-inches thick made from Western hemlock peeler logs. In processing, the veneer is slit grain-wise at half inch intervals, leaving only enough fiber at the base of the incisions to hold the material together. At the same time, under tension, the veneer is expanded in area by about four per cent. The incisions provide a slack in the veneer that prevents later distortion due to absorption of moisture from the atmosphere. Depending on its intended use, the veneer is strengthened by an overlay of sheet aluminum, sheet glue, roofing felt, heavy paper, or other material attached by waterproof glue under pressure.

Anderson Ranch Dam Construction Delayed a Year

BOISE. — Construction work on the Anderson Ranch Dam Project has been drastically curtailed on account of lack of funds, it was announced today by R. J. Newell, regional director for the U. S. Bureau of Reclamation.

Water In 1949

In a telegram to Morrison-Shea-Twaite-Winston, dated Feb. 11, the chief engineer at Denver, contracting officer for the Bureau of Reclamation, notified the contractor that construction for the balance of fiscal year 1947 must be immediately curtailed to provide for continuing only vitally essential construction work now in progress until March 1, 1948, and only operation and maintenance of minimum essential facilities to the end of the current fiscal year.

The effects of this curtailment will be that the completion of the dam proper will be postponed at least one year and the full amount of water expected for use in the Boise Valley during the 1948 irrigation season will not be available at least until the spring of 1949.

Await Appropriation

The Bureau of Reclamation requested an appropriation for fiscal year 1947 of $2,847,000 to provide for continuing construction according to schedule, of which $1,234,475 was appropriated. Under present conditions, additional funds will be available for expenditure only after congress has passed the fiscal year 1948 appropriation bill, which contains a budget allowance of $4,136,000 for Anderson Ranch Dam construction.

300,000 Acre Service

The Anderson Ranch Dam Project is a multiple-purpose project which will provide 492,000 acre-feet of storage for irrigation, flood control, and silt retention, and includes a 30,000-kva. power installation. The irrigation storage will provide a supplemental water supply for about 300,000 acres of land in the Boise Valley now subject to late season shortages.

#

REQUESTS ARCHITECTS WITHHOLD SIGNATURES

In a telegram dated February 19, to John S. Bolles, president of the San Francisco chapter, James R. Edmunds, Jr., president of American Institute of Architects, requested that Institute members not sign letters being circulated on the United Nations site selection.

Institute officers are conferring with United Nations officials, Edmunds pointed out, adding, "These letters evidence lack of complete understanding as to the situation."

#

PLAN INSPECTION TOUR ANGEL ISLE THURSDAY

The Bay Area Council scheduled a special conference and inspection tour of Angel Island on Thursday, for a Council committee from the nine Bay counties and an interim committee from California State Legislature, which will serve cooperatively with the Council in recommending the disposal of the mid-Bay site in the public interest.

The Council had originally gone on record with recommendations for a study of the possible use of Angel Island as a recreation area, or for similar public service, when it was declared surplus.

FHA PERMITS ISSUED

SAN FRANCISCO. — The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

COMPETITIVE (?) BIDDING!
Who wants to continue the old wasteful, expensive system of competitive bidding which requires as many as a dozen competitors each to take-off his own quantities?
Who wants to continue the old impractical, unfair system of competitive (?) bidding? It compels skillful, responsible contractors to waste their time and money in a so-called competition in which no two have an equal chance; since no two of them bid on the same quantities.
Who wants to continue the old inequitable system, which permits some incompetent to bid on his own incomplete take-off or errors in his quantities, and thereby submit a low bid that takes the business away from competent, skillful bidders?
Who wants to continue the old pernicious practice which handicaps skill and responsibility, and favors irresponsible bidding?
The answers are obvious. The solution is adoption by all bidders of the proposed LeRoy *guaranteed* quantity surveys.

YOU GET EXTRA PROFITS
from
American Mutual's
All American Plan
Here's a simple way to get three important extra's . . . **Complete Insurance Protection . . . Protection At Its Best . . .** and **Savings Through Lower Costs.** American Mutual's All American Plan for Contractors shows you quickly and simply how you may get these three extra's for your next contract:
Complete Protection—American Mutual writes practically every type of insurance coverage for all types of construction projects. All forms are modern, and comprehensive to give maximum protection.
Protection At Its Best—Every American Mutual policy is backed by complete service to assure maximum value to you for the insurance dollars you spend.
Savings Through Lower Cost—Since 1887, American Mutual has returned 20% or more to policyholders—more than $100,000,000 in dividends.

Winterize Project

(Continued from Page One)

would have advantages far outweighing the disadvantages, according to the article. For example, the erection of a tent might involve additional costs but these would be offset by lower overhead. Expensive construction equipment would be kept busy all year and the high cost of rushing jobs to completion in the summer months would be avoided.
By reducing winter unemployment, the contractor would be able to keep a highly trained construction crew intact with a resulting increase in labor efficiency. Other advantages of winter construction are summarized:
Stabilizes Production
The construction worker is benefited by the security that year-round employment gives and young men, who now hesitate to take up a trade notorious for its seasonal employment, would be encouraged to enter the field; the owner of the house gains by securing earlier use of his building; and manufacturers of building materials and construction equipment can put their production on a more stable basis.

BETHLEHEM STEEL

STRAN-STEEL "Quonsets" FOR FARM AND INDUSTRY

ALL-STEEL BUILDINGS AT LOW COST

Adaptable to hundreds of farm and industrial uses, Stran-Steel "Quonset" buildings are filling a steadily increasing need for low-cost, all-purpose structures.

Available in a variety of sizes, "Quonsets" are framed with Stran-Steel *nailable* framing members for strength and rigidity and the simple attachment of exterior and interior collateral materials.

Features include clear-span construction (except in the "Multiple"), for 100% usable floor space . . . all-steel materials, for fire-safety, permanence, and freedom from weather and rodent deterioration. The Stran-Steel framing system permits the easy addition of sections or the demounting of the entire building for re-erection elsewhere.

Stop in today for details and prices.

Stran-Steel "Quonset" buildings are products of Great Lakes Steel Corporation, a unit of National Steel Corporation.

Streets and Highways..... 40
Gas, Water and Oil Pipe Lines 41

2/18/47 40
Owner Taking Bids—Due March 4, 10 A. M.
Grading, Bridges and Surfacing
WASHINGTON.
Owner—State of Washington, Clarence B. Shain, director of highways, Olympia, Wash.
Plans by engineering department of owner.
Includes the following six projects:
(1) Clearing, grubbing and grading on 0.30 mile of P.S.H. No. 1, Cowman River North in Cowlitz County, F.A.P. No. UI-2 (1), Unit 5, involving lump sum clearing and grubbing, about 158,800 cu. yds. common excavation, 2450 cu. yds. selected roadway borrow and other items.
(2) Constructing a reinforced concrete flat slab bridge on P.S.H. No. 12, Raymond East bridge in Pacific County, a state project, involving 78 cu. yds. concrete pavement, 14,260 lbs. pavement reinforcing, 505 cu. yds. bridge concrete, 97,000 lbs. steel reinforcing bars, 6700 lbs. structural steel, 3200 lin. ft. steel piling and other items.
(3 Constructing a steel girder bridge over Birnie Slough and grading approaches to bridge on 0.196 mile of S.S.H. No. 12-F on Pugent Island in Wahkiakum County, F.A.S. No. S-146 (1), involving 13,300 cu. yds. embankment from borrow, 3230 cu. yds. fragmentary rock, 1700 cu. yds. ballast, 600 lin. ft. culvert pipe, 310 cu. yds. concrete, 42,000 lbs. steel reinforcing bars, 49,000 lbs. structural steel, 6300 lbs. cast steel, lump sum erecting structural steel (62 tons furnished by state), 3200 lin. ft. precast concrete piling and other items.
(4) Clearing, grubbing, grading and surfacing on 1.991 miles of Clark County Road project, Hockinson vicinity, F.A.S. No. S-76 (1), involving about 12,412 cu. yds. unclassified excavation, 6675 cu. yds. ballast, 1827 cu. yds. crushed stone surfacing, 2216 cu. yds. mineral aggregate, 762 lin. ft. culvert pipe and other items.
(5) Clearing, grubbing, grading, surfacing and constructing 1light bituminous surface treatment on 4.206 miles of Touchet Road, Dayton to Abels Grove, Columbia County Road project, F.A.S .No. S-78 (1),, involving lump sum clearing and grubbing and about 51,220 cu. yds. common excavation, 6800 cu. yds. solid rock excavation, 13,480 cu. yds. ballast, 3240 cu. yds. crushed stone surfacing, 1150 cu. yds. crushed cover stone, 123 tons bituminous cement MC-2, 714 lin. ft. culvert pipe and other items.
(6) Clearing, grubbing, grading and surfacing on 2.462 miles of the John Koontz Road, Lewis County Road project, F.A.S. No. S-100 (1), involving about 18 acres of clearing, 18 acres of grubbing, 11,310 cu. yds. unclassified excavation, 11,250 cu. yds. selected roadway borrow, 3250 cu. yds. crushed stone surfacing, 1377 lin. ft. culvert pipe and other items.
Federal funds have been allocated for items 1, 3, 4, 5 and 6.
Specifications obtainable from the above office upon payment of $2, not refundable.

2/20/47 40
Low and Only Bidder
Street Improvement. Spec. 20.141 Cost, $33,803.45
SAN FRANCISCO, Calif, St. Joseph's Ave. between Turk St. and O'Farrell St. including intersections of St. Joseph's Ave. with Eddy, Ellis and O'Farrell Sts. and O'Farrell St. between St. Joseph's Ave and Broderick St.
Owner—City & County of San Francisco, Dept of Public Works, Rm. 282, City Hall, San Francisco, Calif. City Engineer:— Ralph Wadsworth, City Hall, San Francisco, Calif.
Only Bidder—Charles L. Harney, 575 Berry St., San Francisco, Calif., $33,803.45.
Work involves:
(1) 5780 cu. yds. grading, excavation
(2) 150 cu. yds. pavement excav.
(3) 175 lin. ft. stone curb reset
(4) 1 each catchbasin reset and rebuilt
(5) 3 each brick catchbasins
(6) 7 each brick manholes complete
(7) 78 lin. ft. 10 in. VCP culvert
(8) 975 lin. ft. 8 in. VCP sewer
(9)64 lin. ft. 12 in. do
(10) 38 lin. ft. 15 in. do
(11) 2 each 12 in. x 6 in. VCP Y-branches
(12) 24 each 8 in. x 6 in. VCP Y-branches
(13) 635 lin. ft. 6 in. VCP side sewers
(14) 1 each low-pressure fire hydrant reset
(15) 1 each street sign reset
(16) 2275 lin. ft. unarmored concrete curb
(17) 285 lin. ft. white concrete curb
(18) 3090 sq. ft. asphalt on concrete pavement
(19) 46,675 sq. ft. asphaltic concrete pavement
(20) 10 tons asphaltic concrete conform pavement
(21) 3150 sq. ft. 2-course concrete sidewalk
(22) 1040 sq. ft. 3½ in. concrete pavement
(23) lump sum, street lighting system complete
(24) lump sum, traffic signs
(25) 6 each curb reflectors
(26) 5 each water services at $13.50 each.
Total bids submitted Feb. 19 were:
(A) Charles L. Harney, San Francisco, Calif., $33,803.45.
(B) Fay Improvement Co., San Francisco, Calif., $40,076.
(C) Eaton & Smith, San Francisco, Calif., $41,207.50.

2/20/47 40
Low and Only Bidder
Street Improvement . Cost $3,096.65
SAN FRANCISCO, Calif., Portions of 40th Ave., between Wawona and Yorba Sts.
Owner — City and County of San Francisco, Dept. of Public Works, Room 282, City Hall, San Francisco, Calif.
City Engineer — Ralph Wadsworth, City Hall, San Francisco, Calif.
Only Bidder—Charles L. Harney, 575 Berry St., San Francisco, Calif., (1) $0.45, (2) $1.75, (3) $1.80, (4) $9; total, $3096.65.
Work involves:
(1) 5560 sq. ft. asphaltic concrete on rock subbase pavement consisting of 6 in. compacted rock subbase; 4 in. asphaltic concrete base and 2 in. asphaltic concrete wearing surface;
(2) 175 lin .ft. unarmored concrete curb;
(3) 65 lin. ft. 6 in. VCP side sewer;
(4) 3 water services.

2/21/47 40
Owner Taking Bids—Due March 13, 10 A. M.
Highway; Project Ariz.-FH9-H
GILA CO., Ariz. Bridgeport-Roosevelt Dam: Tonto National Forest.
Owner — Public Roads Administration, 302 W. Jefferson St., Phoenix, Ariz.
Plans by engineering department of owner.
About 9.404 miles.
Work involves:
(1) 67 acres clearing and grubbing;
(2) 208,000 cu. yds. unclassified excavation;
(2) 1,910 cu. yds. unclassified excav. for structures;
(4) 22,846 cu. yds. unclassified excavation for borrow;
(5) 325,000 sta. yds. overhaul;
(6) 11,400 cu. yds. miles special overhaul of borrow;
(7) 24,000 lin. ft. furrow ditches;
(8) 3,500 M. gals. watering;
(9) lump. sum, provide and maintain water plant or plants;
(10) 125 cu. yds. cement rubble masonry;
(11) 3,218 lin. ft. corrug. galv. sheet metal culvert pipe;
(12) 252 lin. ft. field assembled metal plate culvert;
(13) 358 lin. ft. remove clearing, stockpiling or relaying salvaged culvert pipe;
(14) 185 cu. yds. hand laid riprap for culvert inlet and outlet culvert protection;
(15) 26 each right of way monuments;
(16) 4 each concrete maintenance marker posts;
(17) 70 each timber culvert markers;
(18) 1 each cattle guard;
(19) 26,300 lin. ft. barbed wire fence, (20)12 each gates.
Specifications obtainable from the above office or from 720 Phelan Bldg. San Francisco, Calif., upon deposit of $10, refundable.

2/21/47 40
Contract Awarded
Surfacing Cost $184,013.80
GRAYS HARBOR & PACIFIC COS., Wash. P. S. H. No. 13, Grays Harbor Co. line to Smith Creek.
Owner—State of Washington Dept. of Highways, Clarence B. Shain, director of highways, Olympia, Wash.
Plans by engineering department of owner.
Contractor—Quigg Bros., Constr. Co., Hoquiam, Wash.
2nd and 3rd low bidders were:
N. Florito Co., Seattle, Wash., $201,650.
J. D Stotwell, Tacoma, Wash., $269.144.

2/21/47 40
Contract Awarded
Surfacing Cost $151,839.30
CHELAN CO., Wash., S. S. H. No. 10-D, Chelan River North.
Owner—State of Washington Department of Highways, Clarence B. Shain, director of highways, Olympia, Wash.
Plans by engineering department of owner.
0.747 miles Grading and Surfacing.
Contractor—Goodfellow Bros., Inc., Wenatchee, Wash.
N A. Degerstrom, Spokane, Wash., at $161,780 submitted 2nd low bid.

2/21/47 40

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on **March 19, 1947,** at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Tehama County, between Mill Race Creek and Red Bluff (11-Teh-3-D), a net length of about Two and eight-tenths (2m) miles, to be graded, surfaced with plant-mixed surfacing on crusher run base and on existing pavement.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate Per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Cement finisher	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	1.90
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.3375
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays — one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal Statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until **2 o'clock p. m. on March 5, 1947**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

San Joaquin County, at Calaveras River, about eight miles north of Stockton (X-SJ-97-A), about four-tenths (0.4) mile in length to be graded and surfaced with plant-mixed surfacing, and a steel girder bridge to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixed operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	1.90
Concrete vibrator operator	1.375
Derrick operator	2.10
Flagman	1.25
Jackhammer operator	1.375
Laborer	1.25
Motor grader operator	2.10
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Painter (brush)	1.625
Painter (spray)	1.75
Pile driver hoistman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Structural steel worker	2.00
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.25
Overtime—one and one-half (1½) times the above rates.	
Sundays and holidays—one and one-half (1½) times the above rates.

TRAXCAVATE for PROFIT

The profitable machine on any job is the machine that keeps busy

The TRAXCAVATOR—front-end loader built by THE TRACKSON CO. and mounted on a "CATERPILLAR" diesel tractor—has been called "the busiest machine on the job" by many builders. It's the perfect machine for jobs that involve digging, loading, leveling, or backfilling, and for the handling and rehandling of materials.

PLANS and Speculations

Geologists of the Recreation bureau have started a survey on the state's proposed site of a huge Feather River dam four miles east of Oroville.

oOo

Preliminary studies and surveys to complete work on the Salinas River flood control project will begin soon.

oOo

Bids on $450,000 worth of Carmel unified school district bonds will be opened March 10.

oOo

A dam to prevent excessive seepage along Sacramento River farm lands recently was urged before a joint state legislative committee on water problems.

oOo

Creation of a water district was advocated recently by the Sonora Grange. It would comprise all of Tuolumne County except that contained in Water District No. 1 at Twain Harte and the fourth judicial township.

oOo

A hearing will be held February 28 by army engineers on proposed dredging of 330 acres of submerged land in the bay near Burlingame. The property is owned by Pacific Portland Cement Company.

oOo

Recently discussed was formation of a water and irrigation district to cover all of Las Vegas Valley through use of Lake Mead as a water source.

oOo

Businessmen of Oroville are pressing for improvement of Myers Street and the Palermo Road. Fifty-six property owners recently met to discuss widening of Myers Street.

oOo

Improvements advocated by the Nevada City chamber of commerce recently include improvement of Pioneer's Park. It was reported that plans are nearly complete for submission to CAA for federal aid for the local airport.

oOo

A fourteen member citizens committee appointed a subcommittee to study further the water conservation problem in the Santa Cruz mountains above Los Gatos. Construction of a dam near Windy Point is receiving its consideration.

#

RESUME OPERATIONS AT "OLD MISSION" CEMENT PLANT SOON

Pacific Portland Cement Company announced today that the company's "Old Mission" cement plant at San Juan Bautista, Calif., will resume operations in the very near future.

This is in response to the urgent demand for greater production of cement for housing, highways, and other construction.

The company is also operating its cement plants at Redwood City, Calif., and Gold Hill, Ore., its plaster and gypsum plant at Gerlach, Nev., and its gypsum wallboard plant at Redwood City.

#

SEES GREAT NEED IN SCHOOL CONSTRUCTION

ST. LOUIS.—George H. Field, commissioner of the bureau of community facilities, told delegates to the annual meeting of the American Association of Junior Colleges here Saturday that "the amount of plan preparation now being carried on both with and without federal aid represents only a small fraction of the public works that are due for construction within the next five years."

He added: "This is very obviously true of public school construction; and, in my opinion, it is also true of construction in the field of higher education."

Federal Financial Aid Necessary to Rebuilding Program

Substantial financial aid from the federal government will be necessary if there is to be any considerable amount of slum clearance and sound urban redevelopment in this country, Louis Justement, chairman of the urban planning committee of the American Institute of Architects, said today.

"Under present systems of taxation, neither private enterprise nor local and state governments can carry out large-scale urban reconstruction without some form of special aid," he added.

Expect Rural Opposition

"This conclusion is shared by the recently formed Interprofessional Urban Planning Committee which agreed that it is desirable that urban communities should be self-reliant and avoid dependence on Federal aid and direction, but pointed out that practical considerations make Federal participation imperative if slum clearance and urban redevelopment are to become a reality.

"Aside from the fact that the cities do not have the resources with which to undertake these projects unaided, there is the fact that the various cities, villages, and unincorporated communities which lie within a metropolitan region should undertake urban planning and development on the basis of an overall metropolitan area plan. The availability of Federal aid would make the necessary political cooperation much less difficult.

"Federal financial assistance could be made available through a local agency organized to function for an entire metropolitan urban region without regard to political boundaries.

"It would be unrealistic to place too much reliance on financial help from the states because the rural vote will effectively oppose aid to the cities and because the states do not have the direct interest in urban redevelopment that the Federal government has owing to the importance of construction in the nation's economy.

'Realize Limitations'

"While maximum reliance should be placed on private enterprise in the approach to this problem, it is essential that private enterprise should realize its limitations clearly. Those who care to preserve the widest scope for individual initiative should not seek to claim for it tasks that it cannot possibly perform".

STOP ISSUING MM PRIORITY RATING

Following its tightening in the issuance of CC priority ratings early in January, the Civilian Production Administration today announced the revocation of its delegation of authority to assign MM (military) ratings and adso adjusted its criteria for issuance of future CC ratings to cover military and Veterans' Administration needs.

These actions, now effective, result from the revocation of Directives 39 and 41, under which the Veterans' Administration, the Army and Navy Munitions Board and the Maritime Commission have heretofore been authorized to issue MM ratings, and from amendment of Priorities Regulation 28, which controls the assignment of CC ratings.

However, all MM and other ratings already issued under Directives 39 and 41 will remain in full force and effect and these ratings may still be applied or extended under applicable CPA regulations.

GROOVER AND I

"IT IS LATER THAN YOU THINK"

Quite some time ago the late Calvin Coolidge stated that no man has the right to strike against the public welfare.

☆ ☆ ☆

Phil Murray has just stated there is absolutely no moral justification for a jurisdictional strike.

☆ ☆ ☆

Yet both Houses of Labor are squalling like hell about restrictive labor legislation which will require them to legally do those things which they should do in common honesty, equity, justice and decency. Organized Labor has no better friend than Senator Morse who has asked labor to cooperate in formation of fair and sane labor legislation.

☆ ☆ ☆

Morse stated there will be labor legislation and he will vote for legislation that goes too far rather than not vote for any legislation—Messrs. Murray and Green should realize that it is later than they think.

☆ ☆ ☆

Should it become a question of the welfare of Union Labor or the welfare of this Union of States—

☆ ☆ ☆

We must put the welfare of the States first.

PRAISES AFL, AGC LABOR AGREEMENT

WASHINGTON.—In a letter to Herbert E. Foreman, managing director of the Associated General Contractors of America, Secretary of Labod Schwellenbach recognized the no-strike, no-lockout agreement between labor and management in the construction industry as "an act of industrial statesmanship".

He commented: "The fact that the specialty contractors have their own machinery, or are setting up comparable procedures, or may have access to the flexible machinery provided in your plan should assure in the building and construction industry as a whole an even more outstanding record of industrial peace."

#

ELECT SIX DIRECTORS

NEW YORK.—The election of six directors to the board of the American Standards Association was announced today by Frederick R. Lack, president of the association and vice president in charge of the radio division of Western Electric company.

All of the directors will serve three-year terms.

They are:

R. L. Pearson, who will represent the Association of American Railroads; Curtis W. Pierce, president of National Fire Protection Association and president of the Factory Insurance Association, who will represent the fire protection group; J. H. Hunt, who will represent the Society of Automotive Engineers;

J. M. McElhinney, who will represent the American Iron & Steel Institute; R. Oakley Kennedy will become one of three directors representing general consumer interests on the board, and Auguste G. Pratt, who will represent American Society of Mechanical Engineers.

#

PALMER PRESIDENT

Vincent Palmer will head the list of officers of the California Council of Architects during 1947. Andrew Hass is vice-president, and A. C. Martin, Jr., is secretary-treasurer.

John Bolles serves as chairman of the legislative committee, and Norman K. Blanchard is chairman of the public relations committee.

"Private Industry Should Not Play 'Dog In the Manger' in Public Housing Now"

Housing Administrator Refuses to Predict Building Prospects for 1947; Scores Prefab Homes as 'No Cheaper'

WASHINGTON.—Raymond M. Foley, administrator of the National Housing Administration, exercised characteristic evasiveness when he refused to predict the prospect for building during 1947.

He steered away from committments on this subject by telling questioners that in his belief advance estimates tend to encourage premature housing starts and serve no useful purpose in promoting housing development.

The successor to Wilson W. Wyatt had a definite statement on another phase of the building situation, however; he said that housing built last year has considerably alleviated the condition of extreme shortage and that henceforth "conditions will steadily improve".

In spite of the large handicap imposed by the high cost of building materials ,the supply of these items continues to improve steadily, he said. Since it is inadvisable for many, if not most, veterans to commit themselves to the purchase of housing at present inflated prices, his agency has concluded that the veterans' immediate interest will be safeguarded better by his changing emphasis from ownership to rental property. The NHA already has moved to effect this change in emphasis.

The administrator believes that the real estate market now is riding the peak of inflated home prices and that the trend in costs of completed dwellings will henceforth be downward. This he attributes to the increased efficiency and minimized delay involved in home completions.

Prefabs No Better

The basic task of private enterprise in the housing industry, Foley maintained, is that of getting building costs down within a range where more people can afford to pay the cost of the finished product.

Among many wasteful practices cited as working against this desirable end he listed inefficient building codes, poor zoning and certain rules enforced by the building trades.

He was inclined to blame industry for inefficient practices in the marketing of materials but did not enlarge on his comments to the extent of enumerating these.

In the administrator's opinion the formula for rent control, as applied to new housing, is acceptable to industry. This control is in the province of the Federal Housing Administration, not the Office of Price Administration under the Office of Temporary Controls.

Answering a point-blank question on pre-fabs, Foley said that pre-fabricated housing so far has not been able to show any better results as to cost than conventional construction. He added that, in time, it might improve its relative showing.

'Dog in the Manger'

The idea that private enterprise consists of management alone is false, Foley said. It embraces labor and government, he added. All three are parties to the private enterprise process which cannot succeed if all three do not help it to do so.

"Until private enterprise is ready to go way down the ladder," he said, "it should not play 'dog in the manger' regarding public housing needed to provide shelter for people whose requirements private enterprise is unwilling or unable to satisfy."

#

VET PREFERENCE

EPHRATA, Wash.—The Bureau of Reclamation is working on plans under which veterans of World War II will have preference in acquiring family-size farms created from government-owned land on the million-acre Columbia Basin Project of Eastern Washington, Goodrich W. Lineweaver, director of the Bureau's branch of operation and maintenance, said today.

'Urban Planning Unit As Much Needed As Dept. of Agriculture'

WASHINGTON.—Louis Justement, chairman of the urban planning committee of the American Institute of Architects today recommended creation of a federal department or agency to assist local governments in clearing and redeveloping the blighted areas of the nation's cities.

He said: "If we are faced with another depression, it is almost inevitable that the federal government will be compelled to resort to spending. . . Our best chance to avoid excessive and wasteful federal spending will be to stimulate redevelopment of our blighted cities. This, in turn, will stimulate the investment of a large amount of private capital and thereby reduce the necessity for federal funds."

"More than half of our citizens live in cities," the architect pointed out, "and their living conditions and well-being are as much entitled to consideration as those of rural citizens for whose benefit we have for many years maintained a Department of Agriculture."

#

PERMIT TO BUILD CHURCH GRANTED

The Eleventh Church of Christ, Scientist, last week received permission from the Civilian Production Administration to build a new church structure on Judah Street at Sunset Boulevard in San Francisco.

A church official said this new edifice has long been contemplated and was about to be started at the time of Pearl Harbor. Even now but half the structure is permitted pending an easing up of materials going into housing. The present construction will largely be of concrete steel reinforced and will cover practically all of the 100 by 120-foot site.

A contract has been let and the building is now under construction by Swinerton and Walberg, general contractors, under the supervision of Bakewell and Weihe, architects. Pending completion, Sunday school and church services continue at the present location at 2037 Irving Street.

LIGHTING SHOW COMES HERE FROM NEW YORK

A Lighting Show brought direct to San Francisco from the 1946 Architectural League showing at New York will be featured when the local chapter of American Institute of Architects meets in the Marine Memorial Theatre, 609 Sutter, next Thursday evening.

Members of the Producers' Council, the San Francisco Section of the American Institute of Electrical Engineers, and the Illuminating Engineers' Society have been invited to attend the lighting demonstration.

President Hervey Parke Clark will introduce two speakers, S. H. Hazelton, district engineer, and W. E. Carlson, advertising manager, both of General Electric Company's lamp department, whose topic will be "Relating Modern Commercial Ligting Methods to Architecture".

Correction—Owner Taking Bids—Due Feb. 26, 2 P. M. (Not Feb. 24)
Water Softener Equipment (Install) Spec. 18165
OAKLAND, Calif., Alameda County. Naval Hospital.
Owner — Public Works Department, 12th Naval District, Room A-109, Federal Office Bldg., Civic Center, San Francisco, Calif.
Plans by owner.
Plans obtainable from the Public Works Department, Design Division, Room A-119, Federal Office Bldg., Civic Center, San Francisco, Calif., upon deposit of check or postal money order for $10, payable to the Chief of Bureau of Yards and Docks.

2/24/47 32
Formation of Sanitary District Approved
SOLANO COUNTY, Calif.
Owner — Solano County Sanitation District No. 1, c/o Solano County Board of Supervisors, Wm. Jones, county engineer; Lewis Morrill, clerk, Courthouse, Fairfield, Calif.

2/24/47 31
Owner Taking Bids—Due March 10, 2 P. M.
Water System Improvments
PULLMAN, Wash.
Owner—Board of Regents, State College of Washington, Dr. Wilson Compton, president, Administration Bldg., Pullman, Wash.
Architect—Stanley A. Smith, State College of Washington, Pullman, Wash.
Consulting Engineers — Stevens & Koon, Spalding Bldg., Portland 4, Ore.
The work involves:
Unit "A"—Furnishing material and building a well house of concrete, 12 ft. square, with appurtenances.
Unit "B"—Trench excavation and backfill and the hauling and laying of distribution system materials furnished by the owner, including about 8000 lin. ft. of 8-in. and 12-in. open bell cast iron pipe with fittings, valves and appurtenances.
Unit "C"—Furnishing materials except pipe, valves, pumps and incidentals which are to be furnished by the owner, and building a covered reservoir of two (2) million gallons capacity and a control house. Approximate quantity for the reservoir include: 9000 cu. yds. of earth excavation, 8000 cu. yds. of concrete, 50,000 lbs. of reinforcing steel, 144 squares of tar and gravel roof over wood construction.
Unit "D"—Furnishing and erecting an elevated steel tank of 100,000 gallons capacity on a tower of height to place water level in the tank 67 ft. above foundations.
Unit "E"—Furnishing material and building concrete foundations for the towner and tank requiring about 50 cu. yds. of conerete.

Official Proposals

LS 380—Installation of 30-inch Welded Steel Water Main

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the East Bay Municipal Utility District, Room 205, 512 Sixteenth Street, Oakland, California, until 5:30 P. M., Wednesday, March 5, 1947, and will at that hour be opened, for installing approximately 3550 linear feet of 30-inch welded steel water main, 90 linear feet of 24-inch welded steel water main, and 80 linear feet of 12-inch cast iron pipe, and valves and appurtenances, and for removing about 1700 linear feet of existing 12-inch cast iron main, and 80 linear feet of 24-inch welded steel cement lined pipe in South 23rd Street, Pullman Avenue and 21st Street, in Richmond, Contra Costa County, California.

The general prevailing rate of per diem wages in the locality in which the work is to be performed, for laborers, and for each craft or type of workman and mechanic needed to execute the contract, and the general prevailing rate for legal holiday and overtime work, specifically set forth in the plans and specifications on file with the Secretary of the District, are referred to and incorporated herein.

Specifications No. LS 380 covering this work, may be obtained at Room 406 of the office of the District.

DANIEL READ,
Secretary.

Oakland, California.

COMPLETE BUILDING AND ENGINEERING NEWS SERVICE

LARGEST CONSTRUCTION DAILY IN THE WEST

Vol. 57—No. 38 SECTION ONE SAN FRANCISCO, TUESDAY, FEBRUARY 25, 1947

Copyright 1946 by F. W. Dodge Corporation

PLANS and Speculations

Bids have been asked by March 19 for buildings at Bolsa Point military reservation near Pescadero. Included are water tanks, tank towers, mess halls, barracks and officers' quarters. Information may be obtained from the South Pacific Division of army engineers, 351 California St., San Francisco.

oOo

Bids will be accepted up to 10 a. m., March 27, for 10,500 square feet of industrial property at Bay and Stockton Streets, San Francisco, by war assets administration. Bids have been asked also on equipment for production of oxygen and other gases.

oOo

Improvements on the Sears Pt.-Black Pt. cutoff are being delayed because all existing funds have already been allocated for other projects.

oOo

Operations will begin early in March at the American Pipe and Construction Company plant which is being opened two miles west of Pittsburg. It will handle concrete work on steel pipe manufactured elsewhere.

oOo

Niles may take action through zoning laws to prevent the Southern Pacific Company from building additional loading sheds or spur tracks along First Street.

oOo

Monterey's high school board has lined up three to two against a proposed junior college plan. The junior college would require a million dollar bond issue.

oOo

Enlargement of the proposed site for San Francisco State College was formally opposed by the San Francisco board of supervisors committee on county, state and national affairs.

oOo

Preliminary survey work has been started in Kern County by engineers of the state water resources board on a proposed 80-mile canal to check and distribute the waters of four mountain streams.

oOo

More than one-fourth of the veterans on the Berkeley campus of the University of California are registered in the College of Engineering.

oOo

The Apartment House Association this week went on record opposing passage of A. B. 735 for provisions requiring that stairways, passageways and shafts of existing buildings be enclosed with fireproof materials.

#

MILITARY ENGINEERS HOLD DINNER DANCE

The annual dinner dance of the local post of the Society of American Military Engineers will be held Thursday, March 13, and will honor retiring and incoming post officers. It will be held in the Officers' Recreation Building at Treasure Island.

The evening will begin with assembly and cocktails at 7:15, and dinner at eight. Dance music will be played by Harry Mason and his orchestra until midnight.

#

ELECT GARLINGHOUSE

CHICAGO. — Californian A. F. Garlinghouse was elected executive vice-president of the Associated Equipment Distributors at the recent 28th annual convention here. He is a partner in the firm of Garlinghouse Bros., of Los Angeles.

Among the directors elected for 1947 are Fred M. Viles, of Fred M. Viles & Co., Spokane, and R. L. Arnold, Arnold Machinery Co., Inc., Salt Lake City.

Builders Must Fight Vested Interests to Get $7,500 Home Lid

CHICAGO. — Home production during 1947 must be directed toward the family with an income of $2,000 to $3,000, and the cost of these homes must not be more than $7,500, Morgan L. Fitch, Chicago, president of the National Association of Real Estate Boards, told the home builders of the nation today. He spoke at the annual convention of the National Association of Home Builders in the Stevens Hotel, Chicago.

"You say you cannot do it under existing wage scales, under existing restrictive labor practices, in the face of monopolistic control of building material, and on account of local home building ordinances?" Fitch asked

"In the hope of a true free market in housing, are we to change from one set of controls imposed by the monopolistic practices of government to another set of controls imposed by the monopolistic practices of vested interests?

"Do you think the people of America are willing to go without housing simply because it suits somebody's whim to say that a painter cannot use a spray-gun, or that a carpenter cannot glaze a window, or that a lather can set 30 bundles of wood lathe for a 6-hour day? Is it any comfort to a houseless veteran to know that the law provides for a certain type of masonry construction when he has no house?"

Fitch told the home builders that vigorous attack on these barriers to construction is their greatest challenge in 1947.

#

CONSERVATION WEEK IS OBSERVED MARCH 7-14

California Conservation Week will be observed from March 7 to 14. It will feature California Arbor Day, forest, soil and wildlife conservation, fire prevention and better health. The week is sponsored by the California Conservation Council composed of leaders of organizations and industries interested in the conservation of natural resources, educators and state and federal government officials.

ANGEL ISLAND REPORT

A joint report will be developed for the next session of the State Legislature recommending further study and action to be taken by the state, leading to possible acquisition of Angel Island as a state park, it was announced today.

The mile-square island with its $2 million in buildings and improvements, was toured recently by war assets administration officials, an interim committee from the California State Legislature and representatives of Bay Area Council.

GROOVER AND I

LET'S START OVER

There has been too much argument regarding the appointment of nances?" Fitch asked.

of the Atomic Control Commission. This question has resolved itself into a partisan, political contest.

☆ ☆ ☆

President Truman states he is 100% in support of Mr. Lilienthal. Mr. Truman is talking like a country Justice of Peace instead of President of the United States.

☆ ☆ ☆

It is Mr. Truman's duty to nominate within the limits of his best judgment. It is not his right to force his choice upon the people. That approval belongs to the people through their Congress.

☆ ☆ ☆

Being head of the most powerful nation in the world is a very strong and intoxicating wine. Any of us might become confused between the Divine Right of Kings and Democratic obligations of a President.

☆ ☆ ☆

Mr. Lilienthal is a man of integrity; however, the job in question calls for more than that. It calls for the most hard-boiled and stubborn reactionary this nation can produce. A man of idealistic sympathies or experimental tendencies is not emotionally qualified.

☆ ☆ ☆

Mr. Lilienthal will be approved in the face of honest objections. This approval should be ample personal satisfaction to him, and then he could prove his own greatness by—

☆ ☆ ☆

Immediately resigning in recognition of the fact that the chairman of ACC should be above personal controversy or objection.

ASK RESEARCH FUND

WASHINGTON.—Tyles S. Rogers, president of the Producers' Council, today recommended that the office of technical services of the U. S. Department of Commerce allocate $20,000 of available research funds for a study of methods of reducing the cost of erecting small industry - engineered homes.

#

QUITS EXPEDITER OFFICE

WASHINGTON. — Resignation of Philip H. Coombs, deputy housing expediter in charge of materials supply, was announced today by the office of the housing expediter. His assistant, Harry L. Smith, has been named acting head of the materials supply office.

Coombs plans to write for several months and will become associate professor of economics at Amherst College next fall.

Government Hospital Plan and Construction Work Details Stated; Two Types of Bids Okay

WASHINGTON.—The regulations governing plan preparation and construction work in connection with the government's hospital construction program have just been announced in Washington by the federal security agency of the U. S. Public Health Service.

The comprehensive listings cover all phases of the hospital construction program, dealing with distribution of the proposed public health centers, general standards of construction and equipment, and methods of administering the state plan.

The publication reveals that actual construction work under the Public Health Service Act will be performed by the lump sum or fixed price contract method. According to these rules applicants to the designated state agencies must assure that adequate methods of obtaining competitive bidding will be employed prior to awarding the construction contract. Either of two methods can be used — public advertising or circularizing three or more bidders with awards going to the lowest responsible bidder.

Other assurances that are demanded from applicants for new hospitals under the act include:

1.—That construction contracts prescribe minimum rates of pay for laborers and mechanics as determined by the Secretary of Labor and that these minimum rates be stated in the specifications advertised in the call for bids on the proposed project.

2.—That each contractor or subcontractor furnish a weekly sworn affidavit with respect to the wages paid each employee during the preceding week and that this requirement be incorporated in project specifications.

3.—That the project will not be advertised or placed on the market for bidding until the final working drawings and specifications have been approved by the Surgeon General and the applicant has been so notified.

4.—That no construction contract whose cost exceeds estimated cost approved in the application will be entered into without prior approval of the Surgeon General.

5.—That the construction contract will require the contractor to furnish performance and payment bonds, each in an amount not less than 50 per cent of the contract price.

Recognizing the likelihood that many hospital jobs will be undertaken in communities that are not now subject to local building codes, the Public Health Service stipulates that recommendations of the following nationally known technical and engineering authorities shall be adopted:

American Concrete Institute;
American Standards Assn.;
American Society of Testing Materials.
National Lumber Manufacturers' Association.
National Board of Fire Underwriters.
National Bureau of Standards.

General design data in the published rules and regulations set out that all hospital construction shall be in keeping with "generally accepted good engineering practice".

Special provisions must be made by contractors "for any machines or apparatus loads which would cause a greater load than the specified minimum live load."

Detailed explanations are given for mechanical specifications dealing with heating (steam piping and ventilation), plumbing and drainage, electrical installations, elevators and dumbwaiters, refrigeration, kitchen equipment and laundry facilities.

State agencies designated by the federal security agency are authorized to survey the overall need for hospitals in the state, and to conduct necessary planning. Federal funds are appropriated by congress among the various states on a population basis, with the reservation that no state may be allotted less than $10,000 for planning and survey purposes. Upon approval of applications by the Surgeon General, the states which have approved applications will be entitled to receive a third of their planning expenditures.

State agencies officially or tentatively designated to administer hospital survey and planning programs in California and surrounding states, are as follows:

Arizona: Dr. G. F. Manning, superintendent, state department of health, Phoenix.

California: Dr. Wilton L. Halverson, director, state department of public health, Sacramento.

Hawaii: Dr. C. L. Wilber, Jr., president, territorial board of health, Honolulu, T. H.

Nevada: Dr. Fred S. Loe, state health officer, state department of health, Carson City.

Oregon: Dr. Harold M. Erickson, state health officer, state board of health, Portland.

Washington: Dr. Arthur L. Ringlo, director, state department of health, Seattle.

To aid in the program the U. S. Public Health Service has added to each of its regional district offices a Division of Hospital Facilities, which will be staffed by a division medical officer, a hospital administrative expert, a construction engineer, and a district architect, whose assignment is to get the program into operation in the hands of local architects and to assist the states in setting up competent staffs for the handling of the technical phases of the program. They will work through states agencies.

Following are the names of medical officers and architects in the far western regions:

In California

Dr. Thurman H. Rose, in charge of Division of Hospital Facilities Activities; Charles H. Coogan, architect.

Dr. W. T. Harrison (YU-6-3111) 1604 U. S. Appraiser's Building, San Francisco 11, officer in charge of District 5, including Alaska, Nevada, Arizona, California, Oregon, Washington and Hawaii.

District 8

Dr. H. T. Wagner, in charge Division of Hospital Facilities; Kenneth A. Lake, architect-engineer;

Dr. Fred T. Foard, Room 615 Colorado Bldg., Denver, officer in charge of district comprising Colorado, Idaho, Utah, Wyoming, and Montana.

The names of the state survey directors of the far western states follow:

Dr. P. K. Gilman, 423 Phelan Bldg., San Francisco, DPH; Arizona, Dr. Hilda H. Kroeger, director MCH division; Nevada, Mrs. Christie T. Corbett, DPH, Reno; Oregon, Dr. Forrest E. Rieke, state board of health, and Washington, Ralph L. Nielson, DPH, Smith Tower, Seattle.

#

TILE PRODUCTION UP 66% IN YEAR

The American floor and wall tile industry substantially increased output during 1946, according to U. S. Department of Commerce figures. D. P. Forst, chairman of the Tile Council of America, announced.

"The 1946 total of 61,528,000 square feet compares with 37,027,000 in 1945, an increase of 66 per cent. The 1946 production will be exceeded by about 30 million square feet this year, according to Tile Council estimates," Forst said.

December output of 5,114,000 sq. ft., 1 million more than 12 months ago, was achieved despite a strike that tied up one of the largest plants during November and December, the Tile Council chairman pointed out.
